STEEL RAILS IN CANADA.

By. F. P. Gutelius, General Superintendent Lake Superior Division, C.P.R.

Steel rails are manufactured in this country at Sydney, N.S., by the Dominion Iron & Steel Co., and at Sault Ste. Marie, Ont., by the Algoma Steel Co. The rails manufactured at Sydney are all basic open-hearth. The size of their ingots is 18 by 21 ins. In reducing the ingot to a finished rail the steel makes 30 passes through the rolls. At Sault Ste. Marie 75% of the product is acid Bessemer, and 25% basic open-hearth. In this mill 28 passes are given in reducing the steel from 16 by 17 ins. ingot to finished rail. The capacity of these two steel companies is about equal to the requirements for new steel in this country.

The method of manufacturing steel rails in Canada can best be described by reference to the C.P.R. specifications for the manufacture of Bessemer and open-hearth steel rails, which were prepared after an agreement with the mills had been made for 1908 rails, copies of which are hereto appended. The standard weight of C.P.R. rail for 1908 is 85 lbs. The section is known as the C.P.R. 1908 85-lb. rail section, as per diagram shewn herein. (See pg. 3.) This new section can best be described by comparing it with the American Society of Civil Engineers 80-lb. section, which has 5-in. base, and is 5 ins. high. C.P.R. 1908 85-lb. rail has ⅛-in. added to the thickness of the base. The radius of the web has been decreased from 12 to 8 ins., thus giving a wider web where it joins the head and the base. The sides of the head are slightly inclined, and the radius of the top of the head is 8 ins., instead of 12. The new section, therefore, has a 5-in. base, and is 5⅛ ins. high. It differs from the new section recommended by the American Railway Association in that the base has not been narrowed. I do not feel that in the redistribution of material in the new rail section, which all rail section designers consider is necessary, that the narrowing of the base is justifiable, as it makes the rail more unstable, introducing an element of danger which cannot be counterbalanced by the advantage that would be gained by the more uniform cooling of the half-inch narrower flange. The C.P.R. has had 85,000 tons of rails of this section rolled, which are now in the track. Following are tabulated particulars:

VERTICAL INERTIA 29.492. HORIZONTAL INERTIA 7.139.

	AREA PERCENTAGES	COOLING PERC'TGES	VERTICAL SECTION MODULUS	HORIZ'TAL
HEAD	36.77	1.965	10.425	
WEB	22.21	3.081		
BASE	41.02	2.875	12.84	2.855
TOTAL	100.00	2.586		

The advantages of this section, from the mill standpoint, are that the finished rail, when approaching the hot saws, is of more even temperature in all parts of the section, and, as a result, the temperature of the head is very much less than in the old section, giving a finer grain of steel, therefore greater wearing quality. Second, the more equal distribution of material between the head and base exemplifies the cold straightening process to such an extent that the mill people advise that the work of straightening is less than 40% of what was required in the old section. The straightening of rails under the cold press is a punishment which seriously impairs the strength of the rail, and frequently appears to open defects or starts fractures which would never be known in ordinary wear during the life of the rail.

G. T. BELL

General Passenger and Ticket Agent G.T.R. and President American Association of General Passenger and Ticket Agents.

In designing a rail for use in Canada the conditions of winter roadbed must be provided for. The roadbed, when frozen, is absolutely rigid, and, in the process of freezing, ties under which there is a quantity of moisture heave on account of the action of the frost to such an extent as to require wooden shims on the adjoining ties to maintain an even bearing for the rail, and give proper surface to the track. At the time the shimming becomes necessary the rails must bend sufficiently to receive their proper support from the low ties, and, if the rail be too rigid, or too hard, it is liable to break. For this reason, we deemed it wise to limit the height of the rail to 5 or 5⅛ ins., and place the additional strength on those portions of the rail which are most liable to crack or break. This conclusion was arrived at after an experience of seven years with about 50 miles of A. S. C. E. section of 100-lb. rail, in which, with an equal amount of heaving and equally rigid track, more square breaks occurred with the 100-lb. rails than did with an equal mileage of 80-lb. rails of the same section, handling the same traffic, under like climatic conditions.

The composition specified by the C.P.R., in which the average carbon for Bessemer rails is .58%, and for open-hearth rails is not less than .60%, gives a harder rail than that manufactured under commercial specifications, or demanded by most of the American railways, in which the carbon content is from 5 to 10 points lower. In the introduction of this additional carbon the C.P.R. has arranged to reduce the phosphorus in Bessemer to .085%, and in open-hearth to .06%, whereas the average American specification allows .10% phosphorus in Bessemer, and for open-hearth the standards are practically the same. This combination gives the C.P.R. rail greater hardness, and the same or greater toughness than is secured under the American specifications. The advantages are a better wearing rail and one which does not readily flatten at the joints under traffic. The reason for the difference in the carbon and phosphorus for open-hearth and Bessemer rails under the C.P.R. specifications is the inability of the acid Bessemer rail manufacturers in the United States to produce, at commercial prices, a low phosphorus rail, so that where phosphorus is .10% the carbon should be kept below .50%, whereas with phosphorus .085%, the carbon should not exceed .63%, and should average about .58%. It must be remembered, however, that the composition of steel in rails is not the only feature to be considered. In fact, my experience has shown that some of the best rails in service are of the poorest composition. In other words, the heat treatment which steel receives during its manufacture into rails is of greater importance than the exact chemical composition.

To insure as nearly as possible that railway companies receive rails of proper composition test analyses are being made continually, and pieces of finished rail are tested by means of a falling hammer, known as a drop-testing machine. If steel in rails were absolutely uniform and homogeneous, these tests would be sufficient to prove the quality of all rails manufactured, but unfortunately this steel is not absolutely uniform and homogeneous, which we note in our micro-photographs, in acid etchings, and in fractures, in the indi-

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

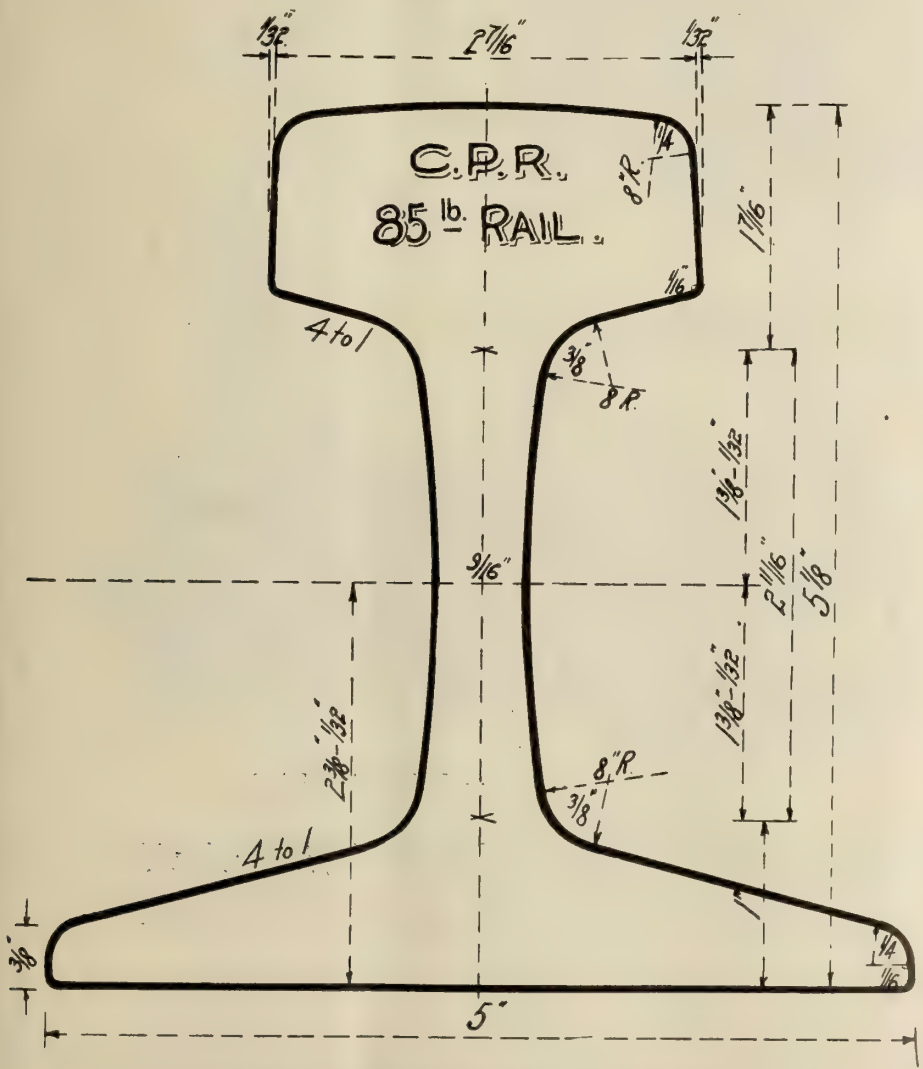
Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

vidual cross sections of any point of the rail. In practice we find this also to be true, for the reason that many rails, which break off square in the track and latterly have the pieces drop tested, bend double the specification requirements before breaking, so that our drop testings when rails are being purchased is very much more of a grab sample than is usually conceded by rail manufacturers or railway men. To overcome this feature as much as possible, railway companies employ expert inspectors, men who are familiar with the manufacture of steel in general, and the manufacture of rails in particular, who watch every detail of rail manufacture, discarding heats of steel, improperly-poured ingots, and imperfectly-rolled rails. In fact, it is not uncommon to have 25% of the output of the mill discarded in the cutting of the top of the ingot, the rail butts, and rejected-finished rails.

A great deal has been written and said recently in connection with broken rails, and the public and the railway world have become aroused on account of the danger in connection therewith. The term "broken rail" is a general one, which applies to rails having small cracks in the base, in the web, flange, or head, and are removed from the track on account of that defect, and of the total number of defective rails removed from the track, the number of those which break off square, like the stem of a clay pipe, is comparatively small. The most common defect in rails is the splitting of the head, which is caused usually by pipes therein. The second defect on the list is known as flange breaks. These consist usually of the breaking out of a crescent-shaped piece at the base, started by a lap in the base, located usually near the centre, and running parallel with the axis of the rail. These laps are caused by defective rolling, and whilst there is a difference of opinion as to their origin, I am of the opinion that they are caused by the intermediate rolls producing more skin, or surface, than can be used in the finished rail, thus causing the skin, or surface, to double or lap, which opens and cracks under traffic, especially if cold-straightened at these points. The third defect, is breaks through the bolt holes. This is the result of a weak web, occasioned by improper rolling, possibly the stretching of the material beyond its elastic limit latterly in the rolls. There are other defects for which rails are removed from the main tracks, such as, indications of pipes in the head, flattened ends, and square breaks. I feel justified in saying that none of these defects ever occur in commercially sound, high carbon rails. It will doubtless be interesting to know what the railways are doing to insure safety of rails in the track, and, with that idea, appended hereto is a copy of the C.P.R. rules in connection with the laying and care of rails. It is my opinion that the remedy for defective rails is entirely in the hands of the manufacturer, and my belief is that the Canadian mills are alive to this fact, and that they are adopting the most modern methods. As to this is added the eternal vigilance of expert steel men to each detail of rail manufacture in the matters of composition, heat treatment, rolling, and straightenings, the number of defects is not sufficient to cause alarm, either with the railways or the public.



CANADIAN PACIFIC RAILWAY 1908 85-LB. STEEL RAIL.

EXTRACTS FROM C.P.R. MAINTENANCE OF WAY RULES.

The standard length of new rail is 33 ft. Short new rails have ends painted green, seconds or defective new rails have ends painted white; seconds must not be laid in fast running main track.

Rail is the most expensive portion of the track, defects in which are usually permanent and apparent. They must be handled carefully before being put in the track, and must be uniformly supported after being placed there.

The rails may be distributed either from the ends or sides of car. If distributed from sides, both ends of rail must be dropped simultaneously. Skids will invariably be used whenever necessary to unload them into piles. In all cases the greatest care must be used to avoid injury to rails by dropping them on hard substances or uneven surfaces.

When necessary to make holes in rails for bolts they must be drilled with the proper tools fornished for that purpose.

Short rails are advisable only as a temporary expedient on tangents and on inside rail of curves. They must not be used on the outside of curves, and no piece shorter than 10 ft. should be used in main track.

When new steel is being laid all kinds must be taken out with the rail bender, and the track must be perfectly gauged. The spacing and renewal of ties and surfacing and lining of the track should follow as closely as possible.

The rails must be laid consecutively to line and gauge, throwing out the rails from the old track ahead as the new rails are laid. Split points will be used for closing track for passage of trains. Accurate expansion cannot be secured if long stretches of rail are fastened upon one side of the track and subsequently thrown into line.

Track centres will be furnished by the engineer every 200 ft. on tangents, and every 50 ft. or less on curves. The track must be laid to conform exactly to the line so established.

Roadmasters and section foremen must watch the flange wear of the outer rail on sharp curves, on account of the weakening of the rail and the extra width of gauge which this wearing will cause and change worn rails to the inside of the curve, or remove them from the main track entirely if they have been previously changed under the following conditions: 1. When the joint bars are being cut or struck by the wheel flanges. 2. When the rail is weakened by the side of the head being worn as much as one-eighth of its original width. 3. When the side of the rail head is worn to the slope of the wheel flange and fillet, over which wheels are liable to climb.

The position of the brand on the rail is immaterial, whether right or left, inside or outside, but its position must be uniform in the same line of rails. When new rails are being laid, different brands must not be mixed.

Rails having pieces of head or base broken out, or those having cracks, splits, pipes, and flaws, must be removed from the main track as soon as discovered, as such rails are liable to break. The discovery and removal of such rails is a most important feature of track inspection and maintenance. Track walkers, section foremen, and roadmasters must be constantly vigilant in this respect.

All rails for curves of over two degrees must be separately curved, by a rail bender, before being placed in the track. The sledging or dropping of rails on ties to curve them is forbidden.

Proper allowance must be made for expansion. The expansion space will be determined by ascertaining the average temperature of the rail by means of a C.P.R. track thermometer at the time it is being laid.

FAIRBANKS-MORSE COMBINED ENGINE AND PUMP

The Canadian Fairbanks Company Limited

444 St. James St., Montreal

TORONTO ST. JOHN, N.B. WINNIPEG CALGARY VANCOUVER

When the average thermometer reading on 30 ft. or 33 ft. rails is:

90	degrees Fahr., give	0″	expansion space
70 to 90	"	1/16″	"
50 to 70	"	1/8″	"
30 to 50	"	3/16″	"
10 to 30	"	1/4″	"
00 to 10	"	5/16″	"

Rails must not be bumped together when being laid.

Proper expansion must be secured by using iron shims, according to the above specifications, except where track is laid on a steep grade, when sawn wooden shims of proper thickness will be provided. Wooden expansion shims must be left in place until track is full spiked, bolted, and anchored, then be removed.

C.P.R. CO. SPECIFICATIONS FOR 85-LB. OPEN-HEARTH STEEL RAILS, 1908.

1.—The section shall be the C.P.R. standard 85-lb. 1908 rail, in accordance with plans attached, with an allowance in height of 1/64 of an inch under, and 1/32 of an inch over. The fit of the fishing or "male" template shall be maintained perfect.

2.—The weight of the rail shall be kept as near 85 lbs. per yard as is practicable after complying with section 1.

3.—The standard length of rail shall be 33 ft. at a temperature of 60° Fahrenheit. Ten per cent. of the entire order will be accepted in lengths of 27 and 30 ft. All such short rails shall be painted green on both ends. A variation in length of ¼ in. longer or shorter will be allowed.

4.—The rails must be free from all mechanical defects and flaws. They shall be sawn square at the ends, and the burrs made by the saws shall be carefully chipped and filed off, particularly under the head and on top of the flange.

5.—The rails shall be smooth on the heads, straight in all directions, both surface and line, and without any twists, waves or kinks, particular attention being given to having the ends without kinks or drop. The hot-straightening shall be carefully done, so that gagging under the cold-press will be reduced to a minimum. The supports of the rail in the straightening press shall be not less than 42 ins. apart. Cold-straightening shall be done so as not to injure the rails. "Lumpy" rails will not be accepted.

6.—Bolt holes 1 in. in diameter shall be drilled through the web at 2 11/32 ins. from the bottom of the flange. The centres of the first hole shall be 2½ ins. from the end of the rail, and the centre of the second hole shall be 6½ ins. from the centre of the first hole. These holes must be drilled accurately in every respect; all burrs to be removed. (See plan R-12-28, dated Jan. 22, 1908.)

7.—The weight per yard of rail, name of maker, month and year of manufacture, shall be rolled on the web of each rail in plain letters and figures, not less than ⅞-in. high and in sufficient relief for future identification. The heat numbers shall be stencilled three times on the web of each rail in distinct letters at least 9/16 ins. high, placed on the opposite side from the brand marks. A letter shall be stamped on the heat number side of the web of each rail, clear of the angle bars, to indicate the portion of the ingot from which it was rolled.

8.—The rail in composition must be hard, sound and tough, showing fine, dense, grained metal, on fracture. The carbon shall average not less than .60 %, within limits of .56 to .66 %. The phosphorus shall not exceed .06 %. The sulphur shall not exceed .055 %. The silicon shall not exceed .18 %, nor less than .075 %. The manganese shall not exceed 1.00 %, nor less than .80 %. The sum of sulphur plus copper plus other injurious elements not more than .075 %.

9.—The number of passes and speed of train shall be so regulated, that, on leaving the rolls at the final pass, the temperature of the rail will not exceed that which requires a shrinkage allowance at the hot saw of 6¼ ins. for 33 ft. rails, and no artificial means of cooling shall be used between the final pass and the hot saw.

10.—While the heat is being cast two test-ingots shall be made; the first from steel going into the first regular ingot, the other from metal taken from the last one. From each of these test-ingots a chemical analysis shall be made. These and all final analyses made by the works, relating to this contract, shall be furnished the C.P.R. Co. for its records.

11.—From each 50-ton heat three rail-butts shall be tested. Each butt must not exceed 6 ft. in length, and must be taken from the top end of the first, middle and last ingots cast of each heat. These butts shall be placed heads upwards on solid steel or iron supports, the distance apart of which, in the clear, shall be 4 ft., and upon it shall be dropped a weight of 2,000 lbs. (whose striking face shall have a radius of not more than 5 ins.) falling freely from a clear height of 20 ft. Should two of the tests stand and show a deflection of less than 3¼ ins. under such test, this heat shall be accepted. If two fail it shall be rejected. The anvil blocks shall weigh at least 20,000 lbs., and the supports shall be a part of, or firmly secured to the anvil. Butts shall be tested to destruction as requested by the inspector.

12.—After the ingots are cast, they shall be either constantly kept in an upright position until ready to be rolled, or else so maintained until the interior steel has had time to solidify.

13.—No "bled" ingots or ingots from "chilled" heats shall be used in the manufacture of rails under this contract.

14.—No ingots from badly-teemed heats shall be used.

15.—After cutting off or allowing for the "sand" or top-end of each ingot, at least 12 ins. more of seemingly solid steel shall be cut off that end of the bloom—a greater length than 12 ins. being preferred; and if, after cutting such length, the steel does not look solid, the cutting shall continue until it does.

16.—Care shall be taken to avoid overheating the steel, and, under no circumstances shall a "cinder" heat be allowed—that is, a heat high enough to cause the cinder to run off the steel as it is being drawn from the furnace. This does not apply to cinder which may be sticking to the underside of the steel when drawn from a horizontal furnace, or to the bottom of an ingot when drawn from a soaking-pit.

17.—Inspectors representing the purchaser shall have free entry to the works of the maker at all times while this contract is being filled, and shall have all reasonable facilities afforded to satisfy them that the rails are being made in accordance with these specifications. The makers shall furnish them with the carbon-determinations of each heat, and a sufficient number of complete analyses to represent the average steel of each day and night's turn. The drillings to be taken from the test-ingots. See sec. 10. On request, borings for check analyses shall be furnished the inspector by the manufacturer.

18.—The inspectors shall have authority to reject rails made from insufficiently-sheared blooms, or from heats, the test pieces or drop-tests of which have failed, or from badly-poured heats, or from "chilled" heats or from "bled" ingots. The rails made from insufficiently cut blooms, if otherwise perfect, to be afterwards received as short rails, if sufficient lengths have been sawn off to make an amount of steel equal to the original demand of 12 ins. By a badly-poured heat is meant one which from any cause has been teemed without the control of the operator. A "chilled" heat is one which by reason of the chilling of the steel has to be either pricked or poured over the top of the ladle. A "bled" ingot is one from the centre of which the liquid steel has been permitted to escape.

19.—Imperfectly-drilled, straightened (except "lumpy" rails), or chipped and filed rails shall be rejected, but will be accepted after being properly finished.

20.—Rails failing to comply with sec. 1 will be rejected.

21.—All rails must be loaded in the presence of the inspector. Rails must be handled during manufacture, loading, and while in transit, in such a manner as not to bruise the flanges, or cause other injury.

F. P. GUTELIUS, Assistant Chief Engineer.
Montreal, Jan. 23, 1908.

C.P.R. SPECIFICATIONS FOR 85-LB. BESSEMER STEEL RAILS, 1908.

These specifications are the same as those for open-hearth steel rails, with the exception of the following sections:

8.—The rail must be hard, sound and tough, showing fine, dense, grained metal in fracture. The carbon shall be within limits of .53 % and .63 %, and shall average between .57 % and .59 %. The phosphorus shall not exceed .085 %. The sulphur shall not exceed .075 %. The silicon shall not exceed .18 %. The manganese shall be within limits of .80 % and 1.00 %. Copper and other injurious elements must not be more than traces.

11. A rail-butt from every third heat shall be tested. The butt must not exceed 6 ft. in length, and must be taken from the top-end of the first ingot. All butts shall be placed heads upwards on solid steel or iron supports 4 ft. clear apart, and upon it shall be dropped a weight of 2,000 lbs. (whose striking face shall have a radius of not more than 5 ins.) falling freely from a clear height of 18 ft. Should the test fail or show a deflection of more than 3¼ ins. under such test, a second test shall be made. If it also fails, all rails made from that heat shall be rejected, but if the second test stands, then a third one shall be made, and if this be successful, the rails of that heat shall be accepted. Should the test from any heat fail, as above specified, similar tests shall be made from the preceding and succeeding heats, and if they fail as above specified, all rails from these heats shall be rejected. The anvil blocks shall weigh at least 20,000 lbs., and the supports shall be a part of, or firmly secured to the anvil. Butts shall be tested to destruction as requested by the inspector.

The foregoing paper was read before the Canadian Railway Club recently, A brief description of the C.P.R.'s 1908 85-lb. rail was published in our issue of March, 1908, from which the illustration on pg. 3 is reproduced.

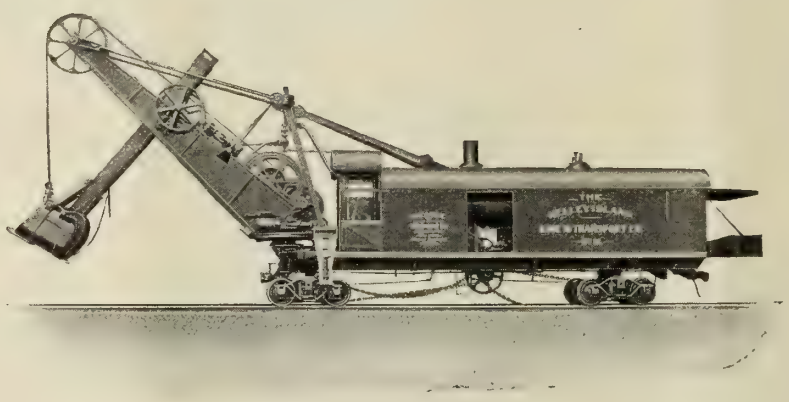
Canadian Ticket Agents' Association.—At a meeting of the Executive Committee held at Toronto, Nov. 27, it was decided that in consequence of representations having been made that the motion passing the annual subscription passed at the annual meeting in October was misunderstood, it would be advisable to leave the matter in abeyance until the next annual meeting, when it could be rediscussed, and that in the meantime, for 1909 at any rate, the subscription will remain as heretofore, viz., $2 a year, which includes subscription to THE RAILWAY AND MARINE WORLD. The general opinion appeared to be that as long as $2 a year would meet current expenses it should so remain, but the amount of entrance fee should be increased.

The I.C.R. Moncton, N.B., branch of the International Association of Machinists has elected the following officers for the current year: President, J. Delahunt; Vice-President, N. Davis; Secretaries, J. Blackwood and G. Kennedy; Treasurer, N. R. Baird. During the recent annual meeting, the President was presented with an address and purse of gold.

LOCOMOTIVES

Pacific Type Passenger Locomotive built for the Intercolonial Railway. Total weight of engine, 194,500 pounds. Weight on driving wheels, 132,000 pounds; diameter of driving wheels, 72 inches. Boiler pressure, 200 pounds. Maximum tractive power, 29,200 pounds.

STEAM SHOVELS



A high-class and powerful machine, absolutely reliable under all conditions of service.

MONTREAL LOCOMOTIVE WORKS, LTD.

BANK OF OTTAWA BUILDING, MONTREAL, CANADA.

Flag Stations and Stations with Agents.

J. P. Mabee, Chief Railway Commissioner, has given the following judgment on the application of the Winnipeg Jobbers and Shippers Association vs. C.P.R. Co., and Canadian Northern Ry. Co., and G.T. Pacific Ry. Co.: This matter seems to have been first brought to the attention of the Board at a meeting in Winnipeg in Sept , 1906, by the Board of Trade of that city, and in Feb., 1907, a formal complaint was lodged by the applicants. Several matters are involved in the complainants' petition, and amongst others they asked that the railway companies be ordered to (1) Where the traffic warrants it, erect a freight shed and appoint a permanent agent in charge of the business at that station. (2) Not reduce any regular station with an agent in charge to a flag station without an agent. (3) Not to close any regular or flag station without the Board's approval. All the railway companies have taken exception to the Board's jurisdiction to deal with these matters.

Sec. 284 (s.s. a) provides that the railway company according to its powers shall "furnish at the place of starting, and at the junction of the railway with other railways, and at all stopping places established for such purpose, adequate and suitable accommodation for the receiving and loading of all traffic offered for carriage upon the railway."

S.s. 3 empowers the Board to order such accommodation to be furnished having regard to all proper interests.

Sec. 258 provides—"Every station of the company shall be erected, operated, and maintained with good and sufficient accommodation and facilities for traffic.

"2. Before the company proceeds to erect any station upon its railway, the location of such station shall be approved of by the Board.

"3. In the case of any railway, whether subject to the legislative authority of the Parliament of Canada or not, subsidized in money or in land, after July 18, 1900, under the authority of an act of the Parliament of Canada, the payment and acceptance of such subsidy shall be taken to be subject to the covenant or condition, whether expressed or not, in any agreement relating to such subsidy, that the company, for the time being owning or operating such railway, shall, when thereto directed by order of the Board, maintain and operate stations, with such accommodation or facilities in connection therewith as are defined by the Board, at such points on the railway as are designated in such order. 3 E. VII., c. 58, s. 204."

It is argued first that because the above s.s. 3 deals specially with railways subsidized after July 18, 1900, the fair construction of the whole act is that the powers conferred upon the Board by this sub-section do not exist as to railways not so subsidized. I do not think this contention well grounded. This section, I think, was intended to extend the Board's jurisdiction, as to the matters covered by it, to railways not subject to the legislative authority of the Parliament of Canada, that is to railways incorporated under provincial statutes, and which had not been declared to be works for the general advantage of Canada; without this subsection the power of the Board would not extend to such railways, whether subsidized either before or after July 18, 1900.

The second objection is that s.s. (a) of 284 only requires the railway companies to furnish accommodation at stopping places established for the purpose of "receiving and loading traffic," the contention being that "flag stations" were used for delivering or unloading, and not for "receiving and loading." I do not know that the expression "flag station" appears in the statute, but, of course, it has a well-known meaning.

S.s. (b) of 284 imposes upon the railway companies the duty of furnishing "adequate" and suitable accommodation for "the carrying, unloading, and delivering of all such traffic." Sec. 30, s.s. (g), provides that the Board may make orders "with respect to rolling stock, apparatus, cattle guards, appliances, signals, methods, devices, structures, and works, to be used upon the railway, so as to provide means for the due protection of property, the employes of the company, and the public. It seems to me perfectly clear that under these sections the railway companies are obliged to provide suitable accommodation for unloading and delivering all traffic, and if they omit so to provide then the Board has power so to order, and in doing so may require the companies to erect and maintain platforms or freight sheds, or any other "structures or works" that might be deemed reasonably proper for the protection of property or the public. The statute seems to confer ample power upon the Board to deal with the subject matter of this application.

With respect to the first ground of the complaint, the companies all express their willingness to establish permanent agents "where the traffic warrants it." The difficulty is in saying when the traffic warrants such a step. Hitherto this and the other matters involved have been left entirely to the good judgment of those in charge of the management and operation of the railways, and they quite naturally object to interference; but if I am correct in my interpretation of the statute, it is clear that Parliament has placed these matters under the Board's control, and it has imposed upon it the duty of saying when the time has arrived for the appointment of permanent agents, if that is thought by the Board to be part of furnishing suitable and adequate accommodation for the delivery of traffic. It is also stated by the Chief Traffic Officer that in practice the companies receive freight in carload lots at these stopping points, as well as butter, cheese, and eggs, in which event they would be required under s.s. (a) to furnish suitable accommodation for such receiving.

The applicants submit a list of 30 flag stations upon the C.P.R. and 46 upon the Canadian Northern; doubtless now there are many more upon the Grand Trunk Pacific; this matter has been standing so long since originally brought before the Board that the conditions have greatly changed and it is impossible to deal with these stations or stopping places by name, and the matter must be disposed of upon general lines. I have read the evidence and fully considered all the arguments that appear upon the file. I feel myself handicapped by reason of not having been upon the Board during the progress of the proceedings, but am compelled to make the best disposition of the complaint that I am able and deem fair to all concerned. The operating assistant to the Chief Traffic Officer, in Oct., 1907, dealt with the details of establishing accommodation at stopping places, and later on the Chief Traffic Officer, on Nov. 15, 1907, reported to the Board as then constituted, in some respects agreeing and in others differing from the opinion of the operating assistant. Both of these reports I have carefully considered, and while I hesitate to set my judgment up against those of far greater experience in these matters, I am unable to say that I agree with either in all respects.

It must be kept steadily in view that it is almost always in the interest of the railway companies to convenience the public as far as possible. Flag stations are established at points for the convenience of those living at inconvenient distances from the regular stations, and if this Board required unreasonable expenditures to be made by the railway companies at once upon the establishing of a flag station, I fear that a large section of the public might be seriously inconvenienced by the omission to establish such stopping places; it may be that some relief might be had by application to the Board, but I am of opinion that great difficulty would be experienced (assuming there is jurisdiction, but as to which I do not decide) in determining when or where a new stopping place should be established, without the experience afforded by the receipts and travel to and from an experimental stopping point. For those reasons, I am of opinion that the companies should not be required to establish a heated and lighted station building with a caretaker in charge at these flag stopping points as recommended by the Chief Traffic Officer. On the other hand, I think their practices in the past open to serious comment in omitting to provide any sort of platform for people to alight or stand upon, no sort of shed or shelter of any description to place freight in when discharged at these points, and in leaving goods upon the ground exposed to the elements. It seems to me that some middle course should be adopted that will provide some reasonable accommodation and protection to the public, and at the same time not operate as too great a burden upon the railway companies.

I think it not unreasonable that the companies should, at all stopping places known as flag stations, erect a suitable shelter or waiting-room which could be used for both freight and passengers; it should be provided with a door and windows. I would not require a caretaker to be kept, nor would it be reasonable to require this building always to be kept heated or lighted. There should be some sort of platforms and proper approaches. If the railway companies are willing to accept the foregoing views, the Board will hear them as to the size of buildings and platforms to be provided. If they desire to appeal from the holding that the Board has jurisdiction, we will delay until such appeal is disposed of before settling these details.

Dealing next with the question of appointing permanent agents at flag stations, as I have said I think the Board has jurisdiction so to order if it deems a permanent agent part of the station equipment necessary to furnish to the public adequate and suitable accommodation for unloading and delivering traffic, or for receiving and loading of traffic, and in this view I am confirmed by the late Chief Commissioner in a memo. of Oct. 11, 1907, in which he says that the Act requires "the railway company to provide reasonable and proper facilities for receiving, carrying, and delivering traffic, and that while the point has never been decided, it may well be argued that the Board has power to require a company to place and keep an agent at a particular station where, in view of the amount of business to be done and other circumstances this would seem to be a reasonable and proper facility to be afforded. The question is what amount of traffic warrants the appointment of a permanent agent. I think the Minnesota law not an unreasonable one in this respect. There a total freight and passenger earning of $15,000 requires the appointment of a permanent agent; and I agree with the recommendations of the operating assistant upon this point and think the companies should be required to appoint and maintain permanent agents at stations where the total freight and passenger earnings amount to $15,000 for the year; and at points where the business consists principally of shipping grain, where such shipments amount to at least 50,000 bush., agents should be appointed and maintained at such points during the grain shipping season; and at points of shipment where a telegraph operator is located for the handling of trains, such operator should, while he remains at such point, be provided with the necessary equipment to enable him to take care of all traffic at such point. It does not appear to be necessary at this moment to consider the request that the companies be prohibited from reducing a regular station to a stopping point without any agent, or from closing any regular or flag station without the approval of the Board. It is not to be assumed that such steps would be taken without good reason, and I think such cases should be left to be dealt with individually when they arise, assuming there is jurisdiction, as to which I express no opinion.

Strong objections are made and I think with good reason, to the form of release required for traffic for delivery at flag stations;

Locomotive Smoke Regulations.

The Board of Railway Commissioners has passed the following order, 5678: In pursuance of the powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf It is ordered that

1. Every locomotive steam engine operated in the Province of Ontario by any railway company subject to the legislative authority of the Parliament of Canada, shall be equipped so as to prevent the unnecessary and unreasonable emission therefrom to the atmosphere of dense or opaque smoke, and every such locomotive steam engine shall, subject to clauses 2, 3, 4, and 5, while passing through, or being operated within any city, town, or village, be so operated as not to permit the unnecessary and unreasonable emission to the atmosphere of dense or opaque smoke.

2. Where it is necessary to clean out the fire-box or build a new fire, the necessary and reasonable emission of dense or opaque smoke within any city, town, or village may be permitted for a period not to exceed six minutes in any one hour.

3. The necessary and reasonable emission of dense or opaque smoke from a locomotive steam engine standing at stations or in station yards, in cities, towns, or villages, may be permitted for a period of one minute in any ten minutes of any one hour.

4. This order shall apply to and be in force only in such cities, towns, and villages in Ontario that have passed, or may hereafter pass, by-laws for the control, regulation, or prohibition of dense or opaque smoke from stationary steam engines, or a by-law or by-laws to the like effect.

5. In the ascent of the Scarboro grade easterly out of Toronto, or the grade east and west out of Hamilton, the necessary and reasonable emission of dense or opaque smoke may be permitted for a period not to exceed ten minutes in any one hour.

6. Every company or person offending against the foregoing regulations, or any of them, shall be subject to a penalty of $25 for every such offence.

7. This order shall take effect on Jan. 1, 1909.

In connection with the foregoing the following memorandum has been issued: "The regulations that the Board has framed dealing with the unnecessary emission of dense smoke from locomotive engines are made applicable only to the Province of Ontario, for two reasons. The first is that no municipalities outside of that province have asked for them; the second and more important one is that, outside of Ontario, there are many railways not subject to the jurisdiction of the Board. For instance, in Halifax, N.S., the Intercolonial Ry., the Halifax and Southwestern Ry., and the C.P.R. Companies use the same stations. The two former are not subject to the jurisdiction of the Board, and it would be manifestly unfair to subject the C.P.R. Co. and its employes to penalties for permitting the unnecessary escape of dense smoke while side by side with locomotives under the control of employes of these two other railways who would be exempt from the operation of this order. It will not be considered that the Board has finally determined that regulations of this character are to be withheld from the other provinces, but these will be considered as the occasion may arise. Many villages and towns, and possibly some cities in Ontario, have no municipal by-laws on this subject, and it was thought reasonable that this order should not apply to places where the local council had not taken steps, within its own jurisdiction, to prevent the fouling of the air by stationary engines. This subject has been found to be a difficult and perplexing one. There is no doubt there has been in the past much unnecessary annoyance and inconvenience caused to the public by the unreasonable discharge of noxious smoke from locomotive engines, and the Board feels that in making this order it has gone as far in the attempt to suppress this nuisance as is fair, without imposing too great expense or hardship on railway companies. If, however, it is found to be not sufficiently effective, the Board will have no hesitation in rescinding its provisions."

Running Passenger Trains on Time.

J. Oborne, General Superintendent Ontario Division C.P.R., has issued the following circular:

Running trains on time is the best possible kind of advertising. Traffic officers are so thoroughly impressed with this fact, that they have expressed a willingness to reduce the advertising account 50% if passenger trains are run on time. Fifty per cent. of the cost of our advertising represents a large amount of money, and it must be saved. Most railway men have never been engaged in any other business, and are inclined to overlook the railway situation from a public viewpoint. All railway men use street cars, and know how unsatisfactory it is to have to wait at street corners for delayed cars, and how hard to maintain their tempers while on a street car that is delayed en route. Now, if these petty street car delays are trying, railway men should endeavor to realize how inconvenient and annoying delayed trains must be to the travelling public.

No engineer who takes a pride in his locomotive would leave a divisional point without seeing that his machine is not only neat and clean, but in a thoroughly fit condition, well stocked with suitable coal and other supplies, to take the train through without delay. Every detail of the locomotive should be understood by the man in charge, so that it may be handled to good advantage. Waste of water, as well as coal, should be guarded against, so that detention by water stops may be reduced to a minimum, and that passengers may not be subjected to black smoke and cinders.

The ideal conductor is he who appears on duty well groomed, and in ample time to see that every detail of his train is in good order, that his men are on hand with their supplies, and that nothing occurs to prevent the train leaving on time. Station work should be done with all possible despatch. Trainmen should know what passengers are to get off at the next stop, and should request them to have their belongings all ready to disembark immediately the train stops, and should render whatever assistance is necessary to old people, invalids and people with children. At stations where it is necessary to secure orders, conductors should run to and from the station. A good deal of unavoidable lost time can be made up by quick, but safe work, at stations.

Any agent who does not consider it a reflection upon his administration to have a passenger or fast freight train delayed at his station, has not sufficient ambition to carry him to success. Outward baggage and express should be on the platform opposite the cars ready to load immediately the train is stopped. Loading and unloading should be done with energy and vim. Passengers should be encouraged to reach the station in sufficient time to purchase their tickets and have their baggage checked before the arrival of the train.

Slow orders affect the movement of trains considerably, and while it is desirable that slow orders should in all cases be placed on trains, where they are necessary in the interest of safety, bridge and building masters and roadmasters can aid the movement of traffic considerably if they will see that all work involving the maintenance of slow orders is completed with the utmost despatch, and that this important feature of the service may be properly supervised; hereafter a record will be kept of the hour and date slow orders are put on, cause for each, and date and hour slow orders are lifted. If any work involving a slow order is detained waiting material, the Superintendent, and if necessary the General Superintendent, should be advised, with a view to expediting delivery. Bridge and building masters should see that the water service is maintained in a thoroughly efficient manner, so as to avoid delay to trains because of poor water service.

Train despatchers can render valuable assistance by having train orders ready, and by the exercising of good judgment in handling time limit orders and favoring trains influencing connecting trains.

I have endeavored to make it clear that in the interests of the road and the travelling public, our passenger trains must be run on time, and feel that with the hearty co-operation of all concerned, satisfactory results will be obtained, but, if we are disappointed, repeated responsibility for delayed trains will be considered sufficient cause for the removal of the employe implicated.

Index to The Railway and Marine World.

A complete index to the matter contained in the RAILWAY AND MARINE WORLD for 1908, Jan. to Dec. both inclusive, is in course of preparation, and will be printed and ready for distribution early this month. The index for 1907, issued in Jan. last, met with much favor, and we have no doubt the one for the past year will be equally appreciated. A large portion of the matter we publish from month to month is of great permanent value for reference, and of course this value is much enhanced by a complete classified index. We were much gratified when we issued our index for 1907 to find that a large number of subscribers file and bind the paper.

It is not the intention to make a general distribution of the past year's index, but a copy will be sent to each subscriber who desires one, and who will notify us to that effect. A letter or post card, simply stating that the index is desired, and giving the subscriber's name and address, will be sufficient. Early application is requested, and subscribers who wish a copy are asked to write us at once. "Do it now." The number of copies to be printed will be governed by the number of applications received.

C. H. Fergie, recently Superintendent of Mines for the Dominion Coal Co., spent some time in Sydney, N.S., and vicinity recently examining a number of coal properties, which it is reported that the C.P.R. proposes to purchase, with a view to securing a supply of coal for its own requirements.

A discussion on "Reinforced Concrete Beams" was the feature at a recent meeting of the Toronto Branch of the Canadian Society of Civil Engineers. The discussion followed a paper read by E. Brown, and the general opinion of the members seemed to favor the adoption of larger factors of safety to offset the possible inferior work of fabrication due to the tendency to hurry all construction.

Rates for Crow's Nest Pass Coal Co.

In the case of the Crow's Nest Pass Coal Co. vs. C.P.R. Co., Chief Railway Commissioner Mabee gave the following judgment Nov. 23: The applicant asks for an order that the Railway Company do file a tariff from all points in Canada to all points on the property of the applicant company, viz., Michel, Fernie, Coal Creek, Morrissey Jct., and Carbonado, and hereafter to all other points at which collieries may be established by the applicant company for all "plant," as defined by an agreement of Feb. 19, 1906, which the applicant company may ship over the respondent's lines, required by the applicant for the construction and operation of its works, such tariff to be not more than six-tenths of the present tariff rates on such materials for carload or less than carload, and to refund to the applicant company all excesses which the respondent has charged the applicant on such plant since May 1, 1907, and generally to file tariffs in compliance with the provisions of paragraph 14 of an agreement of July 30, 1897. On the last mentioned date a lengthy and somewhat complicated agreement was entered into, to which the B.C. Southern Ry. Co., the respondent, and the Kootenay Coal Co. were parties, the applicant company being formerly the Kootenay Coal Co., and admittedly entitled to the benefits of the agreement. Par. 14, under which relief is sought, is as follows: "The construction materials required by the Coal Co. to be used in the construction of permanent works, and for timber used in its said mines, and carried by the C.P.R. Co. to the Coal Co.'s said mines from points on the line of the C.P.R. Co.'s said railway, the Coal Co. will be charged by the C.P.R. Co. for the carriage of all such materials no more than the rate of 1c. per ton of 2,000 lbs. per mile, such construction material to include rails, fastenings, ties, bridge timber, and lumber required by the Coal Co., provided that such material may be carried a distance of not less than 100 miles on the C.P.R. Co.'s railway, and that for all plant shipped by the Coal Co. over the C.P.R. lines, and required by the company for the construction and operation of the said works, the Coal Co. shall be charged by the C.P.R. Co. at the rate of not more than six-tenths of the ordinary tariff rates on such materials for carload or for less than carload."

When this agreement was entered into the Coal Co.'s works had not been established, and the respondent had no line of railway in the locality where it was the intention of the Coal Co. to locate what has since become an industry of very large proportions, and in which upwards of $5,000,000 have been invested. Nothing turns upon the portion of the above paragraph concerning the carriage of materials at 1c. per ton per mile, and it was stated that respondent's regular tariff rate upon such materials was less than the amount agreed upon, and the applicant was charged upon such material at the tariff rate.

On Feb. 19, 1906, an agreement was entered into by the parties to this contest under which the following articles were considered as "plant" under the above clause 14: Asbestos, babbit metal, brattice cloth, bridge or tipple material and machinery, including conveyers, link belt or other transmission machinery, screens, picking tables, dumps, car hauls and parts thereof; castings, iron, steel, or brass; chain, iron or steel; electrical machinery and parts, including generators, dynamos, motors, lamps, globes, sockets, wire, insulators, and transformers; engines, stationary, including boilers, condensers, compressors, box car loaders, air receivers, hoists and parts thereof; fire engines and apparatus; harness and saddlery; horses; hose, water and steam; iron bolts, nuts, rivets, and washers; iron, bar and other iron and steel; locomotives, steam, air or electric (used in and about the mines); machinery and parts thereof, including blocks, pulleys, shafting, coal and rock drills; mine cars and parts, including trucks, irons and wheels; machine shop material; machine shop machinery and parts thereof; machinery packing; mules; nails and spikes used in mine structures; pipe, lead, vitrified, soil, wood, including fittings, injectors, lubricators and valves; pumps and parts thereof; rails, fastenings, and switch material used in and about the mines, not over 45 lbs. weight per yard; rope, all kinds; safety lamps and parts; scales and parts; tools, including files, saws, coke forks, wheelbarrows, axes, shovels, spades, picks, handles, lanterns, globes, grindstones, wrenches, anvils, bellows, dirt scrapers, machinists and machine shop tools; wire, plain; vehicles and parts, including wagons and sleighs.

The agreement of July 30, 1897, was entered into in good faith, and has been carried out by the parties, except as to the matter which gives rise to this application. Many covenants were entered into by the parties to that agreement, and one result of it was that the respondent company obtained the conveyance of a very large area of coal lands, estimated by a witness at the hearing as being worth many millions of dollars—but in the view I take of this application it is neither needful nor desirable that close or accurate attention be paid to the consideration received by the Respondent Co. for entering into the covenants embraced in this agreement, one of which was the one in contest. The respondent agreed to construct a line of railway; this was done. The applicant agreed that this large area of coal lands should become vested in the railway company, and this covenant was fulfilled. All other covenants contained in the agreement were carried out, except that the railway company says that the provisions of the Railway Act prevent its carrying over its lines plant shipped by the applicant company for the construction and operation of its works at six-tenths of its ordinary tariff rates, and that such an agreement was and is illegal. It was stated that when the agreement was originally entered into there was no demand in that locality for the class of articles the railway company was agreeing to carry at reduced rates; that there were no industries in existence, and, therefore, no persons against whom the six-tenths clause of the agreement would be a discrimination, and that, therefore, the agreement was valid when entered into. Be this as it may, it, I think, is not necessary to decide whether the agreement was opposed to the Railway Act of 1888, and the only point for decision here is whether the application can succeed in view of the provisions of the Railway Act now in force; and I am of the opinion that the fairer position to leave the parties in is to deal with the situation upon the footing of the present legislation, leaving the applicant to take such other proceedings as it may be advised with respect to the consideration alleged to have been given for the covenant of the railway company for this reduced freight rate, if such course is open to it.

Admitting the jurisdiction of this Board to make an order of the kind asked for, as to which I have grave doubt, although jurisdiction was not disputed by the railway company, I do not think the application can succeed. It is admitted that at present large development has taken place in the portion of British Columbia to which this agreement applies, and there are many persons, firms, and corporations requiring carriage by the railway company of the class of articles and material as defined by the agreement of Feb. 19, 1906, into that district, and into the towns mentioned in the prayer of the petition, there are other coal companies within varying distances, some within 100 miles of the applicant's coal area and plants, requiring similar articles and material, and the success of this application would mean that the applicant would pay but six-tenths of the regular tolls charged to others upon all the various materials mentioned in the agreement of Feb. 19, 1906, and this for all time to come, so that in future years, if the railway company reduced its rates upon these articles, or any of them, or were so required by the Board, the tolls to be paid by the applicants would continue to be but six-tenths of such reduced rates, and so discrimination in its favor would continue for all time. I think such a condition is opposed to the spirit as well as the express provisions of the Railway Act.

Mr. Marsh argued with much force that all this was quite permissible, as the applicant had paid an adequate consideration for the favored treatment, and he cited some English and American cases that go to support that contention. I have gone through most of these, and while some can be distinguished, both as to the facts and the terms of the various statutes upon which they were decided, it is sufficient to say that the same are not binding upon the Board, and no such principle has as yet been introduced into the railway jurisprudence of Canada, and it has been dissented from in other cases both in England and the United States. It is impossible to find as a fact that the consideration passing from the coal company to the railway company was "adequate." It is contended this consideration requires the railway company to carry at these reduced tolls for all time. Who can say what the actual sum was that was paid? The area of coal lands so conveyed are undeveloped, and their value is based upon opinion evidence only. Who can say how much material is to be carried by the railway company for the coal company, and what is the length of time that such carriage is to continue? Who can say to what extent the tolls upon these articles may be reduced in future years by reason of competition or otherwise? All these are matters upon which reasonably accurate information must be had before it could be said that the coal company had paid to the railway company a consideration that could fairly be said to make up the other four-tenths of the tolls, thereby eliminating the discriminatory feature of the agreement. In this case no finding could be made that the consideration was "adequate"; but if the contrary was the case, I would not follow the cases cited for the proposition that under our law any such agreement can be made.

The Railway Act requires that under substantially similar conditions the tolls charged shall be equal to all persons, and at the same rate, whether by weight, mileage, or otherwise, and any reduction or advance either directly or indirectly is expressly prohibited. No undue or unreasonable preference or advantage can be permitted to any person or company. The object of the legislation is to place everyone upon terms of absolute equality, and if agreements were permitted to be entered into for reduction in tolls or for other preferential treatment, the door would be opened wide for the defeat of the Act, and the Board would be called upon to struggle with all sorts of conditions, opinions, and complications in the determination of such cases. It will not be understood that I am expressing the opinion that such was

Commutation Fares from Brampton and Oakville.

On the application of F. W. Wegenast of Brampton, Ont., under sec. 315 of the Railway Act, for an order directing the G.T.R. Co. to issue to him a 55-trip ticket, for use between Brampton and Toronto, similar to those in use between Oakville and Toronto, at the same rate as those between Oakville and Toronto are sold, namely, $7.15. Chief Railway Commissioner Mabee delivered the following judgment, Nov. 23:

The applicant alleges that he is a resident of the town of Brampton, is a law student attending lectures at Osgoode Hall, Toronto, and travels daily, except Saturdays and Sundays, between Brampton and Toronto, the return fare between which places is $1.10, Brampton being 21.1 miles distant. That between Toronto and Oakville, 21.14 miles from the former city, the railway company issues commutation tickets consisting of 55 coupons, good for one trip each way at 13c. per trip, and also a ticket consisting of 10 coupons for $3.25, or 32.5c. per trip. The applicant claims that the railway company should be required to issue trip tickets good between Toronto and Brampton upon a similar basis. The application was supported by counsel for the town and Board of Trade of Brampton, and by counsel for the city of Toronto. The case was based entirely upon the contention that the action of the railway company was an unjust discrimination against Brampton in favor of Oakville.

Sec. 341 of the Railway Act provides that nothing in the Act shall be construed to prevent the company from issuing "mileage, excursion, or commutation passenger tickets," so that the company is within its rights in issuing these reduced fare tickets between Toronto and Oakville. Sec. 77 of the Act provides that whenever the company charges persons in one district lower tolls than it charges to other persons in another district "for the same or similar services," the burden of showing that such difference in treatment does not amount to an undue preference, or an unjust discrimination, shall lie on the company.

Much evidence was given showing the train facilities between Toronto and the towns in question, and the history of the granting of these tickets between Toronto and Oakville. It appears that many years ago, reduced rates existed between Toronto and Brampton, but they were abandoned by the railway company upon the complaint of Brampton merchants, who contended that it took trade from them to Toronto merchants. The former, it is said, went so far as to threaten the company that they would divert their traffic from the G.T.R. if these reduced fares were continued. At the same time, similar reduced fares existed between Oakville and Toronto, and no complaints were made by Oakville merchants against the practice. It would, therefore, seem that the withdrawal of these privileges from Brampton was not brought about by the railway company upon its own initiative, but was solely upon account of the situation above indicated. It was said, also, that during the experimental stages of the cheap fares between Toronto and Oakville, some persons, in consequence thereof, had purchased houses there, and at the time the rates were withdrawn from Brampton they were allowed to continue between Toronto and Oakville, otherwise these persons might have to sacrifice their property. In view of these facts, it is clear that the present situation is not brought about by the choice of the railway company; that it is not solely responsible for either the discontinuance of the Brampton rate, or the continuance of the Oakville rate, and if there is unjust discrimination against Brampton and in favor of Oakville, the people of the former place can hardly lay the blame upon the company.

Between Toronto and Oakville about 12 persons in the winter, and 20 in the summer, avail themselves of these reduced fare tickets. There never was any suburban service, and these passengers ride on the regular trains. Witnesses from Brampton stated that, in their opinion, reduced fares between Toronto and Brampton would have the effect of increasing real estate values there, and persons now residing in Toronto would go there to live. I have no doubt these reduced fares would prove a great convenience to the persons now residing in Brampton, but the point for decision is whether Brampton is "unjustly discriminated" against in favor of Oakville. The Act recognizes the right of a railway to discriminate between points; it is only unjust discrimination, or undue preference that the company is required to prove itself free from. There is evidence that no one has chosen to buy property in Oakville who would have purchased in Brampton had reduced fares to that town been in effect. There is evidence that no one has removed from Brampton to Oakville consequent upon reduced fares to that town, and there is evidence that, so far as known, no one has removed from Toronto or elsewhere to Oakville, who would have chosen Brampton had reduced fares existed to that town. It may be that Oakville has to a small extent profited by these reduced fares; it may be that Brampton would profit to an equal or greater degree if they were in force between Toronto and that town; but the question is whether Oakville has profited at the expense of Brampton, and I am of opinion that such has been shown not to be the case.

Counsel for the town of Brampton asked that these tickets between Toronto and Oakville be prohibited unless the like privileges were granted to Brampton; but I am of opinion that inasmuch as it has been shown that Brampton has not been injured, it would not be fair to the people of Oakville to make such an order. The application must be refused.

Inspection of Electric Crossing Bells.— Our last issue contained, on pg. 867, order 5568 of the Board of Railway Commissioners, providing for the inspection of electric bells installed by railway companies at crossings for the purposes of protection, requiring that every such bell be inspected each morning by the sectionman in whose section it is. On the G.T.R. Co.'s application the Board has passed an amending order, 5754, providing that the daily inspection may be made by the sectionman "or other employe of the railway company specifically charged with such duty by the company."

H. Sutherland, Executive Agent, Mackenzie, Mann & Co., Winnipeg, is reported to have said in Port Arthur, Ont., recently, that the blast furnaces there would probably be reopened after the new year.

C. P. R. Betterments, Construction, Etc.

St. Maurice Valley Ry.—A contract has been entered into between the company and the Department of Railways and Canals, under the act granting aid to certain railways, for the construction of a railway from Three Rivers to Grand Mere, Que., 28 miles. This line has already been constructed, and is being operated by the C.P.R.

Northern Colonization Ry.—Good progress is reported to have been made with the extension of the line from Nomining to the Lievre River, Que. Track has, it is stated, been laid to about 27 miles from Nomining, leaving a further distance of eight miles to be laid before the extension is completed.

Subway at St. Louis, Que.—It was reported at a meeting of the St. Louis city council recently, that the C.P.R. was ready to proceed with the construction of the subway at St. Lawrence St. next summer. The Mayor explained that from the negotiations which had taken place it would appear that the company was quite willing the work should be done during the coming summer, because the traffic at that point, already very heavy, was increasing so rapidly that there is danger of serious interference with the street traffic in the near future. The cost, estimated at about $70,000, will be paid by the town, the C.P.R. and the street railway. It was decided to instruct the town engineer to prepare plans for the subway.

The Ottawa, Northern and Western Ry. Co. will apply next session of the Dominion Parliament for an act extending the time within which the company may construct the extensions and branches of its railway which it was authorized to construct by sec. 11 of chap. 87 of the statutes of 1894.

Pembroke Freight Shed.—It is reported in Pembroke, Ont., that the company has taken an option on certain properties on Lake and Victoria streets. The object in view is said to be the company's desire to have freight sheds nearer the centre of the town than the present one.

The Guelph and Goderich Ry. Co. will apply next session of the Dominion Parliament for an act extending the time within which it may construct the branch line authorized to be constructed by sec. 7, chap. 81, of the statutes of 1904.

The Tillsonburg, Lake Erie and Pacific Ry. Co. will apply next session of the Dominion Parliament for an act extending the time within which it may construct the extension of its railway, authorized by sec. 2, chap. 105, of the statutes of 1902.

St. Mary's and Western Ontario Ry.—Under the act granting aid to certain railways the Department of Railways has entered into a contract with the company for the construction of a line from Woodstock to Exeter, Ont., 45 miles. A portion of this line extending from St. Mary's to Embro has been completed, and is being operated under lease by the C.P.R.

The Walkerton and Lucknow Ry. Co. will apply next session of the Dominion Parliament for an act extending the time within which it may construct the railway which it was authorized to construct by sec. 8, chap. 138, of the statutes of 1904.

Fort William Taxation and Improvements.—After negotiations extending over some considerable period, an agreement has been reached between the company and the city council of Fort William, Ont., respecting the exemption from taxes of the company's property. It is said that the company will pay between $25,000 and $30,000 a year as taxes, and will be exempted from the balance. The company agrees in the near future to undertake the construction of two bridges across the rivers to the islands, a cleaning elevator, a new station, increased accommodation at the car repair shops, and to concentrate all its business at the head of the lakes at Fort William. It will also give 300 ft. of frontage to the city for the purpose of constructing a dock, and will also construct a subway. The formal agreement embodying these terms is being drawn up for signature.

In connection with the negotiations for the settlement of the amount of taxes to be paid by the company in Fort William, it is stated that the company has lately acquired a large area of land on Island No. 1, bringing its holdings fronting the lake up to about 240 acres. On this property the company is preparing to expend a large amount of money in the improvement of its terminals, so that the increasing business at the port may be handled promptly and efficiently. Press reports state that among the structures which it is contemplated to erect will be a coal-handling plant having a storage capacity of 1,000,000 tons, and a capacity for handling 2,000,000 tons a year. It is understood, however, that nothing definite about plans has been settled, but we are advised that no doubt a coal-handling plant will be built on the island in time, and that generally it is found necessary to enlarge the company's terminal facilities there. The price paid for the four lots on the Island front is said to have been $80,000.

A press report of Dec. 16 states that a good deal of real estate on the east side has changed hands recently, the purchasers being, it is understood, the C.P.R. It is practically certain, says the report, that a union station will be erected.

First Street Bridge, Brandon.—The question of the construction of the bridge at First St., Brandon, Man., is being reconsidered by the city council. The C.P.R. does not approve of the plans previously submitted, and desires that an entirely new plan be prepared and submitted for consideration.

Saskatoon Westerly.—Wilkie is the present terminus of the C.P.R. line running westerly from Saskatoon, Sask., for about 100 miles. The grading has been completed from Wilkie to Hardisty, Alta., where a junction will be effected with the Calgary and Edmonton Ry. branch running easterly from Wetaskiwin. Tracklaying westerly from Wilkie will be resumed in the spring. Ballasting has been completed to Wilkie, which it is expected will be made a divisional point when the line is completed through to Hardisty.

Wetaskiwin, Alta.—A site has been selected at Wetaskiwin, Alta., upon which it is proposed to erect a 12-stall roundhouse. The yard is being graded and a good deal of other work done in preparation for the completion, during the next construction season, of the line between Wilkie and Hardisty, which will make Wetaskiwin the terminal of the line from Saskatoon.

Edmonton - Strathcona Bridge.—The Alberta Government, in reply to a request from a delegation representing the cities of Edmonton and Strathcona, has promised to proceed at once with the preliminary work for the new central bridge, which is to be located near the power houses of the two cities. A promise was made that the surveys for the bridge would be gone on with at once. It is stated that the Government does not feel justified in expending $100,000 towards a high level bridge, and a similar amount towards the proposed low level bridge. If there is no possibility of coming to an arrangement with the C.P.R. regarding the traffic section of the projected high level bridge, or if the cities are willing to drop the traffic section of the high level bridge, the Government will be prepared to construct the central bridge as asked for by the cities.

Okanagan Lake.—Notice has been given that the company is applying to the British Columbia Government for permission to lease 13.44 acres of land in sec. 24, tp. 13, Yale district, fronting on Okanagan Lake and adjoining the Shuswap and Okanagan Ry.

Nicola, Kamloops and Similkameen Ry.—A trip of inspection over the route surveyed for the projected extension of this line from Coutlee, near Nicola Lake, to Penticton, B.C., has been made by R. Marpole, General Executive Assistant, Vancouver, and H. J. Cambie, Consulting Engineer, Vancouver, in company with H. E. Carry, the engineer who had charge of the location party.

Esquimalt and Nanaimo Ry.—Reports as to the improvements and betterments carried out on this line during the past construction season show that several of the longest trestle structures on the northern section have been replaced by permanent bridges, or have been completely filled in by gravel. Perhaps the most important of these undertakings is that at Mill Stream, about half a mile beyond Nanaimo. The old wooden work has been removed and in its place is 70,000 yards of gravel filling, and a 20 ft. arch. At Ladysmith, another trestle has been replaced by a 10 ft. arch and 21,000 yards of gravel filling. The foundations of new bridges have been put in at Chemainus, Nanaimo and Cowichan rivers, and the steel superstructures will be placed as soon as they are received from eastern points, where heavier bridges are in course of erection.

In connection with the work on the Alberni extension, it is said that work will be commenced at an early date upon the Mountain section. Survey parties have been sent out to work in the vicinity of Cameron Lake upon location work.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—Work is reported to have been commenced on clearing the sites for the passenger station, car yards, roundhouse and other improvements at Duluth, Minn. The actual construction of the buildings will not be started, it is stated, until spring opens up.

A press report states that the company has placed an order for 6,500 tons of steel rails. (Dec., 1908, pg. 861.)

Six claims cases for damages against the C.P.R., arising out of the Caledon railway accident, Sept. 3 1907, were heard at Orangeville, Ont., recently, and it is said that the company will pay about $30,000 in connection with them. M. E. Stewart was awarded $11,000. Most of the claims have been settled out of court.

The board of conciliation which has been dealing with the dispute between the Canadian Northern Ry. and its firemen and engineers on the eastern lines, respecting wages and hours of labor, reached a decision recently, and the award was signed. The firemen and engineers on the company's western lines agreed to accept the terms of the award as applying to their wages and hours also.

The I.C.R. and the city of Moncton, N.B., are having a dispute as to which is entitled to the sum of $50 inflicted as a fine on a passenger on the I.C.R., for refusing to pay his fare. The railway claims that any fine imposed under the Government Railways Act belongs to the Government. The matter has been referred to the city legal department, and in the meantime the amount has been paid into the city treasury.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alberta.—Press reports from Calgary state that the construction of a railway running from the extreme north of Alberta to the U.S. boundary will be undertaken in the spring, the money for its construction being provided by an issue of bonds guaranteed by the Provincial Government. Nothing has been definitely stated about the route of the projected railway, but it is said that it will extend from the Peace River country, and run south to the east of the Calgary and Edmonton Ry., reaching the U.S. boundary at Coutts.

Hon. C. W. Cross, Attorney-General of Alberta, arrived in Ottawa, Dec. 15, for the purpose of interviewing the Dominion Cabinet on the policy of the Provincial Government as to railway construction in Alberta.

Alberta Central Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the company to construct extensions of its projected railway as follows: From its westerly terminus near Rocky Mountain House to the G.T. Pacific Ry. in or near the Yellowhead Pass; easterly from the terminus near the elbow of the Battle River to or near Saskatoon or Warman, Sask.; and from the main line east of Red Deer, Alta., southerly and easterly to Moose Jaw, Sask. The applicants will also ask to have power conferred upon the company to increase the issue of debentures, bonds or other securities which it may issue from $20,000 per mile of railway constructed to $30,000 a mile; to increase the capital of the company from $1,000,000 to $2,000,000, and for an extension of time within which the already authorized lines may be constructed. Smith and Johnson, Ottawa, are solicitors for the company. (Dec., pg. 865.)

Algoma Central and Hudson's Bay Ry.—It is reported that surveys have been made for an extension from the present end of track, mileage 69.35, at the Chippewa River, Ont., northerly to Michipicoten, mileage 103.65. The report adds that it has not been decided when construction will be started.

Application will be made next session of the Dominion Parliament for an act to extend the time for the commencement and completion of the authorized lines from the C.P.R. main line northerly towards James Bay, not farther north than the Equam River.

Alsek and Yukon Ry.—Application will be made next session of the Dominion Parliament for an act extending the time for the commencement and completion of the authorized line. Lewis and Smellie, Ottawa, are solicitors for the applicants.

Athabasca Northern Ry.—The Dominion Parliament will be asked next session to pass an act extending the time for the commencement and completion of the line authorized to be constructed by 4 and 5 Edward VII, chap. 57. Smith, Markey, Skinner, Pugsley and Hyde, Montreal, are solicitors for the company.

Athabasca Ry.—Application will be made next session of the Dominion Parliament for an extension of time for the commencement and completion of the authorized lines, and for permission to enter into agreements with other railway companies. Smith and Johnston, Ottawa, are solicitors for the applicants.

Bathurst Iron Mine Line.—The Canada Iron Corporation, Ltd., which was incorporated in 1908, and which has taken over the Drummond iron properties, etc., at various points in Nova Scotia, New Brunswick, Quebec and Ontario, has a lease of a hematite and magnetic iron ore deposit near the Nepisiquit River, some 25 miles up stream from Bathurst, N.B. Mining engineers estimate the property to contain 20,000,000 tons of merchantable hematite iron ore, carrying 53 to 55% of metallic iron, which he believes can be mined and transported to Bathurst Harbor for shipping at from 75c. to $1 a ton. Representatives of the corporation waited on the New Brunswick Government Dec. 11, and asked for a guarantee of bonds for a railway from the mines to Bathurst, and for other concessions. A press dispatch says that the Government will submit a bill to the Legislature to grant the aid desired, with certain restrictions, and that the corporation will build the line to Bathurst, provide docks and erect a smelter if the Dominion Government will dredge the harbor, which is now unnavigable except for small tugs, etc. The dispatch also says that instead of dredging Bathurst harbor the Dominion Government may build a branch line of the I.C.R. from the mines to Red Pine, two stations east of Bathurst, and carry the ore by that route to Chatham, N.B., for shipment. It is said the Corporation will also apply for a Dominion subsidy for the proposed line.

Brandon Transfer Ry.—Application will be made at next session of the Dominion Parliament for an act extending the time for the commencement and completion of the proposed line. Smith and Johnston, Ottawa, are solicitors for the applicants.

British Columbia.—An application will be made at the next session of the B.C. Legislature for an act incorporating a company with power to construct and operate lines of railway from Hardy Bay in a westerly direction to Quatsino Sound, opposite Coal Harbor; and to build all necessary roads, ways and ferries; to build or acquire and operate wharves, docks, etc., in connection with such railway; to construct telegraph and telephone lines; to generate and dispose of electric power; and with power to connect and make traffic arrangements with other companies. H. Appleton, Victoria, is acting for the applicants.

Cardston to Great Falls, Mont.—Lethbridge, Alta., press reports state that there is a probability that the C.P.R. will construct a line "from Calgary to Macleod, to Cardston, and the International boundary, and thence southerly almost in a straight line to Great Falls, Mont." The C.P.R. already has a line from Calgary to Macleod, so that if there is anything in the report, the line to be constructed will probably extend from Macleod to Cardston—the terminus of the old St. Mary's River Ry.—and thence to Coutts, at the International boundary, the terminus of the Alberta Ry. and Irrigation Co.

Crawford Bay and St. Mary's Ry.—Application will be made next session of the Dominion Parliament for an act amending the company's charter, so as to extend the time for the construction of its authorized railway; to change the name of the company to that of British Columbia, Alberta, Saskatchewan and Manitoba Ry., and to enter into agreements under secs. 361, 362 and 363 of the Railway Act, with the Northern Empire Ry. Dandurand, Hibbard, Boyer and Gosselin, Montreal, are solicitors for the applicants.

Crow's Nest and Northern Ry.—Plans have been filed with the British Columbia Government for a line to be constructed from Crow's Nest to Crown, B.C., some 12 miles. C. O. Diffenderfer, Spokane, Wash., is Chief Engineer, and J. A. Williams is President of the company.

Delaware and Hudson Co.—The extension of the Quebec, Montreal and Southern Ry., the Canadian line of the D. and H. Co., has been completed as far as Ste. Philomene, Que., where a junction is effected with the Lotbiniere and Megantic Ry. The extension passes through the towns of Nicolet and St. Gregoire, both of which have been served for years by the G.T.R. and the Intercolonial; and then opens up new territory serving the towns of La Baie du Febvre, Becancour, Gentilly and Ste. Cecile. The big bridge over the Nicolet River will probably be completed by Feb., when the new extension will be opened for freight and passenger traffic. The construction of the additional 40 miles, from Ste. Philomene to Quebec, will be gone on with in the spring. (Sept., 1908, pg. 618.)

Intercolonial Ry.—A deputation from Fredericton, N.B., waited on the Minister of Railways at Ottawa, Dec. 6, to urge the erection of an up-to-date station in that city. (Dec., pg. 865.)

It was reported in Moncton, N.B., Dec. 9, that the route for the proposed change of location of the Intercolonial Ry. between Moncton and Truro had been laid out. There have been three parties in the field since Aug., 1908, locating a line between the points named, to pass through Parrsboro, and so avoid the present heavy gradient over the Cobequid mountains.

The watertank at the Island yard, St. John, N.B., holding 100,000 gallons, burst Dec. 14, doing damage to the extent of over $10,000.

International Ry. of New Brunswick.—A contract has been entered into between the Department of Railways and Canals and the company, under the act relating to subsidies to certain railways, varying the contract entered into for a line from the western end of the 20 miles, as already constructed from Campbellford, to the St. John River, between Grand Falls and Edmundston, dated Aug. 24, 1908, to provide for the payment of the double subsidy.

Kettle River Valley Ry.—The Department of Railways has entered into a contract with the company, under the act granting aid to certain railways, for the construction of a line from Carmi to Penticton, B.C., 50 miles.

Kootenay Central Ry.—Application will be made next session of the Dominion Parliament for an act amending the act of incorporation and amending acts, by extending the time fixed for the completion of its railways. Harvey, McCarter and Macdonald are solicitors for the company.

Maritime Coal, Ry. and Power Co.—A contract has been entered into between the company and the Department of Railways under the subsidy act, for a line from Joggins Mine to the Bay of Fundy, N.S., one mile.

Ontario, Hudson's Bay and Western Ry.—Application will be made next session of the Dominion Parliament for an act to extend the time for the commencement and completion of the authorized lines. Rowell, Reid, Wilkie, Wood and Gibson, Toronto, are solicitors for the applicants.

Pacific Coast Coal Mines Ltd.—Application will be made to the B.C. Legislature for an act authorizing the construction of railways or tramways in the Districts of Cranberry and Cedar, and in the District of Prince Rupert, Vancouver Island, for transporting coal to seashore ports, or to connect with other railways. Power will also be sought to construct and operate telegraph and telephone lines and to confer powers under the Water Clauses Consolidation Act. Barnard and Robertson, Victoria, are solicitors for the applicants.

Prince Edward Island Ry.—The electric plant at the power-house at Charlottetown, P.E.I., for which tenders have been asked, will consist of a 75 k.w. direct-current generator, with potential of 230 volts, direct connected to and mounted on same base with engine. The specifications state that the generator must be under control so that it will not show a variation as great as 2%. (Dec., pg. 865.)

Quebec Central Ry.—Surveys have been completed for the extension of the line from St. George to St. Justine, Que., a distance of 30 miles. The extension follows the Famine River. Negotiations relative to the securing

the right-of-way are proceeding, and it is expected that construction will be commenced in the spring, and that the line will be completed before Jan., 1910.

Railway to Hudson's Bay.—Reports received by the Department of Railways recently show that rapid progress is being made with the surveys on the route of the proposed railway to Hudson Bay. Four parties have been placed in the field by the Dominion Government, and alternative routes are being surveyed. It is anticipated that the engineers will be in a position to make a general report to the Government by the end of Feb., and that it will be immediately presented to Parliament. (Nov., 1908, pg. 787.)

Rimouski International Ry.—Application will be made next session of the Dominion Parliament for an act to incorporate a company with this name, with power to construct a line from Rimouski, Que., to Edmundston, N.B., along the Rimouski River to the centre of Duquesne township, and turning westerly along one of the tributary streams of the lakes in the northern part of Chenier tp., thence in the direction of Eagle's Lake in Biencourt tp., and following the River Biencourt to Squateck Lake, the second Squateck Lake and the River Squateck, in Rouillard tp., and possibly the Owens River, and the west branch of Iroquois River. Power will also be asked to operate steam and other vessels on the waters touched by the railway; to utilize steam and water power for electrical generation and to dispose of the surplus power; to operate telegraph and telephone lines along the railway; to construct or acquire hotels, restaurants, etc. All of the foregoing works to be declared for the general advantage of Canada. L. N. Asselin, Rimouski, Que., is solicitor for the applicants.

Southern Central Pacific Ry.—Application will be made next session of the Dominion Parliament for an act reviving the act of incorporation, chap. 191, 3 Ed. VII, R.S.C. 1903, as amended by chap. 162, 6 Ed. VII, R.S.C. 1906; to change certain of the incorporators and to extend the time for the commencement and completion of the railway so authorized. A. T. Thompson, Ottawa, is solicitor for the company.

Temiskaming and Northern Ontario Ry.—The first train from North Bay to Cochrane, Ont., the point of junction with the National Transcontinental Ry., was run Nov. 25. The roadbed has been fully ballasted to the junction, and was reported to be in good condition. A notable feature of the section of the line between Driftwood City and Cochrane is a long tangent of 17 miles, which ends about five miles south of Cochrane. The greater part of the tangent is over muskeg. At Cochrane a station 30 by 150 ft. has been erected, in which all the offices are at present located. This building is for temporary use, and will be converted into a freight shed when the permanent station has been erected. On the day named the members of the Commission, a number of officials, H. D. Lumsden, Chief Engineer National Transcontinental Ry., and a large party, went over the line in a special train. One of the features of the trip was a sale of lots in the new town by the Commission. The sale realized over $50,000 for the 145 lots which were sold. The Commission proposes to expend $15,000 during the winter in clearing and grading the streets through the lots sold. The main thoroughfare will be 100 ft. wide, and other streets will have a width of 66 ft.

The spur line at Haileybury has been completed to Moore's Cove, and freight trains have been run in to that point. It is said that the line will not be pushed ahead any further at present. The difficulty in the way arises out of the objections of some of the residents to having the line pass along the lake shore in front of their residences. An injunction was taken out to prevent the Commission from constructing this piece of line, and until a settlement has been arrived at, nothing further will be done.

It is reported that the Commission has decided to erect a car repair shop and a pipe-casting shed at North Bay.

During the past fall a considerable amount of information was collected by engineers on behalf of the Commission regarding suitable routes for branch lines in the north country. Survey parties have gone over all the routes leading to the new mining districts in the vicinity of Cobalt. These districts include South Lorraine, Montreal River, Gowganda, and Northern Temiskaming. It is understood that just as soon as any of these districts become of sufficient importance to warrant the construction of a branch line, the work will be put in hand. At present the South Lorraine district appears to be the place which is in most pressing need of a railway. In the Montreal River district the winter road to Elk City will help the prospectors and miners considerably. (Dec., pg. 867.)

Vancouver, Fraser Valley and Southern Ry. Application will be made next session of the Dominion Parliament for an act reviving chap. 175, 6 Ed. VII, R.S.C. 1906, being the act of incorporation of the company; and to extend the time for the commencement and completion of the railway so authorized. McPhillips, Tiffin and Laursen, Vancouver, B.C., are solicitors for the applicants.

Victoria and Barclay Sound Ry.—The Dominion Parliament will be asked next session for an act incorporating a company with this title to construct a railway from Victoria, B.C., by way of Otter Point and San Juan to Barclay Sound, near Sarita River, such railway to be declared to be for the general advantage of Canada. W. H. Langley, Victoria, B.C., is solicitor for the applicants.

Windsor Tunnel and Lake Erie Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title to authorize the construction of a single or double track railway from Windsor, southerly through the townships of Sandwich West, Anderdon, Colchester North, Malden, Colchester South, and Gosfield South, to Kingsville, Ont., with power to construct branch lines as follows: (a) From the village of Harrow to the shore of Lake Erie, near Oxley; (b) from some point on the line in Sandwich West to the Detroit River, in the same township; (c) from near Harrow, westerly through the townships of Colchester South and Malden to Amherstburg, Ont. It is desired to have the lines to be constructed declared to be for the general advantage of Canada; to have authority to enter into an agreement with the company now constructing the tunnel under the Detroit River, for running privileges for the company's cars, and to operate steamships from Oxley to the shore of Lake Erie in the U.S. G. J. Leggatt, Windsor, Ont., is solicitor for the applicants.

Winnipeg and Northwestern Ry.—Application will be made next session of the Dominion Parliament for an act extending the time for the construction and completion of this projected railway, and authorizing it to construct branches as follows: (a) From its authorized line near the Narrows of Lake Manitoba westerly to the Assiniboine River, and thence northwesterly to its authorized line at or near Nut Lake; and (b) from the last-mentioned branch near Good Spirit Lake southeasterly to the G.T. Pacific Ry., at a point between the Manitoba boundary line and the second meridian. It is also intended to ask for power to authorize the company to guarantee the securities of other companies. A. T. Drummond, Toronto, is acting for the company.

Winnipeg City Power Line.—Tenders were received Dec. 28, by the Secretary of the Board of Control, Winnipeg, for the construction of the general works for the supply and erection of various portions of a transmission line between Point du Bois and Winnipeg. Individual tenders will be received for general works at Point du Bois; erection of transmission line, steel towers, and electric transmission cable. The city corporation has already completed the construction of a railway line between the two points.

G.T.R. Betterments, Construction, Etc.

Portland Docks, etc.—The damage to the company's docks and sheds at Portland, Me., by the recent fire, was estimated at $300,000. It was officially stated, Dec. 4, that there was no danger of traffic being hindered by the fire, as there were ample facilities at the company's other five docks there for shipping everything at present in sight.

Electrification of Point St. Charles Shops.—In connection with the press reports, referred to in our last issue, that consideration was being given to plans for the electrification of the shops at Point St. Charles, Montreal, we are advised that there is no intention to do anything in this regard at the present.

Toronto Union Station.—In connection with the recent call for tenders for clearing the site for the proposed new union station at Toronto, it is stated that there is no immediate chance of the building being started at once. G. W. Mitchell, Master of Bridges and Buildings, Toronto, stated that the company only desires to clear up the property and realize on the stone and brick.

The Belt Line.—The G.T.R. is reported to have purchased the old Lander homestead just west of the Toronto and York Radial Ry. west of Yonge St., and bordering on the old belt line. It is stated that the object of the purchase is to construct a yard there to be used in connection with the old station and yard on the east side of Yonge St. The purchase has revived the stories of a reconstruction of the old belt line, and its utilization for freight purposes between the yards at Mimico and at East York. The company's officials state that no good object would be at present attained by the reconstruction of the belt line. The only use of the line at present is that the eastern portion can be used as a siding for stock cars at the eastern end.

London Improvements.—Work was started in the London, Ont., yards Nov. 25, on raising and reballasting a number of tracks. The work is not regarded as having any bearing on the general plan of track elevation, which has been under discussion for some years. The Grand Central Hotel, London, has been purchased by T. P. Phelan, of the Canada Railway News Co., and it is stated that the purchase has been made so that when the contemplated improvements are carried out, the new station will have hotel accommodation attached to it.

Strathroy Station and Yards.—A press report states that plans for the remodelling of the station at Strathroy, Ont., have been prepared, and will be carried out at an early date. It is also said that waterworks will be installed in the yard, and other improvements will be carried out.

Port Huron Shops.—The Mayor of Port Huron, Mich., has been informed that E. H. Fitzhugh, Third Vice-President G.T.R., is negotiating with an eastern manufacturer to take over the portion of the company's shops which have been vacated in consequence of the opening of the new shops at Battle Creek, Mich. (Dec., 1908, pg. 869.)

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

PYLE-NATIONAL ELECTRIC HEADLIGHT CO.

MONADNOCK, CHICAGO

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this. Complete copies of any of the orders summarized below, or of others previously passed by the Commission, will be furnished for 25 cents, cash to accompany requests for copies in all cases.

In our last issue, order 5583 was summarized as follows:

5583. Nov. 10.—Ordering that the crossing at Aylmer St., Peterboro, Ont., have watchman at same daily from 6 a.m. to 7 p.m., cost of same to be divided between the C.P.R. and the City of Peterboro.

The summarizer, in preparing this, made a mistake; it should have read:

5583. Nov. 12. — Authorizing Manitoba Government to erect telephone wires across G.T.P.R. tracks one mile west of Rivers, Man.

5584. Nov. 12.—Authorizing C.N.O.R. to construct bridge over Greene's Creek, mileage 52, west from Hawkesbury, Ont.

5585. Nov. 12.—Authorizing Bell Telephone Co. to place wires across G.T.R. at foot of Peter St., Toronto.

5586. Nov. 12.—Authorizing Manitoba Government Telephone Commission to place wires across C.N.R. at Loretta.

5587. Nov. 12.—Authorizing Toronto Electric Light Co. to place conduit ducts under C.P.R. at Christie St., North Toronto.

5588. Nov. 11.—Authorizing Manitoba Government Telephone Commission to place wires across C.N.R. near Lavenham.

5589, 5590. Nov. 11.—Authorizing Bell Telephone Co. to place wires across C.P.R. at the main road, Megantic, and half-a-mile north of Labelle, Que.

5591. Nov. 11.—Authorizing C.P.R. to open for traffic the portion of its Wolseley-Reston branch from mileage 98.2 to Wolseley, Sask., 24 miles.

5592. Nov. 11.—Approving C.N.O.R. location through Gurd and Patterson tps., Parry Sound district, Ont., mileage 228.75 to 242.75, west from Ottawa, Ont.

5593. Nov. 11.—Authorizing Water Commissioners of Guelph, Ont., to lay water main under G.T.R. at Crimea St.

5594. Nov. 11.—Authorizing New Brunswick Telephone Co. to place its wires across C.P.R. at Perth, N.B.

5595. Nov. 11.—Approving revised location of Esquimalt and Nanaimo Ry., Wellington-Alberni extension, from mileage 125 to 133.21.

5596. Nov. 11.—Authorizing G.T.P.R. to cross road allowances in Saskatchewan between mileage 100.298 and 153.60.

5597. Nov. 11.—Authorizing G.T.R. to construct spur line, and a spur therefrom, to Hiram Walker & Son's premises, Walkerville, Ont.

5598. Nov. 12.—Authorizing Edmonton Ry. Co., through application of City of Edmonton, to cross, at level, with its lines and poles, the G.T.P.R. and the C.N.R. at intersection of First St. and Namayo Ave., Edmonton, Alta.

5599-5604. Nov. 13.—Authorizing the Bell Telephone Co. to erect wires across W.E. & L.S.R. Co. at various points.

5605. Nov. 4.—Authorizing C.P.R., lessees of Ontario & Quebec Ry., to change location of its spur to Sherwin-Williams Paint Co.'s premises, approved by order 4857, of June 2, 1908.

5606. Sept. 14.—Ordering G.T.P.R. to treat with the John Arbuthnot Co., Ltd., of Winnipeg, with respect to certain property in Winnipeg, owned by applicants, included in location of railway company's line approved by order 3507, of Aug. 15, 1907.

5607. Nov. 4.—Directing the C.P.R. to construct highway crossing in Mortlach, Sask.

5608. Nov. 3.—Authorizing City of Edmonton to construct, at rail level, the lines of its electric railway and erect poles and wires across Calgary & Edmonton Ry., at White Ave., Strathcona, and at intersection of proposed line of C. & E.R. Co. with Jasper St., near Tenth St., Edmonton.

5609. Oct. 20.—Directing Michigan Central Rd. to provide farm crossing for R. N. MacVicar, Brook tp., Ont.

5610. Sept. 14.—Ordering G.T.P.R. to treat with C. R. Muttleberry, Winnipeg, with respect to certain lands owned by applicant in Winnipeg, through which the G.T.P.R. is intended to pass, as to the purchase of the said property.

5611. Oct. 20.—Dismissing complaint of W. Wigle, Kingsville, Ont., against refusal of Pere Marquette Rd. to carry passengers on its way freight or local trains.

5612. Nov. 4.—Allowing G.T.R. to leave out filling and packing mentioned in sec. 230 of the Railway Act, 1903, from Dec. to April in each year, both months included.

5613. Oct. 20.—Dismissing complaint of W. Wigle, Kingsville, Ont., that W.E. & L.S.R. Ry. is charging excessive rates for passenger traffic, in violation of the provisions of the Railway Act.

5614. Oct. 22.—Authorizing C.P.R. to cross road allowances on its Stoughton-Weyburn branch, Sask., between mileage 0 and 36.

5615. Sept. 14.—Authorizing G.T.P.R. to construct its railway over road allowances in Miniota municipality, Man.

5616. Oct. 6.—Authorizing C.P.R. to cross road allowances on its main line grade diversion, on Medicine Hat section, between Kincorth & Walsh, Alta., between mileage 102.11 and 110.56.

5617. Oct. 28.—Directing Ottawa Electric Ry. not to allow passengers to stand on front platforms of cars. That motormen be forbidden to engage in conversation with passengers or others while cars are in motion. That a printed notice to this effect be posted in a conspicuous place inside every car. That the distance between cars on the Britannia Line be not less than 1,000 ft. while descending grades. That cars carrying passengers shall always have both a motorman and conductor upon them while in operation.

5618. Nov. 18.—Authorizing R. H. Ashton, Morrisburg, Ont., to lay a water pipe under G.T.R. in Morrisburg, Ont.

5619-5628. Nov. 18.—Authorizing Bell Telephone Co. to place its wires across G.T.R., 1 mile west of St. Basile station, Que.; St. Bruno station, 1½ miles east of Ridgeway station, Ont.; Albert St., Stratford, Ont.; ½-mile northeast of Port Dover, Ont.; 3 miles north of Beeton station, Ont.; 3½ miles southeast of Alliston station, Ont.; 2½ miles southeast of Alliston station, Ont.; 1 mile east of St. Bruno station, Que., and at St. Basile station, Que.

5629. Nov. 18.—Authorizing C.P.R. to open for traffic the portions of its line from mileage 0 to 14.0, and from 18.6 to 31.2, Kenora section; from mileage 51.1 to 63.5, from 97.9 to 104.3, from 104.3 to 115.0, and from 127.8 to 133.5, Ignace section; and the second track of the double-track diversion, from mileage 98.6 to 99.0, from mileage 102.64 to 104.81, and from mileage 130.0 to 132.0, Ignace section.

5630. Nov. 18.—Authorizing C.P.R. to construct a bridge at mileage 12.55, Owen Sound section.

5631, 5632. Nov. 18.—Authorizing Alberta Government Telephones to place wires across C.P.R., ½-mile west of Coaldale, and 2 miles west of Woodpecker, Alta.

5633. Nov. 13.—Authorizing C.P.R. (Walkerton & Lucknow Ry.) to cross certain highways in Grey and Bruce counties, Ont.

5634. Nov. 5.—Ordering G.T.P.R. to treat with Graves & Ferris, as owners of the n.e. ¼ of sec. 16-53-24, w. 4th m., through which the railway is intended to pass, respecting the purchase of same.

5635. Sept. 23.—Approving location of C.N.R. Goose Lake branch, from where it joins the Qu'Appelle, Long Lake & Saskatchewan Ry. in Saskatoon, Sask., to sec. 6-31-12, west of 3rd m., mileage 57.96.

5636. Nov. 3.—Authorizing the People's Telephone Co. and E. P. Smith to place wires across C.P.R. near Johnville station, P.Q.

5637. Nov. 3.—Dismissing application of C. Franche, Wendover, Ont., for farm crossing over C.N.R.

5638. Nov. 3.—Authorizing St. Maurice & Champlain Telephone Co. to make telephonic connections with ticket offices in stations and with freight offices of the C.P.R. in Louiseville, Yamachiche, Batiscan, Ste. Anne de la Perade, and Lac a la Tortue, Que.

5639. Nov. 3.—Authorizing the C.N.Q.R. to take part of lot 8, Longue Pointe, Que., property of Montreal Protestant House of Industry and Refuge for the construction of a Y.

5640. Nov. 19.—Authorizing G.T.P. Telegraph Co. to place wires across C.N.R. east of Portage la Prairie, Man.

5641. Nov. 14.—Ordering that the derails provided at the crossing of the C.N.Q.R. by the Montreal St. Ry., at the intersection of Valois Ave. and Ontario St., Montreal, be interlocked with home signals and otherwise protected, by Dec. 31, 1908.

5642. June 23.—Authorizing C.N.R. to construct an overhead crossing across C.P.R. near Bell's Corners, at mileage 12.03 from Ottawa.

5643. Dec. 4.—Authorizing the City of Portage la Prairie, Man., to lay water and sewer mains under C.P.R. at Gaddy St.

5644. Nov. 3.—Authorizing C.P.R. to take possession of parts of the south halves of lots 34 and 35, 3rd con., Humphrey tp., Parry Sound district, Ont., belonging to C.N.O.R.

5645. Nov. 3.—Rescinding order 5107, dated July 28, 1908, directing G.T.R. to install an electric bell at highway crossing in Cornwall tp., Ont.

5646. Nov. 3.—Authorizing G.T.R. to construct spur lines from lot 5 to lot 7, 12th con., Tay tp., Ont.

5647. Nov. 20.—Regulations for the erection of mail cranes. See pg. 27.

5648. Nov. 20.—Authorizing Mount Carmel & Centralia Telephone Co. to place wire across G.T.R. north of Centralia station, Ont.

5649. Nov. 20.—Authorizing town of Thorold, Ont., to place wires for lighting purposes across G.T.R. at two points at Thorold.

5650. Nov. 20. — Authorizing Manitoba Government Telephone Commission to place wires across C.P.R. near Plum Coulee.

5651. Nov. 12.—Ordering Toronto Electric Light Co. to remove certain poles east of Scott St., Toronto, near the G.T.R., complained of by the latter company, within 4 months from Nov. 12, 1908.

5652. Nov. 20.—Authorizing C.P.R., as lessees of British Columbia Southern Ry., to construct spur line to the East Kootenay Lumber Co.'s premises.

5653. Nov. 3.—Directing C.P.R. to submit plans for approval of Board, showing a 16 ft. clearance over C.N.R. tracks at Little Key River, Ont., and to make alterations at said crossing in accordance therewith, within 50 days.

5654. Nov. 16.—Ordering C.P.R. to complete work of connecting its railway with the G.T.R. at Galt, Ont., by Jan. 1, 1909.

5655. Nov. 10.—Authorizing Guelph & Goderich Ry. Co. to cross road allowances on

its Listowel branch, from mileage 0.00 to 16.54.

5656. Nov. 12.—Ordering that the speed of the C.N.R., G.T.R. and C.P.R., when crossing Yonge St., Toronto, shall not exceed 4 miles an hour between 7 a.m. and 12 p.m., from May 11 to Oct. 15 of each year.

5657. Nov. 21.—Authorizing C.N.R. to connect its Prince Albert branch with the Qu'Appelle, Long Lake & Saskatchewan Ry. in Prince Albert, Sask.

5658. Nov. 21.—Approving C.P.R. specifications for steel bridges, comprising sections A to E.

5659. Nov. 21.—Authorizing C.N.O.R. to reconstruct superstructure of bridge across North Nation River, 23.6 miles west of Hawkesbury, Ont.

5660. Nov. 21.—Rescinding order 5463, dated Oct. 22, 1908, authorizing C.P.R. to construct the bridges described therein on the New Brunswick Southern Ry.

5661. Nov. 10.—Ordering Berlin & Waterloo St. Ry. to pay the G.T.R. $1.25 a day, from Dec. 12, 1905, to May 1, 1907, and that the Light Commissioners of Berlin, Ont., pay the G.T.R. $1.25 a day from May 1, 1907, to Nov. 10, 1908, and thereafter the G.T.R. $1.25 a day until further ordered by the Board, re King St. crossing, Berlin, Ont.

5662. Nov. 16.—Dismissing application of Board of Trade of Preston, Ont., for order directing C.P.R., G.T.R. and the B.W.W. & L.H. Ry. to connect their lines in Galt, Preston, Hespeler, Berlin and Waterloo, for interswitching purposes.

5663. Nov. 16.—Dismissing application of Town of Hespeler and Board of Trade of Galt, Ont., for order directing C.P.R., G.T.R. and B.W.W. & L.H. Ry. Co., to connect their lines in Galt, Preston, Hespeler, Berlin and Waterloo, Ont., for interswitching purposes.

5664. Nov. 16.—Dismissing application of Board of Trade of Berlin, Ont., for order directing C.P.R., G.T.R., and B.W.W. & L.H. Ry. Co., to connect their lines in Galt, Preston, Hespeler, Berlin and Waterloo, Ont., for interswitching purposes.

5665. Nov. 16.—Dismissing application of Board of Trade of Waterloo, Ont., for order directing G.T.R., C.P.R., and B.W.W. & L.H. Ry. Co., to connect their lines in Galt, Preston, Hespeler, Berlin and Waterloo, Ont., for interswitching purposes.

5666. Nov. 10.—Ordering G.T.R. to erect gates and place a day and night watchman at Thames St., Ingersoll, Ont.

5667. Nov. 24.—Authorizing Brantford & Hamilton Electric Ry. Co. to open for traffic the portion of its line from Alfred St. to Market St., Brantford, Ont.

5668. Nov. 23.—Rescinding order 5510, dated July 14, 1908, authorizing the Grand Valley Ry. Co. to cross the G.T.R. in Brantford, Ont.

5669. Nov. 24.—Approving Supplement 4 to Canadian Classification N1.13, subject to certain conditions.

5670. Nov. 11.—Ordering C.N.O.R. to construct a farm crossing opposite property of Mrs. H. A. McLeod, Stoney Brae, Ont.

5671. Nov. 10.—Dismissing complaint of H. J. Gibney and other residents of Alliston, Ont., against the closing of Nelson, Wellington and Queen sts.

5672. Nov. 27.—Authorizing G.T.P.R. to transport on construction trains, or by special service if necessary, workmen, contractors, employes, etc., with their effects, between Fort William and the end of track, mileage 0.5 to 188.2, Lake Superior branch.

5673. Nov. 10.—Dismissing application of J. S. Digman, Toronto, for order directing Bell Telephone Co. to furnish him with a copy of its latest Official Telephone Directory for Western Ontario and the United States.

5674. Nov. 23.—Authorizing C.P.R. to construct spur to the Astorville Lumber Co.'s premises.

5675-5677. Nov. 23. — Authorizing Bell Telephone Co. to place wires across G.T.R. tracks at Delhi, Ont., near Marshville station, Ont., and near air line station, Simcoe, Ont.

5678. Nov. 25.—Directing that locomotives operated in Ontario shall be equipped so as to prevent unnecessary emission of smoke. (See pg. 9.)

5679. Nov. 25.—Approving G.T.P. Telegraph Co. tolls.

5680. Nov. 11.—Ordering C.P.R. to re-arrange approaches to Parry Sound road and other highway crossings in Foley tp., where crossed by the railway in that township.

5681. Nov. 12.—Authorizing G.T.R. to erect and maintain gates and watchmen at Ellis and Windermere Avenues, York tp., Ont.

5682. Nov. 17.—Authorizing G.T.R. Co. to construct 2 spur lines to the Expanded Metal & Fire-Proofing Co.'s premises, Toronto.

5683. Nov. 11.—Directing C.N.O.R. to construct a cattle-pass in Foley tp., Ont., where A. Oastler shall designate.

5684. Nov. 11.—Directing C.N.O.R. to build two culverts in Foley tp., Ont., where A. Oastler shall designate.

5685. Nov. 11.—Directing C.N.O.R. to construct a watering-place where its railway intersects A. Oastler's farm, in Foley tp., Ont.

5686. Nov. 3.—Authorizing City of Ottawa to construct an aqueduct for waterworks purposes along a part of lot 39, con. A, Ottawa, front of Nepean tp.

5687. Nov. 20.—Dismissing application of Crow's Nest Pass Coal Co. for order requiring C.P.R. Co. to provide a special tariff of tolls for applicant company. (See pg. 11.)

5688. Nov. 12.—Authorizing G.T.R. Co. to install and maintain gates and watchmen at the Jameson Ave. crossing, Toronto.

5689. Nov. 13.—Dismissing application of F. W. Wegenast, Brampton, Ont., for order directing G.T.R. to issue him a 55-trip ticket for use between Brampton and Toronto. (See pg. 13.)

5690. Nov. 17.—Regulations for lighting passenger cars. (See pg. 31.)

5691. Nov. 24.—Authorizing the City of Edmonton and Strathcona Radial Tramway to use such portions of Edmonton, Yukon & Pacific Ry. Co.'s right-of-way as may be necessary for approaching and crossing Dominion Government bridge across North Saskatchewan River, connecting Strathcona and Edmonton.

5692. Nov. 3.—Directing C.N.O.R. to connect the spur from its main line in Hawkesbury, Ont., to Riordon's pulp mills yards, with the G.T.R. track in the yards.

5693. Nov. 3.—Directing that the new road the C.P.R. was authorized to construct by order 5217, from the new station location at milepost 22 to the road that runs from the village of Bolton to the 6th Line, be 18 ft. wide; and that the C.P.R. old main line and switches to the premises of A. McFall, Bolton, be left open for traffic until May 1, 1909.

5694. Nov. 27.—Authorizing C.N.R. to open for freight traffic its Goose Lake branch railway between Saskatoon and Zealandia, Sask., 60 miles.

5695, 5696. Nov. 27.—Authorizing Bell Telephone Co. to place wires across the Pere Marquette Rd. at Adelaide St., London, Ont.

5697, 5698. Nov. 27. — Authorizing Bell Telephone Co. to place wires across W.E. & L.S.R. Ry. Co. near Essex and Kingsville, Ont.

5699. Nov. 27.—Approving change of location of C.P.R. Weyburn-Lethbridge branch from sec. 21, tp. 8, r. 14, west of 2nd mer., at Weyburn, to sec. 4, tp. 8, r. 29, west 2nd mer.

5700. Nov. 27.—Authorizing C.P.R. to construct spur line to G. Gauthier's premises, St. Martin parish, Laval county, Que.

5701. Nov. 27.—Authorizing C.P.R. to construct spur in Sudbury, Ont.

5702. Nov. 27.—Authorizing C.P.R. to construct a spur line at Mile End, Que.

5703. Nov. 27.—Authorizing Qu'Appelle, Long Lake and Saskatchewan Ry. & Steamboat Co. to construct a spur line to the Sturgeon Lake Lumber Co.'s premises, Prince Albert, Sask.

5704. Nov. 27.—Authorizing C.P.R. Co. to open for traffic the portion of its line between Sheho and Leslie, Sask., provided the speed of trains is limited to 15 miles an hour.

5705-5707. Nov. 27.—Authorizing Bell Telephone Co. to place wires across C.P.R. near L'Epiphanie station, Que.; at Hunt St., Hamilton, Ont., and near Wingham station, Ont.

5708. Nov. 27.—Authorizing C.P.R. to construct spur line to A. Hain's premises, West Toronto, Ont.

5709. Nov. 27.—Authorizing Niagara, St. Catharines & Toronto Ry. to construct a spur line to Lincoln Paper Mills, Merritton, Ont.

5710. Nov. 27.—Authorizing C.P.R. to construct a spur line to Turnbull & Cousin's premises, near Nevis, Alta.

5711. Nov. 27.—Authorizing B.C. Telephone Co. to place wires across C.P.R. at Huntingdon, B.C.

5712. Nov. 27.—Authorizing C.P.R. Co. to use bridges on Emerson section, Central Division.

5713. Nov. 27.—Authorizing C.P.R. Co. to construct bridge across right-of-way at mileage 99.88, Smith's Falls section, Ont.

5714. Nov. 27.—Approving changes in C.P.R. Quill Lakes branch, from sec. 36, tp. 30, r. 11, west 2nd mer., to sec. 23, tp. 33, r. 22, west 2nd mer.

5715. Nov. 27. — Authorizing C.N.R. to open for traffic the portion of its line from Rossburn to Russell, Man.

5716. Nov. 27.—Authorizing C.P.R. to construct spur line to the False Creek Lumber Co.'s premises, Vancouver, B.C.

5717. Nov. 27.—Authorizing Bell Telephone Co. to place wires across C.P.R. near Hillsburg station, Ont.

5718. Nov. 18.—Approving revised location of Niagara, St. Catharines & Toronto Ry. through lot 27, cons. 5, 6, and 7, Crowland tp., Ont.

5719. Nov. 28.—Directing that contracts, conditions, by-laws, etc., of the United States and the Great Northern Express Companies, may continue to be used and have effect until June 1, 1909, subject to terms and conditions contained in order of Nov. 22, 1907.

5720. Nov. 28.—Directing that, subject to terms and conditions contained in order of Nov. 8, 1906, the time during which the North American Telegraph Co. may charge such telephone tolls as it was, immediately previous to July 13, 1906, authorized by law to charge, be extended until June 1, 1909.

5721. Nov. 28.—Directing that all contracts, by-laws, etc., of the National and American Express Companies may continue in use and shall have effect until June 1, 1909.

5722. Nov. 28.—Directing that, subject to terms and conditions expressed in order of Nov. 8, 1906, the period during which the Bell Telephone Co. may charge such telephone tolls as it was, previous to July 13, 1906, authorized by law to charge, be extended to June 1, 1909.

5723. Nov. 28.—Authorizing W. C. Albert, Edmundston, N.B., to lay a water pipe under Temiscouata Ry.

5724. Nov. 28.—Extending until June 1, 1909, the time for the approval of the Can-

adian and Dominion Express Companies' contracts, tolls and by-laws.

5725. Nov. 28.—Authorizing Light and Heat Commissioners of Guelph, Ont., to lay a gas pipe under the C.P.R. at Eramosa Road.

5726. Nov. 30.—Approving plans showing temporary repairs to the Ottawa & New York Ry. drawbridge over Cornwall Canal, and authorizing the company to use the bridge until further ordered.

5727. Nov. 30.—Approving revised location of C.N.Q.R. St. Jacques branch, from St. Jacques to Rawdon, Que.

5728. Nov. 30.—Authorizing Bolton Telephone Co. to place wires across C.P.R. in Albion tp., Ont.

5729. Nov. 28.—Authorizing Cobourg Utilities Corporation to lay water pipe under G.T.R. on Ontario St., Cobourg, Ont.

5730. Nov. 30.—Authorizing Bell Telephone Co. to place wires across T.H. & B.R., corner of Hayt and McMurray Sts., Dundas, Ont.

5731. Nov. 24.—Dismissing application of T.H. & B.R. for authority to renew or alter highway bridge under which the T.H. & B.R. crosses the public highway in Brantford tp., Ont., commonly called the London & Hamilton road.

5732. Dec. 1.—Directing C.N.R. to ballast and put in safe and proper condition its Prince Albert branch between Gilbert Plains Jct. and Prince Albert, Sask.

5733. Nov. 26.—Directing C.P.R. to refund to C. E. Deakin, of Montreal, 2c. per 100 lbs. on the 16 carloads of gravel shipped from Miletta pit, near Magog, to Montreal.

5734. Nov. 24.—Authorizing G.T.R. to take additional lands in St. Hilaire parish, Que.

5735. Nov. 26. — Authorizing Manitoba Government Telephone Commission to place wires across C.N.R. at Carberry, Man.

5736. Nov. 25.—Regulations respecting running of freight cars on main line passenger trains. (See pg. 27.)

5737. Nov. 26.—Authorizing North Cowichan municipality, B.C., to construct a highway across E. & N.R., at milepost 41+610.

5738. Nov. 3.—Amending order 4407, dated Mar. 6, 1908, approving location of Montreal & Southern Counties Ry. between Montreal and St. Lambert, Que.

5739. Nov. 4.—Dismissing the complaint of residents of Fort Erie, Ont., alleging that the M.C. Rd. unjustly discriminates against Fort Erie, and in favor of Bridgeburg, in the matter of freight rates on shipments from Black Rock, N.Y.

5740. Nov. 16.—Dismissing application of Algoma Central & Hudson Bay Ry. for order determining continuous routes via Sarnia, Pt. Edward, Goderich, etc., for traffic between points in Canada and easterly and southerly thereof; and fixing the tolls and apportioning the same between the companies interested, as a joint tariff for such continuous routes; and determining the date when the toll or tolls shall come into effect. (See pg. 35.)

5741. Dec. 1.—Dismissing application of H. S. Conn, Ottawa, for order directing C.P.R. to refund certain overcharges on shipments of hay from West Moncton, Ont., and the G.T.R. from Mitchell and Harley, Ont., all consigned to Temagami, on T. & N.O.R.

5742. Dec. 1.—Directing C.N.Q.R. to reconstruct crossing on F. Leduc's farm, St. Casimir parish, Que.

5743. Nov. 26.—Authorizing City of Ottawa to lay water main under G.T.R. at Lees Ave., Ottawa.

5744. Nov. 26.—Authorizing City of Ottawa to lay water main under C.P.R. tracks at Laurel Ave. and Champagne Ave., Ottawa.

5745. Nov. 26.—Authorizing the City of Wetaskiwin, Alta., to construct a highway across the portion of the C. & E.R. which intersects proposed extension of Pearce St.

5746. Oct. 13.—Authorizing T.H. & B. Ry. Co. to construct a farm crossing where its railway abuts H. New's lands in Barton tp., Ont.

5747. Nov. 21.—Authorizing Ingersoll Telephone Co. to place wires across T.L.E. & P.R., on Charles St. West, Ingersoll, Ont.

5748. Nov. 28.—Approving "Form MX 27" and "Form MX 70," of Maritime Express Co., and permitting same to be used until June 1, 1909, subject to terms contained in order of Dec. 19, 1907.

5749. Dec. 3.—Extending for three months from date of order, time during which the C.N.O.R. may use for construction purposes the crossing of its line with the G.T.R. spur line to Edwards' mill, Rockland, Ont.

5750. Dec. 3.—Authorizing G.T.P.R. to close road allowance in secs. 8 and 9, tp. 26, r. 12, west 2nd mer., and between secs. 4 and 5, and 8 and 9, tp. 26, r. 12, west 2nd mer.; and to open in lieu thereof new roads in secs. 4, 5, 8 and 9, tp. 26, r. 12, west 2nd mer.

5751. Dec. 3.—Dismissing application of Town of Port Arthur for order authorizing it to construct under the C.P.R. a flume for generating additional power at the powerhouse on the shore of Thunder Bay.

5752. Dec. 3.—Authorizing Commissioners of the Transcontinental Ry. to take a portion of the Temiscouata Ry. lands in Town of Edmundston and parish of Madawaska, N.B.

5753. Dec. 3.—Dismissing application of C.P.R. for order directing McIntosh & Gullett so to construct a trestle over the siding at their premises at North Toronto, that there will be at least a clear headway of 7 ft. between the top of the highest freight car used by the applicant and the lowest beams of the trestle.

5754. Dec. 3.—Amending order 5568, dated Nov. 3, 1908, by adding after the word "is" in the fifth line the words "or other employe of the railway company specifically charged with such duty by the company."

5755. Dec. 3.—Dismissing application of Township of Grantham, Que., for an order authorizing it to cross the C.P.R. near Drummondville, Que.

5756. Dec. 3.—Authorizing the Bell Telephone Co. to place wires across W.E. & L.S.R. Ry. at private right-of-way at C.P.R. and Gravel Road, southeast of Windsor, Ont.

5757. Dec. 3.—Rescinding order 5512, in re application of Grand Valley Ry. to cross B. & H. Elec. Ry. in Hamilton, Ont.

5758. Dec. 3.—Authorizing the C.P.R. to construct a branch line across Alder St., Vancouver, B.C.

5759. Dec. 3.—Authorizing A. Broder, Morrisburg, Ont., to lay a water pipe under G.T.R. on Church St., Morrisburg, Ont.

5760. Dec. 3.—Dismissing application of Ingersoll Telephone Co. for leave to erect a cable across T.L.E. & P. Ry. in Ingersoll, Ont.

5761. Dec. 3.—Authorizing C.P.R. to construct its railway across Park St., Nelson, B.C.

5762. Dec. 3.—Authorizing G.T.P.R. to construct its railway across certain highways in Manitoba and certain streets in Winnipeg, Man.

5763. Nov. 23.—Authorizing Town of Oshawa, Ont., to lay water main under Oshawa Ry.

5764, 5765. Dec. 4.—Authorizing J. P. Gordon to lay water mains under C.N.R. at Gaddy and Main Sts., Portage la Prairie, Man.

5766. Dec. 3.—Authorizing Government of Alberta Telephones to place wires across C.P.R., 2¼ miles west of Tabor.

5767. Dec. 3.—Amending order 5669 by extending to Jan. 1, 1909, time within which Supplement 4 to Canadian Classification 13 shall become effective.

5768. Nov. 30.—Approving Pacific Express Co.'s contract forms, and granting leave to the company to use them until June 1, 1909.

5769. Dec. 3.—Authorizing International Portland Cement Co. to construct subway under C.P.R. in Hull, Que.

5770. Dec. 3.—Authorizing Government of Alberta Telephones to place wires across C.P.R. at milepost 84.

5771. Dec. 3.—Amending order 5672 by substituting mileage 0.00 to 188.77 for mileage 0.5 to 188.2.

5772. Dec. 3.—Dismissing application of Tilbury tp., Kent county, Ont., for order approving plans of the King & Whittle improvement drain across the C.P.R.

5773. Dec. 3.—Authorizing C.N.R. to construct a branch line in Man. to the Manitoba Ry. Co.'s Morris-Brandon branch in block 39.

5774. Dec. 3.—Authorizing Vancouver, Victoria and Eastern Ry. & Nav. Co. to make competitive tariffs for freight traffic (see pg. 31).

5775. Nov. 30.—Extending until June 1, 1909, time within which contracts, by-laws, etc., of National and American Express Companies may continue in use.

5776. Dec. 3.—Authorizing Toronto Elec. Light Co. to rearrange wires and install tile ducts under C.P.R. and G.T.R. on Esplanade, foot of Scott St., Toronto.

5777. Dec. 3.—Authorizing the City of Winnipeg to place electric light wires across C.P.R. to reach pumping station 6.

5778. Dec. 3.—Dismissing application of J. Overend & Son of Ninette, Man., alleging that the rates charged by the C.N.R. on freight shipped from Winnipeg were excessive. (See pg. 31).

5779-5781. Dec. 4.—Authorizing J. P. Gordon, to lay water mains under C.P.R. and G.T.P.R. tracks on Main and Gaddy Sts., Portage la Prairie, Man.

5782. May 18.—Authorizing G.T.R. to construct a spur line to the Knechtel Furniture Co.'s premises., Hanover, Ont.

5783. Dec. 1.—Directing C.P.R. to clean out and put in good order all ditches leading to and from culvert 89.9, as far as station 31+18, near Crookston, Ont.

5784. Dec. 7.—Dismissing application of Government of Alberta Telephones for an order to place wires across C.P.R. at experimental farm, near Lethbridge, Alta.

5785. Dec. 8.—Authorizing C.P.R. to construct a spur connecting with a siding already constructed for the Dominion Government coal shed.

5786. Dec. 8.—Rescinding order 5511, dated July 14, 1908, authorizing Grand Valley Ry. to cross the T.H. & B.R. in Brantford, Ont., provided crossing be protected by a half-interlocker.

5787. Dec. 8.—Authorizing Cataract Elec. Co. to place wires across C.P.R. in Caledon tp., Ont.

5788. Dec. 8.—Authorizing C.P.R. to construct a spur to the Sherbrooke Machinery Co.'s premises, Sherbrooke, Que.

5789. Dec. 7.—Dismissing application of G.T.R. for order extending time for construction of the branch line and station authorized to be constructed by order 2333, dated Dec. 16, 1908, between G.T.R. main line east of Port Hope viaduct and the northern division of its line north of Ontario St., Port Hope, Ont.

5790-5793. Dec. 7.—Dismissing application of the Hawthorn Hill Rural Telephone

Salary-Raising Training For Railroad Men

There is no profession in which promotion depends in any higher degree upon a man's real ability and technical knowledge than in railroading. Quick promotion then for the railroader is the result of quick and also thorough acquirement of that technical training which will qualify him to hold a higher position. In no way can the ambitious railroad employe secure this technical knowledge so quickly and yet so simply as through the I. C. S. Courses of home training. These Courses have been written by the best railroad experts on this Continent and are taught after a manner that 15 years' experience in training hundreds of thousands of ambitious men for promotion and better earnings has proved to be the most practical and efficient. These Courses include instruction in LOCOMOTIVE MANAGEMENT, LOCOMOTIVE BOILERS, STEAM CYLINDERS, and VALVE GEARS, BREAKDOWNS, COMPOUND LOCOMOTIVES, TRAIN RULES, WESTINGHOUSE and NEW YORK AIR BRAKES, CAR LIGHTING and HEATING, and ELECTRIC HEADLIGHTS.

If **YOU** wish to secure the training in your own home, in your spare time, and at an insignificant cost, that will qualify you for promotion to the highest positions in your profession, simply mark and mail this coupon and we will tell you how you can do so. The fact that we have enabled hundreds of other railroad men to secure promotion in itself warrants your careful investigation of our plan if you really wish to better yourself. Don't let a postage stamp stand between you and a better position. **Mark and mail this coupon NOW.**

5800. Dec. 7.—Dismissing application of C.N.O.R. for approval of its line from Billings Bridge to mileage 29, west from Ottawa, Ont.

Regulation for Erecting Mail Cranes.

The Board of Railway Commissioners has passed the following order, 5647: In pursuance of the powers conferred upon it by secs. 26, 30, and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf, it is ordered that every railway company subject to the legislative authority of the Parliament of Canada, operating a railway by steam power, using mail cranes, be forbidden to erect, place or maintain, on or after Jan 1, 1909, any mail crane along its line of railway, at a distance less than 7 ft. 1¾ ins. from the centre of the track to the point of the arm of the crane when in position, or at a height less than 10 ft. 10 ins. from the bottom of the rail to the top of the arm when in position. And it is further ordered that every such railway company failing or neglecting to comply with the foregoing regulation be subject to a penalty of $100 for every such failure or neglect.

Freight Cars in Passenger Trains.

The Board of Railway Commissioners has passed the following order, 5736: In pursuance of the powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf: It is ordered that every railway company subject to the legislative authority of the Parliament of Canada be forbidden to handle freight cars in through main-line passenger trains, unless such freight cars are equipped with air-brakes, steel-tired wheels, and special trucks designed for use in through passenger train service. Provided, however, that every such company shall be at liberty to use such freight cars in its through passenger service when its baggage cars, or freight cars, especially equipped as aforesaid, become disabled or unfit for use while in transit, and such cars only are available to receive the baggage or freight, as the case may be, to avoid unnecessary delay in forwarding the same. In this event the cars must not be loaded beyond their marked capacity, and the speed of the train must not exceed thirty-five miles an hour. And it is further ordered that every such railway company failing to comply with the foregoing requirements shall be liable to a penalty of not exceeding $50 for every such offence.

Canadian Northern Ry. Construction, Etc.

The Quebec and Lake St. John Ry. has filed plans for extensions of the Quebec and Lake St. John Ry. from Roberval and Chicoutimi, and it is expected that construction will be started in the spring.

Canadian Northern Quebec Ry.—At a recent meeting of the Quebec city council, a letter was read from the company, signed by W. A. Kingsland, Auditor, and H. K. Wicksteed, Chief Engineer, stating that the present yard and trackage was excessively cramped and inadequate for the requirements of the present time. The company, in view of the early opening of the direct line to Montreal, and of the Hawkesbury-Ottawa line, considered that a rearrangement of the present yard was imperative. Plans had been prepared for the solution of the difficulty. These involved the removal of the freight shed to another site and making available for passenger business six separate tracks, three for arrival and three for departure, in place of the single one now used. This arrangement involved the removal of the present shops and engine house, which were quite inadequate for the carrying on of the company's business. Plans for the company's requirements showed an area of about 20 acres to be covered with tracks and buildings. It was, in the company's opinion, impracticable and contrary to the city's interests that any such area of land within the present city limits should be devoted to this purpose, and, therefore, an outside area would have to be obtained. It was submitted that an area of land in the direction of the Beauport flats afforded the only chance for the necessary expansion of the facilities. The President had authorized progress to be made with the work, but before making a start the company desired to have the approval of the corporation to the general scheme of improvement. If the council would pass such resolutions as would enable the company to make an immediate start, the first step taken would be the erection of the car repair shop. This would have the effect of concentrating in Quebec a large amount of work now done in Shawinigan and other outside points. The letter was referred to the Finance Committee for consideration, and is being taken up in connection with the proposal to annex St. Malo and Limoileu to the city. If the amalgamation is decided upon the city council is favorable to the company's proposals, as the present agreement with the city, with respect to the location of the shops within the city, will not require to be amended. One of the conditions of the amalgamation will have to be more direct communication by means of at least one additional bridge. Dorchester bridge is a long distance away from the heart of the village, and the railway bridge has no communication except for steam and electric cars. At low water the St. Charles River, separating Limoileu from Quebec, is less than 300 ft. wide.

Tracklaying on the Garneau cut-off was completed Dec. 10, but G. Tombs, General Freight and Passenger Agent, said it was not likely that a passenger service would be operated before the spring, although schedules had been arranged.

The Department of Railways has entered into a contract with the company, under the terms of the act granting subsidies in aid of certain railways, for the construction of a line of 30 miles, from near Arundel, at the northerly terminus of the Montfort and Gatineau Colonization Ry., to the united townships of Preston and Hartwell; and for a line of 15.2 miles to connect the Montford and Gatineau Colonization Ry. with the main line of the C.N.Q.R. at St. Jerome, Que. This latter line has been constructed.

A branch line to Totogan, Man., has been opened. This is an extension of the Oakland branch, starting from Portage la Prairie, Totogan being 28 miles distant.

M. H. McLeod, General Manager, on his return to Winnipeg, after a trip of inspection over the company's Western lines, Dec. 9, stated that three spans of the six-span bridge over the Saskatchewan River at Prince Albert, Sask., had been completed, and he expected that the whole structure would be completed by March.

Canadian Northern Ontario Ry.—G. Tombs, General Freight and Passenger Agent C.N. Quebec Ry., who went over the C.N.O.R.'s new line from Hawkesbury to Ottawa, Ont., Nov. 30, stated that all that is required to put it in thorough working order is the completion of a couple of bridges. It is not likely, however, that this line will be opened for traffic until the spring. An early extension of the line westward may be looked forward to, added Mr. Tombs.

In connection with the application of the company for a right-of-way for an entrance into Ottawa, the Minister of Railways heard representatives of the company and the city council Dec. 17. It is proposed to cross the Rideau River about 1,000 ft. north of Hurdman's Bridge, run through the Stewart property and strike the G.T.R. near the Ottawa and New York Ry. new weigh scales. The Hurdman road would be crossed by a trestle about 600 ft. south of Gladstone Ave. The council expressed an opinion, in instructing its representatives, that the bridge should be built on as few piers as possible, to lessen the danger of ice jams.

Plans have been filed with the Town Clerk of Orillia, Ont., showing the location of the company's projected branch line from Udney into the town. It is expected that the line will be constructed in the spring.

W. H. Moore, Secretary C.N.O.R., stated, Dec. 12, that the company was prepared to extend its present line from Sudbury to Sellwood, Ont., to the newly opened Gowganda silver district, if the Temiskaming and Northern Ontario Ry. Commission would co-operate. The company is extending its line from Sellwood to Burwash, 20 miles, and a further distance would bring it to Gowganda. The suggestion is that the T. and N.O. Ry. should extend its line from Charlton to Gowganda, and that each line should give the other running rights.

Canadian Northern Ry.—In connection with the purchase of the Duluth, Rainy Lake and Winnipeg Ry. by the C.N.R. Co., it is stated that the agreement provides for the construction of branch lines into the Seine River country, northerly from Fort Frances, Ont. The Weyerhausers, who are interested in timber limits along the D., R.L. and W.R. in Minnesota, also own a number of limits along the Seine River valley, which the projected branch line will be constructed to develop.

Press reports state that the line will be extended northerly from Macleod's pit to Brant, in Stonewall district, Man.

A bi-weekly train service was put in operation, Dec. 1, on the Goose Lake branch, extending from Saskatoon to Zealandia, about 70 miles.

A Saskatoon, Sask., press report states that a survey party in charge of B. Beaumont and —. Mackenzie started out, Dec. 3, to locate a route for the company's projected railway to Calgary. It is said to be desired to have the location so far completed that construction may be gone on with in the spring. (Dec., 1908, pg. 879.)

As a result of the settlement of the strike of machinists on the C.P.R., there has been a rearrangement of the officials of the federation of employes, the offices of which are at Montreal. P. Kennedy, of the Machinists' Union, has been elected to succeed B. Hardy as President; A. R. Mowatt becomes Vice-President, and Jas. Somerville becomes Secretary-Treasurer, succeeding J. H. McVety.

THE HART-OTIS CAR CO., LIMITED

Successors to Dominion DUMP CAR Co., Limited

MONTREAL

Railway Finance, Meetings, etc.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales, for Oct., $32,544, against $37,335 for Oct., 1907. Approximate railway traffic receipts for Nov., $39,424, against $31,937 for Nov., 1907. Total net profits for 5 months ended Nov. 30, $147,993.

Atlantic, Quebec and Western Ry.—A special general meeting of shareholders was called to be held at the company's offices, London, Eng., Dec. 16, 1908, for the purpose of authorizing the directors to issue the securities which the company is empowered to issue under sec. 3 of its act of 1908, in respect of the railways therein referred to, and to give the directors power to secure such securities and to dispose of the same according to law. The meeting was also called for the purpose of empowering the directors to create, and issue from time to time, consolidated bonds or perpetual or terminal debenture stock to the extent in all of $45,000 a mile of railway constructed or under contract to be constructed, or of the railways which the company is authorized to construct or acquire, and to authorize the directors to execute on behalf of the company security for the same.

Canada Atlantic Ry.—An issue of consolidated first mortgage 4% gold bonds, amounting to £598,000, has been placed on the London, Eng., market, through Glyn, Mills, Currie & Co., by the G.T.R., which owns the railway. The issue price was 93, of which 10% was due on application, 25% on allotment, and 58% on Dec. 30. The proceeds of the bonds were required for the purpose of meeting a similar amount of 5% bonds maturing Jan. 5, the holders of the latter having the option of exchanging their bonds on the basis of £102 14s. 9d. for each $500 in payment in full for the bonds of the present issue, the balance of £9 14s. 9d. % due to the holders being paid in cash on Jan. 5. The bonds form part of a total issue of £3,292,200, of which £2,282,400 are already on the market and £411,400 are retained in the treasury to be issued for betterments, etc. The principal and interest are guaranteed unconditionally by the G.T.R. The interest is payable Jan. 1, and July 1, and the principal is payable at par on Jan. 1, 1955. The bonds are secured by a trust deed and constitute a consolidated first charge on all the real and personal property of the Canada Atlantic Ry. Co., excepting ships and branches or extensions to be hereafter constructed.

Canadian Northern Ry.—An issue of £1,127,400 first mortgage 4% land grant bonds was placed on the London, Eng., market recently, and when the subscription list closed, Nov. 25, it was reported that the issue had been oversubscribed. The price was 95%, the bonds being issued in denominations of £100 and £500. Besides constituting a direct indebtedness of the C.N.R., the bonds are secured by a specific first charge in favor of trustees upon 1,250,000 acres of freehold lands in Manitoba and Saskatchewan. Of these lands, since July, 1907, there have been sold 139,000 acres at an average price of $8.46 an acre. Interest is payable Jan. 1, and July 1, a full year's interest being payable July 1, while the principal and interest is repayable at par July 1, 1938, the company reserving the right to redeem the bonds at 103 and accrued interest on three months' notice at any time before July 1, 1918, or thereafter at par.

Central Ontario Ry.—A meeting of shareholders was called to be held at Trenton, Ont., Dec. 7, for the purpose of authorizing the directors to issue bonds to the amount of £50,000 sterling, or such other amount as may be necessary to retire the outstanding bond issue.

Dominion Atlantic Ry.—Gross earnings for Oct., $130,500, against $130,140 for Oct., 1907. Total gross earnings for 10 months ended Oct. 31, $1,071,300, against $1,036,961 for same period 1907.

Grand Trunk Pacific Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the company to issue a further issue of bonds, or perpetual or terminable debenture stock, or both, for such amounts as may be determined upon and fixed by such act, and to apply the proceeds to the general purposes of the company.

Grand Trunk Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the company to create and issue additional Grand Trunk debenture stock, and Grand Trunk 4% guaranteed stock, respectively, in such amounts, subject to the limitations to be fixed in the act, as the shareholders may from time to time determine, and to apply the proceeds to the general purposes of the company; also repealing sec. 19 of the G.T. Arrangements Act of 1862, and substituting other provisions therefor. See also Canada Atlantic Ry.

Lake Superior Corporation.—The Philadelphia, Pa., banks, which had taken over several million dollars' worth of securities of the company in settlement of loans upon which interest had not been paid, has disposed of about $5,000,000 to interests represented by New York and Philadelphia parties. The transaction was completed by the President of the Commercial Trust Co., of New York City, on the part of the purchasers.

New York Central and Hudson River Rd.—Press reports from New York City state that the Vanderbilt interests at present own less than 5% of the stock of this company, and that the largest shareholder is E. H. Harriman. It is also stated that C. M. Depew will shortly retire from his position as chairman of the Board, and that E. H. Harriman will be elected a director, with the intention of ultimately succeeding to the chairmanship of the Board.

Quebec Bridge and Ry. Co.—A special general meeting of shareholders has been called to be held at Quebec, Jan. 4, to authorize the execution of all documents, conveyances and deeds, and the performance of all other acts required or necessary to grant, surrender and release to the Dominion Government all the corporate and individual right, title and interest of the company and its shareholders, in the undertaking, assets, property and franchises of the company; the whole pursuant to the provisions of chap. 59 of the Statutes of 1908, and under the agreement between the Government and the company, dated Oct. 19, 1903, and set out in the schedule to chap. 54 of the Statutes of 1903.

A meeting of the directors was held at Quebec, Dec. 2, 1908, for the purpose of taking the necessary steps for effecting the transfer. The company was originally incorporated in 1887, but practically nothing was done until 1896, when a reorganization was effected, with S. N. Parent as President. On a promise of Dominion aid, the subscribed share capital was increased to $1,000,000, the total amount of capital paid in being $263,700. Subsidies were voted by Quebec City, the Quebec Provincial Legislature, and the Dominion Parliament, and the work proceeded. In 1903 an act was passed by the Dominion Parliament guaranteeing an issue of bonds for the construction of the bridge. The partially constructed bridge collapsed in Aug., 1907, and in 1908 an amendment to the act of 1903 was passed, which gave the Government the right to assume control of the structure, its assets, etc., at the same time guaranteeing the shareholders 5% interest and a bonus of 10% on the amount of stock paid in. This act came into effect on Dec. 1, when an official from the Department of Railways came from Ottawa to liquidate accounts with the Quebec Bridge Company and pay the shareholders, who received $355,000, an advance of $101,300 over the amount they originally paid.

Quebec and Lake St. John Ry.—Gross earnings for Oct., $64,835.24; Nov., $57,742.65; against $65,454.62 and $63,585.27 for Oct. and Nov., 1907. Gross earnings for 11 months ended Nov. 30, $588,075.37, against $600,259.62 for same period 1907.

St. Mary's and Western Ontario Ry.—The Ontario Railway and Municipal Board has issued an order validating a loan of $20,000 made by the township of East Nissouri to the company. The portion of the company's line already constructed extends from St. Mary's to Embro, Ont., and is being operated under lease by the C.P.R.

Temiscouata Ry.—Total traffic receipts for Nov., $17,549.92; aggregate for 11 months ended Nov. 30, $209,835.96.

White Pass and Yukon Ry.—A half-yearly dividend of 2% has been declared on the £1,375,000 stock. This dividend, with the 2% paid in July, 1908, makes the total distribution for the year at the rate of 4%, as compared with 5% which was paid in each of the three previous years.

Gross earnings for Oct., $111,875. Total for 4 months ended Oct. 31, $820,926.

Duluth, Rainy Lake and Winnipeg Ry.

D. D. Mann, Vice-President Canadian Northern Ry., said, in Toronto, Dec. 14: "We have bought this railway from the Virginia Lumber Co., and will take it over shortly. The extension of the line to Duluth will not be immediately considered. Our object is to get connections to Chicago for our line to Winnipeg, and, of course, the line into the U.S. will be a return outlet for Canadian produce. With the acquisition of this line our system will cover nearly 5,000 miles, of which all but 250 miles is now in operation."

This purchase has been under consideration for some time. The line extends from Virginia, Minn., to the Rainy River, at the International boundary, opposite Fort Frances, Ont., a distance of 95 miles. A bridge was constructed over the Rainy River jointly by the D.R.L. and W. Ry., and the Canadian Northern Ry., and the latter constructed a spur line from the bridge to connect with its line from Port Arthur to Winnipeg, at Fort Frances. The line was originally projected as a lumbering line by the Virginia Lumber Co., which is controlled by the Cork and O'Brien interests, and its extension to the Canadian boundary, opened up connection with lumber limits operated by the Haines Lumber Co., of Chicago, Ill., and the Weyerhausens, of St. Paul. There has not been a combination of these lumber interests as has been reported from Chicago. The conditions under which the C.N.R. has secured the D.R.L. and W.R. are such that it also has secured the charter rights of the D.R.L. and W.R., to construct an extension of its line from Virginia to Duluth, which it is proposed to do, at some future time, by a more direct route than the Duluth, Missabe and Northern Ry., by which the line now obtains an entrance into Duluth, on the Duluth and Iron Range Ry. The lumber companies have agreed to ship all their output over the line as well as over the projected extension.

Two special courses of lectures to the students in the Railway Department at McGill University, Montreal, are being delivered this term. A. A. Goodchild, Auditor of Stores and Mechanical Accounts C.P.R., is dealing with the subject of Railway Organization and the Elements of Accounting, and G. C. Wells, Assistant General Passenger Agent Eastern Lines, is dealing with Passenger Business.

Railway Commissioners' Traffic Orders.

5739. Nov. 4.—In the matter of the complaint of certain citizens and residents of Fort Erie, Ont., alleging that the Michigan Central Rd. unjustly discriminates against Fort Erie and in favor of Bridgeburg, Ont., in the matter of freight rates charged by the company on shipments from Black Rock, N.Y., and applying for relief in the premises; upon the hearing of counsel for the M.C.R., no one appearing for the complainants, and upon the report of the Chief Traffic Officer of the Board, it is ordered that the application be dismissed.

HAY RATES TO T. AND N.O.R. POINTS.

5741. Dec. 1.—In the matter of the application of H. S. Conn, of Ottawa, Ont., under the provisions of the Railway Act, for an order directing the C.P.R. and the G.T.R. to refund to applicant alleged overcharges on shipments of hay by the C.P.R. from West Moncton, Ont., and by the G.T.R. from Mitchell and Harley, Ont., all consigned to Temagami, on the T. and N.O.Ry., via North Bay, upon hearing counsel for the railway companies, the applicant appearing in person; and upon the report of the Chief Traffic Officer of the Board, it is ordered that the application be dismissed.

V. V. AND E. RY. APPLICATION.

5774. Dec. 3. In the matter of the application of the Vancouver, Victoria and Eastern Ry. and Navigation Co., under secs. 7, 328 and 329 of the Railway Act, for permission to meet, on the Pacific Coast, the competition of independent water carriers not subject to the Railway Act: It is ordered that the applicant company be, and it is hereby, granted permission to make competitive tariffs for the carriage of freight traffic on any of the routes hereinafter described, namely, between any ports on the mainland of British Columbia, or between any ports in Vancouver Island, or between any port or ports in Vancouver Island and any port or ports on the mainland of B.C., where the transportation is entirely in or on vessels particularized in sec. 7 of the Railway Act; or between any port or ports in Vancouver Island, and any port or ports on the mainland of B.C., where the transportation is partly over the railway of the applicant company in Vancouver Island and partly in or on vessels, as aforesaid, the said traffic to include none other than local port to port freight which might otherwise be handled by exclusively water carriers not subject to the Railway Act; and not to include any freight in transit to or from any point or points where the carriage is partly over the applicant company's railway on the mainland; and may act upon and put in operation the said tariffs immediately upon the issue thereof by the applicant company, before such tariffs have been filed with the Board; and that such tariffs shall forthwith, after the making thereof, be forwarded to and filed with the Board; but that the applicant company shall be exempt from otherwise publishing any of the said tariffs, unless otherwise directed by the Board.

RATES FROM WINNIPEG TO NINETTE.

5778. Dec. 3. In the matter of the complaint of J. Overend & Son, of Ninette, Man., alleging that the rates charged the complainants by the Canadian Northern Ry. Co. on freight shipped from Winnipeg to Ninette were excessive: Upon the reading of what was alleged in support of the application and on behalf of the railway company; and upon the report of the Chief Traffic Officer of the Board, it is ordered that the complaint be dismissed.

WALKERVILLE INTERSWITCHING AND GRAIN RATES.

5797. Dec. 8.—In the matter of the complaint of Hiram Walker & Sons, Ltd., of Walkerville, in respect of interswitching between the G.T.R. and the Pere Marquette Rd. at Walkerville; and to the local grain rate of the P.M. Rd. from Walkerville Jct. to Walkerville, or the P.M. Rd.'s rate from that junction on a through shipment from a point on the C.P.R. Upon the hearing of counsel for the railway companies interested, and what was alleged on behalf of the complainants, it is ordered that the following rates from the following places, on grain shipped to Walkerville in carloads, shall apply, namely:

Elmstead	3¼ cents per 100 lbs.
Belle River	3¾ cents per 100 lbs.
St. Joachim	4 cents per 100 lbs.
Haycroft	4¾ cents per 100 lbs.
Tilbury	4¾ cents per 100 lbs.

Minimum of 40,000 lbs. per car; delivery to be on the transfer siding of the P.M. Rd. and the G.T.R. at Walkerville; the contracting carrier, viz., the C.P.R., to absorb half the switching charge of the G.T.R., pursuant to order 4988, the P.M. Rd. agreeing to bear its proportion of such absorption upon the basis of the division of the through rate with the C.P.R., the consignee to bear the remaining half of the said switching charge.

Passenger Car Lighting Regulations.

The Board of Railway Commissioners for Canada has passed the following order 5690: In pursuance of the powers conferred upon it by sections 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf; the Board orders that every railway company subject to the legislative authority of the Parliament of Canada, operating a railway by steam power, cause, subject to any exception or exceptions hereinafter contained in this order, the equipment of each and every car requiring lighting used on the railway or portion of railway operated by it, with one of the following lighting systems, namely: The Pintsch compressed oil-gas system. Acetylene gas, under what is known as the absorbent or commercial acetylene system.

That the Pintsch compressed oil-gas system may be used subject to and upon the terms and conditions following, viz.: That the tanks be tested and tight at 300 lbs. pressure to the square inch, and that they stand such tests without distortion. That the maximum working pressure be 150 lbs. to the square inch. That every gas tank attached to a railway car be equipped with an extra heavy stud valve securely fastened to every such tank. That the equipment necessary for the installation of the said system be provided with—A pressure gauge with a dial reading from 1 lb. to 300 lbs. to the square inch, to show the exact pressure of gas carried. A re-charging valve to attach to the charging station hose. A regulating valve, to reduce the pressure of gas contained in the tank before it enters the main line piping and lamps on the car. That all piping between the regulating valves and stud valves be of extra heavy seamless steel or iron tubing; and that all elbows or tees be of extra heavy steel fitting. That the high pressure piping and fittings be carefully threaded before being screwed together, the pipe thread to be carefully tinned after being screwed up, and the piping to be sweated to the fittings. That standard tubing be used to connect the low pressure side of the regulating valve with the lamps of the cars; and that a main line cock, to turn on and off the gas, be placed on the inside of each car in a convenient and conspicuous location. That in order to locate leakages, soap suds be used; and that lighted matches or torches be not used for this purpose. That printed regulations defining and explaining the use of the system be posted inside of each car, in close proximity to the main line cock, and that, alongside of such regulations, there be placed and kept available in each car a tank stud valve key, a main line cock key, and such other keys as may be necessary for the use and operation of this equipment. That every car lighted by this system be placed under the charge of a competent and reliable employe of the railway company using such system—every such employe to be specially instructed in regard to the proper working and operating of the same.

That the acetylene, or what is known as the absorbent or commercial acetylene storage system, may be used, subject to and upon the following conditions, namely: That the tanks used in connection with the said system be properly safeguarded against the possibility of explosion and be tested and tight at four times the maximum working pressure, and be able to stand such test without distortion; and that the said tanks be protected by an effective and durable preventative of rust. That the service tank pressure do not exceed 150 lbs. to the square inch. That the acetylene gas be compressed; and that where tanks are charged elsewhere than at the generating station, plans showing in detail the location of all appliances used in connection therewith, including intended location of cars, be submitted to the Board for its approval,—all gas to be thoroughly dried and purified. That car equipment be inspected and tested at least once every six months. That generators, charging apparatus, and other details be under expert supervision at all times. That acetylene gas generators be not installed in or upon cars or other railway rolling stock, except by leave of the Board. That every gas tank attached to a railway car be equipped with an extra heavy stud valve securely fastened to every such tank. That the equipment necessary for the installation of the said system be provided with—A pressure gauge with a dial reading from 1 lb. to 300 lbs. to the square inch, to show the exact pressure of gas carried. A re-charging valve, to attach to the charging station hose. A regulation valve, to reduce the pressure of gas contained in the tank before it enters the main line piping and lamps on the cars.

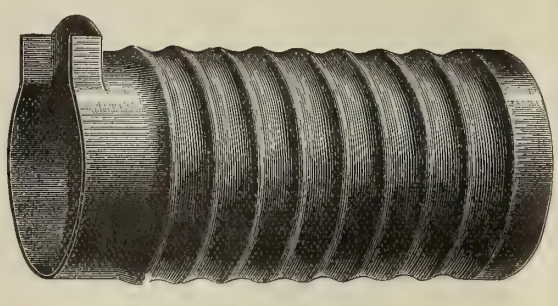
The Board further orders that every such railway company may use free acetylene as a lighting medium, providing the same is not used under a pressure greater than 10 lbs. to the square inch; every such equipment to be submitted for and subject to the approval of the Board. That these regulations do not prevent or affect the lighting with what is known as mineral seal lamp oil on cars and railways where the same is now used; nor prohibit the lighting of cars by electricity. That every railway company committing any breach of or failing to comply with any of the foregoing provisions be, for each such offence, liable to a penalty of $100. That every railway official or employe charged with any duty in respect of any of the matters aforesaid, who shall commit any breach of, or shall neglect to comply with, the foregoing provisions, be liable to a penalty of $20 for each such offence. That these regulations take effect on and after Jan. 1, 1909.

During Oct., 1908, 27 railway employes were killed in the course of their work on Canadian railways, and 18 were injured. Of the fatalities, 10 were due to being run over, 8 to collisions, 6 to derailments, and one each to being caught between cars, to explosion, and to falling material. Of the non-fatal accidents, 7 were due to collisions, 3 to derailments, 2 each to falls, to explosions, and to being run over, and one each to falling material, and to tools.

MORISON Suspension Furnaces

The universally satisfactory record of "THE MORISON" proclaims it the best furnace made.

With Plain Ends or Flanged to any required shape.



For Land and Marine —Boilers—

Uniform Thickness, Easily Cleaned, Unexcelled for Strength, Unsurpassed for Steaming Capacity.

National Transcontinental Railway.

The Commissioners of the N.T.R. report that the whole of the Eastern Division, from Moncton, N.B., to Winnipeg, Man., is now under contract. Considerably over 150 miles of steel had been laid to Nov. 30, and there is a good mileage of the roadbed ready for tracklaying in sections, while much progress has been made with the clearing, rock cutting and filling on other portions of the line. Most of the actual work done has been from Moncton to the St. Lawrence River, from the St. Lawrence River to Weymontachene, on the eastern end of the division, and from Winnipeg to Lake Superior Junction at the western end. There has also been considerable work done in the vicinity of Lake Abitibi. A statement of the condition of the various contracts follows: From Moncton 50 miles west, under contract to the G.T.P.R. Co., much grading done and some rails down; next section west, J. McManus, eight miles, good progress; next section, G.T.P.R. Co., two contracts, one of 40 and the other of 67 miles, much grading done; next section, W. Kitchen Co., 31½ miles, well advanced toward completion; next section, Lyons & White, 62 miles, to New Brunswick-Quebec boundary, work well advanced; M. P. & J. T. Davis, 204 miles, to Quebec bridge, work well advanced over whole contract; M. P. & J. T. Davis, from the St. Lawrence 50 miles west, good progress and some rails laid; Macdonald & O'Brien, 100 miles, good progress and some rails laid; G.T.P.R. Co., 45 miles, to Weymontachene, good progress; Macdonald & O'Brien, 221 miles, roads being cut and supplies taken in; G.T.P.R. Co., 150 miles, to eight miles west of Abitibi River, preliminary and some grading work done; E. F. & G. E. Fauquier, 100 miles, preliminary and some grading work done; M.P. & J. T. Davis, 204 miles, contract just awarded and supplies being taken in; E. F. & G. E. Fauquier, 275 miles, contract let last spring and preliminary construction work commenced; O'Brien & McDougal, 150 miles, to Superior Jct., contract just awarded; J. D. McArthur, 245 miles, from Superior Jct. to Winnipeg, 80% of the work completed.

In a booklet published by the G.T.R., the company reviews its position and says with regard to the Eastern Division: "By the terms of the lease to the company of this portion of the railway it will be seen that the company will practically have the free use of it for seven years, and taking into account the time allowed for construction, which is fixed at seven years, no payments will be required to be made on account of rental until 1919, and since it is to pass through an entirely new and undeveloped section of the country which is now known to be rich in agricultural and mineral resources, as well as timber, it is anticipated that long before the first payment on account of rental becomes due, the company will have reaped a rich harvest from the traffic that will exist upon its completion. This section of the line between Quebec and Winnipeg will pass through what may appropriately be termed the mineral belt of eastern Canada, as in this district, adjacent to the main line, are located the now famous Cobalt deposits, as well as nickel, copper, iron, etc., which are only awaiting the advent of the railway to be brought forth for manufacture."

The permanent rails for the N.T.R. were laid into Moncton, N.B., Dec. 1, the tracks joining the Intercolonial Ry. about a quarter of a mile from the station, and on the western outskirts of the city.

At Cochrane, Ont., where the Temiskaming and Northern Ontario Ry. effects a junction with the N.T.R., the right-of-way has been cut out for a considerable distance in both directions. A mono-rail line is in operation along the right-of-way for the conveyance of supplies from the crossing of the Abitibi River to the junction. The single rail is laid on ties placed 4 ft. apart, a car about 10 ft. long, supported by two wheels on one side, is used to convey the material, a horse at the side supplying the supporting as well as the motive power.

The contracts for the last sections of one division to be placed under contract have been signed. These were let to M. P. and J. T. Davis, Quebec, and are for the following sections, tenders for which were asked Sept. 12: Districts D and E from the western end of Fauquier Bros.' Abitibi contract, westerly for 104 miles. District E, from about 60 miles west of the easterly boundary of this district easterly to the west of Fauquier Bros.' contract, north to Lake Nipigon, about 100 miles. This work is to be completed by Dec. 31, 1910. There are at present no means of communication with this district, and the contractors will themselves have to construct a wagon road northward from Jackfish Bay, on Lake Superior. This is now being surveyed, and it is expected that most of the construction in this part of Ontario will be put in hand early in the spring.

We are advised that none of the tenders recently sent in for some of the buildings at the shops to be erected near Winnipeg has been accepted. It was originally stated that the tender of T. Kelly & Sons had been accepted, but the Commissioners' Engineer reported that probably better prices could be obtained for the work if tenders were asked for the whole plant instead of for separate buildings. It is stated that tenders will be asked at an early date for the whole of the plant.

GRAND TRUNK PACIFIC RY.

A summary of the work done on the construction of the section of the N.T.R., which is being constructed by the G.T. Pacific Ry., shows that the laying of track on the 666 miles from Winnipeg to the Battle River had been completed; as well as on the branch line from Fort William to Superior Junction, Ont., 188 miles, and that trains were being operated on both sections. The erection of the bridge over the Battle River was completed Dec. 15, and track laid over it. This will enable tracklaying to be resumed on the completed roadbed towards Edmonton, Alta. It is intended to have the line completed and opened for traffic as far as Edmonton by the fall. Grading has also been completed to the end of the Prairie section at Wolfe Creek, 129 miles west of Edmonton, and 916 miles west of Winnipeg.

For operating purposes the section of the line recently opened for traffic between Winnipeg, Man., and Wainwright, Alta., has been designated the Prairie Division.

The G.T.P. Ry Co. will make application next session of the Dominion Parliament for an act ratifying and confirming an agreement dated June 6, 1908, made between itself and the Midland Ry. of Manitoba, respecting joint facilities at Portage la Prairie, Man.

A station building is under construction at Waterous, Sask., by the Carter-Halls-Aldinger Co., of Winnipeg, which has also contracts for the erection of stations at Biggar and Wainwright.

The location survey for the main line between Edmonton and Prince Rupert was reported to have been completed Nov. 26. The parties working in the vicinity of Fort George, B.C., were the last in the field, and they came out to Ashcroft Nov. 26. It is probable that during the summer some surveys will have to be undertaken for the revision of the surveys just completed. R. P. Bishop, one of the engineers, states that the line has been located for part of the distance through the Nechaco district, into which many settlers were going. The surveyed route crosses the Fraser River just above Fort George, and follows the south shore of the Nechaco River nearly to Fraser Lake. Thence it skirts the south shore of Fraser Lake as far as Stella. From there two lines have been laid out.

Large quantities of equipment continue to be shipped from Vancouver to Prince Rupert, B.C., for Foley, Welch and Stewart, the contractors for the building of the G.T.-P.R. easterly. Among the plant are two steam shovels to be used on the laying out of the terminal yard at Prince Rupert. The work of laying out the townsite is being rapidly proceeded with, preparatory to opening it up in May, in accordance with the agreement with the B.C. Government.

In a recent interview C. M. Hays, President G.T.P. Ry., said he expected that the company's easy gradients—not more than 21 ft. to the mile going west—would in a few years twist around a great portion of the wheat export trade of the northwest, and with the opening of the Panama Canal in 1914, Canada would send wheat to Europe and Asia by way of the Pacific Ocean. He looked forward to seeing Prince Rupert one of the great wheat ports of the world.

G.T. PACIFIC BRANCH LINES.

The Lake Superior Branch, extending from Fort William to Superior Jct., on the main line from Winnipeg to Moncton, N.B., was opened for traffic Nov. 27, and is being operated as the Lake Superior Division. The mileages of the different station points are: Westfort, Fort William, 0.0; C.P.R. crossing, 0.6; Albe, 7.4; Baird, 13.21; Crest, 20.90; Dona, 26.42; Ellis, 32.83; Flett, 38.82; Griff, 45.72; Horne, 51.05; Dexter, 56.94; Linke, 62.34; Jakes, 67.83; Knowlton, 99.57; Oscar, 107.31; Petry, 114.34; Quorn, 121.99; Reba, 127.07; Snowdon, 134.45; Tanain, 139.14; Unaka, 145.28; Valora, 151.72; Weke, 160.26; Hunt, 166.60; Yonde, 170.80; Larn, 178.05; Alcona, 185.23; Superior Junction, 188.77. The branch is being used for the purpose of taking in supplies for the construction of the main line, and it will not be until the completion of the main line from Winnipeg, that there will be any other than contractor's traffic over it. A contract has been entered into with the Department of Railways, under the terms of the act granting subsidies in aid of certain railways, for the construction of a branch line from the National Transcontinental Ry. to Port Arthur and Fort William, Ont., a distance not exceeding 220 miles. The ratepayers of Fort William were asked to vote Jan. 1, in favor of a by-law to raise $12,000 by means of debentures to pay for a portion of the right-of-way secured by the city for the G.T.P.R. in the city. (Dec., 1908, pg. 873.)

Press reports state that work is proceeding on the construction of a Government telegraph line from Athabasca Landing, Alta., northerly, and that it will be carried to Little River, 75 miles, this winter, and continued to the Lesser Slave Lake later in the year. A sum of $10,000 was voted at the last session of the Dominion Parliament for the extension of this line towards Peace River Landing, by way of the south side of Lesser Slave Lake. The distance between the extreme points in question is about 290 miles, and the line to be strung under this appropriation is about 70 miles. The poles, wire, etc., is being distributed along the route during the winter in readiness for erection early in the spring. It is probable that a further sum will be voted at the next parliamentary session.

A.C. and H.B.R. Application for Joint Tariff.

On the application of the Algoma Central and Hudson Bay Ry. Co. for an order under secs. 7, 317, 333, 334, and 336 of the Railway Act for joint tariff with the G.T.R., Railway Commissioner McLean gave the following judgment Nov. 23:

In the case of the Algoma Central and Hudson Bay Ry. Co. v. the G.T.R. Co., in which application was made on behalf of the steamboats of the A.C. and H.B.R. Co. to obtain a joint tariff with the G.T.R., the application was refused, it being held that in terms of secs. 266 and 267 of the Railway Act of 1903, a line of steamships operated by a railway company running to ports reached by the line or lines of another railway does not constitute a continuous route within the meaning of secs. 266 and 267 of the Railway Act of 1903. 5 Canadian Ry. Cases, 199. The applicant company relied upon sec. 276 of the Railway Act as making the provisions of secs. 266 and 267 extend to the traffic mentioned.

In respect of the present application: The jurisdiction conferred under secs. 333 and 334 of the Railway Act in regard to through or joint rates is based on section 25 of the English Railway and Canal Traffic Act of 1888. This section is an expansion of the "reasonable facilities" clause of the Act of 1854. The principles involved in the English Act are the same as those in the Canadian Act, although the means whereby the through rate may be obtained differ. Section 25 of the Act of 1888 provides inter alia that the "facilities" shall include "the due and reasonable receiving, forwarding, and delivery—at through rates, tolls, or fares." Sub-section 5. "If an objection be made to the granting of the rate or to the route, the Commissioners shall consider whether the granting of the rate is a due and reasonable facility in the interest of the public, and whether.....the route proposed is a reasonable one....."

The more important expressions of opinion by the English Railway Commission follow. Reasonableness of the through rate, and the interest of the public are the tests by which the demand must be tried. Didcot, Newbury, and Southampton Ry. Co. v. L. and S.W. Ry. and others, 10 Ry. and Canal Traffic Cases, 15, 17.

"It was not the intention of Parliament, nor has it been the practice of the Court to encourage applications for through rates, the only effect of which would be to transfer traffic from one route to another, or to reduce reasonable rates." Ib. per Lord Cobham, 25.

In order to grant through booking, public inconvenience must be made out. Barret v. G.N.R., 1 Ry. and Canal Traffic Cas., 38.

A through rate was refused because not a facility in the interests of the public. Swindon, Marlborough, and Andover Ry. v. G.W.R. and L. and S.W.R., 4 Ry. and Canal Traffic Cases, 350.

".....however desirable a reduced rate may be in the interests of the public, it is always necessary to see whether there is a commensurate advantage to the railway company which may be forced by the decision of the Commissioners to accept a lower scale of charge than that which it is actually making, and to which it is entitled." Per Collins J., in Plymouth Chamber of Commerce vs. G.W.R. and L. and S.W.R., 9 Ry. and Canal Traffic Cases, 72.

".....I for one should be inclined, in a case of this sort, to take very seriously into consideration, on the question of public interest, the fact that two competitive routes must tend to make either company more likely to give reasonable concessions to traders." Plymouth, Devonport and S.W.R. v. G.W.R. and others, 10 Ry. and Canal Traffic Cases, 68.

The Interstate Commerce Commission of the United States has passed on the question of joint or through rates in Loup Creek Colliery v. Virginia Ry. Co. and Chesapeake and Ohio Ry. Co., XII Interstate Commerce Reports, 471. In this case, Commissioner Clements said: "Joint rates are only empowered with the manifest intent of giving effect to the general purposes of the Act to regulate commerce by securing reasonable facilities to the public and by preventing unreasonable and unjust rates, facilities, and discriminations." 477.

The authorities quoted show that the public interest and the question of the reasonableness or otherwise of the existing rate arrangements are the vital points in any application for through rates. I am of the opinion: That the Algoma Central Ry. Co. has not proved that there is a public interest involved, or that the existing rate arrangement is unreasonable.

Chief Commissioner Mabee agreed with Commissioner McLean.

Commissioner Mills said: The serious thing to my mind is that, with the present local rates on the G.T.R. (so much higher than those charged to the Northern Navigation Co.) the applicant company is prohibited from carrying its own supplies and its own manufactured goods in its own boats; and it should not be overlooked that the Northern Navigation Co. now finds it necessary to increase the number of its boats in order to accommodate the traffic via the G.T.R.

Great Northern Ry. Lines in Canada.

Emerson, Man., to Winnipeg.—Press reports state that the survey being made by the company's engineering staff from Emerson, at the International boundary, to the southeastern limits of Winnipeg, have been completed. The located route runs from Emerson, on the east side of the Red River, to Ste. Agathe, where it crosses to the west side of the river and runs northwesterly to the right-of-way purchased a couple of years ago in the city, and running parallel with the C.P.R. Gretna branch to Ross St. It has not been announced when construction will be started, but it is said that grading will be commenced in the spring.

Midland Ry. of Manitoba.—Application will be made next session of the Dominion Parliament by the G.T. Pacific Ry. Co., for an act ratifying and confirming an agreement made June 6, 1908, with this company, respecting the provision of joint facilities at Portage la Prairie, Man.

Coutts to Crow's Nest Pass.—The passing of the Alberta Ry. and Irrigation Co. under the control of the C.P.R. has brought about an increased activity of G.N.R. locating engineers in Alberta. The G.N.R. has a line extending to the International boundary at Sweet Grass, Mont., and Coutts, Alta., connecting with the A.R. and I. Co.'s line. A Frank, Alta., report states that the President of the G.N.R. has expressed an opinion that within a couple of years the company would be cut off from this connection, and to forestall such an event is preparing for the construction of a line to connect Sweet Grass with its lines in the Crow's Nest Pass district. The reports further state that two charters have been purchased by the J. J. Hill interests for the construction of lines in the territory mentioned. One of these is for an east and west line through the Crow's Nest Pass, and the other for a north and south line somewhat to the east of the Pass.

Crow's Nest Southern Ry.—The extension of this line from Fernie, through Hosmer and Olsen to Michel, B.C., 20.9 miles, was opened for traffic Nov. 30. Connection is made at Michel with the Crow's Nest Pass Coal Co.'s tracks. (Dec., 1908, pg. 855.)

Canadian Freight Classification Amendments.

The Board of Railway Commissioners has passed the following order, 5669: In the matter of the application of the Canadian Freight Association, under sec. 321 of the Railway Act, for the approval of a proposed supplement, filed as supplement 4 to Canadian Classification 13; a supplement to the said proposed supplement; and an addition to the said proposed supplement referring to automobiles. Upon the report and recommendation of the Chief Traffic Officer of the Board, it is ordered that the additions and changes embodied in the said proposed supplement 4 to the Canadian Classification 13, and the supplement to the said proposed supplement, be approved, subject to the following exceptions and conditions, namely:

The proposal to make the classification of printed matter, unbound, n.o.s., the same as bound books, is hereby disallowed.

The proposal to increase the classification of crude rubber from l.c.l. 3rd, c.l. 5th, to l.c.l. 1st, c.l. 3rd class, is hereby disallowed; but an advance to l.c.l. 2nd, c.l. 4th class is hereby permitted and authorized; the classification of gutta percha, l.c.l., to be reduced from 1st to 2nd class.

That the proposed reclassification of wagons (delivery) express, and peddlers'), be withdrawn pending reconsideration or hearing; but is hereby approved, provided the following changes be made, namely: One-horse, with fixed or standing tops, minimum 1,500 lbs. each, 1st class; two-horse, without tops, wheels and poles off, minimum 1,500 lbs. each, 1st class; two-horse, with fixed or standing tops, minimum 1,800 lbs. each, 1st class.

The proposed minimum weight of 14,000 lbs. per car on mixed carloads of bicycles, tricycles, velocipedes, quadricycles, motor cycles, automobiles, and parts thereof, is hereby reduced to 10,000 lbs.

That the carload classification of bicycles and bicycle parts, all kinds, n.o.s., crated or boxed, be changed to read "crated, or boxed, or in bundles."

That the proposed changes with respect to bottle caps, and bottle wrappers be withdrawn, in accordance with the applicant's request.

That the words "cast iron, not machine finished, on skids," qualifying hoisting drums of passenger and freight elevators, be struck out, in accordance with the applicant's request.

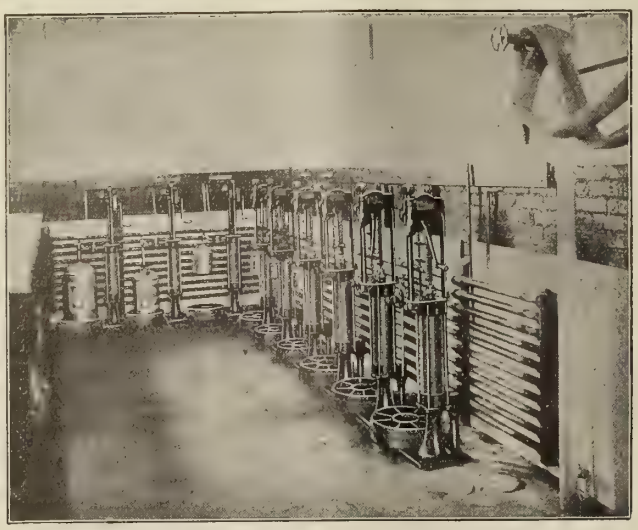
That rule 15 (1) be made to read as follows: "Freight shipped in waterproofed pulp, fibre, or double-faced corrugated board boxes (facings to be of fibreboard), will be accepted at the ratings and conditions provided for the same shipments in wooden boxes, when meeting the following requirements, except that in the case of sub-secs. 1, 2, 6 and 7, it will also be subject to owner's risk of damage and leakage in each case."

That the proposed reclassification of automobiles be suspended pending hearing, notice of which will be given.

And it is further ordered that the said supplement become effective within three weeks from the date of receipt of this order by the Chairman of the Advisory Committee of the Canadian Freight Association, or, in his absence, by his representative.

On the application of the Canadian Freight Association the Board passed an order 5767, Dec. 3, extending the time within which supplement 4, above referred to, shall become effective until Jan. 1, 1909.

A G.T.R. official at London, Ont., is reported to have stated that the company will as soon as possible dispatch its trains by telephone instead of telegraph.



BOWSER PUMPS IN A RAILWAY STOREHOUSE

FIRE-PROOF OIL STORAGE

When your oils are stored by the Bowser System, you know they can never be the source of a fire—

What is more, fire starting from some other source cannot get to the oils.

These are only two results of

THE BOWSER SYSTEM

The Bowser is constructed so as to secure the measure of safety prescribed by the National Board of Fire Underwriters.

Equipments for Railway Oil Houses described in Bulletin 18. Send for it.

TRANSPORTATION APPOINTMENTS.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Atlantic, Quebec and Western Ry.—The Earl of Ranfurly is reported to have been appointed President, vice Viscount Templetown, resigned.

Canadian Pacific Ry.—W. G. Annable, heretofore General Baggage Agent, has been appointed General Passenger Agent, Atlantic Steamship Service, vice G. McL. Brown, transferred. Office, Board of Trade Bldg., Montreal.

J. O. Apps, heretofore Assistant General Baggage Agent, has been appointed General Baggage Agent, vice W. G. Annable, transferred. Office, Montreal. We are advised that no appointment to the position of Assistant General Baggage Agent will be made for the present.

G. S. Cantlie, heretofore Superintendent Car Service, has been appointed General Superintendent Car Service. Office, Montreal.

John Leslie, heretofore Auditor of Disbursements, has been appointed Assistant Comptroller. Office, Montreal.

F. E. Shrimpton, heretofore chief clerk to Auditor of Disbursements, has been appointed Auditor of Disbursements, vice J. Leslie, promoted. Office, Montreal.

W. J. Moule, heretofore chief clerk statistical department, has been appointed Assistant Auditor of Disbursements. Office, Montreal.

E. N. Todd, heretofore Assistant Export and Import Freight Agent, Toronto, has been appointed Export Freight Agent, in charge of export traffic, via Atlantic seaboard, vice P. B. Earle, resigned to enter private business. Office, Board of Trade Bldg., Montreal.

B. Pendleton has been appointed District Master Mechanic, District 1, Eastern Division, vice J. H. Mills, assigned to other duties. Office, Farnham, Que.

A. W. Horsey has been appointed District Master Mechanic for District 2, and Chalk River section, District 4, Eastern Division, including Brockville and Prescott branches, vice G. T. Fulton. Office, Smith's Falls, Ont.

W. Coulter, heretofore Terminal Agent, Toronto, has been appointed Assistant Superintendent, Toronto Terminals and Hamilton joint section, which from Dec. 17, 1908, have been operated as District 4, Ontario Division. He will report direct to the General Superintendent. Office, Toronto. The position of Terminal Agent at Toronto has been abolished.

G. D. Robinson, heretofore chief clerk General Foreign Freight Agent's office, Montreal, has been appointed Assistant Export and Import Freight Agent in charge of export and import traffic, Ontario Division lines west of Smith's Falls, Ont., vice E. N. Todd, promoted. Office, Union Station, Toronto.

C. Rowe is reported to have been appointed as a special fruit agent, in charge of matters pertaining to that trade. Office, Toronto.

R. V. Nicholson, heretofore foreman carpenter, White River, Ont., has been appointed Bridge and Building Master, District 2, Lake Superior Division. Headquarters, White River, Ont.

A. West, heretofore Road Foreman Locomotives, District 2, Central Division, has been appointed District Master Mechanic, District 1, Central Division, vice A. H. Eager, transferred. Office, Kenora, Ont.

D. C. Coleman, heretofore Superintendent District 3, Pacific Division, Nelson, B.C., has been appointed Superintendent Car Service, Western Lines, Winnipeg, vice J. A. McGregor.

A. E. Trump, heretofore Chief Dispatcher District 3, Central Division, Brandon, Man., has been appointed Chief Dispatcher District 2, Central Division, vice W. J. Uren, promoted. Office, Brandon, Man.

W. J. Uren, heretofore Chief Train Dispatcher District 2, Central Division, Winnipeg, has been appointed Superintendent District 3, Central Division, vice T. R. Flett, transferred. Office, Brandon, Man.

J. K. Savage, heretofore Trainmaster District 3, Central Division, Brandon, Man., has been appointed Chief Train Dispatcher, same district, vice E. G. Trump, transferred. Office, Brandon, Man.

W. M. Ansley has been appointed Trainmaster District 3, Central Division, vice J. K. Savage, assigned to other duties. Office, Brandon, Man.

T. R. Flett, heretofore Superintendent District 3, Central Division, Brandon, Man., has been appointed Superintendent District 5, Central Division, vice C. S. Maharg, transferred. Office, Saskatoon, Sask.

C. S. Maharg, heretofore Superintendent District 5, Central Division, Saskatoon, Sask., has been appointed Superintendent District 2, Western Division, Medicine Hat, Alta., vice J. S. Lawrence. The official circular announced that Mr. Lawrence had been assigned to other duties. We have since been advised that he has been granted leave of absence.

F. L. Hay, heretofore acting Superintendent Sleeping and Dining Cars and News Service, District 5, Pacific Division, has been appointed Superintendent Sleeping and Dining Cars and News Service, District 5. Office, Vancouver, B.C.

Allan Cameron, heretofore General Traffic Agent, London, Eng., has been appointed General Traffic Agent, New York, vice E. V. Skinner, deceased, who had the title of Assistant Traffic Manager.

G. McL. Brown, heretofore General Passenger Agent, Atlantic Steamship Service, Montreal, has been appointed General Traffic Agent, Great Britain and Europe, vice Allan Cameron, transferred. Office, London, Eng.

Referring to the appointment of S. E. Cruse as the company's representative at Antwerp, Belgium, announced in our last issue, we are advised that his title is Agent.

H. T. Wilgress, heretofore chief clerk General Traffic Agent's office, Yokohama, Japan, has been appointed Agent, Trans-Pacific Steamship Line, there.

Grand Trunk Pacific Ry.—A. B. Smith, Manager Telegraph Department, has also been appointed Superintendent of Time Service and Watch Inspection. Office, Winnipeg.

J. W. Pringle has been appointed acting Locomotive Foreman, with charge of all matters pertaining to the Motive Power and Car Departments, vice O. C. Fraser, resigned. Office, Earl, Saskatoon, Sask.

Grand Trunk Ry.—The following Agents have been appointed: St. Michel, Que., J. A. Toupin; Jacques Cartier Jct., Que., W. J. Rowland; Powassan, Ont., J. J. Carey (Permanent); Thedford, Ont., G. S. Cline; Goderich, Ont., G. H. Lauder; Burgessville, Ont., H. G. Simmons; Allenford, Ont., J. E. Brent; Milverton, Ont., W. F. Burgman; Brussels, Ont., W. J. Kyle.

A press report that A. Grills, Roadmaster at Hamilton, Ont., had been appointed General Roadmaster of the joint southern division, which is operated jointly by the G.T.R. and Wabash Rd., had not been confirmed up to Dec. 29. S. A. Haynes, heretofore General Roadmaster of that division, with headquarters at St. Thomas, is reported to have resigned to go into farming in Missouri.

New York Central and Hudson River Rd.—W. H. Newman, President, has resigned, the resignation to take effect Feb. 1. It is said he will continue as a director.

Temiskaming and Northern Ontario Ry.—V. T. Bartram, Purchasing Agent, having resigned, the position has been abolished. All matters relating to the department are now in charge of W. W. Graham, storekeeper. Office, North Bay, Ont.

Corrections for the Erring.

"The first Canadian electric locomotive is now being built in the Canadian General Electric works, Peterboro. It has been built for use in a tunnel at Shawinigan Falls."—Canadian Machinery, Dec., 1908.

The locomotive referred to is not "the first Canadian electric locomotive." The first one built in Canada was completed in January, 1896, by the Canadian General Electric Co. for the Hull Electric Co. The one built recently is not "for use in a tunnel at Shawinigan Falls." It is for the Shawinigan Falls Terminal Ry. There is no tunnel on that company's line. The Shawinigan Co. had one electric locomotive before it placed the order for the one completed recently.

"George S. Cantilo, Superintendent of Car Service of the Canadian Pacific, has been appointed also General Superintendent of Car Service, with office at Montreal, Que."—Railroad Age Gazette, Dec. 4, 1908.

The official referred to does not trace his descent from sunny Italy, as might be inferred from our contemporary's spelling. He is of Scotch extraction, and his name is Cantlie. He has been appointed General Superintendent of Car Service, not "also" General Superintendent of Car Service, the title "General," etc., abolishing the previous title.

We quite appreciate the impossibility of securing absolute accuracy in all information published, and will be much obliged to any of our readers who will point out to us any mistakes which may occur in our reading matter. Our chief aim is accuracy, and our readers can materially assist us in securing the ideal we aim at.

Railway Subsidy Contracts.

The Department of Railways and Canals has entered into contracts, under the provisions of the act granting aid to certain railways, for the construction of the following lines:

ST. MAURICE VALLEY RY.—From Three Rivers to Grand Mere, Que., 28 miles. (Oct. 2, 1908.)

ST. MARY'S AND WESTERN ONTARIO RY.—From Woodstock to Exeter, Ont., 45 miles. (Oct. 3, and a supplemental agreement, Dec. 10.)

INTERNATIONAL RY. CO. OF NEW BRUNSWICK.—Varying the contract of Aug. 24, 1908, for a line from the western end of the 20 miles, as already constructed from Campbellton, to the St. John River between Grand Falls and Edmundston, N.B., so as to provide for the payment of the double subsidy. (Aug. 26, 1908.)

KETTLE RIVER VALLEY RY.—From Carmi to Penticton, B.C., 50 miles. (Oct. 19, 1908.)

GRAND TRUNK PACIFIC RY.—For a branch line from the National Transcontinental Ry. to Port Arthur and Fort William, Ont., 220 miles. (Oct. 19, 1908.)

CANADIAN NORTHERN QUEBEC RY.—From near Arundel to the united townships of Preston and Hartwell, 30 miles, and for a line connecting its Montford and Gatineau line with the main line at St. Jerome, Que., 15.2 miles. (Oct. 26, 1908.)

MARITIME COAL, RY. AND POWER CO.—From Joggins mine to the Bay of Fundy, N.S., one mile. (Dec. 2, 1908.)

VANCOUVER AND LULU ISLAND RY.—From Eburne to New Westminster, B.C., 9.65 miles.

At the sixth annual meeting of the Canadian Freight Association, Western Lines Freight Inspection Bureau, in Winnipeg, Dec. 15, W. C. Bowles, General Freight Agent C.P.R. Central and Western Divisions, was elected President. H. R. Partriarche was re-elected Secretary-Treasurer, and was also re-elected Manager of the Canadian Car Service Bureau, Western Lines.

MAINLY ABOUT PEOPLE.

Sir H. Montagu Allan has been re-elected President of the Montreal Jockey Club.

Sir Henry M. Pellatt returned to Toronto from London, Eng., Dec. 6.

W., Mrs. and the Misses Mackenzie arrived in Toronto Dec. 21, from Great Britain.

E. B. Osler, M.P., Director of the C.P.R., has been elected Hon. President Toronto Western Hospital.

Miss M. Calvin, daughter of H. Calvin, Kingston, Ont., was married to W. H. Boyd, Ottawa, recently.

W. D. Reid, President Reid Newfoundland Co., arrived in Montreal from St. John's, Nfld., early in December.

H. E. Carry, C.E., has been given charge of the laying out of the park, etc., at Shaughnessy Heights, Vancouver, B.C.

Chas. Mitchell, father of A. J. Mitchell, Comptroller Mackenzie, Mann & Co., Ltd., died in Toronto Dec. 26, aged 67.

C. M. Hays, Second Vice-President and General Manager G.T.R., arrived in Montreal, Dec. 21, from Great Britain.

H. Paton, President Shedden Forwarding Co., Montreal, has been elected a director of the Royal Bank of Canada.

F. W. Morse, Vice-President and General Manager, G.T. Pacific Ry., was a guest of the Governor-General, at Ottawa, Dec. 8.

E. A. Neil, Traffic Manager Buffalo and Susquehanna Ry., Danville, Pa., was married to Miss M. Post at Toronto recently.

D. B. Hanna, Third Vice-President Canadian Northern Ry., returned to Toronto, Dec. 21, 1908, after a short trip to Great Britain.

M. V. B. Stearns, who died suddenly at London, Ont., recently, aged 68, was for 20 years in the M.C.R. service at St. Thomas, Ont.

J. A. McHarg, for 25 years stationmaster G.T.R., London, Ont., died there Dec. 11, aged 68. He had been in G.T.R. service 47 years.

W. C. Bowles, General Freight Agent Central Division C.P.R., Winnipeg, left there Dec. 16, for a month's vacation in California.

R. R. Jamieson, ex-General Superintendent, Central Division, C.P.R., Winnipeg, has been elected mayor of Calgary, Alta., for the current year.

S. Bend, chief clerk, M.C. Rd., West Detroit, Mich., who died Dec. 8, aged 56, was in the service of the same company at Windsor, Ont., about 35 years ago.

The engagement of Miss N. J. H. Kerr, daughter of Senator Kerr, to E. F. Osler, son of E. B. Osler, M.P., Toronto, was announced recently.

The engagement is announced of Miss E. H. Messent, of London, Eng., to J. D. Wilson, Montreal, nephew of Sir C. Rivers Wilson, President G.T.R.

R. Kerr, Passenger Traffic Manager C.P.R., Montreal, was present at the recent meetings of the Transcontinental Passenger Association in Chicago, Ill.

T. Britt, General Fuel Agent, C.P.R., Montreal, was elected First Vice-President of the International Railway Fuel Association at its inaugural meeting at Chicago, Ill., recently.

F. Dane, one of the Temiskaming and Northern Ontario Ry. Commissioners, has declined to accept the office of President of the ward 4 Conservative Association, Toronto.

G. C. Wells, Assistant General Passenger Agent C.P.R. Eastern Lines, Montreal, was present at the recent meeting of the New England Passenger Agents' Association at Boston, Mass.

Mrs. Archer Baker, wife of the C.P.R. European Manager, London, Eng., was a guest at the Guildhall there, at the reception and luncheon in honor of the King and Queen of Sweden.

G. W. West, Superintendent of Motive Power, New York, Ontario and Western Ry., Middletown, N.Y., died there Dec. 24. He was a former President of the American Association of Master Mechanics.

C. B. Hibbard, who was until recently General Manager Quebec, Montreal and Southern Ry., and Napierville Jct. Ry., is reported to have been appointed Second Vice-President Quebec Eastern Ry.

H. R. Charlton, G.T.R. Advertising Agent, has been awarded a special gold medal as collaborator in connection with the G.T.R. pavilion at the Franco-British Exhibition, recently held in London, Eng.

G. Gibson, son of Hon. J. M. Gibson, Lieut.-Governor of Ontario, and ex-President Dominion Power and Transmission Co., Hamilton, Ont., died at Colorado Springs, Col., Dec. 15, aged 28.

The following are among the directors of the Bank of Montreal elected for the current year: Lord Strathcona, Sir Thos. G. Shaughnessy, R. B. Angus, C. R. Hosmer, Hon. Robt. Mackay, and Jas. Ross.

Hon. Walter Scott, Premier of Saskatchewan, has decided to take up the duties of the newly created portfolio of Railways and Telephones, and A. P. McNab has been appointed his successor as Minister of Public Works.

Wm. Easton, Civil Engineer and estate agent, Taunton, Somerset, Eng., who died at Clifton, Eng., Nov. 17, aged 86, was between 1845 and 1851 engaged in Canada on canal surveys for the British Government.

G. J. Bury, General Manager C.P.R. Western Lines; F. T. Griffin, C.P.R. Land Commissioner of Winnipeg, and A. C. Shaw, General Agent Passenger Department, Chicago, Ill., were in Montreal recently on a business trip.

R. G. Gray, ex-Roadmaster Toronto, Hamilton and Buffalo Ry., died at Hamilton, Ont., Dec. 6, aged 56. He was connected with the T.H. and B.R. since its construction, prior to which he was in the M.C. Rd. service.

R. Reford, of the R. W. Reford Co., Managers of the Donaldson, Thomson and other steamships, has given $50,000 in securities to McGill University, Montreal, the interest of which is to be devoted to increasing the professors' salaries.

A. F. Colwell, who resigned his position in the C.P.R. Freight Traffic Manager's office at Montreal recently, has entered the service of the Saskatoon Tent and Mattress Co. at Saskatoon, Sask., in which he is one of the principal stockholders.

Sir H. Montagu Allan is reported to have been offered the position of High Commissioner for Canada in London, Eng., in succession to Lord Strathcona, whose early retirement on the ground of increasing age is looked for.

H. R. Charlton, G.T.R. Advertising Agent, Montreal, was entertained at luncheon at Winnipeg, Dec. 7, by the Western Canada Press Association, in recognition of the kindness shown to members when on a trip through Eastern Canada some time ago.

Mrs. C. Doheny, who has been employed by the G.T.R. at its Bonaventure station, Montreal, for 17 years, is the first female pensioner of the recently organized fund. She is 72 years of age, and the amount to which she is entitled is $16.67 a month.

H. Armstrong, M.P.P., Portage la Prairie, who has been appointed Provincial Treasurer of Manitoba, in succession to the late Hon. J. H. Agnew, is actively engaged in fishery business on the Lake of the Woods and Lake Winnipeg, owning a number of tugs and other vessels.

H. P. Dwight, President G.N.W. Telegraph Co., and the grand old man of Canadian telegraphy, celebrated his 80th birthday Dec. 23, and in connection therewith, was presented with a gold scarf pin by I. McMichael, Vice-President and General Manager, on behalf of the Toronto staff.

Col. J. M. Gibson, Lieut.-Governor of Ontario, and formerly President of the Dominion Power and Transmission Co., was the principal guest at a dinner given in Hamilton, Ont., recently, on his removing from that city to take up his residence at Government House, Toronto.

D. B. Hanna, Third Vice-President Canadian Northern Ry., Toronto; W. I. Osborne, of Chicago, Ill., and G. J. Moore, of Detroit, Mich., have been reappointed receivers of the Chicago and Milwaukee Electric Ry. by Judge Grosscup, of Chicago, who has consolidated the foreclosure suits.

Mrs. M. Bennett, of Chicago, Ill., widow of J. O. Bennett, formerly in the railway mail service in Toronto, died Dec. 3, at the residence of one of her sons at Ottawa. The funeral took place at Toronto, Dec. 8, from the residence of another of her sons, B. H. Bennett, General Agent Chicago and North-Western Ry., Toronto.

W. Stitt, General Passenger Agent C.P.R., Montreal, recently received a beautifully engrossed letter from the Canadian Mining Institute, bearing the signatures of the leading mining men of Canada, Europe and the U.S., thanking him for the courtesy extended to them on their tour of the Canadian mining districts.

Wm. Whyte, Second Vice-President C.P.R., and Hugh Sutherland, Executive Agent Mackenzie, Mann and Co., Ltd., Winnipeg, have been elected directors of the Winnipeg Industrial Exhibition Association, which proposes to hold a world's fair there in 1912 to celebrate the centenary of the landing of Lord Selkirk's settlers.

R. M. Pratt, a well-known civil engineer, died at Winnipeg Dec. 12. He was at various times connected with the C.P.R. and C.N.R., having been engaged in the Crow's Nest Pass for the former company and since 1898 among other things in the construction of dock and coal handling plant for the latter at Port Arthur and Key Inlet, Ont.

Lt.-Col. H. S. Greenwood, who has been engaged in railway and general engineering work in South Africa for the Imperial Government, and who has recently returned to Canada, was, prior to going to South Africa, Assistant Superintending Engineer of the Trent Canal at Peterboro, Ont. He was previously engaged in engineering work on the Cornwall canal.

V. T. Bartram, who has resigned his position as Purchasing Agent of the Temiskaming and Northern Ontario Ry., is going into railway construction, dredging and mining. It may be mentioned that his name appeared in our Dec., 1908, issue as one of the provisional directors of the recently incorporated Cape Breton Dredging Co., Ltd., with office in Toronto.

C. P. Coleman, who has been appointed Travelling Freight Agent Atchison, Topeka and Santa Fe Ry., Buffalo, N.Y., was for some time prior to entering railway service engaged in business in Toronto. He has been with the A. T. and S.F. Ry. for 9 years, having occupied the positions of stenographer and rate clerk at New York, and chief clerk passenger and freight departments at Buffalo, N.Y.

J. L. Morrison, who died in Toronto Dec. 4, aged 74, was one of the first di-

LOCOMOTIVE CYLINDER REPAIRED WITH THERMIT

WELDING

Locomotive Frames, Connecting Rods, Driving Wheel Spokes, and Mud Rings

By the THERMIT PROCESS, welds may be made to all kinds of steel sections without removing the broken part. Locomotive frames and mud rings may be welded without dismantling the engine. Stern-posts and rudder frames of steamships may be quickly repaired without removing them from the ship. Furthermore, all this may be accomplished in one or two days, depending on conditions.

Write for descriptive pamphlet No. 18-N and for "REACTIONS," the Thermit Quarterly.

rectors of the Credit Valley Ry., being elected in 1873, and later he constructed the Kingston, Ont., St. Ry. In 1879 the Toronto Board of Trade entertained him at a banquet in recognition of his services in promoting the construction of railways, and in 1881 he was presented with a life pass over the Credit Valley Ry.

A number of C.P.R. steamship lines' officials were in Montreal recently to take leave of G. McL. Brown, on his leaving Canada to take the position of General Traffic Agent at London, Eng. Among them were: S. J. Sharp, Western Passenger Agent, Toronto; H. M. McCallum, General Agent, Winnipeg; C. E. Benjamin, General Agent, Chicago, Ill., and T. J. Burns, Northwestern Passenger Agent, Minneapolis, Minn.

J. A. Cuttle, Managing Director Montreal Transportation Co., died on a train near San Francisco, Cal., Dec. 20. As head of the Montreal Transportation Co., he was most active in the development of the Canadian inland water traffic. He was for many years an active member of the Montreal Corn Exchange and the Board of Trade. At the time of the sittings of the transportation commission, he was a very important witness regarding inland transportation.

J. F. Kane, whose appointment as Fuel Agent, C.P.R. Western Division, Calgary, Alta., was announced in our last issue, was born at Toronto, Sept. 8, 1884, and entered C.P.R. service in 1900, since when he has been, to April, 1901, office boy at Toronto; April, 1901, to June, 1902, stenographer, Master Mechanic's office, Winnipeg; June, 1902, to July, 1906, secretary to Second Vice-President, Winnipeg; July, 1906, to Nov., 1908, chief clerk Second Vice-President's office, Winnipeg.

J. W. Donald, formerly District Passenger Agent Chicago and Alton Rd., Detroit, Mich., died there recently. He had suffered from locomotor ataxia for several years. In Feb., 1908, he was compelled to resign his position with the Chicago and Alton Rd., and spent some time at Egypt, Mass., from which place he wrote, on Sept. 18 last, to the Managing Director of THE RAILWAY AND MARINE WORLD: "I am improving, eat and sleep well, and suffer little pain, but do not get so as to walk any distance. They say it's coming, and I may get round to see the boys once more."

John Leslie, who has been appointed Assistant Comptroller C.P.R., Montreal, was born at Toronto, and entered railway service with the Toronto, Grey and Bruce Ry. as assistant cashier, and was subsequently cashier, accountant and auditor in succession. On the absorption of the railway by the C.P.R. in 1893, he was placed in charge of the accounts of the Ontario lines at Toronto until Mar., 1895, and until 1897 at Montreal; 1897 to Oct. 2, 1899, chief clerk to Auditor; Oct. 2, 1899, to Dec. 1, 1908, Auditor of Disbursements, Montreal.

L. D. Chetham, city ticket agent C.P.R., Victoria, B.C., who has recently been also appointed District Passenger Agent Esquimalt and Nanaimo Ry., was born in Matlock, Derbyshire, Eng., Nov. 5, 1869, and entered C.P.R. service in Canada in 1888, since when he has been connected with the passenger department, with the exception of three years spent in Australia. He was from June, 1901, to Mar., 1908, chief clerk, passenger department, Victoria, when he was appointed city ticket agent at Victoria, and in Sept., 1908, was also appointed District Passenger Agent E. and N. Ry.

J. O. Apps, who has been appointed General Baggage Agent C.P.R., Montreal, was born at Tara, Ont., Nov. 9, 1877, and entered railway service in 1893, since when he has been to 1896 clerk, local freight agent's office, Illinois Central Rd., Chicago, Ill.; Nov., 1896, to Nov., 1897, in a railway supply office; Nov., 1897, to June, 1898, clerk; June, 1898, to 1901, secretary; and to Mar., 1903, assistant-chief clerk to General Superintendent C.P.R. Eastern Division, Montreal; Mar., 1903, to May 1, 1908, chief clerk to General Baggage Agent, C.P.R., Montreal; May 1 to Dec. 1, 1908, Assistant General Baggage Agent C.P.R., in charge of the lines east of Fort William, Ont.

G. McL. Brown, who has been appointed General Traffic Agent C.P.R., London, Eng., was born in Hamilton, Ont., Jan. 29, 1865, and entered railway service in 1882, since when he has been successively: 1882 to 1885, freight department Northern and Northwestern Ry.; 1885 to 1887, Superintendent's office and other departments G.T.R.; Sept., 1887, to 1902, C.P.R. service at Vancouver, acting successively as ticket agent, district passenger agent, and executive agent; July, 1902, to Nov., 1905, Superintendent Dining, Sleeping and Parlor Cars and News Service, Montreal; Nov., 1905, to Dec., 1908, General Passenger Agent C.P.R. Atlantic Steamship Lines, Montreal.

W. G. Annable, who has been appointed General Passenger Agent C.P.R. Atlantic Steamship Lines, Montreal, was born at Ottawa, Mar. 3, 1875, and entered railway service 1891, since when his record has been: 1891 to Jan., 1901, starting as junior clerk and rising to chief clerk, C.P.R. City Passenger office, Ottawa; Jan., 1901, to Nov., 1905, in General Passenger Department, Montreal, having charge of the steamship reservations on the Pacific for through passengers from Europe, as well as those on the continent; also on the Atlantic for through passengers from the Orient; also the Chinese business in detail for the company, the recording of such passengers through Canada in bond to other countries; Nov., 1905, to Dec., 1908, General Baggage Agent C.P.R., Montreal.

Lord Northcote, who recently completed his term as Governor-General of Australia, and who has been visiting friends in Canada on his homeward journey, was one of the original directors of the C.P.R., and though that connection has been severed, still maintains the utmost interest in the company. Lady Northcote is the adopted daughter of Lord Mount Stephen, a former President of the company. During their stay in Montreal Lord and Lady Northcote were the guests of R. and Mrs. Meighen, the latter being a sister of Lord Mount Stephen. They were also at various times entertained by the Governor-General and Lady Grey, Sir Thos. and Lady Shaughnessy, Sir Wm. and Lady Van Horne, Sir George and Lady Drummond, Sir Montagu and Lady Allan, and R. W. and Mrs. Reford.

H. J. Maguire, whose appointment as District Baggage Agent C.P.R., Pacific Division and B.C. and Pacific Coast Steamship Service, at Vancouver, B.C., was announced in our last issue, was born at Toronto June 16, 1881, and entered railway service July, 1896, since when he has been successively to Feb., 1904, office boy, clerk, and stenographer, General Baggage Agent's office G.T.R., Toronto; Mar. to July, 1904, Agent Canadian Transfer Co., Toronto; Aug. to Nov., 1904, chief clerk in Baggage Master's office, Toronto Union Station Association; Dec., 1904, to Apr., 1906, Baggage Master C.P.R. and G.N.R. jointly, Nelson, B.C.; Apr., 1906, to May, 1907, chief clerk to Assistant General Baggage Agent, C.P.R., Winnipeg; May, 1907, to Nov., 1908, Travelling Baggage Agent C.P.R. Western Lines, Winnipeg.

Allan Cameron, who has been appointed General Traffic Agent C.P.R., New York, was born March 14, 1864, and entered railway service in 1879, since when he has been consecutively to July 31, 1882, messenger and clerk Great Western Ry. of Canada, Toronto; Aug. 7, 1882, to May 1, 1883, baggage master Northern Ry. of Canada, Orillia, Ont.; June 1, 1883, to June 1, 1887, clerk local freight office, C.P.R., Vancouver, B.C.; June 1, 1887, to Feb., 1890, clerk General Freight and Passenger Department, C.P.R., Vancouver; Feb., 1890, to July 1, 1893, freight and passenger agent, C.P.R., Victoria, B.C.; July 1, 1893, to Sept. 30, 1896, freight and passenger agent, C.P.R., Portland, Ore.; Oct. 1, 1896, to July 1, 1899, District Freight Agent C.P.R.; July 1, 1899, to Dec., 1900, Assistant General Freight Agent, C.P.R., Vancouver; Jan., 1901, to Aug., 1905, in charge of Asiatic business Oregon Rd. and Navigation Co.'s steamers as General Agent at Hong Kong, China; Aug., 1905, to Dec., 1908, General Traffic Agent C.P.R., London, Eng.

S. E. Cruse, who has been appointed C.P.R. Agent at Antwerp, Belgium, was born at Liverpool, Eng., Oct. 10, 1864. He was educated at the Liverpool Institute, and after serving in various capacities in offices of Liverpool merchants, entered transportation service Jan. 1, 1888, since when he has been, to 1891, assistant bookkeeper; 1891 to 1892, Assistant Passenger Manager; 1892 to Oct., 1903, Passenger Manager, Dominion Line, Liverpool, Eng. In 1897, when the Dominion Line inaugurated its passenger service to Boston, Mass.; he was sent there to organize matters, and again visited Boston in 1901 in connection with the inauguration of a direct Mediterranean service. On the absorption of the Dominion Line into the International Mercantile Marine, he was from Oct., 1903, to Mar., 1904, Manager of the White Star Line Boston-Mediterranean service, and from Mar., 1904, to Sept., 1905, was Resident Manager, same service, Naples, Italy; and Sept., 1905, to Dec. 31, 1908, Agent White Star and Hamburg-Amerika Lines, Naples, Italy. He is a grandson of Capt. Robson Cruse, R.N., who was mortally wounded at Trafalgar under Nelson.

D. C. Coleman, whose appointment as Superintendent of Car Service C.P.R. Western Lines, Winnipeg, was announced in our last issue, was born at Carleton Place, July 9, 1879, and entered railway service 1899, since when he has been successively: Nov., 1899, to Jan., 1900, stenographer, Assistant Engineer's office, Fort William, Ont.; Jan., 1900, to July, 1900, Secretary to Superintendent at Fort William, Ont.; July, 1900, to Sept., 1900, Secretary to General Superintendent, Winnipeg; Sept., 1900, to Feb., 1901, Secretary to Superintendent, Fort William, Ont.; Feb., 1901, to Mar., 1901, Secretary to Superintendent, Cranbrook, B.C.; Mar., 1901, to May, 1902, chief clerk Superintendent's office, Cranbrook; June 1, 1902, to April, 1903, chief clerk General Superintendent's office, Lake Superior Division, North Bay, Ont.; April, 1903, to Feb., 1904, General Superintendent's accountant, Lake Superior Division, North Bay; Feb., 1904, to Mar., 1907, chief clerk General Superintendent's office, Central Division, Winnipeg; Mar., 1907, to June, 1907, chief clerk Assistant General Manager's office, Western Lines, Winnipeg; June, 1907, to Nov., 30, 1908, Superintendent, district 3, Pacific Division, Nelson, B.C. Entire service with C.P.R.

Among the subscribers to the Hammond Endowment Fund, inaugurated by H. C. Hammond, President Northern Navigation Co., in connection with the Toronto Free Hospital for Consumptives, are the following: E. B. Osler, M.P., director C.P.R., $5,000; C. Cockshutt, director Niagara Navigation Co.; J. A. McKee, President Western Steam-

The Pennsylvania Railroad System has an average of one Hayes Derail for every two and seven-tenths miles of road.

That's pretty fair evidence of merit; but there are other convincing reasons why you cannot do better than to install our derails:

We are derail specialists; we have done nothing but manufacture derails and attachments for five years.

Our derails have been tried out under every possible condition and have thoroughly proven their efficiency.

We make it our business to have you entirely satisfied with every piece of material we ship you. We want not only your first order but your continued future patronage.

Let us ship you a trial order from our works at Hamilton, Ontario.

Address: Hayes Track Appliance Co., Geneva, N.Y.

ship Co.; L. Solman, Managing Director Toronto Ferry Co.; A. M. Nanton, Managing Director Alberta Ry. and Irrigation Co.; each $1,000. Hon. J. S. Hendrie, director Northern Navigation Co.; W. J. McPherson, General Passenger Agent, C.P.R. Western Lines; and Hugh Sutherland, Executive Agent, C.N.R., Winnipeg, each $10.

Board of Railway Commissioners.

The principal matter engaging the attention of the Board of Railway Commissioners during Dec., was the Toronto Viaduct question. Chief Commissioner Mabee, assistant Chief Commissioner Scott, Commissioner Mills, opened a sitting at Toronto Dec. 8, and after hearing some minor cases, began the viaduct case Dec. 9. From then until Dec. 19 the Board was occupied in hearing evidence from engineers, manufacturers, merchants and others, the Chief Commissioner allowing very great latitude in the giving of evidence. He intimated, Dec. 19, that the case could be considered closed. The arguments of the numerous counsel will be heard later.

It is the intention of the Chief Commissioner to take up, Jan. 5, the investigation into express tolls which had been opened by the late Chief Commissioner a year ago, and the Chief Commissioner announced recently that a visit would be made to the Pacific coast during the winter to take up a number of matters of importance waiting settlement there.

While the three Commissioners were sitting at Toronto, the remaining members of the Board were at Ottawa transacting routine business.

The Annual Financial Review appendix to Vol. 8 has been issued, containing information of railway, telegraph and other companies, which is compiled and classified in a handy way for reference. Official statements of the leading mining properties are also included. The price of the appendix to other than annual subscribers is $1. The publishers are Houston's Standard Publications, Toronto.

Rate Meetings.—The meetings of the Niagara Frontier Summer Rate Committee, and the Great Lakes and St. Lawrence River Rate Committee, will be held at the Clifton House, Niagara Falls, this year. The rate representatives of the different lines in the Niagara Frontier Summer Rate Committee will meet on Jan. 19 and 20 to arrange details for summer fares from Niagara Falls, Montreal, Quebec, Detroit, Port Huron, etc. The general meeting will open Jan. 21 at 10 a.m. The Great Lakes and St. Lawrence River Rate Committee will meet Jan. 21 at 2 p.m.

The Minister of Public Works for Quebec directed the Engineer of his department, Dec. 4, to investigate and report upon the freight rates charged on the Quebec and Lake St. John Ry., since it passed under the control of the Mackenzie and Mann interests.

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-08, from July 1, 1908:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.
July..	$728,500	$ 525,600	$ 202,900	$159,000–
Aug..	747,400	561,300	186,100	30,400–
Sept..	901,700	650,600	251,100	42,000+
Oct...	1,172,700	752,600	420,100	110,200+
Nov..	1,156,900	744,300	412,600	144,300+
	$4,707,200	$3,234,400	$1,472,800	$107,100+
Inc....	$ 200,400	$ 93,300	$ 107,100	... .
Dec..	.....	... .	.....	.....

Approximate earnings for 3 weeks ended Dec. 21, $673,300, against $565,200 for same period 1907.

C.P.R. Earnings, Expenses, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-8, from July 1, 1908:—

	Earnings.	Expenses.	Net Profits.	Net Increase or Decrease.
J'ly	$6,292,880.82	$4,018,307.57	$2,274,573.25	$232,279.41–
Aug. 6	385,956.69	3,807,057.98	2,578,898.71	8,623.56+
Sept. 6	391,672.48	4,277,064.71	2,114,607.77	36,745.58–
Oct.. 7	381,970.41	4,726,703.70	2,655,266.71	25,050.93–
	$26,452,480.40	$16,829,133.96	$9,623,346.44	$285,452.36–
Inc..	.....	.....	.....	.....
Dec.	$1,060,471.73	$775,019.37	$285,452.36	.....

Approximate earnings for Nov., $7,156,000 and for 2 weeks ended Dec. 14, $3,071,000; against $6,811,000 and and $2,958,000 for same periods 1907.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross earnings for Oct., $257,439.40; working expenses, $175,941.76; net earnings, $81,497.64; against, $301,398.07 gross earnings; $245,394.49 working expenses; $56,503.58 net earnings for Oct., 1907. Aggregate gross earnings for 4 months ended Oct. 31, $965,558.35; working expenses, $683,480.62; net earnings, $282,077,73; against $1,290,050.90 gross earnings; $924,709.76 working expenses; $365,341.14 net earnings for same period 1907. Approximate earnings for Nov., $233,059; and for 2 weeks ended Dec. 14, $102,538, against $269,425 and $103,051 for same periods 1907.

MINERAL RANGE RD.—Gross earnings for Oct., $77,294.63; working expenses, $56,384.97; net earnings, $20,909.66; against, $73,864.43 gross earnings; $63,182.85 working expenses; $10,681.58 net earnings for Oct., 1907. Aggregate gross earnings for 4 months ended Oct. 31, $296,176.68; working expenses, $230,252.25; net earnings, $65,924.43; against, $290,367.45 gross earnings; $229,125.40 working expenses; $61,242.05 net earnings for same period 1907. Approximate earnings for Nov., $70,021; and for 2 weeks ended Dec. 14, $31,500; against $72.222 and $29,230 for same periods 1907.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for Oct., $1,518,210.31; working expenses, $675,005.01; net earnings, $843,205.30; against, $1,420,516.31 gross earnings; $708,111.56 working expenses; $712,434.75 net earnings for Oct., 1907. Aggregate gross earnings for 4 months ended Oct. 31, $4,928,144.43; working expenses, $2,495,809.36; net earnings, $2,432,335.07; against, $4,586,505.03 gross earnings; $2,698,734.76 working expenses; $1,887,770.27 net earnings for same period 1907. Approximate earnings for Nov., $1,142,593; and for 2 weeks ended Dec. 14, $442,953, against $1,104,517 and $458,741 for same periods 1907.

Grand Trunk Ry. Earnings, Expenses, etc.

The following figures give the earnings of the G.T.R., the C. A. R., the G. T. Western Ry., and the D. G. H. & M. Ry., separately, for Oct., as compared with Oct., 1907:

GRAND TRUNK RAILWAY.

	1908	1907
Earnings	$3,053,000	$3,177,300
Expenses	2,078,000	2,254,200
Net earnings	$ 975,000	$ 923,100

CANADA ATLANTIC RAILWAY.

Earnings	$ 150,000	$ 221,100
Expenses	163,000	206,000
Net earnings	$ 13,000–	$ 15,100

GRAND TRUNK WESTERN RAILWAY.

Earnings	$ 471,000	$ 614,100
Expenses	386,000	516,700
Net earnings	$ 85,000	$ 97,400

DETROIT, GRAND HAVEN & MILWAUKEE RY.

Earnings	$ 145,300	$ 155,900
Expenses	117,800	133,700
Net earnings	$ 27,500	$ 22,200

Approximate earnings for Nov., $3,555,674, and for 2 weeks ended Dec. 14, $1,426,374; against $5,332,940 and $1,649,883 for same periods 1907.

TRAFFIC RECEIPTS OF THE SYSTEM.

Aggregate from July 1 to Nov. 30:

	1908.	1907.	Increase.	Decrease.
Grand Trunk	£2,832,405	£3,198,833	....	£366,428
Canada Atlantic	172,874	213,492	...	40,618
G. T. Western	487,416	589,383	....	101,967
D., G. H. & M.	150,625	168,864	....	18,239
Total.....	£3,643,320	£4,170,572		£527,252

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Canadian Westinghouse Co. has issued circular 1157, The Westinghouse Type S. Distributing Transformers.

The Falls Hollow Staybolt Co., Cuyahoga Falls, Ohio, has appointed W. C. Squire, 209 Western Union Bldg., Chicago, Ill., as its agent for railway trade in Chicago territory, and A. S. Mitchell, 45 Broadway, New York, as agent for railway and marine trade in New York territory.

The Hutchins Car Roofing Co., of Detroit, Mich., has established a plant at Blue Bonnets, near Montreal, for the manufacture of all kinds of car doors and metal and plastic roofs for railway cars. The plant is already working on contracts for metal roofs for Canadian railways. The works and office are under the management of F. H. Hopkins, of F. H. Hopkins & Co.

The Alexander Car Replacer Co., of Scranton, Pa., has issued a booklet: "What we do, how we do it," containing a series of illustrations showing the various stages in the manufacture of its replacers which are made both in Scranton and in Montreal, also replacers in position on track and in operation. The company has sold 63,000 pairs of replacers, including 4,000 to Canadian railways, and is represented in Canada by F. H. Hopkins & Co., and Mussens, Ltd.

The Canadian Westinghouse Co.'s pocket diary for 1909, the fifth year of publication, contains more information of interest to engineers and users of power apparatus than any of the former editions, to whom it will prove of great convenience for ready reference altogether apart from its useful features as an up-to-date diary, with maps, etc.

The Canadian Fairbanks Co., Ltd., exclusive selling agents for the Fairbanks-Morse Supplies, has within the past year extended its railway supply department so as to cover such articles in addition to railway supplies as are required by general contractors. This branch of the business is now known as the railway and contractors' department, and includes the following machinery and supplies: Steam shovels, light engines, steam, gasoline or motor-driven concrete mixers, and hoisting machinery, gasoline engines, combined engines and water pumps, combined engines and deep well pumping equipment, railway and contractors' pumps, duplex steam power or gasoline driven pumps, steam pumps, hand and power pumps, triplex power pumps, gasoline direct connected or belt driven air compressors, steam independent condensing apparatus and jet condensers, gasoline or electric turntable and drawbridge machinery, windmills and windmill pumping apparatus, railway water tanks, tank fixtures and all equipment, coaling stations, railway and contractors' supplies, track tools, car movers, barrows, trucks and tinware, stand pipes, motor cars, hand cars, push cars, velocipede cars, wrecking lights, acetylene lights, scrapers, plows, shovels, buckets and cars, bottom dumping buckets and cars, jacks, screw, locomotive and hydraulic jacks, cement testing apparatus, and block machines. In addition to the above list, the company handles all regular supplies required for construction work, and makes a special point of distributing its stock through-

out its various branch houses which are situated in the principal Canadian cities, and from which a large staff of salesmen cover the entire territory from the Atlantic to the Pacific.

Applications to Board of Railway Commissioners.—The Secretary has issued the following circular: "It has been brought to the attention of the Board that railway companies subject to its jurisdiction have, in many instances, when filing applications with the Board, neglected or omitted to comply with the Board's rules of procedure in many respects, the most flagrant of which omissions have been in their neglect to complete their applications by filing the proper plans, proofs of service, consents of municipalities, and the like. I am, therefore, directed to inform your company that, after the receipt of this notice, no application will be received by the Secretary of the Board, unless proof of service on all interested parties so entitled to notice, consents, where the application is so based, and all necessary plans are furnished with such application. In the past, the work has been enormously increased by applicants neglecting these details."

Car Surpluses and Shortages.—The report of the committee on car efficiency of the American Railway Association for the period ended Nov. 27, 1908, shows a total of 132,829 idle available cars, an increase of 11,655 cars over the previous report, and an increase of 21,917 idle cars over the figures of Oct. 28. Taken in connection with the shop reports, which show a decrease of 10,119 in the number of bad order cars, this report seems to indicate that there is but little change in the car situation. There are some shortages reported, but with the exception of the Canadian lines the shortages are slight, and are generally filled from surplus stocks on the roads reporting them. The large shortage reported in the Canadian group is in the extreme western portion of the Dominion and is less an actual shortage than a temporary delay in providing equipment from districts where empties are more plentiful, the distance from the base of supply being an important factor in the situation. Four companies reported in the Canadian group, the surpluses being: 638 box cars, 820 flat cars, 78 coal, gondola and hopper cars, and 539 other kinds, making a total of 2,027 cars of all kinds, against 1,739 cars of all kinds on Nov. 11. The shortages were: 6,480 box cars, and 800 coal, gondola and hopper cars, a total of 7,280 cars, against 8,124 cars on Nov. 11.

The grand jury at Guelph, recently, brought in an indictment against the G.T.R. for maintaining a nuisance in that city, by not having a passenger station with the necessary accommodation for traffic, and for not properly safeguarding the level crossings near the station. The company has been given until the next assizes to make improvements.

In a case in which a Georgetown, Ont., hotelkeeper was charged with supplying intoxicating liquor to a G.T.R. conductor while on duty, Justice Latchford quashed the conviction, Dec. 4, on the ground that as the G.T.R. is under the jurisdiction of the Dominion Railway Act, the Ontario Act, under which the proceedings were taken, cannot be made to apply.

The award of the arbitrators recently made in the matters in dispute between the locomotive engineers of the Canadian Northern Ry. and the company sets forth a stipulation that a railway company must provide adequate stopping places for train crews along its railway when they are forced to remain over night from their homes, and sometime after a long trip in inclement weather.

Railway Rolling Stock Notes.

The Montreal Locomotive Works recently shipped 7 consolidation locomotives to the C.P.R.

The Crossen Car Mfg. Co., Cobourg, Ont., has shipped 2 snowploughs to the Canadian Northern Ry.

The Intercolonial Ry. has ordered one 60-ft. baggage car from the Preston Car and Coach Co., Preston, Ont.

The Eastern British Columbia Ry. has received 2 consolidation locomotives from the Montreal Locomotive Works.

The G.T. Pacific Ry., between Nov. 18 and Dec. 19, added to its rolling stock 500 box cars, nos. 307,425 to 307,924.

The Canada Foundry Co., Toronto, between Nov. 23 and Dec. 22, shipped one consolidation locomotive to the Canadian Northern Ry., and 2 eight-wheeled passenger locomotives to the G.T. Pacific Ry.

The Hamilton Steel and Iron Co., Hamilton, Ont., has ordered one saddle tank locomotive, of 108,000 lbs., from the Canadian Locomotive Co., Kingston, Ont.

Among the U.S. patents granted recently was one for superheater for steam boilers, to H. H. Vaughan, Assistant to the Vice-President C.P.R., and A. W. Horsey, Mechanical Engineer C.P.R.

The Canadian Northern Ry., between Nov. 15 and Dec. 15, received 4 consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont., and one consolidation locomotive from the Canada Foundry Co., Toronto.

The C.P.R., between Nov. 18 and Dec. 22, placed the following orders for rolling stock at its Angus, Montreal, shops: 84 box cars, 3 stock cars, one steel coal car, 1 refrigerator car, 1 box baggage car, 1 mail and express car, 5 Hart ballast cars, 3 vans and 1 Pacific type locomotive.

The C.P.R., between Nov. 18 and Dec. 22, received the following additions to rolling stock: One tourist car, 408 box cars, 1 pile driver, 4 snowploughs, one refrigerator car, and 2 Pacific type locomotives, from its Angus, Montreal, shops; and 16 vans from its Farnham, Que., shops.

The Canadian Northern Ry., between Nov. 15 and Dec. 22, in addition to the orders mentioned in our last issue, ordered the following rolling stock: 6 first-class coaches from Rhodes, Curry & Co., Amherst, N.S.; 200 box cars and 100 stock cars from the Crossen Car Mfg. Co., Cobourg, Ont.

Following are particulars of the 1,000 box cars being built for the Canadian Northern Ry. by Rhodes, Curry & Co., Amherst, N.S., as mentioned in our last issue:

Dimensions	M.C.B.
Capacity	60,000 lbs.
Trunk and body bolsters	Simplex
Brake beams	Simplex
Air brakes	Westinghouse

Following are chief dimensions, etc., of the 500 box cars which are being built for the G.T. Pacific Ry. by Rhodes, Curry & Co., Amherst, N.S., as mentioned in our last issue:

Length, over end sills	36′ 9¾″
Width over side	9′ 0¾″
Height, top of sill to underside of plate	7′ 10¾″
Length, inside	36′ 0″
Width, "	8′ 6″
Height, "	8′ 0″
" from rail to top of running board	13′ 4″
Wheel base of truck	5′ 2″
Bolsters and brake beams	Simplex
Air brakes	Westinghouse

The Montreal Locomotive Works has received an order from Pagano and Cavecci, contractors, Plaster Rock, N.B., for two 4-wheel locomotives, of which the following are chief particulars:

Cylinders	10″ by 16″
Driving wheels, diam	30″
Boiler, type	straight top.
" pressure	150 lbs.
Firebox	42″ by 24″
Tubes, no. and diam	98—1¾″
" length	8′ 2″
Engine, wheel base	5′ 0″
Total weight	36,000 lbs.
Tank, capacity	600 U.S. gals.

Following are additional particulars of the 500 steel frame box cars being built for the C.P.R., as mentioned in our last issue. The steel frames are being built by the Dominion Car and Foundry Co., and the cars are being finished at the C.P.R. Angus, Montreal, shops:

Capacity	40 tons
Body and underframe, steel sheathed with yellow pine	
Length, inside couplers	39′ 10¼″
Width, overframe	9′ 3½″
Axles	5″ by 9″ M.C.B
Brake shoes, Am. Brake Shoe and Foundry Co.'s steel back.	
End doors, iron, 2′ wide by 14″ high, for loading lumber and small iron end door for loading rails.	

Following are chief dimensions of the 1,000 steel, hopper bottom, gondola cars, being constructed in the U.S. for the G.T.R.:

Capacity	50 tons
Weight	38,500 lbs.
Length, inside	30′ 0¼″
Width "	9′ 6″
Length, over all	31′ 6″
Width, "	10′ 1½″
Height, "	10′ 0″
Axles	open hearth steel
Bolsters, body	plate and angle
" truck	pressed steel
Brake beams	pressed steel
Side bearings	steel
Wheels	chilled cast iron
" diam	33″

The Montreal Locomotive Works has received an order from J. D. McArthur Co., Winnipeg, for 6 mogul locomotives, of which the following are chief particulars:

Cylinders	19″ by 26″
Driving wheels, diam	50″
Boiler	extended wagon top
" pressure	180 lbs.
Firebox	95″ by 42½″
Tubes, no. and diam	240—2″
" length	10′ 5¼″
Driving wheel base	12′ 6″
Engine wheel base	20′ 6½″
" and tender	49′ 0½″
Weight on drivers	117,000 lbs.
" total	135,000 lbs.
Tank capacity	5,000 Imp. gals.

Following are chief particulars of the 10 consolidation locomotives which the C.P.R. is building at its Angus, Montreal, shops, as mentioned in our last issue:

Weight on drivers	168,150 lbs.
Total weight	192,350 lbs.
Cylinders, diam	22½ ins.
Pistons, stroke	28 ins.
Drivers, diam	58 ins.
Boiler	wagon top
Steam pressure	180 lbs.
Heating surface, total	2,797 sq. ft.
Tubes, diam	240—2″ and 24—5″
" length	14′ 1⅜″
Firebox	8′ 0⅝″ by 5′ 5¾″
Grate area	43 sq. ft.
Capacity, water	5,000 Imp. gals.
" coal	10 tons
Brake beams	Simplex
" shoes	C.P.R. standard
Couplers	Tower
Headlights	C.P.R. electric
Journal bearings	C.P.R. standard
Superheater	Vaughan-Horsey

On page 37 it is stated that A. E. Trump has been appointed Chief Train Dispatcher District 2, Central Division, C.P.R., with office at Brandon, Man. It should read E. G. Trump and office at Winnipeg.

W. Basdon, section foreman Burketon station, was committed for trial at Bowmanville, Ont., Dec. 7, in connection with a train wreck on the C.P.R. at Sandbank, when three persons were killed. It is alleged that the switch lights were not burning at the time the accident occurred.

The Commissioners and officers of the Victorian Railways, Melbourne, Australia, of which Thos. Tait, formerly of the C.P.R., is Chairman, have sent out a very interesting greeting card for Christmas and the New Year, containing half tone illustrations of the Sydney express train, the general railway offices, Richmond station with its high platforms following English practice, and a train crossing the Yarra River at Hawthorn.

Central Railway and Engineering Club of Canada.—At the annual meeting of the Club in Toronto, Dec. 22, A. M. Wickens read a paper on the electrification of steam railways. The Secretary-Treasurer's report showed a satisfactory balance in hand. Officers were elected as follows: President, C. A. Jefferis, Master Mechanic Consumers Gas Co.; 1st Vice-President, J. C. Gorden, general foreman G.T.R.; 2nd Vice-President, H. G. Fletcher, manufacturers' agent; Executive Committee: G. Black, road foreman locomotives, G.T.R.; G. Baldwin, yardmaster Canada Foundry Co.; J. Bannan, chief mechanical engineer, City Hall; H. Ellis, machinist, Consumers Gas Co.; W. R. McRae, Master Mechanic, Toronto Ry.; J. Markey, Master Mechanic, G.T.R.; R. Paterson, Master Mechanic, G.T.R. All of the officers are residents of Toronto except Messrs. Patterson and Black, of Stratford, Ont.

A London cablegram says W. Beckett Hill, Manager of the Allan Steamship Line, died at Liverpool Dec. 26.

The G.T.R. has reserved a space of 6,000 ft. at the Alaska-Yukon-Pacific Exposition, to be held at Seattle, Wash., in May.

A through daily train service between Winnipeg and Duluth, Minn., via the Canadian Northern Ry., was inaugurated Dec. 7.

The second annual dinner of the C.P.R. London, Eng., staff was held there Dec. 4, under the presidency of Archer Baker, European Manager.

The C.P.R. is establishing an industrial department for the territory tributary to its western lines, under the direction of F. W. Peters, assistant to the Second Vice-President.

The Montreal Polytechnique School directors are discussing the inauguration of a course in railway transportation, and the help of the Dominion and Provincial Governments, and of the C.P.R. and G.T.R., will be sought to carry out the scheme.

J. L. Doupe, Assistant Land Commissioner C.P.R., Winnipeg, while in Montreal and Toronto recently, said that while the company's land sales during the season were not so great as the previous year, really more land was sold to actual settlers than in the time of boom.

The Winnipeg Union Stock Yards Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $1,000,000, and office at Winnipeg, to acquire and operate stockyards, and carry on the general business of stockyardsmen, etc., throughout the Dominion and elsewhere. The provisional directors are: A. M. Nanton, Managing Director Alberta Ry. and Irrigation Co.; J. H. Munson, General Western Counsel Canadian Northern Ry.; J. A. M. Aikins, Local Solicitor C.P.R.; W. Harvey, Winnipeg; and D'Arcy Tate, Assistant Solicitor G.T. Pacific Ry., Montreal.

Press reports stated recently that an agreement had been arrived at by various railways operating in the U.S., providing for the pooling of the commission in connection with the eastbound traffic for the Atlantic steamship service; and that in the division of business the G.T.R., among others, would receive one-sixth. We are officially advised that the report is not correct. The steamship companies naturally ticket the trans-Atlantic business, and have been buying railway tickets in connection with ocean tickets for a great many years, and will continue to do so, giving passengers the choice of routes. It is anticipated that with a better understanding between the railway and steamship companies, a fairer portion of the business will be ticketed over each railway, and without the disturbances which have previously resulted from lack of proper understanding.

ELECTRIC RAILWAYS.

A Toronto Railway Judgment.

The Ontario Railway and Municipal Board gave the following important judgment, Dec. 10:

This is an application made by the Toronto Railway Company to have their rights declared under an agreement, dated Sept. 1, 1891, made between the respondent and G. W. Kiely and others, which agreement was validated by a statute of the Parliament of Ontario, 55 Vic., chap. 99, by virtue of which it is alleged that the company have the right to construct and operate tracks for the purposes of their railway upon any and all streets in the City of Toronto. The company also ask that the respondents, the city, their servants and agents, be restrained and enjoined by the Board from interfering with the construction of the company's railway upon Adelaide St., from Jarvis St. to Bathurst St.; upon Bay St., from Front to Queen St.; upon University Ave., from Queen to College St.; upon Richmond, from Victoria to Church St., and upon Wellington St., from Church St. to York St., all in the City of Toronto, in accordance with plans submitted by the company to the city's engineer, and for an order that the city engineer may be required to state whether he has any reasonable or valid objections to said plans; and if no such objection can be made, that the same should be ordered to be taken as approved.

The following is a short history of the transaction out of which the agreement arose: In 1891, the City of Toronto became the owners of the street railway and the real and personal property of the former street railway company. The old company operated the railway with horses as the motive power. After the city acquired the system, they advertised the railway and appurtenances, together with a franchise for 20 years, to be extended to 30 years if legislative authority could be obtained, for sale by tender under conditions which were adopted by the council. The tender of G. W. Kiely and his associates, called the purchasers, was accepted by a by-law of the city, subject to the execution of an agreement to be approved as therein mentioned. In pursuance of the by-law, the agreement of Sept. 1, 1891, mentioned in the application, was executed. On April 14, 1892, an act of the Parliament of Ontario was obtained, 55 Vic., chap. 99, incorporating Mr. Kiely and his associates as the Toronto Railway Co., and confirming and validating the agreement, and the condition, and tenders within referred to and incorporated therewith, which are described in the act as schedule A. The company paid for the railway and its appurtenances, and the franchise, $1,453,788, and in pursuance of sec. 24 of the conditions of sale, changed the system from a horse to an electric railway, and as such have operated it ever since. It is a matter of common knowledge that the installation of the steam and electric plant, and the relaying of the track necessary to operate the system as an electric street railway, and new cars, cost the company several millions of dollars.

The crucial question to be decided by the Board on this application is, who has the right to pick, choose or select the streets upon which the new lines are to be built? This question would be concluded by the judgment of Judicial Committee of the Privy Council in the consolidated appeals of the Corporation of the City of Toronto v. the Toronto Railway Co. from the Supreme Court of Canada, and of the Toronto Railway Co. v. the Corporation of the City of Toronto from the Court of Appeal of Ontario, delivered April 26, 1907, had not the Parliament of Ontario, on April 14, 1908, by an act, 8 Edward VII, chap. 112, enacted that "notwithstanding any judicial decision interpreting the effect of the said act and the said agreement, it is hereby declared that it is and always has been the true intent and meaning of the said act that the rights retained by and secured to the City of Toronto by the said agreement as to the control and management of the streets of the said city, and as to establishing and laying down new lines of railway, and as to extending the street car service upon the streets of the said city, as may be from time to time recommended by the City Engineer, and approved by the city council, have not been and are not affected by the said act, but said rights remain and are as set out in the said agreement scheduled to the said act."

To give effect to this act, 8 Edward VII, the Board, in determining the case, will treat 55 Vic., chap. 99, as a mere incorporating and validating act, which does not add to, extend or enlarge the rights, powers or privileges of the company. We propose to try the rights of the parties to this application as they exist under the application alone, unaffected, except as to validation, by the act 55 Vic. In arriving at a conclusion as to the construction of the agreement between the parties the Board will keep in view the surrounding circumstances, what the parties were bargaining for, and the objects they had in view as we can gather them from the writings, so that the Board may place themselves in the position of the parties when the bargain was made. The intention of the parties must be gathered from the language of the several documents which make up the contract itself.

What the city was selling, and the company were buying, in addition to the then existing horse railway and the property appurtenant thereto, was the exclusive right to operate surface street railways in the City of Toronto, except on the Island and on a portion of Yonge and Queen Sts., for 20 years, with a right of renewal for a further period of 10 years in the event of legislation being obtained to enable this to be done. This is abundantly clear from sections 5 and 11 of the agreement of Sept. 1, 1891, from sec. 1 of the conditions of sale, and from the recital in by-law 2,929, passed April 27, 1891. The operation of the railway is a business enterprise. It is operated on joint account. The company furnished all the capital necessary for the acquisition, changing, extension, maintenance and operation of the system. The city are paid a percentage of the earnings of the road, payable out of the gross receipts. The city are not required to provide any capital for the enterprise. They furnish the right-of-way along their streets subject to a joint use by the pedestrian and the vehicle. The city have not a dollar in jeopardy. The company took all the financial risk involved in the business of operating the system. It is quite clear that extensions of the lines were contemplated by the parties. The parties did not expect that the then existing lines would suffice or would be sufficient during the whole period of the franchise, to provide adequate and sufficient rapid transit for the people. Neither was it intended that tracks should be laid by the company upon all the streets of the city. The right purchased by the company and granted by the city was the exclusive right, upon certain conditions, to operate surface street railways. The right to operate includes the working of the railway as a system, and carries with it the right to include or exclude particular streets in or from the system. A company advancing all the capital, making themselves responsible for the success of the enterprise, taking all the risk of failure and loss, would require to have the right to select the streets where men most do congregate, where passengers could most readily and easily present themselves for carriage, and where the traffic would be most remunerative. The denial of this right to the company to thus manage their business would require to be stated in very clear and decisive language.

The city depends upon clause 14 of the con-

Design of Typical Steel Railway Bridges

By W. CHASE THOMSON

M. Can. Soc. C.E. Assist. Eng. Dominion Bridge Co.

Cloth, 6 x 9 ins., 178 pages, 21 figures, 5 folding plates - - - - $2.00 net

This book has been developed from lectures given by the author, and treats of the commonest types of railway bridges, which were chosen because they seemed best suited to illustrate the problems which occur most frequently to the bridge designer. These include a 60-ft. deck plate girder, a 100-ft. deck Warren girder, a 150-ft. through Pratt truss, a 200-ft. through Pratt truss with curved top chord, a 170-ft. swing bridge and a railway viaduct.

Any of these books will be sent, postpaid, on receipt of price, or further details with full list of contents will be given if desired. We can supply promptly, and at lowest price, any book published

tract to give them the right to select the streets upon which extensions would require to be built from time to time and to prevent the company from making the choice. This clause would appear at first sight to cut down the exclusive right acquired by the company to operate surface street railways, by making such right depend on the approval of the City Engineer and city council. This clause must, however, be read in connection with clause 17 of the contract. The effect of these two clauses is that while the city may requisition the company to extend its tracks on such streets as may be from time to time recommended by the City Engineer and approved of by the city council, yet the company cannot be compelled to build such extensions. They may refuse to build and abandon the privilege of laying down such new lines or extensions, and the city may grant the right to some other person or company, and in that case the company can have no claim against the city for compensation. To force the company to abandon and to grant the right to build on the abandoned streets to some other person or company, is the only remedy which the city has. This, however, does not prevent the company from picking and choosing the streets that they consider will fit in with the rest of their system, and where the most people require to be accommodated with rapid transit cars and the best financial results obtained. The company have selected the streets mentioned in the application, and the amendments thereto upon which to build extensions. On May 17, 1907, in an application by the city against the company, commonly called the overcrowding case, the record of which has been admitted as evidence in this case, in order to mitigate the congested traffic conditions in the city, this Board ordered the company with all reasonable despatch to construct between 10 and 15 additional miles of single track, and to build 100 new cars to be finished in time to be distributed and put in operation on the system as soon as sufficient new lines were built. Shortly after judgment was delivered by the Board in that case, the Manager of the company endeavored to get the city to agree with him upon the streets upon which the new lines should be built. He says that he has considered the lines that would relieve the congestion, and for that purpose he wants the streets above mentioned, and that he is prepared to improve the service regardless of expense. It appears from the evidence that the streets that have been selected by the company for the new lines have been at one time or another approved by Mr. Rust, the City Engineer. B. J. Arnold, an engineer and traffic expert from Chicago, of international repute, was called into consultation with Mr. Rust by the city. Mr. Arnold, generally speaking, agreed with Mr. Rust as to the necessity for new lines and the streets upon which they should be built. The city council, however, have not approved of the recommendations of these engineers. The city takes the position that the company have no right to build on streets, even when recommended by the City Engineer, unless also approved by the city council.

They also now allege that the construction of railway tracks and the operation of a service of cars upon the streets referred to in the company's application is not necessary, but by a re-arrangement of the routes any congestion that exists can be relieved by the existing tracks.

We determine again, as we determined before in the overcrowding case, after hearing a great deal of expert evidence, and after a careful consideration of the traffic conditions of this city, that new lines and more cars are absolutely necessary to cope with the congestion that now exists. The people are suffering while the city are delaying the company by denying them the streets they require for the new lines. The City Engineer, in his evidence, states that he is not prepared to approve of any plans for street railway extensions until the city council approve of the streets; but that otherwise, as an engineer and as an expert, his views are in accordance with those of the company as to the necessity and advisability of the construction of these tracks. The Board received evidence, submitted by the company, largely of a statistical character, to show the absolute necessity for the new lines in the public interest. Evidence was given on behalf of the city that showed that the building of new lines on Bay St. was objected to by a number of citizens, as the street cars would make it less convenient for cartage from the wholesale houses, for which this street is at present used; also that the location of the lines on University Ave. would create noise, vibration and dust, which would be inimical to patients in a hospital which it is proposed to build upon that street. If the Board are right in their view, that the company have the right to select the streets for the new lines, this evidence is quite beside the mark, for the reason that once the selection is made by the company, neither the city nor the Board have the right to say nay. The company, however, will require, in constructing the new lines, to build subject to the conditions of secs. 12 and 13 of the conditions of sale.

The Board determine that the company ave the right to select the above-mentioned streets, and so declare: We find that the city has denied the company's right and Has prevented the company from using the streets selected for their new lines, and has violated and committed a breach of the agreement which they made with the company. Under the authority vested in the Board by sec. 63 of the Ontario Railway and Municipal Act, 1906, having regard to all the circumstances of the case, we think it reasonable and expedient in our discretion to enjoin and restrain the city, their servants and agents, from preventing or interfering with the construction by the company of the railway upon the said streets mentioned in the application and amendments thereto. The Board reserves further direction. The Board makes no order as to costs except that the city shall provide $50 for stamps upon the formal order.

The Toronto Board of Control decided, Dec. 24, to appeal to the Supreme Court of Canada against the order of the Board, and, should it be rendered necessary, by an adverse decision, to carry the matter before the Judicial Committee of the Privy Council.

Projects, Construction and Betterments.

Brantford and Hamilton Ry.—It is reported that the directors of the Dominion Power and Transmission Co., owning this line, as well as the other electric lines radiating from Hamilton, have decided that it will be necessary to have a direct line to Toronto. This line, it is stated, will start from west of Hamilton and run along the west side of the bay to Burlington, connecting there with the Hamilton Radial Ry., now terminating at Oakville. The construction of this line will give the company a line completely around Burlington Bay, and a through connection between Brantford and Toronto, as soon as the Radial Ry. is extended from Oakville to Toronto. (Dec., 1908, pg. 891.)

Brantford Street Ry.—It was reported, Dec. 13, that the time fixed for the completion of the improvements promised in the agreement of 1907 expired Dec. 1, and that the company had asked for its extension for a further period. The proposed new agreement is that the present lines will practically be reconstructed within a year, and that the extensions, including new loop lines to Terrace Hill, Holmedale, Eastward and Eagle Place, be constructed within two years. The city council is agreeable to this extension of time, provided the company deposits $25,000 as a forfeit in the event of the agreement not being fulfilled.

The question of the ratification of the new agreement with the company came before the city council Dec. 21. In addition to the terms mentioned above, provision is made in the new agreement for the extension of the line to Port Dover at an early date. It was stated that the company had practically completed arrangements for the underwriting of a $3,000,000 bond issue in the U.S.

British Columbia Electric Ry.—Rapid progress is reported to have been made with tracklaying and other work on the New Westminster-Cloverdale section of the line under construction to Chilliwack. The rails were delivered at New Westminster and Cloverdale Dec. 1, so that the work of tracklaying could go on simultaneously from both ends. Surveys have been completed for the entrance of the line into the city along Front St. The route to be followed necessitates the shifting of the C.P.R. and the Great Northern Ry. tracks about 8 ft. nearer the river, which will be done at the B.C.E.R. Co.'s expense. A contract for 150,000 ties has been let for delivery along the route of the new line.

Work on the cemetery extension of the line in Victoria is being progressed with. The rock blasting on May St. has been completed, and steel was laid to the cemetery Nov. 30. This is about half-way to Foul Bay road, which will be the terminal of the extension. It was expected that the line would be opened for traffic Dec. 30. (Dec., 1908, pg. 891.)

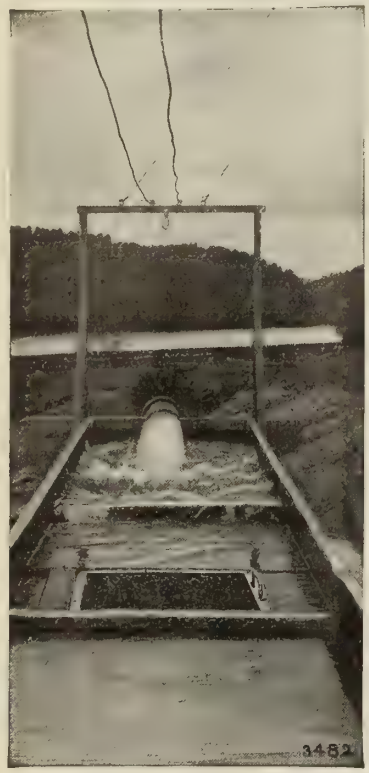
During the current year the company intends to construct, at its own car shops, about 26 double-truck city passenger cars, which it has been arranged to have built in such a manner that they can be easily converted into "pay-as-you-enter" cars. They will at first be operated under the present system of collecting fares until the passengers have become accustomed to the new entrances and exits, and it is anticipated the pay-as-you-enter system will be fully adopted during the next year.

Calgary.—A further offer has been submitted by P. A. Rodrique to the city council of Calgary, Alta., to construct an electric railway for the city, finance it, construct it according to the specifications of the city, and turn it over whenever the city desires it. He offers to put up a deposit as a guarantee that he will put through his part of the agreement. The line, he says, can be constructed within the city's estimate, and would be a paying venture from the start. (Dec., 1908, pg. 891.)

Desjardins Interurban Ry.—A public meeting was held at Waterdown, Ont., recently, when the question of the construction of this projected electric railway was considered and an address to the citizens of Hamilton, in favor of the line, was adopted. There has always been considerable difficulty in the way of securing an entrance into Hamilton from Waterdown and the northern country, and the people in their address state that the projected lines "afford improved facilities for the travel and traffic seeking a more direct passage across the country and through Hamilton, making the city a complete centre of passage, as well as of radiation to all surrounding points. The design of the survey is not competition with any existing charter . . . the routes proposed form a united system connecting with or extending every other railway contiguous to it." (Dec., 1908, pg. 891.)

Dunnville, Wellandport and Beamsville Electric Ry.—The taxpayers of Dunnville, Ont., voted in favor of the granting of a bonus of $15,000 towards the construction of the projected railway, Dec. 3. Application is being made for subsidies in adjoining muni-

PUMP YOUR WATER
BY
COMPRESSED AIR



For pumping mines, sand, mine tailings, condensing and factory water, from rivers or lakes having a great rise or fall, the RAND "RETURN AIR" is unquestionably the most economical system known.

Its essential principle, distinguishing it from other pneumatic displacement pumps, is the use of the same charge of air over and over, thus utilizing its expansive power.

No system is so simple to manage or maintains such a high original efficiency indefinitely.

cipalities. It is reported that a contract for the construction of the line has been let to Wm. Graham, Toronto.

Eastern Ontario Electric Ry.—Application will be made next session of the Ontario Legislature for an act incorporating a company with this title for the purpose of constructing a railway to be operated by electricity or other motive power, except steam, from Cornwall to Toronto, touching at any or all of the various incorporated cities, towns and villages lying in its route through the various townships lying between the two terminal points; also a line from Ottawa to Brockville, with power to construct branch lines or extensions, not exceeding in any case 30 miles, and not beyond the boundaries of the counties in which the townships enumerated in the act are situated. The company desires to have power to issue bonds to the extent of $25,000 a mile. H. F. Holland, Cobourg, Ont., is solicitor for the applicants.

Electric Belt Line.—A meeting was held, Dec. 9, in the Board of Trade, Ottawa, to consider the advisability of applying for a charter for an electric belt line to run from Darling to Brockville, Ont.; through Morrisburg to the southeasterly boundary between Ontario and Quebec; and between Ottawa and Morrisburg. This would give a mileage of about 170 miles, and by means of the line to the Quebec boundary opportunity would be given to a Quebec company to construct a line to Montreal. The meeting was attended by representatives from Cornwall, Carp, Athens, Fitzroy, Prescott, Brockville, and other places. We are advised that a provisional organization was effected as follows: President, Mayor Cossitt, Brockville; Secretary-Treasurer, F. Iveson, Metcalfe; directors: J. F. Ault, Winchester; T. Berney, Athens; F. H. Daniels, Prescott; S. R. Rudd, Arnprior; J. L. Rolston, Metcalfe; D. McArthur, Kenmore; Reeve S. McLure, Fitzroy; J. Hilliard, Morrisburg.

Fort William.—Application will be made next session of the Ontario Legislature, by the city council of Fort William, Ont., for an act confirming and validating a number of by-laws and agreements, among them being the following: (1) A by-law authorizing an agreement with the Mount McKay and Kakabeka Falls Ry., and to raise $9,000 by debentures for the purpose of enabling the city to carry out its part of the agreement. The purpose for which the money is required is to compensate the M. McK. and K. F. Ry. for certain expenditure in the construction of a street railway incurred under authority of the council, in regard to which doubts have been expressed as to the city's authority. (2) A by-law to raise $170,000 by debentures to extend and improve the street railway system. It is proposed to double-track certain portions of the present street railway within the city, and to construct certain extensions, which were authorized by the city's act of 1908, and the city now desires authority to raise money to carry out the works. It is desired to have power to issue the debentures as required for the double-tracking of the line, payable within 30 years, without obtaining the consent of the ratepayers thereto. Provisions are also to be inserted in the act relative to the appointment of the fifth member of the commission to manage the street railway, and the salary to be paid him. (Dec., 1908, pg. 891.)

Hamilton and Dundas St. Ry.—Recent press reports stated that the work of double-tracking this line would be commenced at an early date. We have been officially advised that these reports are inaccurate; that no work is to be started and that no tenders will be asked for.

The Hamilton Street Ry. Co. put a force of men and a large number of teams at work, Nov. 24, on the car barns and repair shops proposed to be constructed on the block bounded by Sanford Ave., King, Wentworth and Wilson Streets, Hamilton, Ont. Objection was taken to the laying of rails to connect the existing lines with the new barns, and a delegation of residents waited on the Board of Works Nov. 26. After discussion the Board decided not to give the company any more rights than they already possessed over existing rights, and made such regulations as will obviate the alleged objectionable features of the concessions as to the conveyance of freight through certain streets. When the matter came before the city council, Nov. 30, the by-law was held up, in order that there might be a further discussion before the Board of Works. As a result of further discussion it was understood, Dec. 12, that the council would pass the by-law provided the company would be satisfied to run only passenger cars on Wentworth St. (Dec., 1908, pg. 891.)

Huron and Ontario Ry.—The Ontario Legislature will be asked next session for an act extending the time for the construction of the company's projected railways, and increasing its bonding powers.

Mount McKay and Kakabeka Falls Ry.—See Fort William. (June, 1908, pg. 431.)

Montreal Street Ry.—The action instituted by the city against the company to force an extension of the lines via the Cote des Neiges road through the newly annexed Mount Royal Ward came before the Recorder Dec. 14. The case for the city having been presented, further argument was adjourned to Jan. 4.

Montreal Terminal Ry.—Application will be made next session of the Dominion Parliament for an act amending the company's charter powers, by extending the time limit for the construction of the railway; for power to construct and operate an elevated railway, and to increase the powers given the company.

Nelson Tramway.—An offer has been submitted by a local syndicate to the Nelson, B.C., city council to operate the street railway in the city, if the corporation will supply power free. It is said that the proposition will be voted upon at the municipal elections. The railway has not been operated for some time.

Southwestern Traction Co.—Application is being made to the London, Ont., city council by the company, for permission to extend its tracks along Simcoe St. to Talbot St. It is said that the object is to provide for a connection with the projected line between London and St. Mary's.

Toronto Ry.—In connection with the judgment of the Ontario Railway and Municipal Board, which appears on page 49, Controller Spence suggests that in the best interests of the city and the company a new agreement should be arrived at which would do away with all causes of friction.

Residents of Ward Three have petitioned in favor of a cross-town street car service from Bathurst St. across the Don, the suggestion being for an extension of the present line at Arthur St. to the Don, midway between Queen and College Streets. The matter was referred to the City Engineer for a report. (Dec., 1908, pg. 891.)

Toronto to Niagara Falls.—W. Mackenzie, on returning to Toronto, Dec. 21, from England, stated that he expected that in the near future an electric railway would be built between Toronto and Niagara Falls, on the Toronto and Niagara Power Co.'s right-of-way.

Winnipeg Electric Ry.—It was reported Dec. 15 that the entire street railway system may have to be rebonded owing to the discovery that stray electric currents are invading the big buildings over the telephone conduits, which are in constant danger of fire. Several small fires are said to have been traced to this source. (Dec., 1908, pg. 892.)

Woodstock to Guelph.—A proposition to connect these two Ontario cities by means of an electric railway was laid before the Berlin Board of Trade, Dec. 10, by W. A. Bugg and —. Warfield. The route proposed to be followed is by way of Berlin, Baden, New Hamburg or Dundee, Plattsville, Bright and Innerkip. The suggestion is that the municipalities through which the line will pass should provide one-third of the stock of the line, which is estimated to cost $750,000, being at the rate of $15,000 a mile. Plattsville, where the project originated, proposes to put up $15,000; New Hamburg is considering a proposition to subscribe $25,000; the amount suggested as Berlin's proportion is $70,000. It was stated that the remaining two-thirds of the cost was ready as soon as the municipalities put up the other third. Mr. Warfield explained to the meeting that the cost of Niagara power would be $19 per h.p. for a 24-hour service, while that of steam-generated power was $30 to $33 per h.p. for a 16-hour service. It was proposed on the projected line to give an hourly service to various towns. Six 50 ft. double-track cars would be provided and the fare would not exceed 2 cents a mile, but the exact amount would be fixed by the municipalities. The proposal was favorably received and arrangements are being made by the promoters to have a series of public meetings held in the various municipalities to discuss the matter.

Electric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—A London, Eng., cablegram, dated Dec. 13, stated that an issue of the company's bonds, amounting to £500,000, had been placed on the market.

Gross earnings for Oct., $197,630; operating expenses, $96,075; net operating earnings, $101,555; renewal funds, $14,443; net earnings, $87,112; income from investments, $13,550; net income, $100,662; against $177,105, gross earnings; $86,567, operating expenses; $90,538, net operating earnings; $10,750, renewal funds; $79,788, net earnings; $11,036, income from investments; $90,824, net income, for Oct., 1907. Aggregate gross earnings for 4 months ended Oct. 31, $735,-211; net earnings, including income from investments, $356,210; against $633,439 gross earnings and $310,393 net earnings for same period 1907.

Dominion Power and Transmission Co.—A statement has been sent out by the directors to the shareholders, giving an explanation of the decision to suspend the payment of dividends for the present. The reasons given are that there has been extra expenditure on the Brantford and Hamilton Ry., and there was need of improving the Hamilton St. Ry. and other properties, while the proposals of the Ontario Government power plant to enter the Hamilton field interfered with the disposal of the company's securities. The company has been paying semi-annual dividends of 3% on its preferred stock, and in 1907 paid two dividends of ½% on its $4,698,000 limited preferred stock. There is also $2,-600,000 of common stock.

Halifax Electric Tramway.—Receipts for Nov., $12,929.44, and for 3 weeks ended Dec. 21, $9,877.62; against $11,836.05, and $9,-335.67 for similar periods 1907. Total for 11 months ended Nov. 30, $174,821.22, against $160,475.51 for same period 1907.

London St. Ry.—Gross earnings for Sept., $23,634.33; expenses, $14,651.07; net earnings, $8,983.26; gross earnings for Oct., $18,-477.38; expenses, $13,859.56; net earnings, $4,617.82; gross earnings, for Nov., $17,-618.26; expenses, $13,414.73; net earnings, $4,203.53; against $23,434.23, gross earnings;

$14,120.07, expenses; $9,314.16, net earnings for Sept.; $18,742.09, gross earnings; $13,-764.65, expenses; $4,977.44, net earnings, for Oct.; $17,549.48, gross earnings; $13,-559.92, expenses; $3,989.56, net earnings for Nov., 1907. Total gross earnings for 11 months ended Nov. 30, $214,474.24; expenses, $152,718.06; net earnings, $61,756-.18; against $212,882.35, gross earnings; $153,500.34, expenses; $59,382.01, net earnings, for same period 1907.

Montreal St. Ry.—Gross earnings for Nov., $301,578.14; expenses, $183,382.03; net earnings, $118,196.11; city percentage on earnings, $10,404.42; interest on bonds and loans, $16,113.30; rent leased lines, $444.43; surplus, $91,233.96; against $296,184.47, gross earnings; $182,637.54, expenses; $113,-546.93, net earnings; $10,240.18, city percentage on earnings; $16,470.63, interest on bonds and loans; $339.96, rent leased lines; $27,050.77, surplus for Nov., 1907. Total gross earnings for 2 months ended Nov. 30, $630,186.26; expenses, $351,506.05; net earnings, $278,680.21; standing charges, $54,-442.43; surplus, $224,237.78; against $608,-082.35, gross earnings; $347,212.68, expenses; $260,870.17, net earnings; $54,919.06, standing charges; and $205,951.11, surplus for same period 1907.

Quebec Ry., Light and Power Co.—An extract from the report for the year ended June 30, 1908, shows net earnings $238,461; from which is deducted $125,000 interest, and $26,-395 dividend, on preference stock, etc., leaving net profit of $87,066, against $84,355 for the year ended June 30, 1907.

Application was made Dec. 23, to the Montreal Stock Exchange, for the listing of the company's stock. The amount of stock covered is, 25,000 shares common stock, and 10,000 shares preferred stock, each of $100; and $2,500,000 bonds. Of the total, 3,276 preferred shares are unissued. The stock is non-assessable and the dividends paid up to the present are, on bonds, 5%; on preferred stock, 7%. The Montreal Trust and Deposit Co. acts as transfer agent and registrar.

St. John, N.B., Ry.—The directors have declared a dividend of 3% for the half-year recently concluded, payable to shareholders of record at Dec. 1, 1908.

Sherbrooke St. Ry.—Following are the officers and directors for the current year: President, P. W. Clement, Rutland, Vt.; Vice-President and Manager, R. Denio, Windsor, Vt.; Secretary-Treasurer, H. R. Barney, Rutland, Vt.; other directors, S. L. Clough, W. A. Morehouse, J. P. Royer, and P. J. Slattery, Sherbrooke, Que.

Southwestern Traction Co.—A writ has been issued by the city council of St. Thomas, Ont., against the Southwestern Traction Co. for $1,311.08, claimed to be due the council's Street Railway Commissioners for maintenance of tracks and construction of the siding opposite the city hall, and $700 back rent.

Toronto Ry.—The percentage paid by the company to the city shows, for Nov., $23,-316.90, against $22,558.63 in Nov., 1907. The figures show a gradually increasing amount, the increase being about $10,000 since Nov., 1903, when the amount was $13,789.56.

Car earnings for Nov., $286,557.43, against $279,235.50 for Oct., 1907. Total earnings for 11 months ended Nov. 30, $3,218,636.53, against $3,097,843.40 for same period, 1907.

Windsor, Essex and Lake Shore Rapid Ry.—An annual and special general meeting of shareholders has been called to be held at Windsor, Ont., Jan. 12, for the purpose of electing directors and for other business, including sanctioning or otherwise dealing with a by-law passed by the directors Aug. 28, creating 2,500 shares of preference stock.

Electric Railway Notes.

The Montreal Street Ry. put 10 new pay-as-you-enter cars into service on its various lines Dec. 4.

Jno. McArthur, Assistant Superintendent Toronto and York Radial Ry., died at Toronto, Dec. 8, aged 56.

C. A. Dertsler, C.E., who was engaged on the B.C. Electric Ry.'s Chilliwack extension, was drowned recently.

The London Street Railway management is considering the remodelling of its cars so as to operate them on the pay-as-you-enter plan.

The Montreal Trust and Deposit Co. has been appointed transfer agent and registrar, in Montreal, for Halifax Electric Tramway Co.'s stock.

The Ottawa Electric Ry. has voted $500 a year for three years towards the $5,000 proposed to be raised by the Ottawa Board of Trade for civic publicity.

The Toronto Board of Control decided, Dec. 8, to extend for two months the time within which the Toronto Ry. must equip its cars with an approved fender.

R. Howes has taken up his residence in Vancouver, B.C., to take charge of the electrification of the British Columbia Electric Ry. Co.'s branch line to Chilliwack.

Between Nov. 15 and Dec. 15, the Ottawa Car Co. shipped two double-truck cars, with 33-ft. bodies, and one single-truck car, with 21-ft. body, for the Edmonton St. Ry.

The civic investigation at Port Arthur, Ont., into charges of malfeasance in connection with the operation of franchises, including the street railway, was commenced, Dec. 15, before Judge O'Leary.

E. Bradenbury, a mining engineer of London, Eng., has entered an action against the Ottawa Electric Ry., claiming $50,000 for the loss of a foot, caused by the accident on the Britannia line, May 24, 1908.

The Ontario Railway and Municipal Board has, at the request of the Hamilton and Dun-

NOTICE is hereby given that application will be made by the Canadian Pacific Railway Company and the Grand Trunk Pacific Railway Company to the Parliament of Canada, at its next session, for an Act to ratify and confirm an agreement, dated the 1st day of December, 1908, made between the Canadian Pacific Railway Company and the Grand Trunk Pacific Railway Company, respecting joint facilities at Fort William, Ontario.

E. W. BEATTY,
Assistant Solicitor, Canadian Pacific Ry. Co.

D'ARCY TATE,
Assistant Solicitor, Grand Trunk Pac. Ry. Co.

Dated at Montreal this 10th day of December, 1908.

NOTICE is hereby given that application will be made by the Grand Trunk Railway Company of Canada to the Parliament of Canada at its next Session for an Act authorizing the company to create and issue additional "Grand Trunk Consolidated Debenture Stock," and "Grand Trunk Four Per Cent. Guaranteed Stock," respectively, in such amounts, subject to the limitation to be fixed by the said Act, as the proprietors of the company may from time to time determine, and to apply the proceeds to the general purposes of the company; also repealing Section 19 of "The Grand Trunk Arrangements Act, 1862," and substituting other provisions therefor, and for other purposes.

W. H. BIGGAR,
General Solicitor, Grand Trunk
Railway Company of Canada.

Dated at Montreal, this 2nd day of December, 1908.

A. B. Jardine & Co. - - Hespeler, Ont.

das Ry., directed Engineer Wyse to make an investigation into the recent accident by which Miss V. Norton was killed.

The Ottawa Electric Ry. has ordered 12 semi-convertible, single-truck cars, with 21-ft. bodies, constructed on the "pay-as-you-enter" principle, from the Ottawa Car Co., Ottawa. These cars were fully described and illustrated in our Oct., 1908, issue.

G. B. Blanchard, Vice-President Dominion Power and Transmission Co., Ltd., Hamilton, Ont., has resigned. Reports of the resignation have been current for some time, but no confirmation could be obtained until it was recently announced that it had been accepted.

The application made by Senator Tessier to the Board of Railway Commissioners, for an order compelling the Ottawa Electric Ry. to issue free transportation to members of parliament, was withdrawn Dec. 1. Counsel stated that the application would be pressed later on.

An engineer representing the Ontario Railway and Municipal Bgard is investigating the conditions of traffic, etc., on the Toronto and York Radial Ry.'s Metropolitan Division, particularly in connection with traffic during the winter, about which the municipalities have complained.

The British Columbia Electric Ry. is reported to have given instructions for the construction of new cars for its Vancouver and Victoria lines, to the value of about $200,000. The orders include 18 of the pay-as-you-enter type, and two cars specially constructed for carrying parties of tourists.

The Halifax Electric Tramway Co., Halifax, N.S., has ordered two semi-convertible, single-truck cars, with 21-ft. bodies, constructed on the "pay-as-you-enter" principle, from the Ottawa Car Co., Ottawa. These cars are exactly similar to those built for the Ottawa Electric Ry., described in our Oct., 1908, issue.

G. W. Lang, who has been appointed Assistant Superintendent Ottawa Electric Ry., was born in Ottawa, June 13, 1872, and entered that company's service June, 1892, as conductor. In May, 1896, he was promoted to Inspector and occupied that position until Nov. 15, 1908, when his present appointment took effect.

The question of the operation of street cars on Sundays is occupying attention in St. Thomas, Ont., and Edmonton, Alta. At St. Thomas it was decided to submit the question to a vote of the electorate at the annual municipal elections, and at Edmonton the city council will petition the Provincial Legislature to amend the act passed last session, forbidding the operation of street cars on any line in the province on Sundays.

A Windsor, Ont., dispatch announces the following changes in the Windsor, Essex and Lake Shore Rapid Ry. directorate, etc.: W. C. Crawford, of Tilbury, Ont., heretofore Vice-President, has been elected President, succeeding Jno. Piggott, who becomes Vice-President. J. W. McColl, Toronto, has been appointed Treasurer, and W. R. Phillimore, Chatham, Secretary, the latter succeeding W. T. Piggott, who has been appointed Managing Director. F. E. Lowe, General Manager, who came from Minneapolis last spring, has resigned.

G. W. Lang has been appointed Assistant Superintendent Ottawa Electric Ry., as announced in our last issue. Superintendent Hutcheson's circular, announcing the appointment, says Mr. Lang will have supervision over the car service and traffic. All men employed in this branch of the service will be subject to his instructions. He will make appointments to the service and will look after the training, discipline and welfare of his men. His headquarters for the present will be at the company's receiving office, Sparks St.

Judgment was delivered in the Supreme Court, Dec. 5, in the case of Amyot vs. Quebec Ry., Light and Power Co., in which plaintiff claimed $200 for damages to his property, and $9,800 representing depreciation, alleged to have been caused by the company's cars leaving the tracks at Maple Ave., Quebec, during Jan., Feb., Mar. and April, 1907. The Court decided that the company had not used all the necessary prudence and precaution when approaching the property in question, and gave plaintiff $141.87 for damages to property, and $3,750 interest and costs.

Two members of the Ontario Railway and Municipal Board inspected, on Dec. 22, a car which the Toronto Ry. had equipped with a third step, with a view to meeting the complaints about the height of car steps from the ground. A trial run which was made with the car demonstrated that at several of the busiest street corners the distance between the edge of the lower step and the curbing was less than 7 ins., and at one of the corners an accident to two lady pedestrians was narrowly averted. It was also shown that the car barn doors and cleaning pits were too narrow for the third step car and that the buildings would practically have to be reconstructed to accommodate it.

Regulations for Ottawa Electric Ry.

In consequence of the accident which occurred on the Ottawa Electric Ry.'s Britannia line on May 24, 1908, the Board of Railway Commissioners has passed the following order no. 5617:

In the matter of sub-sec. 2 of sec. 26 of the Railway Act, and of the Ottawa Electric Ry. Co., the Board orders:

1. That passengers be not allowed to stand on the front platforms of cars.

2. That motormen be forbidden to engage in conversation with passengers or others, while the cars are in motion, or to turn from a forward view of the track, except where necessary in the proper operation of the car.

3. That a printed notice embodying the provisions of clauses 1 and 2 of this order, be posted in a conspicuous place inside every car, at the front, and at each end of cars controlled from both ends.

4. That no car running between Holland Ave., Hintonburg, and Britannia-on-the-Bay, on the company's Britannia line, approach within 600 ft. of an immediately preceding car or cars, while running on level track or ascending grades, nor within 1,000 ft. of a preceding car or cars, while running on descending grades.

5. That cars carrying passengers shall always have both a motorman and conductor upon them while in operation.

G.T. Pacific Elevator at Fort William.

The elevator to be erected at Fort William, Ont., for the Grand Trunk Pacific Terminal Elevator Co., for which a contract has been let recently, will be a fireproof structure with a storage capacity of 3,250,000 bush. It will be designed to receive grain from cars and to ship to cars or to lake vessels. It will include a working house with car unloading shed, a storage house, a grain drying plant and a concrete wharf. All portions of the work will be fireproof in every respect, so that the lowest possible insurance rate may be obtained. The foundations will be of concrete, resting upon piles driven to bed rock.

The working house will be 237′ 4″ by 69′ 4″, with a track shed along one side 240′ by 68′. The first story and the bins of the working house will be of reinforced concrete, and the cupola of structural steel, covered on the outside with galvanized corrugated steel. The working house will be of cylindrical bin construction, the cylinders being 12′ in diameter inside, with walls 6″ thick. The total number of bins in the working house, including interspace bins, will be 142, and the storage capacity of the working house will be approximately 780,000 bush. Floors and roof will be of concrete. The track shed will be of structural steel, with concrete floors and roof. It will cover four unloading tracks.

There will be 20 car pits, each with a capacity of 2,000 bush., set in 5 rows of 4 pits, each row being opposite a receiving leg in the working house. The car pits will discharge through valves operated by an interlocking mechanism on to five 36″ belt conveyors, one of these conveyors running beneath each row of four car pits, and delivering grain to a receiving leg. Ten pair of power shovel machines will be erected. There will be 5 receiving legs and 5 shipping legs, each with an elevating capacity of 15,000 bush. an hour. Each of these legs will discharge to a garner of 2,200 bush. capacity in the cupola of the elevator, and beneath each garner a 2,000 bush. hopper scale will be placed to weigh the grain. From this scale, grain will be spouted to the bins in the working house, to the shipping bins, for shipping to vessels; to the car loading spouts; or to the belt conveyors running to the storage house. There will be 12 shipping bins on the water side and 6 vessel loading spouts. There will be 5 car loading spouts for loading cars in the track shed on the track nearest to the working house.

In the first story of the working house there will be 15 cleaning machines built of wood, covered and lined with steel. Six of these will be especially made for the separation of wild oats from wheat. The machines will be set in 5 batteries of 3 machines each, and each battery will be spouted and operated as one machine. There will be 5 elevator legs to elevate grain from the cleaning machines, each leg receiving from one battery, and having an elevating capacity of 10,000 bush. an hour. These legs will elevate cleaned grain to the top story of the cupola, where they will discharge it either into one of 5 cleaner garners, each having a capacity of 1,500 bush., or into one of the shipping garners. From the cleaner garners it will be spouted to the bins in the working house, or on to the belt conveyors running to the storage house. The screenings from the cleaning machines in the first story will be carried by screw conveyors to a screenings leg which will elevate them to the cupola, and discharge them to 2 screenings separators, from which the various separations will be spouted to small bins in the working house. The wild oats separated from the grain by the cleaning machines in the first story will be carried by screw conveyors to a wild oats leg, which will elevate them to the cupola and discharge through spouts leading to the bins in the working house. In the cupola of the working house there will be 2 flax separators for cleaning flax. They will receive grain from a special flax leg, running from the first story, and will discharge the various separations to adjacent bins in the working house. There will be one leg for elevating dried grain received by belt conveyor from the drying plant; this leg will distribute the dried grain through a screw conveyor and spouts in the cupola to bins in the working house. A 42″ longitudinal, reversible belt conveyor will be installed in the cupola of the working house, for distributing grain longitudinally.

The first story and the bins of the storage house will be built of reinforced concrete. The storage house will be 240′ 5″ by 169′ 11″. There will be 70 cylindrical bins 23′ 3″ in diameter inside, and 54 interspace bins. The bin walls will be 7″ thick and 93′ high. The storage capacity of the storage house

Canadian Northern Ontario Railway.

NOTICE is hereby given that application will be made to the Parliament of Canada, at the next session thereof, for an Act amending the Acts relating to the Canadian Northern Ontario Railway Company (formerly the James Bay Railway Company) as follows:

Authorizing the construction of the following lines of railway:

(a) From a point on or near Nepigon Bay northerly to the junction with the National Transcontinental Railway, with two branches to reach water connections at the northerly and southerly ends of Lake Nepigon;

(b) From a point on the company's authorized line between Montreal and French River in or near the Township of Chisholm, thence northerly and westerly to a point on its Hutton Branch in or near the Township of Capreol;

(c) From a point on the company's authorized line between Sudbury Junction and Port Arthur near the source of the Vermillion River northerly and easterly to a point on the National Transcontinental Railway near its crossing of the Abitibi River;

(d) From a point on the line specified in paragraph (c) between its starting point and the Great Northern Bend of the Montreal River, thence in a generally southerly and easterly direction to a point at or near the south end of Lake Temiscamingue.

Also fixing and extending the times for commencement and completion of the lines of railway authorized by the Canadian Northern Ontario Railway Act 1906-7, between points at or near the following points, in brief—(a) Washago to Kincardine, (b) Arnprior to Gananoque, (c) Pembroke to Cobourg or Port Hope, (d) Township of Pickering to Owen Sound, (e) At or near Toronto to Windsor with a branch from London to St. Thomas and Sarnia and a branch or loop north of Toronto, (f) Niagara River to Goderich, (g) Between Dunnville and Port Dover to Owen Sound or Meaford, (h) Washago to Midland, (i) Hawkesbury to Toronto-Ottawa line in Leeds or Lanark, (j) Parry Sound to North Bay; and the line of railway authorized by chapter 65 of the Statutes of 1902, namely, in brief, French River to Batchewana Bay; and the line of railway authorized by section 3 of chapter 110 of the Statutes of 1905, namely, in brief, Toronto to Ottawa.

Also fixing the limit of securities which may be issued in respect of the lines first above mentioned.

GERARD RUEL,
Chief Solicitor.

Toronto, 22nd December, 1908.

The Edmonton and Slave Lake Railway Company.

NOTICE is hereby given that The Edmonton and Slave Lake Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may complete and put into operation the railway which it has been authorized to construct by section 8 of chapter 66 of the Statutes of Canada, 1899, and for other purposes.

GEO. F. MACDONNELL,
Solicitor for the Applicant.

Toronto, Ontario, 23rd December, 1908.

Application will be made at the forthcoming session of the Dominion Parliament for an act authorizing the Mexican Land and Irrigation Company to acquire and operate railways, tramways, and telegraph and telephone lines outside the Dominion of Canada; to change the name of the company; and for other purposes. Blake, Lash and Cassels are solicitors for the applicants.

New Trails to the
Canadian Game Lands

Before the six railways of the Canadian Northern System followed the old fur trails into the Canadian game lands, only a hardy few dared to go in. But now, the back places of the woods—wealthy in moose, caribou, deer and bear—may be quickly and easily reached. The Canadian Northern system serves a wide range of undisturbed territories. Here are a few suggestions:

The country between Parry Sound and Sudbury, traversed by the CANADIAN NORTHERN ONTARIO RAILWAY, is a land of lonely muskeg and brulé, the native country of the white-tailed deer. From Sudbury north to Sellwood this same line goes in through a moose hunting territory unequalled in Ontario.

The CANADIAN NORTHERN QUEBEC and QUEBEC AND LAKE ST. JOHN RAILWAYS span the native country of the ouananiche, northern brook trout, and the spruce-shored lakes of the Roberval country, where moose and caribou abound.

The eastern shore of Nova Scotia, from Yarmouth to Halifax, is served by the HALIFAX AND SOUTH WESTERN RAILWAY. On the barrens, slightly inland from the railway, are some of the best places for big moose in the east.

THE CANADIAN NORTHERN RAILWAY from Port Arthur to Edmonton, with many branches, griddles almost undisturbed haunts of moose, caribou, deer, wolves, bear, and all species of four-footed and feathered game.

For Information, General and Special, Address the Information Bureau, Canadian Northern Railway, Toronto

RAILWAY SPIKES

Particular attention is paid by us to the rolling of the material, and in the making of the Spikes we conform to the most exact specifications.

That our Spikes give satisfaction is proved by their use on all the leading railway lines.

We also manufacture

TRACK BOLTS TIE PLATES ANGLE BARS, ETC.

THE MONTREAL ROLLING MILLS CO.

will be approximately 2,470,000 bush. The story above the storage bins will be of structural steel, covered on the outside with galvanized corrugated steel, and floors and roofs will be of concrete. Five 36″ belt conveyors running through steel galleries from the working house will be used for filling the bins, and five 36″ belt conveyors running through tunnels beneath the storage house and under the track shed, and discharging to the shipping legs, will be used for emptying the bins. Provisions have been made so that additional storage capacity may be added at the end of the storage house, to give a maximum total future capacity of 10,000,000 bush.

The grain drying plant will comprise a No. 6 drier, with a capacity of 5,000 to 7,500 bush. in 10 hours, a boiler for furnishing steam to the drier, spouting for filling the machine and a 20″ belt conveyor, running to the drier leg in the working house, for taking the dried grain away from it.

Grain Elevator Notes.

The Winnipeg Elevator Co. has constructed an elevator of 30,000 bush. capacity at Wilkie, Sask.

J. Straiton, formerly G.T.R. agent at Goderich, Ont., has entered the Goderich Elevator and Transit Co.'s service.

It is reported that M. Orr, of Stoughton, Sask., is arranging to erect an elevator at Wainwright, Alta., in the spring.

The Northern Elevator Co.'s elevator at Glenboro, Man., with 3,000 bush. of wheat, was destroyed by fire recently.

W. and J. McLandress are reported to have purchased the elevator at West Lorne, Ont., formerly operated by Tolmie and Heilmann.

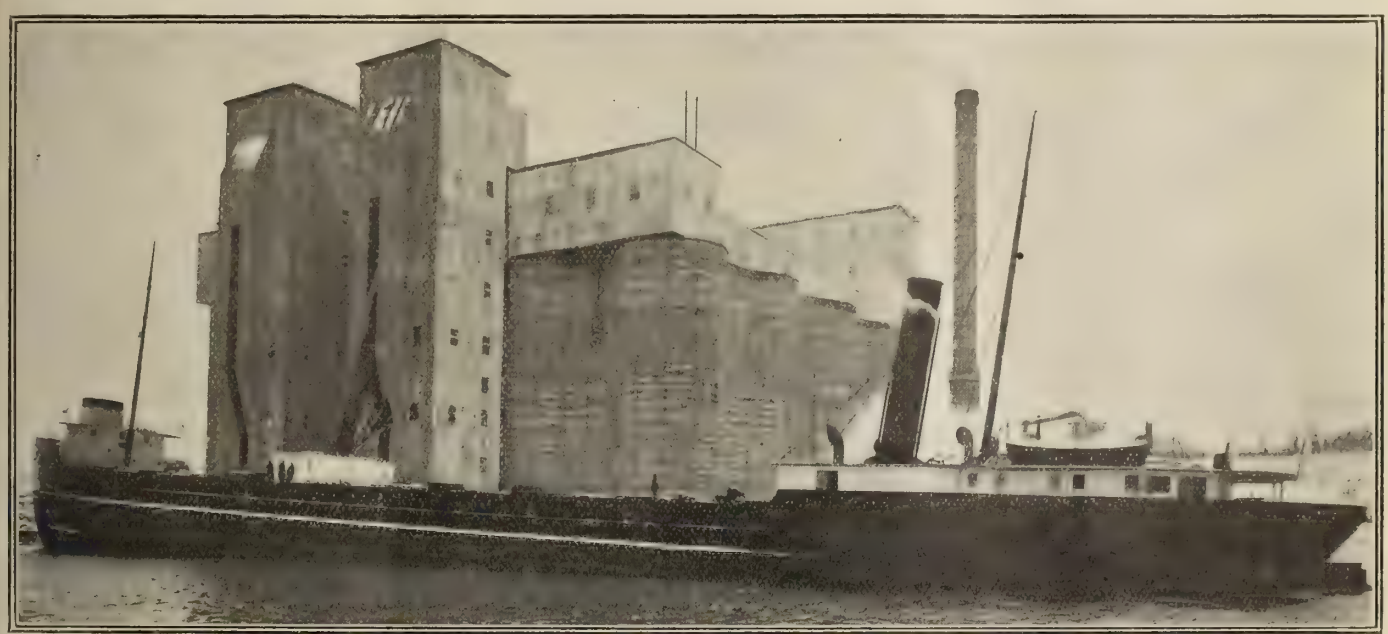
It is reported that arrangements have been completed for the construction of an elevator of 1,500,000 bush. at Port Arthur, Ont., at a cost of about $500,000.

fined $25 and costs, Dec. 2, for loading the car out of turn.

J. R. Boyle, M.P.P., in speaking before the Canadian Club at Edmonton, Alta., Dec. 7, on the grain trade of Canada, made special reference to the probability of the shipment of grain westward instead of eastward in the near future, and also dwelt on the advantage to be gained by the completion of the Hudson Bay route.

The preparations for the construction of the G.T. Pacific elevator at Fort William, Ont., were commenced recently, by the formal turning of the first sod by the Mayor. It was pointed out that, in connection with the construction, a channel of sufficient depth to float the largest lake vessel was to be cut, involving the excavation of 3,000,000 cubic yards of earth. The contract for the elevator excavation has been let to Seaman and Penniman, and for the pile-driving to J. Whalen.

Forwarders, Ltd., has been incorporated



GRAND TRUNK PACIFIC TERMINAL ELEVATOR CO.'S ELEVATOR AT TIFFIN, ONT.

For full description see Railway and Marine World, Dec., 1908, page 895.

The wharf will be 300′ long and will be built of concrete resting upon piles.

All of the equipment will be driven by electric motors, which will be installed in small units in order to obtain the maximum efficiency. Complete electric lighting, signalling and telephoning systems will be put in. A dust collecting system will take the dust from the cleaning machines and from the floor sweeps in the lower portion of the working house. A system of fire service piping supplied by an electrically driven fire pump will be a part of the equipment, as a safeguard against the burning of cars in or near the track shed, or on vessels in the slip. A passenger elevator will be installed in the working house. All windows will be of wire glass in metal sashes and frames. All electric wiring of every kind will be done in conduit, and, in fact, throughout the work most careful attention will be paid to securing an elevator in which a fire cannot possibly occur, and which would not be greatly damaged if a fire should occur in its vicinity. Exceptional facilties will be provided for the handling of cars, not only by a heavy car puller inside of the elevator, but by careful and thorough provision for rapid moving of cars to and from the elevator on the tracks in connection therewith.

John S. Metcalf Co. of Chicago, Ill., and Midland, Ont., are the consulting engineers for the G.T.P. Terminal Elevator Co.

The Farmers' Elevator Co.'s elevator at Carlyle, Sask., and 8,000 bush. of grain, were destroyed by fire Dec. 8. The loss, which is covered by insurance, was estimated at $18,000.

The question of grain elevator accommodation at Vancouver and other ports on the Pacific coast is receiving considerable attention, in view of the probability that grain will be shipped westward in the near future.

The Canada Flour Mills Co, will construct an extensive grain handling plant at Fort William, Ont., provided that railway facilities can be arranged. It is said that a site has been selected at Westfort.

The Scottish Co-operative Wholesale Society, of London, Eng., which recently placed contracts for the erection of six elevators in Saskatchewan and Alberta, will, it is reported, award further similar contracts in preparation for next grain season.

Four elevators at Guernsey, Sask., work on which was started last fall, have been completed and are in operation. They are owned by the Western Elevator Co., the Lake of the Woods Milling Co., the Saskatchewan Elevator Co., and A. E. Little.

The C.P.R. was fined $500 and costs, at Stavely, Alta., Dec. 5, 1908, for a breach of the Manitoba Grain Act, by allotting a car for the shipment of grain out of turn. J. Hagerman, C.P.R. agent at Stavely, was

under the Dominion Companies Act, with a capital of $250,000 and office at Kingston, Ont., to construct, acquire and operate elevators, grain warehouses, etc., and to carry on a general grain business, and in connection therewith to own and operate steam and other vessels, wharves, docks, etc., and to carry on the business of general carriers. The provisional directors are: W. H. Comstock, G. I. Mallory, Brockville; G. Schmidt, Pembroke; W. C. Craig, Kingston; and M. E. Galvin, Detroit, Mich.

At the recent conference of the western grain growers with the Premiers of Manitoba, Saskatchewan and Alberta, in connection with Government ownership of elevators, proposals were submitted by the grain growers for consideration. These covered the provision by purchase or construction, or both, at each railway point where any considerable quantity of grain is marketed, elevator facilities and equipment for cleaning, weighing and loading grain, and that the whole system be operated by the Government direct, or through a commission. It was suggested that the capacity at each shipping point be approximately one-third of the quantity annually marketed there; that about 25% of the storage be at the disposal of buyers of street grain, and that two or more farmers be granted the privilege of jointly utilizing a bin. The conclusions, if any, which have been arrived at by the Premiers, have not been made

NIAGARA NAVIGATION CO., LTD.

Notice is hereby given that a dividend of four per cent. (being at the rate of eight per cent. for the year) has been declared upon the capital stock of this company, and the same will be payable on the 2nd January, 1909.

The transfer books will be closed from the 16th of December to the 31st of December, 1908, both days inclusive.

The annual meeting of the shareholders will be held on Tuesday, the 12th of January, 1909, at noon, at the office of Messrs. Osler & Hammond, 21 Jordan Street, Toronto.

By order of the Board,

B. W. Folger, Manager.

Toronto, Dec. 8th, 1908.

NOTICE is hereby given that application will be made by the Grand Trunk Pacific Railway Company to the Parliament of Canada, at its next session, for an Act authorizing a further issue by the Company, of bonds, or perpetual or terminable Debenture Stock or both, for such amounts as may be determined upon and fixed by such Act, and to apply the proceeds to the general purposes of the Company.

W. H. BIGGAR,
General Solicitor.
Grand Trunk Pacific Railway Company.

Dated at Montreal this 3rd day of Dec., 1908.

public, but Premier Rutherford of Alberta is reported to have said, on his return to Edmonton, Dec. 3: "The whole proposition was talked over at considerable length and assurance was given that the matter would be given most serious consideration. The question is one of great concern to the grain growers, but I do not think they expected that the governments of any of the provinces would commit themselves to an undertaking without careful investigation."

A summary of the report prepared by C. C. Castle, Government Grain Warehouse Commissioner, on the number and capacity of all the elevators included in the Manitoba inspection district, shows that while there is a reduction of elevators in Manitoba, there is a large increase in Alberta and Saskatchewan. The transfer and eastern terminal elevators are this year included in the report for the first time, in accordance with the amendment to the Manitoba Grain Act, passed last session of the Dominion Parliament. The total interior elevator capacity west of the lakes is given as 42,812,400 bush., against 39,734,000 in 1907. The terminal elevator capacity at Fort William and Port Arthur is 18,852,700 bush., and mill elevators at Keewatin, 1,300,000 bush., making a grand total elevator capacity, west of the lakes, of 62,965,100 bush., against 58,482,300 in 1907. By provinces, the capac ty quoted is as follows: Manitoba, 678 elevators, 13 warehouses, 20,558,500 bush. capacity; Saskatchewan—607 elevators, 14 warehouses, 17,699,500 bush. capacity; Alberta—120 elevators, 14 warehouses, 4,386,400 bush. capacity; British Columbia, 3 elevators, 276,000 bush. capacity. Divided by railways: The C.P.R. has 949 elevators, 26 warehouses; C.N.R., 386 elevators, 12 warehouses; G.T.P.R., 39 elevators; G.N.R., 23 elevators; A.R. and I. Co., 11 elevators. The total increase of interior elevator capacity over 1907 is given as 3,088,400 bush., and of terminal elevator capacity, 1,394,000 bush. Transfer and terminal elevator capacity and storage east of the lakes, now in the Manitoba inspection division, is as follows: C.P.R., at Goderich, Owen Sound and Kingston, 2,296,000 bush.; G.T.R., at Collingwood, Depot Harbor, Meaford, Midland, Prescott and Tiffin, 7,449,000 bush.; Montreal, 2,581,000 bush.; Quebec, 500,000 bush.; St. John West, 1,000,000 bush.; St. John, 500,000 bush.; Halifax, 500,000 bush.

MARINE DEPARTMENT.

Atlantic and Pacific Ocean Marine.

The Elder Dempster Co.'s s.s. Bornu, which ran ashore off the Gaspe coast Dec. 3, was released on the following day without damage.

P. Owen, member of the firm of Farnworth and Jardine, Liverpool, Eng., who have considerable interests in the Canadian lumber trade, died there Dec. 7.

Capt. J. T. Gambell, of the Allan Line s.s. Grampian, was presented with a silver loving cup by the Sheffield Choir, on arriving at Liverpool, Eng., after the completion of their Canadian tour recently.

The s.s. Hector, under charter to the Dominion Iron and Steel Co., sailed from Sydney, N.S., Dec. 12, for Sydney, New South Wales, with 6,000 tons of steel rails, the first shipment of an order for 16,000 tons for the N.S.W. Government.

The transportation officials who met recently in St. John, N.B., for the discussion and adjustment of the winter rates and schedules, were dined on board the C.P.R. s.s. Empress of Ireland Dec. 9, and subsequently inspected the facilities at Sand Point.

The passenger lists of the various vessels leaving Canadian ports for Great Britain for Christmas were extremely heavy. The record number of passengers sailing from Canada on any one ship was taken by the C.P.R. s.s. Empress of Ireland, which sailed Dec. 11, the total carried being 1,721.

Regarding the proposed "all red" route, the President of the Board of Trade said in the British House of Commons recently, that the committee investigating the matter was considering an interim report, and it was unlikely that any statement would be made during that session.

The superiority of the Canadian route from the Orient to New York was for a second time proved recently, by the dispatch of two consignments from Yokohama, by Japanese vessel to U.S. port and by the U.S. route, and by C.P.R. vessel and rail route, respectively, to New York. The C.P.R. consignment left Yokohama two days after the Japanese one, and was landed in New York 12 hrs. ahead.

A press report states that W. Thomson and Co., managers of the Battle Steamship Line, owing to lack of remunerative freights, have laid up several of their vessels. The steamships Platea, Cunaxa, Trebia, Pydna and Mantinea, are reported to have been berthed for the present; the first at Rotterdam, and the others in England; and it is said that others will be temporarily withdrawn from service on their arrival at European ports.

The Halifax, N.S., Board of Trade has taken up the question of ocean freight rates, and alleges a discrimination by the Allan Line against that port in favor of St. John, N.B. The C.P.R., it is said, land Halifax freight at St. John, whence it is taken to Halifax by rail, at an extra charge of 60c. a ton. A recent revised freight tariff issued by the Allan Line, which lands freight at Halifax, raises the charge to Halifax by 60c. a ton, which, it is claimed by the Board of Trade, is a discrimination against Halifax.

The Shipping Federation of Canada in its statement as to employment at the Montreal harbor during the navigation season, states that during the 177 working days a total number of 116,850 men was employed, being an average of 669 as against 786 for the 1907 season. The decrease is attributed to the increased facilities in use at the port for loading and discharging vessels. July was the month in which employment reached its highest mark, and Sept. was the lowest, being due to the fog and smoke which tied up all shipping in the St. Lawrence for some time.

A recent press dispatch from Montreal regarding the prospects of the G.T.P. Ry. Co. inaugurating a steamship service in the near future, states that several propositions have been made by the Allan Steamship Line recently, and that an important contract is about to be signed. It is said that plans have been submitted to the G.T.P.R. of the wharfage accommodation owned or leased by the Allan Line at Montreal, Halifax and St. John, and that C. M. Hays will make a study of this question on the other side as well. The present plan under discussion leaves Portland, Me., out of the question as a winter port altogether, and it is considered most likely that the Allan Line will withdraw most of its steamers from there as soon as the Transcontinental Ry. begins to haul freight.

The White Star-Dominion Lines' s.s. Megantic was launched at Belfast, Ireland, Dec. 10. This is the second vessel launched by the International Mercantile Marine Co. for the Canadian route, which is to be inaugurated on the re-opening of the St. Lawrence navigation season. The Laurentic, which was launched in Sept., 1908, was fully described in our Oct., 1908, issue. The Megantic is a sister ship, and is similar in every respect, except in the propelling machinery, which consists of balanced reciprocating engines driving twin screws, whereas the Laurentic is provided with a combination of reciprocating engines and low pressure turbine, driving triple screws. Each method represents a distinct principle in marine propulsion, and the results will be watched with considerable interest.

Grain Shipments from the Dual Ports

F. E. Gibbs, Dominion Grain Inspector, has issued the following statement, showing shipments of grain from Fort William and Port Arthur elevators from Sept. 1 to Dec. 12, 1908 both inclusive:

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10 W., 4th Meridian(generally)	8.00 " "
Map No. 5—South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre.

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
"	"	9.00	"	"	215.70	"	"	"	73.46	"	"	180.00
"	"	10.00	"	"	239.70	"	"	"	81.62	"	"	200.00
"	"	11.00	"	"	263.60	"	"	"	89.78	"	"	220.00
"	"	12.00	"	"	287.60	"	"	"	97 96	"	"	240.00
"	"	13.00	"	"	311.55	"	"	"	106.10	"	"	260.00
"	"	14.00	"	"	335.60	"	"	"	114.32	"	"	280.00
"	"	15.00	"	"	359.50	"	"	"	122 44	"	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 525,000 acres of selected lands in Manitoba and Saskatchewan which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

Referring to the projected additions and changes in the C.P.R. steamship service, the Fourth Vice-President of the C.P.R. is reported to have said in an interview in London, Eng., recently, that it is the company's intention to build a certain number of additional vessels for the Atlantic service, and that they will be at least 600 ft. long, with an average speed of 20 knots. As to the two vessels, the Empress of Japan and Empress of China, he said they may be transferred to the Australian route, but no definite arrangements have been made. He also stated that there was no intention of changing the present Pacific port, and no reason for doing so.

The subsidy agreement between the British Government and the C.P.R. for the conveyance of mails between Liverpool, Eng., and Hong Kong, China, for three years, expiring Apr. 6, 1911, provides for a service once in every three weeks during summer, and once every four weeks during winter. The period allowed for each trip is 818 hrs., when conveyance is by way of Quebec or Rimouski, and 853 hrs. when by way of Halifax or St. John. It is required that the masters, officers and three-fourths of the crews of vessels so employed on the Atlantic Ocean must be British subjects; but such provision is not made for vessels on the Pacific Ocean. Other provisions cover the power of the British Government to purchase or charter vessels engaged in the mail service, and prohibit the selling or hiring of them without the consent of the Admiralty and the Postmaster-General. The annual subsidy is £45,000.

Maritime Provinces and Newfoundland.

W. West has been appointed Government wharfinger at Victoria, N.S.

Capt. W. Watt, one of the old-time West Indies sea captains, died at Halifax, N.S., Dec. 11, aged 67.

The captain and crew of the U.S. schooner M. B. Stetson, which was wrecked off Newfoundland Dec. 3, arrived at Sydney, N.S., Dec. 15.

The U.S. bark Shawmut, from St. John, N.B., to City Island, N.Y., was wrecked off the Maine coast Dec. 1, and with her cargo, became a total loss.

The Whitman Fish Co.'s s.s. Inverness ran aground recently at Grand River, P.E.I. It is anticipated that she will be salved without any great damage.

Holliday Bros.' s.s. King Edward ran ashore at English Bay, Anticosti Island, recently, and was declared a total wreck. She was built at Hull, Eng., and was insured.

An attempt to defraud the underwriters is reported to have been unearthed in connection with the wreck of the schooner Sissie Bell at Whitehead, N.S. The captain of the schooner is said to have decamped to the U.S.

Wreckage and life belts, bearing the name s.s. Stanley, have been found along the west coast of Newfoundland. It was feared that the wrecking steamer of that name had met with disaster, but this turned out to be incorrect.

The U.S. barge No. 101, in tow of the steam tug John A. Hughes, foundered in the heavy seas off Seal Island, N.S., Dec. 3, the tug having a narrow escape. The crew of the barge, numbering seven, all of New York, were drowned.

The s.s. Valentia arrived in Halifax, N.S., Dec. 7, having in tow the Standard Oil Co.'s tank steamer Oriflamme, which had been picked up disabled, at sea, with her tail shaft broken. It is said that the vessel and cargo are valued at nearly £70,000.

The schooner Albertha ran ashore at Grand Manan, N.B., Dec. 9, and became a total loss. She was owned by T. J. Clarke, Halifax, N.S., and was built at La Have, N.S., in 1899. Her dimensions were: Length, 86.9 ft.; breadth, 24.2 ft.; depth, 9.5 ft.; 94 tons register.

The U.S. wooden steamboat Soo City, which sailed from the Great Lakes recently for southern waters, is presumed to have been wrecked in the Gulf of St. Lawrence. A quantity of wreckage bearing her name has been picked up at various points, and it is feared that both steamer and crew are lost.

The steam tug Serena E. is reported to have been purchased by the Partington Pulp and Paper Co., St. John, N.B. She was owned by Holly & Co., St. John, and was built at Liverpool, N.S., in 1899. Her dimensions are: Length, 54 ft.; breadth, 14 ft.; depth, 5.8 ft.; tonnage, 25 gross, 17 net; and has an engine of 8 n.h.p. driving a screw.

The Governor-General in Council has approved the Pilotage Commissioners' resolution for the district of Miramichi, N.B., providing that ships propelled wholly or in part by steam, employed in trading from port to port in the same province; or between any one or more of the provinces of Quebec, New Brunswick, Nova Scotia, or Prince Edward Island; or between ports in the said provinces and New York, or any U.S. port north thereof; or between ports in the said provinces and any port in Newfoundland, shall not be either wholly or partially exempted from the compulsory payment of pilotage dues.

Province of Quebec Marine.

The name of the steamboat North, no. 88,323, registered at Quebec, has been changed by order-in-council to Alcedo.

A portion of the Government wharf at Sorel collapsed recently. It was built about 5 years ago, and situated on the east side of the Richelieu River. The portion which collapsed was a continuation of a 500 ft. section which gave way some time ago.

The case of the Montreal Transportation Co. against the steamboat Norwalk came before the Montreal Admiralty Court Dec. 14, to decide a question of jurisdiction. The Norwalk, which is being sued for damages due to a collision in Lake St. Louis, resulting in the sinking of two barges loaded with grain was seized in the Welland Canal and proceedings instituted in the Toronto Admiralty Court. A motion by the plaintiff company to remove the case to Montreal, to which Justice Hodgins declined to accede, was followed by an application to the Exchequer Court, which transferred the case to the Quebec Admiralty Court. Justice Routhier finally referred the case to Montreal.

An important judgment, deciding a law point raised in Montreal for the first time, was rendered in the Admiralty Court there Dec. 14, in the case of the Richelieu and Ontario Navigation Co. against the steamboat Imperial, formerly Sovereign. This is a claim for damages on account of a collision between the Quebec and the Imperial. When the accident took place the company owning the Imperial was in liquidation, and, for that reason, permission was asked from the Superior Court by the R. & O.N. Co. to refer the proceedings to the Admiralty Court. The permission was granted, and the action taken accordingly. The defendants, however, contested this right of action in the Admiralty Court, and pleaded that the case should have been continued in the Superior Court, under the provisions of the Winding-up Act. The plaintiff demurred to this plea, but Justice Dunlop dismissed that demurrer and held that the position taken by the defendants was right.

Ontario and the Great Lakes.

The Government fishery cruiser Vigilant has been laid up at Toronto for the winter.

The Port Arthur Board of Trade has decided to press for the enlargement and deepening of the harbor to, at least, 25 ft.

The Niagara Navigation Co. has declared a dividend of 4% for the half-year, being at the rate of 8% for the year, payable Jan. 2.

The name of the steamboat Jos. B. Dewey, no. 122,344, registered at Toronto, has been changed, by order-in-council, to Maganetawan.

Capt. J. R. Maitland, of the steamboat Business, fell from a ladder while leaving his vessel at Kingston, Ont., recently, and was killed.

Capt. Foote, of the Northern Navigation Co.'s s.s. Huronic, will, it is said, take command of the company's s.s. Hamonic next season.

Notice was recently given that creditors' claims against the estate of the Lake Ontario Navigation Co., Ltd., in liquidation, had to be filed by Dec. 4.

The contract for the construction of the Rondeau breakwater and bridge has been awarded by the Public Works Department to W. Bermingham, Goderich.

The contract for section 7 of the Trent Valley canal, extending from Rice Lake to Healey's Falls, about 19 miles, has been awarded to the Randolph Macdonald Co., Toronto.

The Government barge Acetylene, while engaged in removing the buoys from the St. Lawrence Channel recently, sank through overloading. The buoys drifted away, but were recovered.

The Public Works Department has decided not to let a contract at present for an extension to the breakwater and bridge at Port Burwell, for which contracts were invited recently.

The Richelieu and Ontario Navigation Co. will, it is said, shortly place an order in England for a passenger steamboat of full canal size for operation on the north shore route of Lake Ontario.

The Owen Sound Board of Trade, towards the close of the lake navigation season, advised the various steamship companies operating on the lakes that free dockage was offered at that port for the winter.

W. H. Furtain, a retired lake captain, who died recently at Detroit, Mich., aged 81, was born at Amherstburg, Ont., and has been in the marine service since he was 11 years old, retiring in 1892. His first trip was from Amherstburg to Montreal, which occupied several weeks.

The construction of the wharf at Lakefield is progressing rapidly. The wharf is of concrete, and will be 518 ft. long. It is being built on three levels to accommodate various types of vessels. The heights and lengths being 1½ ft., above low water by 103 ft. long; 2½ ft. by 254 ft. long, and 4 ft. by 161 ft. long.

The Hamilton Steamboat Co. held its annual meeting Dec. 16, when a very successful season was reported. A half-yearly dividend of 5% was declared, making 10% for the year. The directors were re-elected as follows: President, Æ. Jarvis; Vice-President, A. G. Nicholls; Secretary, C. E. A. Goldman; General Manager, W. E. Bishop; other directors, A. Angstrom, A. Bruce, K.C., H. B. Whitton.

In our last issue, in referring to the recent burning of the s.s. Iroquois at Spanish Mills, we gave as the owners, the Huntsville, Lake of Bays and Lake Simcoe Navigation Co., of Huntsville, Ont., which was an error. That company's s.s. Iroquois does not operate on the route in question. The vessel which was destroyed was owned by T. C. Sims, Little Current, Ont., who holds a mail contract for the Manitoulin district.

Referring to a paragraph in our last issue to the effect that it was reported that the Lake Ontario and Bay of Quinte Navigation Co. had let a contract for the construction of a steamboat, we are advised that the company has not let a contract, but that the report may refer to the owner of the s.s. Aletha, Mrs. A. Roys, which vessel was operated by Capt. Roys during the past season, under charter to the L.O. and B. of Q. N. Co.

The Knapp roller boat, which has been lying at Toronto for some years, was sold by judicial order recently, on the motion of the Turbine Steamship Co., which had obtained an award of $250 against the owner for damages sustained by the s.s. Turbinia. The roller boat was owned by M. Stonehouse, and, it is said, cost $125,000 to construct. The price realized was $595. The Polson Iron Works, Ltd., claimed $295 for fittings supplied.

H. C. Root and H. C. Busse, local manager and cashier respectively of the Great Lakes Towing Co., Sault Ste. Marie, Mich., were recently charged there with smuggling. The case arose out of the stranding of the s.s. Canadian at Drummond Island recently, while bound for Port Arthur, Ont., with general merchandise. The goods alleged to have been smuggled were thrown overboard, and salved by the crew of one of the Towing Co.'s lighters. The defendants were bound over to appear for trial.

H. Calderwood, of Toronto, recently visited Sault Ste. Marie for the purpose of advising the local Board of Trade regarding a site for a proposed dry dock. It is said that the probable site is west of the canal and near the power canal. The property is owned by the Government, and it is said that the natural flow of the St. Mary's Rapids would be all that is required to empty or fill the dock. The President of the Board of Trade is reported to have stated that financial arrangements for the scheme are completed.

The U.S. lake survey reports the levels of the great lakes, in feet above tide water, for Nov. as follows: Superior, 602.23; Michigan and Huron, 580.34; Erie, 571.69; Ontario, 245.92. Since the previous month there was a considerable fall in the levels, due to a continuance of the drought, as follows: Superior, 5½ ins.; Michigan and Huron, 6¼ ins.; Erie, 7½ ins.; Ontario, 6¼ ins.; while the anticipated fall during December is; Superior, 3½ ins.; Michigan and Huron, 4 ins.; Erie, 2 ins.; Ontario, 1½ ins. Compared with the average Nov. level for 10 years, Superior is 9¼ ins.; Michigan and Huron, 1¾ ins.; Erie, 8½ ins., and Ontario, 5 ins., lower.

The Inland Navigation Co., Hamilton, Ont., has placed a contract for the construction of a bulk freight steamer in Detroit, Mich. This is stated to be the first vessel to be constructed by a U.S. firm for Canadian interests, and it will be operated under the U.S. flag between Canadian and U.S. ports. A. B. Mackay, General Manager of the company, is reported to have said that little encouragement was offered to Canadian vessel owners, and he especially referred to the duties payable on repairs to Canadian vessels made in U.S. shipyards. Under the recent amendments to the Canada Shipping Act, the vessel will not be permitted to trade between Canadian ports, but may, of course, call at any one Canadian port on each trip. The dimensions of the new vessel are given as follows: Length, 500 ft. over all; keel, 480 ft.; beam, 56 ft.; depth, 30 ft. She will be used chiefly for the transportation of ore from the U.S. to Point Edward, Ont., for the Hamilton Steel and Iron Co.

A. E. Henschel, Chairman of a meeting of business men in New York recently, is reported to have said: "For years I predicted that the energetic efforts of our Canadian neighbors would succeed in providing the cheapest means of transportation between the great west and northwest and the Gulf of St. Lawrence. The withdrawal of the steamship service from the port of New York conclusively proves that Canada has walked off with the prize of furnishing such outlets to the sea. The Dominion is ably assisted in the diversion of traffic by New York's exorbitant wharfage and other terminal charges, which can only be eradicated by the action of the State Legislature. Such remedial legislation has met defeat year after year at Albany. Now, with the practical tying up of commerce between Buffalo and New York, it is time to use heroic remedies at the people's command, that will bring defiant railroad managers to terms. The Legislature should abolish in toto those great commerce annihilators, wharfage on vessels, exorbitant dock rentals, compulsory pilotage, grain elevating and storage and dockage on property at the port of New York, and thus eradicate the most serious evils which are inflicted upon New York's business prosperity."

C.P.R. S.S. PRINCESS CHARLOTTE, TO BE RUN BETWEEN VANCOUVER, B.C., AND SEATTLE, WASH.

For description see Aug., 1908, issue, page 603.

B.C. and Pacific Coast Marine.

The Vancouver Shipbuilding, Sealing and Trading Co., Ltd., is being wound up, with H. Lockwood, Vancouver, as liquidator.

The British Columbia Dredging Co., Ltd., is being voluntarily wound up. A. St. J. Whiting, Victoria, has been appointed liquidator.

Capts. A. Copp and C. Moore, Vancouver, have been appointed officers in the Fisheries Protection Service, each with the rank of master mariner.

The C.P.R. s.s. Glenfarg, in leaving Vancouver Dec. 7, struck on the Siwash Rock and sustained considerable damage. She returned to port and discharged her cargo.

The gas and bell buoy at Swiftsure Bank was reported to have disappeared Dec. 3, and no trace of it has been discovered. It is surmised that it was sunk in a collision.

The New Westminster steam tug Native has been overhauled and altered so as to accommodate passengers, and is now being operated between Prince Rupert and Port Essington daily excepting Sundays.

The Quamichan Mill Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $20,000, and power to own and operate steam and other vessels, and to carry on the general business of carriers by land and water.

The Glen Valley Logging Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $25,000, with power among other things to carry on the business of ship owners, carriers by land and sea, etc., and to own and operate steam and other vessels, wharves, docks, warehouses, etc., in connection therewith.

The Ship British Yeoman Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $24,000, to purchase or otherwise acquire the ship British Yeoman; to charter, hire and otherwise use and trade with same or any substituted vessel; to carry on the business of ship owner, and to act as general freighter.

The P. D. Hillis Logging Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $100,000, and power among other things to own and operate steam and other vessels, to carry passengers and merchandise, and to act as shipowners, wharfingers, barge owners, lightermen, and general carriers by land and water.

The B.C. Government has decided to construct a wharf at Prince Rupert, to be owned and operated by the Government. The first section to be built will be about 60 ft. long by 80 ft. deep, with a 20 ft. depth of water at low tide. Applications from steamship and other companies for permission to construct wharves there have been refused.

The Victoria Transportation Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $10,000, for the purpose of conveying passengers and goods in ships and boats between such places as the company may from time to time determine, for the buying and selling of steamboats and other ships and commodities, and for doing all such other things as are incidental or conducive to the attainment of the foregoing objects.

In response to questions relating to the transfer of the Esquimalt docks, etc., to the Canadian Government, the First Lord of the Admiralty said recently in the British House of Commons, it has been found that the transfer can only be effected by act of Parliament, and the terms will be embodied in a bill which it is hoped will be presented early next session. The fortress, works, docks, etc., have been maintained during the past two years by the Canadian Government.

The s.s. Powhatan, recently purchased at Hong Kong by the Mackenzie Steamship Co., arrived at Vancouver Dec. 8, 1908, where she will be overhauled and remodelled for the coast trade. The improvements include accommodation for 150 saloon passengers, dining saloon, and steerage accommodation for 250 passengers. She will be equipped with wireless telegraph apparatus. It is said that the price paid for her at Hong Kong was $55,000, and that a further $15,000 will be spent on her at Vancouver. She is to be re-named Rupert City. The Powhatan was built at Barrow-in-Furness, Eng., in 1886, and is equipped with engines having cylinders 18, 18, 38 and 60 ins. diar. by 42 ins. stroke; her dimensions are: Length, 310 ft.; breadth, 38.2 ft.; depth, 25.3 ft.; tonnage, 2,536 gross, 1,640 register.

Notices to Mariners.

The Department of Marine has issued the following notices:

No. 114. Nov. 25.—291. New Brunswick, Kennebecasis River, Reid Point, light established. 292. Newfoundland, west coast, Gulf of St. Lawrence, Rich Point, flashing light in operation.

No. 115. Nov. 26.—293. Quebec, Chaleur Bay, Little Bonaventure, light established. 294. Quebec, Gulf of St. Lawrence, Percé, intended light on wharf at north beach. 295. Quebec, River St. Lawrence, Goose Cape, intended change in character of light. 296. Quebec, River St. Lawrence, chart of Lake St. Peter issued.

No. 116. Nov. 30.—297. British Columbia, Fraser River, entrance to north arm, positions of lights and beacons.

No. 117. Dec. 1.—298. British Columbia, Brown passage, western entrance, Stenhouse shoal, position and color of gas and whistling buoy. 299. Japan, Tsugaru Strait, Yesan-Zaki light station, fog siren established.

No. 118. Dec. 2.—300. Ontario, St. Clair River, Chenal Ecarté, Walpole Island, range lights established. 301. Ontario, St. Clair River, Point Edward, shoal.

No. 119. Dec. 7.—302. Quebec, River St. Lawrence, Little Metis, new lighthouse, change in character of light. 303. Scotland, west coast, Firth of Clyde, Toward Point, character of fog signal altered.

No. 120. Dec. 9.—304. Quebec, Gulf of St. Lawrence, Magdalen Islands, Bird Rocks. tower increased in height. 305. Quebec, River St. Lawrence, Portneuf-en-bas, range lights established, position of main lighthouse.

No. 121. Dec. 11.—306. Quebec, Saguenay River, Rivière Valin, range lighthouses rebuilt.

No. 122. Dec. 14.—307. Nova Scotia, west coast, Yarmouth Sound, Hen and Chickens gas and bell buoy. 308. Nova Scotia, south coast, Sheet Harbor gas and whistling buoy, color of light. 309. Newfoundland, north end, Cape Bauld lighthouse, additional information. 310. Newfoundland, southwest coast, Cape Ray, permanent light.

No. 123. Dec. 15.—311. Quebec, Chaleur Bay, New Richmond wharf, light established. 312. Quebec, Chaleur Bay, St. Charles de Caplan, light established on wharf. 313. Quebec, Chaleur Bay, St. Godfroy, light established on wharf.

No. 124. Dec. 19.—314. Quebec, Richelieu River, Chambly, lights.

No. 125. Dec. 21.—315. British Columbia, Chatham Sound, Prince Rupert harbor, Fairview, change in character of buoy. 316. United States of America, Strait of Georgia, Patos Island light station, light changed.

Vessels Removed from the Register.

The following vessels have been removed from the Canadian register during Nov., 1908, for the reasons assigned: Steam—Alice, Pictou, N.S., 11 tons, unseaworthy; Constance, Hamilton, Ont., 1 ton, out of commission; Emma, Hamilton, Ont., 4 tons, out of commission; Fairy Queen, Hamilton, Ont., 1 ton, broken up; Glenrosa, Toronto, 43 tons, dismantled and burnt; Ida, Quebec, 7 tons, broken up; Lewis, Hamilton, Ont., 1 ton, out of existence; Lillie, Hamilton, Ont., 34 tons, out of existence; Messenger, Quebec, 18 tons, broken up; Ontario, Hamilton, Ont., 28 tons, broken up and burnt; Philadelphia, Sault Ste. Marie, Ont., 88 tons, stranded; R. Watts, Hamilton, Ont., 18 tons, out of commission; Raven, Vancouver, B.C., 17 tons, broken up. Sailing—Antelope, Hamilton, Ont., 180 tons, sold to the U.S.; Caribou, Victoria, 83 tons, stranded; Esme, Lunenburg, N.S., 5 tons, converted into a fishing boat; Ethel G., Arichat, N.S., 12 tons, lost at White Haven, N.S.; George L. Slipp, St. John, N.B., 98 tons, wrecked; Georgiana, Yarmouth, N.S., 90 tons, broken up; Ich dien, Lunenburg, N.S., 197 tons, burnt; Lebarge, Victoria, 63 tons, stranded; Lettie Dame, Chatham, N.B., 11 tons, burnt; May Flower, Lunenburg, N.S., 60 tons, stranded; Midge, Halifax, N.S., 3 tons, sold to U.S.; Minnie B., Lunenburg, N.S., 25 tons, transferred to Newfoundland; Morning Star, Chatham, N.B., 30 tons, wrecked; St. Michel, Quebec, 103 tons, broken up; Stella Maris, Quebec, 70 tons, broken up.

The U.S. canal was opened April 27, and closed Dec. 13, 1908; season, 231 days.
The Canadian canal was opened April 21, and closed Dec. 15, 1908; season, 239 days.

Coasting Regulations for Foreign Vessels.

The following order-in-council was passed Dec. 17: Whereas by an order-in-council dated Jan. 13, 1908, it is provided that certain orders-in-council by which ships and vessels of certain foreign countries had been admitted to the coasting trade of Canada are repealed, on, from and after Jan. 1, 1909. And whereas applications have been made to allow the ships and vessels of certain foreign countries to participate in such coasting trade to a limited extent and for a temporary period, pending the acquisition of suitable British ships, to which class of vessels under the provisions of the order the coasting trade would on and after the said date be confined; therefore the Governor General in Council is pleased to order that the said order-in-council of Jan. 13, 1908, shall be and the same is hereby revoked and the following provisions substituted for the provisions therein contained.

All orders-in-council admitting ships or vessels of any foreign country to the coasting trade of Canada shall be and the same are hereby revoked on, from and after Jan. 1, 1909; and thereafter such ships and vessels shall be subject to the provisions of secs. 952 to 957 of the Canada Shipping Act, both inclusive; provided that steamships of not less than 1,500 tons gross each, of the following countries, namely, Italy, Germany, The Netherlands, Sweden, Norway, Austro-Hungary, Denmark, Belgium, the Argentine Republic and Japan, shall be admitted to the coasting trade of Canada in the carrying of goods and passengers coastwise between any port in Nova Scotia and any port in Quebec, and vice versa, on the same terms and conditions as are applicable to Canadian vessels, until Dec. 31, 1911.

The Welland Canal was officially closed for traffic Dec. 15, though vessels were reported as passing through some days later.

During Sept. and Oct., 1908, 12 workers were killed in the course of their employment in Canadian navigation, and 6 were injured. Of the fatalities, 9 were due to drowning, and one each to being struck by a wharf engine, to a fall, and to machinery. Of the non-fatal accidents, 3 were due to falling material, and one each to machinery, to flying material, and to a fall.

The Department of Marine has issued separate pamphlets recording the tide tables for 1909 for the eastern and western coasts of Canada, respectively. The tables in the former case cover the River and Gulf of St. Lawrence, the Bay of Fundy, Northumberland and Cabot Straits; and in the latter, the Fuca Strait, Strait of Georgia, and the northern coast, with data for slack water in the navigable passes and narrows. The information is arranged and classified by Dr. W. Bell Dawson, M.I.C.E., Engineer in charge of the Tidal and Current Survey.

Northern Navigation Co.'s S.S. Hamonic.

In our April and June, 1908, issue, we gave pretty full particulars of the vessel which is being built for the Northern Navigation Co. of Ontario, and which was launched recently, and named the Hamonic. The company has supplied a more extended description, from which the following extracts are taken:

Her dimensions are: Length over all, 365 ft.; length between perpendiculars, 341 ft.; extreme breadth, 50 ft.; moulded depth, 27 ft.; gross tonnage, 5,000 tons. She is being constructed with strict regard to the rules of the Bureau Veritas and the Great Lakes Register, and under the inspection of the last-named corporation. Her rating will therefore be the highest possible in the lake service.

The hull is moulded with remarkably fine lines forward and a clean run aft, having in view a speed commensurate with the power of her engines, easily sufficient to enable her to keep pace with her sister ship Huronic in her weekly trip from Sarnia to Port Arthur, Fort William, Duluth and return. It is being built on the channel system, with extra heavy frames and steel plates, tested at the mills, strong enough to pass the most rigid requirements in chemical, ductile and tensile qualities. The bottom is double, and fitted with 14 compartments that will hold 1,500 tons of water ballast. The hull itself is divided by watertight bulkheads into nine compartments. To prevent rolling, she is fitted with bilge-keelsons. Steel bulkheads running up to the spar deck completely separate the freight spaces from the part of the ship occupied by the passengers and crew.

The engines are quadruple expansion, having a total of 6,200 indicated h.p., fitted with a counterbalancing system to prevent vibration. Steam is to be furnished by six single-ended Scotch boilers of 250 lbs. pressure to the square inch, with forced draft. Bunker capacity will be provided for 500 tons of coal. The propelling machinery and boilers are placed very far aft, but the funnel will stand well amidship, between the two masts, so that the view in profile is well proportioned and pleasing. This disposition of the power plant is made with reference first to the comfort of passengers, and next to the best arrangement of freight space. The other machinery is placed forward of the engines and in various parts of the ship, as best will serve their purposes. She will be supplied with steam steering gear, capstans and windlasses, operating patent bow and kedge anchors.

As electricity will enter largely into the decoration of the ship she will be brilliantly illuminated. Current will be furnished by generators installed in duplicate. There is a complete artificial ice and refrigerating plant, and a wireless telegraph installation. The fire apparatus and life-saving equipment are ample, and up to the very strictest regulations and requirements of the Canadian and U.S. governments.

Seven gangways are provided on each side, five for freight, one for first-class passengers, and one for second-class passengers and supplies. The five gangways leading to the freight space on the main deck are so arranged that each gangway serves two hatches, which open into the ship's five cargo holds. The latest design of hoisting machinery for the handling of package freight will be installed. Her cargo capacity is about 3,000 tons of package freight, or 100,000 bushels of wheat, below the main deck. She will be fitted with elevator hatches to enable her to receive grain if desirable. She is being given ample refrigerated hold-space to provide for the increasing tonnage of perishable freight.

She will have roomy accommodation for

H. G. THORLEY,
PASSENGER AGENT FOR ONTARIO,
41 KING ST. EAST, TORONTO.

400 first-class and 75 second-class passengers, as well as for officers and crew numbering 110 more altogether. There are five decks, namely, the main, spar, promenade, shade and bridge decks, the first three being of steel construction. On the awning deck there is ample open space forward and a wide promenade entirely around the ship. Seven trips around the deck constitute a mile. On the shade deck additional promenading and lounging space is provided, and that part forward of the bridge and over the drawing-room will give opportunity for observation to passengers while running the rivers or passing other interesting portions of the route.

The coloring throughout the ship is in one inclusive scheme of mahogany, soft green, old gold, ivory, grey and pure white. The distribution and effects vary in different rooms and departments, but the plan is consistent. As passengers enter by the first-class gangway, they will pass through a large vestibule with panels of plain steel done in ivory and rubbed smooth. From the vestibule a spacious hall and rotunda is entered. From the centre the grand stairway leads with easy ascent to the cabin above, all beautifully finished, tastefully decorated, airy and well lighted. This stairway, hall and rotunda are of French-Gothic design, carried out in dark finished quarter-sawn oak, and adorned with panels bearing fleur-de-lis ornaments in old gold. Carved oak pilasters with old gold capitals support a cornice and ceiling of panelled oak, relieved with old gold ornaments. A marble base eight inches high extends around both hall and rotunda, and the floor is laid with interlocking rubber tiles of a form and color corresponding with the rest.

The baggage rooms are at either side of the great stairway, so that passengers may have easy access to their belongings at any time. At the top the stairway opens upon a handsome lobby extending all the way across the ship, and having a width of some 35 ft. The walls and ceiling here are in the Flemish manner, toned in a grey-green and relieved in the panels, pilasters and cornice, with broad effects and delicate traceries in dull gold. At the forward end are the offices of the purser and steward, and aft are two screened spaces containing desks, with writing materials, for general use. Settees with cushioned upholstery in dull green leather stand along the walls, and comfortable arm-chairs are disposed about the floor. The staircase and well leading from the lobby to the grand saloon on the deck will have heavily carved newels and balusters touched with dull and burnished antique gold. The lighting of the lobby will be from 25 incandescents in the ceiling, and four-light newel candelabra carved and touched with old gold. The floor will be laid in rubber tiling finished with a six-inch marble base. From both sides of the lobby, corridors lead forward and aft, in lines that sweep to the curves of the ship's hull. That leading forward enlarges at its farther end into a large room, invitingly furnished, and called "the lounge." The corridors are finished in Colonial style, with panels in old ivory tones, and mouldings and cornices enriched with ornaments heightened with gold.

The deck will be almost entirely given over to berth accommodation. Three rows of staterooms on either side open off the corridors, so arranged that each stateroom is a roomy apartment. Each stateroom is independently lighted and ventilated from the outside, and the corridors as well are amply supplied with light and fresh air. The outside tier of staterooms is provided with double lower and single upper berths, and have extra large plate glass ports opening through the sides of the ship. Communicating doors open into adjoining rooms, so that they may be used "en suite." The inner tiers of rooms have single lower and upper berths, but these as well as all others are unusually wide and long. All staterooms are electric-lighted, fitted with electric bells, and supplied with running hot and cold water, the best quality of spring and hair mattresses, linens, rugs and napery. The decoration is in ivory white, corresponding with that of the corridors. The floor coverings are of the finest quality and of the company's special standard design, corresponding with those in the corridors.

The lounge at the forward end of the corridor has particularly attractive features, such as a carved fireplace, with cozy seats built in on either side, and a large circular table in the centre of the room surrounded by soft upholstered chairs, covered in rose velour. This room is finished in the Colonial style, carried on from the corridors. The wall and ceiling panels are in ivory finish. It is lighted from the ceiling by golden incandescents. A soft deep rose color carpet of a special design covers the floor. From the corridor opening off the after end of the lobby more staterooms are reached, and it terminates on either side with baths, barber shop and lavatories, all finished in quarter-sawn white oak with tiled floors, and fitted with porcelain fixtures.

From the lobby a broad stairway leads to the grand saloon on the promenade deck above. As it is expected this deck will form the principal rendezvous for passengers, the designer has been given opportunity for a free display of the decorator's art. Ascending the stairway, one is confronted by a large mirror and console, carving, paintings and panelling. This room, occupying the entire width of the cabin, is of imposing proportions. The style of decoration is Elizabethan. The native woodwork is of solid Mexican mahogany, spaced out in very attractive panels. At the forward end of the room, on both port and starboard sides, are staircases leading up to the observation room. These stairs, which have been specially treated by handsome carving, form principal features of the apartment. At the after end of the room are glass-panelled doors leading to the main dining-room. Directly next to these doors is the news-stand. On the port and starboard sides are doors leading out to the promenade. At the sides of these doors are niches with soft-cushioned divans, upholstered in dark green velvet, in harmonious effect with the mahogany woodwork. From the middle of the ceiling a dome, 16 by 22 ft., rises to the upper deck, forming a crown to the room, and giving it a feeling of loftiness and freedom. The dome is supported by carved grotesque heads and brackets, alternated by panel transoms with fine art glass, shedding a soft light over the whole. The frame of the dome is in panelled mahogany, enhanced with ornamental mouldings, burnished in gold. The most attractive features in the decoration are the lunette panels in the forward and after ends of the dome. These are painted in allegorical figures on a gold ground, and set in richly carved heavy gold frames. The floors are spread with carpets in green tones, and of a special design. The saloon is lighted by carved gold incandescents studded in each panel of the ceiling. Directly in the centre a heavily carved lantern is suspended by carved projected arms, all finished in antique burnished gold.

Off the forward end of the apartment opens a spacious corridor panelled in solid mahogany of a design in keeping with the grand saloon. A number of large and comfortable outside staterooms are located here. Still forward of these are eight parlor rooms, four on either side. They are treated in four different styles; two Colonial parlors finished in enamel and mahogany, decorated in shades of rich yellow, to match carpet; two Marie Antoinette parlors, finished in maple, decorated in shades of old rose, to match carpet; two Empire parlors finished in mahogany, decorated in shades of green, to match carpet; and two l'art nouveau parlors finished in oak, decorated in blue tones, to match carpet. Arabian lace curtains hang from gold cornices over the windows. The furnishings consist of brass beds, dainty mirrors, soft-cushioned divans, and small tables and chairs. Each parlor has a private bath attached, finished in white enamel, with tiled floors and porcelain fixtures.

At the forward end of the corridor on this deck is the drawing-room—a spacious apartment, terminating in a circular front, with large plate windows overlooking the bow deck, affording excellent opportunities for observation. The entire room and furnishings are in the style Louis XVI. The walls are mahogany, with panels in tapestry to correspond with the green lined upholstery of the furniture. The ceiling decorations are enriched with gold, and the cozy corners have divans built in.

At the after end of the saloon is the dining-room. The double entrances, of plate glass, small-panelled doors, are separated by a heavily constructed console supported by carved figures and surmounted by a large bevelled mirror. This room occupies the full width of the ship, and extends 80 ft. of its length. It is designed in the style of the French renaissance, with blending colors, and a prevailing spirit of warmth and light. All the woodwork is in select solid mahogany. The walls of the forward and after ends are in panelled recesses, and the carved sideboards, silver cabinets, and mirrors are kept in uniformity with the surroundings. The sides of the room are panelled alternate with broad plate glass windows, 38 by 32 inches in size. These windows being high above the water afford the traveller a good outlook. They are draped with heavy silk curtains in soft green tones, in harmony with the furnishings. The tables and revolving chairs are mahogany. The chair seats are upholstered in soft green velvet. The table covers correspond in color with the furnishings, and are woven with broad gold arabesque ornamentation. From the centre of the room a spacious dome rises to the top of the upper deck-house, supported by carved columns with capitals. The dome is panelled and has richly ornamented mouldings, finished and glazed in old ivory. The panels are decorated in tones of silver grey with tracery borders in gold. Art glass transoms at the base of the dome shed light into the centre of the room. At either end of the dome are lunette panels adorned with mural paintings, in heavily carved frames, finished in gold. The floors are laid in parquetry, upon which are spread runways of soft deep crimson carpets. The lighting of this room consists of single gold incandescents spaced so as to throw their rays down evenly upon the tables.

Back of the dining saloon are located the serving rooms, pantry, galley, chill-rooms, wineroom, storeroom, crew's and officers' mess rooms, and second-class dining-room. Here are found electric dish-washers and egg boilers, charcoal grills, steam vegetable cookers and stock kettles, bake ovens, dish warmers, carving table, etc. The chillrooms are artificially refrigerated by the ship's own ice-producing machinery. The dining-room and its attendant service rooms are located aft to prevent the odors penetrating the rest of the ship, but in addition ample ventilation

has been provided in the galley and serving rooms to free them from odors, and at the same time keep them cool for those who undertake the labor of ministering to a large passenger list

Still aft of this, and reached from the outside promenade, is the smoking-room, removed from other parts of the ship. It is designed and finished in German style. The walls are in white ash, finished in wax and brought out in dark mission color. Soft, luxuriously upholstered divans in red leather extend around the entire room. The furniture consists of tables and upholstered chairs of design and color in keeping with the surroundings. Through the centre of the ceiling a dome rises, providing both light and ventilation. The decorations of this room consist of panels in dull metal ground, with the ornamentation painted and picked out in strong coloring, in German design. The dome has art glass transoms. The floor is laid in parquetry, over which soft oriental rugs are strewn. The room is brilliantly lighted by incandescents suspended from the dome and ceiling.

RACINE, WIS.

Returning to the saloon and ascending the stairs at either side of it, one enters the observation room upon the shade deck, which is decorated in the style "l'art nouveau," panelled in quarter-sawn oak, and finished in forest green. Soft divans upholstered in golden brown velvet extend around the forward and after ends. Above the divans the walls are panelled in tapestry. In the centre and between the divans at the forward end a piano is placed. The entire side walls are composed of large plate glass windows, giving an unobstructed view over the water. At the after end of the room is an opening with an oriel bay window, looking down into the saloon. From the centre of the ceiling a skylight rises, for ventilation. The sashes are glazed with rich stained glass of style and color in keeping with the decorations. The skylight is supported by columns crowned with heavily carved capitals, and studded with incandescents. The ceiling panels are in shades of ivory relieved by ornaments in green and purple lines. The floor is laid in suitable material, in harmony with the color and design of the room, and of such a nature that it can be readily converted into a ballroom if required. Exits are provided to the large open deck, where promenading may be indulged in at will.

Forward of the observation room are quarters for deck officers. The captain's quarters come first, and comprise an ice and chartroom, stateroom and bath. Forward of this is the pilot house, and above it the bridge, fitted with engine, telegraph, telephone, binnacle, and other appliances required for the navigation and handling of the ship.

The second-class passenger quarters are on the after part of the spar deck, and completely separated from other parts of the ship. The sleeping rooms are plain but neatly finished, and are so arranged that they will accommodate small or large families, or parties of men or women. Ample toilet arrangements and promenading space have been provided for exercise, and an inside stairway leads to the second-class dining-room above.

The crew's quarters are located in sections of the ship most convenient to their several duties. They are well heated and ventilated, and thoroughly comfortable.

The Corinthian-Malin Head Collision.

In the matter of the investigation into the causes which led to a collision between the Allan Co.'s s.s. Corinthian, Capt. W. Dunlop, and the Head Line Co.'s s.s. Malin Head, Capt. Campbell, near Grosse Isle, River St. Lawrence, on Sept. 13, 1908, at or about 6.25 a.m., whereby serious damage was caused to both vessels, it being necessary to beach the Malin Head at St. Lawrence Point to prevent her from sinking; Commander Spain, R.N., Dominion Wreck Commissioner, has delivered the following judgment:

The Court, having very carefully enquired into all the circumstances attending the above-mentioned shipping casualty, and having carefully reviewed all the evidence which it was possible to obtain (some of which was very contradictory) from the officers and crews of both vessels, and other parties, finds as follows: Both the steamships, Corinthian and Malin Head, were well found in all the requirements of the Board of Trade, in regard to boats, life-saving apparatus, etc., etc.; the officers and pilots of both vessels held proper certificates; both ships had the necessary seamen on the look-out, and the necessary officers on the respective bridges.

It appears that the vessels sighted each other in the River St. Lawrence off Grosse Isle when they were distant approximately a mile and a half, and the lookout man from the Malin Head reported a steamer (which turned out to be the Corinthian) right ahead, and in his evidence says, "that she was end-on, or very nearly so, when he first sighted her"; the master, mate, pilot, and quartermaster of the Malin Head all verify this statement of the lookout. This being the case, the Malin Head's helm was ported one point, afterwards being put hard aport. There were no further orders given, either to the deck or the engine-room from this vessel. The Court has found grave difficulty in establishing correctly how far on the bow, if at all, the Malin Head was first sighted by those on board the Corinthian. The evidence of her lookout man is, that he reported the Malin Head right ahead; this verifies the lookout man of that vessel. The quartermaster and the lookout man of the Corinthian under cross-examination only admit that it is possible the Malin Head might have been a quarter to half a point on the starboard bow of their vessel. The captain, first and third officers, and pilot of the Corinthian consider that the Malin Head might have been anything from half a point to a point on the starboard bow, when she was first sighted.

The officers of the Malin Head gave evidence that if the two vessels had been allowed to continue the courses they were on, when first sighted, there would have been an end-on collision, whereas, the officers of the Corinthian state, that if the vessels had both continued their courses they would have passed clear of each other. The pilot of the Corinthian, however, thought it necessary to starboard a quarter of a point, which shows some doubt on his part in regard to the vessels passing clear. After the pilot gave this order to starboard, the captain immediately ordered more starboard helm, which, in the opinion of the Court, was not correct. The engines of the Corinthian were not reversed soon enough, and if her helm had been put hard a starboard, with the engines going astern, the vessels probably would have cleared.

The Court considers that the two vessels in question were meeting end-on, or nearly end-on, so as to involve risk of collision, and that article 18, of the International Regulations for preventing collisions at sea, governs the case. The Court is aware that the "port helm" rule should always be given the most careful attention, but the question for consideration is, whether the one vessel proceeding in one direction met the other vessel proceeding in another direction, so that if both ships had continued on their respective courses, they would have passed so near to each other as to involve risk of collision. It was contended by the officers of the Corinthian that no such risk was involved, and if the vessels had continued on their respective courses, they would have passed starboard to starboard and clear of each other; on the other hand, the officers of the Malin Head disagree with this, and state, as before mentioned, that if the vessels had continued on their respective courses as they were when they first sighted each other, an end-on collision would have resulted, and the Court, from all the evidence adduced, takes this view of the case, more especially, taking into consideration, that although the Corinthian officers thought the vessels were clear, her helm was starboarded. The duties therefore, which are imposed upon all steamers, under the existing rules, which require vessels meeting on courses parallel, and so close together as to render collision probable, to alter their courses to starboard and pass port to port, should have been carried out in this case. In the opinion of the Court, there was no peculiar or unusual circumstance in the case now under consideration, and in the absence of such, the rule requires each vessel to port her helm, and the officers of the vessel that do not carry out this rule are in the wrong.

The Court therefore considers that the master and pilot of the steamship Corinthian are to blame for the accident, severely censures Capt. William Dunlop, and fines pilot A. Santerre, who was in charge of the ship at the time of the disaster, $100, to be paid in four monthly instalments of $25 each. The master, pilot and officers of the Malin Head are exonerated from blame.

This judgment was concurred in by Capt. W. H. Logan, and pilot R. Baquet, who sat as assessors.

Among the Express Companies.

The Canadian Northern Ex. Co. has opened offices at Cardinal and Clanwilliam, Man.

The Canadian Ex. Co. reports the number of deer shipped by it out of the hunting country of Ontario during the open season, Nov. 1 to 15, inclusive, as 2,348, weighing 264,308 lbs.

The Board of Railway Commissioners passed an order Nov. 28, extending until June 1, 1909, the time for the approval of the Canadian and Dominion Ex. Cos.' contracts, tolls, by-laws, etc.

The Board of Railway Commissioners passed an order Nov. 30, approving the Pacific Ex. Co.'s contract forms, and extending to June 1, 1909, the time within which they may be used.

The Board of Railway Commissioners passed an order Nov. 30, extending until June 1, 1909, the time within which the National and American Ex. Cos.' contracts, by-laws, etc., may continue in use.

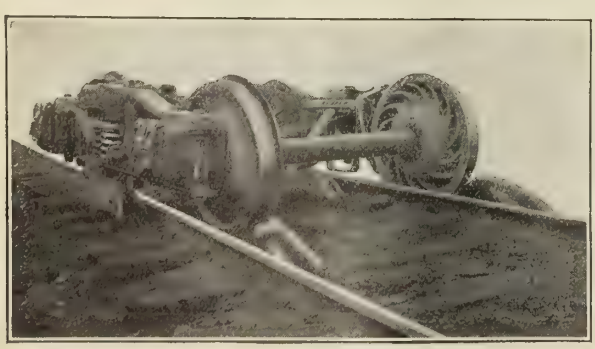
Here 'tis

The "USE-EM-UP" Drill Socket

Grind a flat on those drills with twisted tangs and "USE-EM-UP"

AMERICAN SPECIALTY CO., CHICAGO
All makes of drills furnished to fit it

The Alexander Car Replacer



60,000 PAIRS IN USE.

Manufactured at **Montreal, Que.**, and **Scranton, Pa.**, of Pressed Steel Plate, and guaranteed to re-rail heaviest equipment.

SOLD BY
F. H. HOPKINS & CO. and MUSSENS LIMITED, MONTREAL

THIS APPEAL IS TO YOU!

The Hospital for Sick Children

REMEMBER That Every Sick Child in Ontario Whose Parents Cannot Afford to Pay for Treatment is Treated Free.

SICK BUT NOT NEGLECTED.

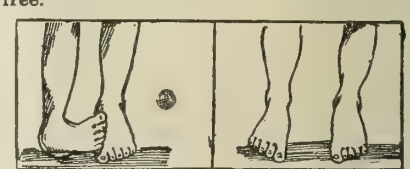
The Hospital is not a local institution, but provincial. The sick child from any place in Ontario, who can't pay, has the same privileges as the child living in Toronto.

The Hospital had last year in its beds and cots 1,245 patients—368 of these were from 241 places outside of Toronto. Seventy-five per cent. were children of poor people who could not afford to pay.

HAPPY WITH HER DOLL.

This Charity appeals to fathers and mothers of Ontario for funds to maintain the hundreds of sick children that it nurses every year.

Since its foundation the Institution has treated 14,458 children. 10,800 of these were unable to pay and were treated free.



BEFORE. AFTER.

There were 51 cases of club feet treated last year.

If you know of any child in your neighborhood who is sick, or has any deformity, send the parent's name to Secretary.

"THIS IS YOUR BOOK."

The Hospital's Cry is not for Itself, but for the Children, as your Dollars go not to the Hospital but to the Children.

Please Send Contributions to J. Ross Robertson, Chairman, or to Douglas Davidson, Sec.-Treas., The Hospital for Sick Children, College St., Toronto.

W. H. Burr, whose appointment as Traffic Manager of the Dominion and Western Ex. Companies, was announced in our Dec., 1908, issue, was born at Bloomington, Ill., Jan., 1864, and entered transportation service Oct., 1882, as clerk to W. S. Stout, then Superintendent of the Dominion Ex. Co. at Winnipeg, who had just brought that company into active operation. On the commencement of the business in Eastern Canada, in 1884, he was transferred to Toronto, and appointed Auditor in 1885. In 1895 he organized the Money Order Department, which has been under his supervision ever since; and since the inauguration of the Western Ex. Co. in 1895, operating over the Minneapolis, St. Paul and Sault Ste. Marie Ry. and other lines in the U.S., he has also acted as Auditor of that company. In Nov., 1906, he was appointed Chairman of the Express Traffic Association.

Telegraph and Cable Matters.

On the installation of the necessary instruments, the Temiskaming and Northern Ontario Ry. telegraph line to Englehart, Ont., will be put in operation.

The Marconi wireless telegraph operators were brought from their stations on the lower St. Lawrence to Quebec, Dec. 1, and the stations closed for the winter.

It is reported that the C.P.R. telegraph department has installed a 40-wire switchboard at Moose Jaw, Sask., to provide for the operation of a dual system of telegraphy and telephony.

The Kingston and Pembroke Ry. telegraphers have applied for the appointment of a conciliation board under the Lemieux Act, to enquire into their complaints. They have named J. G. O'Donoghue, Toronto, as their representative.

It is reported that a U.S. Company is about to erect a wireless telegraph station at Prince Rupert, B.C., and that if the necessary arrangements can be made construction will be commenced at once. This proposal means an additional station to the one to be erected there by the Dominion Government during this year.

C.P.R. telegraph offices have been opened at: Alberta,—Hillcrest and Sheppard; B.C., Haney; Manitoba,—Basswood and Hazelridge; Ontario,—Coldwater Jct.; Saskatchewan,—Aylesbury, Elbow, Guernsey, Southey, Welwyn, and Wilkie. The name of Peart, Ont., has been changed to Ambo.

Press reports from Winnipeg recently stated that J. W. Baker, one of the Winnipeg Board of Control, and formerly in the C.P.R. Telegraph Department, had been offered the position of Superintendent G.T.P.R. Telegraphs. We are officially advised that the report is without foundation and that no such appointment is contemplated.

R. N. Vyvyan, Engineer Marconi Wireless Telegraph Co., who built the Glace Bay station, is reported to have said in an interview at Liverpool, Eng., recently, that the company is at present transmitting an average of about 5,000 words a day, and expects shortly to deal with 30,000 or 40,000 words daily, and to extend its service throughout Canada, instead of confining its operations to Montreal only.

The Board of Railway Commissioners passed the following order 5679 Nov. 25: In the matter of the oral application of the G.T. Pacific Telegraph Co., made this day by its solicitor, D'Arcy Tate, for the approval of the tolls to be charged by the company for messages to be transmitted over that portion of its line in Ontario along the route of the G.T. Pacific Ry. between Westfort and Lake Superior Jct. Upon the recommendation of the Chief Traffic Officer of the Board, it is ordered that the tolls submitted, namely, the day toll of 25 cents for messages of 10 words or less, and 2 cents for each additional word, and the night toll of 25 cents for messages of 10 words or less, and 1 cent for each additional word, be temporarily approved; and that the company be authorized to charge and collect the tolls hereby approved until, unless otherwise ordered, the Board shall dispose of the question of telegraph tolls generally.

Commutation Fares from Brampton.

In our last issue we gave in full the judgment delivered by J. P. Mabee, Chief Railway Commissioner, on Nov. 23, concurred in by Commissioner S. J. McLean, dismissing the application of F. W. Wegenast against the G.T.R., alleging discrimination against the town of Brampton, Ont., as compared with the town of Oakville, in the matter of commutation tickets and applying to the Board for relief. Commissioner Mills gave the following dissenting judgment Dec. 24:

The G.T.R. Co. admits that it has been, and is now, discriminating against Brampton as compared with Oakville in the matter of commutation tickets. Discrimination in tolls or rates against any person, commodity, or locality, is prima facie unjust, and should be disallowed by the Board, unless facts are stated and reasons given which are sufficient to prove that, under the special circumstances and conditions of any case in question, the difference in treatment "does not amount to an undue preference or an unjust discrimination" (Railway Act, sec. 77).

In every case of a lower toll given to one person, commodity, or locality than is given to another person, commodity, or locality, "under substantially similar circumstances and conditions," "the burden of proving that such lower toll or difference in treatment does not amount to an undue preference or unjust discrimination, shall lie on the company" (Railway Act, sec. 77).

A great deal of so-called evidence was given in this case; but very little of it bore even remotely upon the point at issue, viz., whether or not the admitted discrimination against Brampton as compared with Oakville in the matter of commutation tickets is just and reasonable. The railway company made an effort to justify the discrimination; but its failure to do so was, in my opinion, most signal and complete. The only witness called in defence was G. T. Bell, the company's General Passenger and Ticket Agent, who went at length into an explanation of the reasons why the company had issued commutation tickets to Brampton and other places for a number of years, and why it had ceased to do so, especially in the case of Brampton. M. K. Cowan, counsel for the railway company, stated that the commutation tickets were withdrawn from Brampton because "they had not been taken advantage of"; and Mr. Bell testified that they were withdrawn on account of a demand, backed by a threat, from the business men of the town, because so many Brampton people were availing themselves of the commutation tickets to purchase goods in Toronto. Note Mr. Bell's evidence on this point. Question by Mr. Fullerton: "When you were giving commutation tickets to Brampton, the traffic got so large that it alarmed the Brampton merchants, and they, as you said, put a pistol to your head?" Answer by Mr. Bell: "It got enough for them to get excited"; but, he adds, "it was not the class of traffic the rate was put in to cultivate. It was people doing business and living in Brampton, and coming in daily to the city." Further—question by Mr. Cowan: "Is it possible to bring up a suburban service between here and Brampton by commutation tickets?" Answer by Mr. Bell: "I cannot believe it possible in the conditions existing." Thus the company is represented as withdrawing the commutation tickets from Brampton at the dictation of the business men of the town, because so many people were going "daily to the city," and at the same time justifying the withdrawal on the ground that it was then, and is now, impossible to develop a reasonably profitable suburban traffic between the town and the city,—traffic of the kind which the company desires; but no evidence is given to prove that the admitted discrimination against Brampton is not unjust or unreasonable.

W. G. ANNABLE,
General Passenger Agent C.P.R. Atlantic Steamship Lines.

Mr. Bell stated that, after making an experiment with commutation tickets, the company had withdrawn them from certain places, including Brampton, and had decided to continue them at Oakville, because "some people in Oakville, during this experimental stage, had bought homes in the country that they might have to sacrifice if the cheap rates were withdrawn"; but, further on, he stated that he could not tell how many people living at Oakville were doing business in Toronto when the company decided to continue the tickets to Oakville and withdraw them from Brampton. He was, he said, "just stating the general principle"; but he gave no evidence as to how many then had or now have vested interests in Oakville, neither the number of the people nor the extent of their interests; nor any evidence as to the amount of property which might be sacrificed, especially in view of the fact that there is now an electric line between Oakville and Toronto; nor anything which would be called evidence as to whether or not there were and are similar vested interests in Brampton, from which town there is no competing electric line to Toronto. The population of Brampton is nearly double that of Oakville; the two towns are practically the same distance from Toronto. Mr. Bell's evidence proves that there was a very considerable amount—to the merchants of Brampton, an alarming amount—of daily traffic between Toronto and Brampton when the commutation tickets were withdrawn; and the evidence of other witnesses examined at the hearing tends to show, without actually proving, that, with commutation tickets such as those sold to the people of Oakville, the G.T.R.'s suburban traffic between Brampton and Toronto would be much greater than that on the G.T.R. between Oakville and Toronto.

I would not at present be disposed to order the issue of any class of tickets which would reduce the company's revenue, but it was not urged that commutation tickets such as those asked for by Brampton would result in a reduction of revenue. The regular return trip ticket from Brampton to Toronto costs $1.10; and a 55-trip commutation ticket, good for one month, costs $7.15. The former is purchased only by people who must, or think they must, travel; and the latter (the cheaper ticket) appeals, not only to those who must do a certain amount of travelling, but also to the much larger number of people who need not travel, but will do so for a consideration—an inducement offered in the way of rate reduction, combined with the possibility of a greater variety of goods and better bargains in buying and selling; but no one can avail himself of the benefit, or supposed benefit, of the cheaper ticket until he has paid the company $7.15, which is sure income to the company whether the purchaser makes the whole or only a small proportion of the trips within the month covered by the ticket; and so for each succeeding month. Hence it seems almost certain that the use of commutation tickets such as the above on ordinary trains, without any additional ex-

Galena-Signal Oil Company,

CHARLES MILLER,

PRESIDENT.

pense for equipment or service, would pay the company better than the use of the ordinary return trip ticket; and I think this is true wherever the traffic may be—from surrounding towns and villages to Montreal, Quebec, Toronto, Hamilton, London, Ottawa, Kingston, or any other important business centre. I express no opinion as to whether the issue of such commutation tickets, under approved conditions, would benefit the country as a whole; but I am satisfied that it would increase the revenue of the railway companies.

In his evidence regarding the withdrawal of commutation tickets from certain places, Mr. Bell said: "We took the view that it was right to continue to use commutation rates where the ordinary train service made it possible for people to live in the country and come into the city and do their business and go back again at reasonable rates." Now, this is precisely the condition of things at Brampton. It was clearly proved at the hearing that the present train service on the G.T.R. at Brampton is adequate, satisfactory, quite equal to that furnished at Oakville, and the Brampton Council and Board of Trade specifically stated that their application was for commutation tickets to be used on the ordinary trains running between Toronto and Brampton—that and nothing more; so, on Mr. Bell's own evidence, it would appear that Brampton should have commutation tickets. Hence, to sum up, I would say that, as I understand the case, the facts are as follows: Complaint was made to the Board by the applicant and other interested parties, alleging that the G.T.R. was discriminating in tolls, or fares, against Brampton, as compared with Oakville. At the hearing of the complaint, the railway company admitted that it was discriminating against Brampton, but not unjustly so—maintaining that the discrimination complained of and admitted was just, fair, and reasonable. The railway company completely failed to justify the said discrimination—not having given any evidence which, by the utmost stretch of imagination, could be said to prove that the difference in treatment of Brampton as compared with Oakville, is either just, fair, or reasonable. Therefore my judgment is that the Board is under obligation to take such action as may be necessary to remove the discrimination either by ordering the restoration of commutation tickets to the town of Brampton, or by simply directing the railway company to cease and desist from further discrimination against Brampton as compared with Oakville, in the matter of commutation tickets.

At a meeting of Brampton residents, Jan. 15, it was decided to ask for a re-hearing of the application.

EDITOR'S NOTE.—Commissioner Mills is in error in saying that there is an electric railway between Oakville and Toronto. The Hamilton Radial Ry. Co. runs from Hamilton to Oakville, but no further. The Toronto and York Radial Ry. has a line from Toronto to Port Credit, but there is no electric road between Port Credit and Oakville.

During Nov., 1908, 56 railway employes were killed and 36 injured while engaged on Canadian railways. Of the fatalities, 18 were due to explosions of dynamite, 16 to being run over, 6 to collisions, 5 to derailments, 3 to falling material, 2 each to falls, to explosions of boilers, and to being caught between cars, and one each to being struck by a passing object and to being struck by a locomotive. Of the non-fatal accidents 8 were due to collisions, 6 to derailments, 5 each to being caught between cars, to falls, and to explosions of dynamite, 2 each to being run over and to falling material, and one each to a flying object, to machinery and to escaping steam.

Minneapolis, St. Paul, and S.S. Marie Ry.

Following are extracts from the report of this subsidiary company of the C.P.R. for the year ended June 30:

	1907-08	1906-07
Gross earnings	$11,509,857.32	$12,892,079.03
Operating expenses	7,115,964.91	7,433,548.79
Net earnings	$ 4,393,892.41	$ 5,458,530.24
Income from other sources	669,111.99	52,076.86
Total net earnings	$ 5,063,004.40	$ 5,510,607.10
Fixed charges, taxes, etc.	3,062,135.29	2,901,921.32
Surplus income	$ 2,000,869.11	$ 2,608,685.78

The gross earnings show a decrease of $1,382,211.71, the net earnings $1,064,637.83, and the surplus income $607,816.67. The decrease of $1,382,211.71 in gross earnings is the combined result of a short grain crop, reduced rates and general business depression. The operating expenses decreased $317,583.88. The expenses are somewhat increased, compared with previous years, on account of depreciation charges made in accordance with the revised classification of operating expenses issued by the Interstate Commerce Commission. This new classification makes detailed comparisons of operating expenses with previous years impracticable. Total net earnings decreased but $447,602.70, some $551,000.00 of profits from the sale of real estate having been carried to income account. The percentage of expenses to earnings is 61 8-10%, compared with 57 6-10% the previous year.

On account of the financial stringency during the early months of the year, and the consequent inability to provide funds from the sale of securities, the line from Brooten to Duluth will not be completed until 1909. Fifty miles of track were laid during the autumn of 1907, and an additional 50 miles have already been laid this year. Funds for this extension and for the acquirement and improvement of suitable terminals at Duluth have been provided from the sale of bonds and of $4,200,000.00 of increased capital stock, referred to in the last report.

The usual policy of improving the property by the construction of additional side tracks, the enlargement of stations, shops and other buildings, has been continued. The motive power is in first-class condition. In short, the condition of both roadbed, buildings and equipment has not only been maintained, but largely improved. Owing to more favorable crop prospects, business conditions in the Northwest are much improved, and therefore, reasonable hope is entertained for a much better showing for the current year.

The mileage owned and operated is 629.76 east, and 1,643.62 west of Minneapolis, with 15.91 miles of spur lines, making a total of 2,289.29 miles against 2,262.88 miles at June 30, 1907. In addition to this the company has trackage facilities over 19.17 miles of terminal property in Minneapolis, St. Paul and Sault Ste. Marie. One hundred miles of track laid on the Duluth line is not included in the foregoing figures.

The amount spent on additions to equipment was $13,119.52 and on equipment replacement, $210,947.91. The rolling stock owned at June 30 comprised: 252 locomotives, 200 passenger cars, 12,916 freight cars, and 177 miscellaneous.

C.P.R. Roundhouse at Sutherland.

The roundhouse and shops which the C.P.R. has constructed at Sutherland, a suburb of Saskatoon, Sask., have been fully completed and are in use. They are situated in an angle southwest of the main line into Saskatoon. The building consists of a roundhouse completed for 10 locomotives, but arranged for four additional stalls. The petty store building is at the eastern end, and the machine shop and boiler house at the western end. On the track leading to the turntable to the roundhouse are the coal pockets, sand house, ashpit, etc. The machine shop is 87 by 72 ft., and the boiler shop 48 ft. 4 in. by 65 ft. 4 in., outside measurements. There are two tracks with pits in the machine shop. The contractor was the J. McDiarmid Co., Winnipeg.

The engine and boiler house is equipped with a battery of boilers to drive a large engine, the other equipment including a 300 h.p. heater, boiler feed pump, vacuum pump, and a Northey duplex washout pump. The driving pulley on the main shaft in the engine room has a diameter of 6 ft. 4 in., with a face of 2 ft., and the dimensions of the pulleys on the main shaft are: to shaper, 24¾ in. diameter by 8 in. face; to lathe, 25⅜ in. diameter by 6½ in. face; to drill, 39 in. diameter by 8½ in. face; to lathe, 18 in. diameter by 18 in. face; to driving wheel lathe, 30 in. diameter by 12 in. face. The speed of the main shaft is 130 revolutions per minute. The shaper countershaft, on which are fast and loose pulleys 16 in. diameter by 4 in. face, has a speed of 200 revolutions a minute, while the pulleys on the countershaft connecting with the shaper are respectively 10⅛ in., 8⅜ in., 6⅝ in., and 4⅜ in. diameter by 2⅛ in. face; while those on the shaper are 16 in., 14 in., 12 in., and 10 in. diameter respectively by 3¼ in. face. The first lathe countershaft, on which are fast and loose pulleys 11¾ in diameter, 3 1/10 in. face, is driven at a speed of 280 revolutions per minute, while the pulleys on the countershaft connecting with the lathe are respectively 8⅝ in., 6 13/16 in., 5 1/6 in., and 3¼ in. diameter. The drill countershaft, on which are fast and loose pulleys 13⅞ in. diameter by 4¼ in. face, has a speed of 365 revolutions per minute, the pulleys on the countershaft being respectively 14 in., 11¾ in., 9½ in., and 7 in. diameter by 3¼ in. face. The countershaft for lathe no. 2, on which are fast and loose pulleys 18 in. diameter by 9 in. face, has a speed of 130 revolutions a minute, while the countershaft for the driving wheel lathe, fast and loose pulleys 29¼ in. diameter by 6 in. face, has a speed of 135 revolutions a minute.

Victorian Railways, Australia.

The report of the Victorian Railways Commissioners for the year ended June 30, 1908, shows the following financial results:

Gross revenue	$18,849,745
Working expenses (including payment into railway accident and fire insurance fund)	11,124,318
Net revenue	$ 7,725,427
Less deficit, St. Kilda and Brighton Electric St. Ry.	19,101
Total net revenue	$ 7,706,326
Special expenditures and charges completing the liquidation of extraordinary liabilities taken over by the Commissioners, July 1, 1903	229,008
Balance	$ 7,477,318
Interest charges and expenses	7,220,946
Surplus credited to consolidated revenue	$ 256,372

In view of the completion of the liquidation of the extraordinary liabilities taken over by the Commissioners July 1, 1903, a comparison of the results for the five years from that date, with those of the previous five years will be of interest:

	1908	1903
Gross revenue	$90,974,521	$76,167,484
Working expenses	48,835,532	45,554,907
Net revenue	$42,138,989	$30,622,577
Special expenditures and charges in liquidation of extraordinary liabilities	3,398,715	781,706
Balance	$38,740,274	$29,840,872
Interest charges and expenses	36,095,984	35,688,837
Surplus	$2,644,290	.....
Deficit	.....	$5,847,965
Traffic train mileage	48,007,400	52,429,079
No. of passengers carried.	324,149,961	262,105,154
Tons of freight carried	16,942,845	14,445,830
Tons of live stock carried	1,521,265	1,241 705
Percentage of working expenses to gross revenue	53.68	59.80

The report shows the financial figures in sterling, but for the convenience of local comparison, these have been converted into dollars. The total mileage of track operated during the year was 4,316.76, made up as follows: Main tracks, 5′ 3″ gauge, 3,641.14 miles; 2′ 6″ gauge, 81.60 miles; electric street railway, 5′ 3″ gauge, 5.13 miles; sidings, 5′ 3″ gauge, 583.12 miles; 2′ 6″ gauge, 4.94 miles; electric street railway, 5′ 3″ gauge, 0.83 mile.

The Victorian Railways were placed under the control of the present Commissioners July 1, 1903, and Thos. Tait, until then Manager of Transportation C.P.R., Montreal, was appointed Chairman. The success which has been achieved, as shown by the present report, is, without doubt, due in a great measure to the energy and experience which Mr. Tait has introduced into the management.

At the Central Railway and Engineering Club's monthly meeting in Toronto Jan. 20, the newly elected President, C. A. Jefferis, occupied the chair. A. E. Nourse read a paper on reinforced concrete construction. On behalf of the club Acton Burrows presented the retiring President, W. R. McRae, Master Mechanic Toronto Ry., with a handsome gold watch chain emblem.

Train Dispatching by Telephone.

By W. W. Ryder, Superintendent of Telegraph, Chicago, Burlington and Quincy Rd.

Electric interurban roads early recognized the desirability of the telephone and they have extended their use of it until it is now recognized by them as the standard method of operation. Steam roads, however, with their ultra-conservatism, were loath to part with the long-established telegraph, and it is only recently that the use of the telephone for this purpose has been attempted on a sufficiently large scale to secure a fair demonstration of its possibilities. The immediate incentive for these experiments was the near approach of the date for the enforcement of the Federal nine-hour law, coupled with the well-defined shortage of telegraph operators that had existed for two or three years.

The first experiment on the Burlington of handling trains exclusively by telephone was begun Dec. 11, 1907, on the main line between Aurora and Mendota, 46 miles, and 11 offices. The result was so satisfactory that the construction of another circuit from Aurora to Galesburg, 125 miles, with 16 offices, was immediately authorized to handle the dispatching between Mendota and Galesburg. This circuit was completed Jan. 24 and has been in use regularly since that date. On Mar. 1 the third telephone circuit was completed, from Clyde, the end of the Chicago terminals, to Aurora, 28 miles, with 15 offices. These three circuits are all on double track. On Mar. 19, the first installation on single track was completed between Aurora and Savanna, 106 miles, with 23 offices.

Up to this time, while many who personally investigated the matter were willing to concede its efficiency as applied to double-track operation, they were very sceptical as to what would be the result on single track. In this distrust, they overlooked the fact that in our method of double-track operation, the irregularity of reverse movements in reality made the requirements on such lines more exacting than on single track, where opposing movements were perforce the regular method of operation. The results of this last installation were even more marked than on double track, and I am convinced that the handling of trains by telephone is not only much more satisfactory, but is really safer as well, and this opinion is shared by all who have personally looked into the matter.

We use two 210-lb. copper wires and have made the installation as complete and perfect as we know how. With the present market price of copper, the telephone circuit costs approximately $100 a mile and the station equipment about $50 a station. This is more expensive than the telegraph circuit, and the maintenance will be a little more difficult and the cost a little higher, but the results have proven so absolutely satisfactory we feel the additional expense is fully warranted. Our arrangement makes the circuit entirely self-contained, that is, the signalling and talking is all done on the same pair of wires. The signalling is done by semi-automatic selectors that enable the dispatcher merely by the depression of a couple of buttons in connection with a series of synchronous clocks to ring at will vibrating bells in one or more offices on the circuit. This is a much less laborious method of calling, and we also find a very great saving in time, the operators responding very much more quickly than is the practice with the telegraph. In the local offices we put a 4-in. vibrating bell, one large enough to be heard at a considerable distance, and when this bell lets go without any preliminary warning, the one thought of the operator is to shut it off and so he immediately answers the call. More often than otherwise the operators to avoid the annoyance of the signal bell forestall the dispatcher's call and report trains as soon as they pass.

In handling orders, the same general methods are observed as with the telegraph, any figures or names of stations occurring in the order being spelled out letter by letter, both in the giving of the order and all of the repetitions, and the name of the conductor on a "31" order is spelled out as well.

The use of the telephone is so quick in every way and so much more flexible, the dispatcher is enabled to get far more detailed information of just exactly what each train is doing, even, when occasion requires, talking directly with the conductor or engineer personally, and is thus brought just so much nearer the actual details of train movement. Only a personal investigation of the scheme can show how valuable is this information. There has also been a marked improvement in the work of the men on these telephone circuits, due to the fact that the conversations between the dispatcher and the operators or other employes are of a much more personal character than obtains with the telegraph, resulting in much closer co-operation. It is even possible to save considerable time in the actual putting out of orders. The dispatcher copies the orders in his order book as he talks it off, thus gauging, or rather reducing, his speed of conversation to his ability to write it down, as well as the ability of the operators to do so. Then when the operators repeat the order, they talk it off as fast as they can or much faster than is possible by telegraph.

The change in method in every case was made without a hitch and without any opposition worth mentioning. I had an idea that while possibly the dispatchers themselves might not openly oppose the change, their support might be of a passive character, but in this I was agreeably disappointed. The first circuit had not been in operation a week before a little spirit of jealousy was evidenced, directed against the dispatchers on the telephone circuit, it being so clearly evident they had the "snap" of the office. Soon all the dispatchers in Aurora office were desirous that we give them the same facilities, and now that all have been taken care of, there is not one out of the 12 that would willingly go back to the old method.

It is far easier to train telephone operators than to secure telegraphers. There is hardly a town anywhere on the line in which there are not young men who, by reason of their frequently being around the depot, are more or less familiar with the railroad game, and who with a very little training would be perfectly competent to sit in as telephone operators. There is much to be gained by making use of men in their own home towns, or who have grown up along the line. Our telegraph service was at its best when this condition existed to a considerable extent, and discipline has lessened in proportion as we have been compelled to import telegraph talent. This increased use of the telephone has also opened an avenue whereby we can offer better employment to those unfortunately injured in our service few of whom in the past have been able to learn telegraphy. Another item worthy of consideration is the broadened field from which we can make dispatchers. In the past, the first requisite for a dispatcher was an ability to telegraph, and with the character and ability of telegraphers in general dropping as fast as it has during the past two or three years, we certainly can but expect difficulty in the future in getting satisfactory talent, even if this difficulty has not been greatly evidenced in the past. I maintain that a good, bright, young freight conductor, who has been actually carrying out the train orders, would make a better dispatcher himself and be better able to assist in getting other trains over the road than is the telegraph dispatcher, who, in spite of his occasional trips on freight trains, is a theorist after all.

The establishment of telephone circuits enables us to close unimportant offices wholly or a portion of the time, as a telephone instrument can be placed where the train conductors can readily get in touch with the dispatcher. Another important feature in the use of the telephone is the fact that it works even better in bad weather than in good—just the reverse of the telegraph—and if there is ever a time when good service is needed, it is when the weather is wet and foggy. There is no exasperating interference with the dispatcher's efforts by reason of the relay in some way office being out of adjustment and the inattentive operator making no effort to see whether this is the case or not. The telephone is always in proper adjustment and because of the lowered static capacity of the circuits, works as if charmed.

With the telephone it is possible to arrange apparatus, for instance, in the superintendent's office, so that he can at any time listen to the actual work of the dispatchers and operators and thus check up any tendency to slackness. This has not always been possible in the past, as not all superintendents were telegraphers.

The improvement in the handling of train dispatching by telephone having been so clearly demonstrated, we have decided to attempt to handle other messages in like manner and in a short time all business for the way offices on certain portions of our line (both main and branches) will be handled by telephone, this to include Western Union Telegraph business as well. At junction points, where branch telegraph lines are to be worked, and at certain wire test offices, it may be necessary to maintain telegraph service, but at all other points all classes of business will be handled by telephone.

The field for substituting the telephone for the telegraph daily opens up before us almost faster than we can comprehend it, and the results we are obtaining from our experiments are a constant but very agreeable surprise. For instance, only about a month ago it seemed next to impossible to get satisfactory telephone service on single-wire branch lines without completing the metallic circuit, and this the volume of business did not warrant. But within the last few days we have made successful substitution on two branch lines, one 18 miles long with three offices, and the other 49 miles long with 10 offices. These branch wires have been so arranged that while not connected permanently with the main line, they can be connected at the will of the dispatcher or the way office operator, the signalling on the branch being done by means of ordinary bridged bells.

The unqualified success of our experiments with the telephone as a substitute for the telegraph, and the rapidity with which other roads are extending the work, convinces me that the next few months will make a great change in method of handling trains all over the country, one that will greatly benefit the service.

The foregoing paper was read at the last convention of the Association of Railway Telegraph Superintendents in Montreal.

Railways using the telephone system for dispatching, either already in operation, or authorized, are:

Illinois Central Rd	2,536	miles.
Chicago, Burlington and Quincy Rd.	746	"
Chicago and Northwestern Ry	478	"
Chicago, Rock Island and Pacific Ry.	333	"
Michigan Central Rd	259	"
Chicago, Milwaukee and St. Paul Rd.	223	"
Great Northern Ry	202	"
Northern Pacific Ry	109	"
Baltimore and Ohio Rd	105	"
New York Central Rd	95	"
Lake Shore and Michigan Southern Rd	88	"
Delaware, Lackawanna and Western Rd	62	"
Wheeling and Lake Erie Rd	60	"
Canadian Pacific Ry	49	"
Pennsylvania Rd. (East)	225	"
Lake Erie, Alliance and Wheeling Rd	104	"
Total	5,674	miles.

Since the foregoing table was prepared, the system has been extended to a further mileage, details of which are not yet to hand.

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this. Complete copies of any of the orders summarized below, or of others previously passed by the Commission, will be furnished for 25 cents, cash to accompany requests for copies in all cases.

5801. Dec. 10.—Authorizing E. Raymond to construct a crossing over C.P.R. in Chatham tp., Que.

5802. Dec. 10.—Authorizing North-West Ranching and Packing Co. to construct two highways across Calgary and Edmonton Ry. in the w. ½ sec. 16, tp. 15, r. 27, w. 4th. m., Alta.

5803. Dec. 10.—Dismissing application of C.N.Q.R. for leave to construct a spur line to Argenteuil Lumber Co.'s Mills, Morin's Flats, Que.

5804. Dec. 10.—Authorizing Hamilton, Waterloo and Guelph Ry. to take certain G.T.R. lands in Hamilton, Ont.

5805. Dec. 10.—Authorizing Rochester tp., Essex, Ont., to erect wires across C.P.R. at Belle River, Ont.

5806. Dec. 10.—Authorizing Creelman Telephone Co. to erect wires across C.P.R. in Saskatchewan.

5807, 5808. Dec. 10.—Authorizing the Saskatchewan Government Telephones to place wires across C.P.R. near Wauchope, Sask.

5809. Dec. 10.—Authorizing Mallorytown Independent Telephone Co. to place wires across G.T.R. at Mallorytown, Ont.

5810. Dec. 10.—Authorizing C.P.R. to open for traffic the portions of its second track between mileages 31.6 to 31.63, 106.0 to 106.2, 112.6 to 124.7, 71.9 to 89.9, 124.7 to 130.3, and 140.8 to 148.0, Fort William section.

5811. Dec. 10.—Authorizing Manitoba Government Telephones to place wires across C.N.R. to J. Bray's residence, Portage la Prairie, Man.

5812. Dec. 10.—Authorizing Mallorytown Independent Telephone Corporation to place wires across G.T.R. at Yonge Mills village, Ont.

5813. Dec. 10.—Authorizing Barrie & Angus Telephone Co. to place wires across C.P.R. at Utopia station, Ont.

5814. Dec. 10.—Authorizing Consumers' Gas Co. to lay a main under C.P.R. on Elizabeth St., West Toronto, Ont.

5815. Dec. 10.—Authorizing Adams River Lumber Co. to lay telephone wires across C.P.R. near Shuswap station, B.C.

5816. Dec. 10.—Authorizing the Bell Telephone Co. to place wires across G.T.R. at St. Agnes, Que.

5817. Dec. 10.—Authorizing Bell Telephone Co. to place wires across C.P.R. near St. Mary's, Ont.

5819. Dec. 12.—Authorizing the British Columbia Telephone Co. to place wires across C.P.R. at Duncan, B.C.

5820. Dec. 11.—Authorizing Andover and Perth Electric Light Commissioners to place wires across C.P.R. near Perth, N.B.

5821. Dec. 11.—Authorizing the Falkirk Telephone Association to place wires across G.T.R. at Ailsa Craig, Ont.

5822. Dec. 11.—Authorizing the British Columbia Telephone Co. to place wires across C.P.R. at Hammond station, B.C.

5823. Dec. 11.—Authorizing Bell Telephone Co. to place wires across Central Ont. Ry. near Trenton, Ont.

5824. Dec. 11.—Authorizing Princeton and Drumbo Telephone Co. to place wires across G.T.R. near Bright, Ont

5825. Dec. 11.—Authorizing G.T.R. to open for traffic its new second track from North Parkdale, Toronto, to St. Clair Ave., West Toronto.

5826. Dec. 7.—Dismissing application of Mannville Board of Trade, for order directing C.N.R. to construct a crossing west of the station joining Main St., Mannville, Alta.

5827, 5828. Dec. 11.—Authorizing the Andover and Perth Electric Light Commissioners to place wires across C.P.R. in Andover, N.B.

5829. Dec. 11.—Authorizing Princeton & Drumbo Telephone Co. to place wires across G.T.R. near Gobles, Ont.

5830. Dec. 11.—Authorizing the Bell Telephone Co. to place wires across Central Ont. Ry. near Trenton, Ont.

5831. Dec. 14.—Extending till Jan. 15, 1909, time for installation of interlocking plant at crossing of the C.N.Q.R. with the C.P.R. east of Lorette, Que.

5832. Dec. 14.—Authorizing Montreal St. Ry. to operate trains over crossing of Chateauguay and Northern Ry. at Maisonneuve, without being brought to a stop; the C. & N.R. trains to be prepared to come to a stop 75 ft. on the east and west sides of the semaphore and the blade of the semaphore to the west to be painted red.

5833. Dec. 14.—Approving location of the V.V.& E. Ry. & Nav. Co. from the west line of tp. 26 to east line of sec. 15, tp. 16, New Westminster district, B.C.

5834. Dec. 14.—Authorizing C.P.R. to construct a spur line to Graves Bigwood Co.'s premises, Parry Sound district, Ont.

5835. Dec. 14.—Authorizing C.N.O.R. to purchase a portion of Norrow's lot no. 139, and to construct a suitable crossing on lot 140, con. A, Foley tp., Ont.; and to fence its right-of-way.

5836. Dec. 23.—Authorizing Saskatchewan Government Telephones to carry wires across C.N.R. tracks at Disley, Sask.

5837. Dec. 14.—Approving Standard Passenger Tariff C.R.C. B2 of Chatham, Wallaceburg and Lake Erie Ry. between Chatham and Erie Beach, Ont., showing a basis of 3c. a mile.

5838. Dec. 14.—Dismissing application of C.N.O.R. for authority to construct its line across the Montreal-Ottawa Road, Cumberland tp., Ont., and across Cameron St., near Cumberland station grounds, mileage 42 west from Hawkesbury, Ont.

5839. Dec. 14.—Dismissing application of A. LaForest, Megantic, Que., for authority to lay a sewer pipe under C.P.R. in Levis, Que.

5840. Dec. 15.—Approving by-law 24 of New Brunswick and Prince Edward Island Ry., authorizing J. Wood, President, to prepare and issue tariffs of tolls for traffic.

5841. Dec. 15.—Authorizing the C.N.O.R. and the C.P.R. Cos. to operate trains over the crossing on lot 12, con. 2, Cleland tp., Ont., near Elbow Creek, without being brought to a stop.

5842. Dec. 15.—Granting leave to Brantford and Hamilton Elec. Ry. to operate cars over G.T.R. crossing in Brantford, Ont., without being brought to a stop.

5843, 5844. Dec. 15.—Authorizing Bell Telephone Co. to place wires across G.T.R. near Tottenham and Novar stations, Ont.

5845. Dec. 14.—Dismissing application of J. Malkin & Sons, Sprucedale, Ont., complaining of discrimination by the G.T.R. in rates on tan bark from Sprucedale to Berlin, as compared with rates from Burk's Falls and Sundridge to Berlin and London, Ont.

5846. Dec. 17.—Authorizing Bell Telephone Co. to place wires across the tracks of the G.T.R. 1¼ miles north of Alvinston station, Ont.

5847. Dec. 1.—Directing that all proceedings by V.V. & E. Ry. & Nav. Co. under orders 3505, 4578, and 5494, in retaking of lands for diversion of River road, Delta, B.C., be stayed until further consideration by the Board, the company to be at liberty to proceed with construction without prejudice to the rights of the land owners and at the company's peril.

5848. Dec. 15.—Authorizing Chatham, Wallaceburg and Lake Erie Ry. to construct its railway across certain highways in Raleigh and Harwich tps., Ont., subject to certain conditions.

5849. Dec. 11.—Authorizing the Bell Telephone Co. to place wires across Central Ont. Ry. near Trenton, Ont.

5850-5854. Dec. 15.—Authorizing the Toronto and Niagara Power Co. to place wires across G.T.R. at Davenport road, York County, Brant House, Burlington, and Burlington Beach, Ont.; across C.P.R. near Weston road, York County, and across G.T.R. near Weston road, York County, Ont.

5855. Dec. 15.—Authorizing the C.N.O.R. to construct its railway across certain highways in North Plantagenet tp., Ont.

5856. Dec. 15.—Approving by-law of Esquimalt and Nanaimo Ry. authorizing L. D. Chetham, Victoria, B.C., to prepare and issue tariffs of tolls to be charged for traffic.

5857. Dec. 7.—Dismissing application of Government of Alberta for leave to place wires across C.P.R. at Lethbridge, Alta.

5858. Dec. 17.—Authorizing the Bell Telephone Co. to place wires across C.P.R. at Holland Centre, Ont.

5859. Dec. 17.—Authorizing the Bell Telephone Co. to place wires across G.T.R. tracks near Alvinston station, Ont.

5860. Dec. 17.—Authorizing the Bell Telephone Co. to place wires across C.P.R. near Holland Centre, Ont.

5861. Dec. 16.—Authorizing Toronto and Niagara Power Co. to place wires across Pere Marquette Ry. at Welland, Ont.

5862. Dec. 16.—Dismissing application of town of Lindsay, Ont., to lay sewer pipe under G.T.R.

5863. Dec. 14.—Authorizing town of Buckingham, Que., to lay water pipe under C.P.R.

5864. Dec. 1.—Authorizing Toronto and Niagara Power Co. to place wires across Toronto Suburban Ry. at Bathurst St., Toronto.

5865. Dec. 16.—Dismissing application of Buffalo, Niagara and Toronto Ry. for authority to construct a branch line between St. Davids and St. Catharines, Ont.

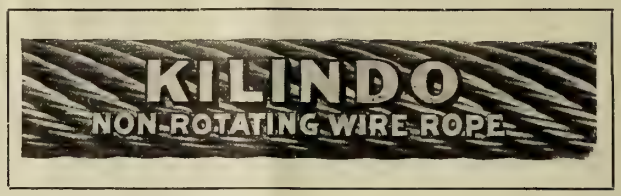
5866, 5867. Dec. 16.—Authorizing C.N.O.R to construct its railway across the highway between Clarence and Cumberland tps., and across certain highways in West Hawkesbury and Alfred tp., and the town of L'Orignal, Prescott Co., Ont.

5868. Dec. 16.—Dismissing application of Buffalo, Niagara & Toronto Ry. for approval of plan and profile showing location of line between Niagara-on-the-Lake and Welland, Ont.

5869. Dec. 16.—Authorizing C.N.O.R. to construct its railway across the highway on lot 20, con. 2, York tp., Ont.

5870. Dec. 18.—Authorizing Lake Erie and Detroit River Ry. and the G.T.R. to operate trains over the crossing of the two roads in Chatham, Ont., permitting the L.E. & D.R.R. to dispense with the north distant signal at the crossing, and directing the L.E. & D.R.R. to trim off trees that partially obstruct view of the south distant signal on its line.

5871-2. Dec. 18.—Authorizing Manitoba Government Telephones to place wires across C.P.R. at Carter Ave., Elmwood, and near Harding.



WIRE ROPE

FOR HOISTING, HAULAGE
TOWING, GUYS, MOORING
TRANSMISSION OF POWER
GRAIN SHOVELS, ETC.

FOR DERRICKS, CRANES
WRECKING, ELEVATORS
BRIDGES, DREDGES
ETC.

The above cuts illustrate our "Ordinary," "Kilindo" and "Durable" makes of wire rope. We manufacture wire ropes for all requirements and also manufacture special ropes to suit any requirements.

All sizes and lengths of "Ordinary"— Kilindo"—"Langs Lay"—"Durable" Wire Ropes in stock—ready for immediate shipment.

The Dominion WIRE ROPE Co., Limited, Montreal

"MARION" STEAM SHOVELS

have demonstrated time and again that they are the best for all classes of service.

F. H. Hopkins & Co SUCCESSORS LATE JAMES COOPER **Montreal**

5873. Dec. 18.—Authorizing Saskatchewan Government Telephones to place wires across C.P.R. between secs. 14 and 15-7-30, west of 1st mer., Sask.

5874-5. Dec. 18.—Authorizing Norfolk County Telephone Co. to place wires across G.T.R. at Simcoe, Ont.

5876. Dec. 18. — Authorizing Manitoba Government Telephones to place wires across C.P.R. 4½ miles northeast of Winnipeg station.

5877. Dec. 18. — Authorizing National Transcontinental Ry. to place wires across C.P.R. at Vermillion Bay, Ont.

5878. Dec. 18.—Authorizing Laval Electric Co. to place wires across C.P.R. at L'Epiphanie, Que.

5879. Dec. 17.—Dismissing application of Quebec, Montreal and Southern Ry. for authority to construct a branch line near St. Angele, Que.

5880-1. Dec. 17.—Rescinding orders 5695 and 5696 authorizing Bell Telephone Co. to place wires across Pere Marquette Rd. at Adelaide St., London, Ont.

5882. Dec. 21.—Ordering Grand Valley Ry. to file its tariff of tolls with the Board.

5883. Dec. 16.—Authorizing G.T. Pacific Telegraph Co. to place wires across C.P.R. west of Portage la Prairie, Man.

5884. Dec. 17.—Dismissing the application of C.P.R. (Ont. & Que. Ry. Co.) for authority to take additional lands, for railway purposes, between Mountain and Windsor Sts., Montreal.

5885. Dec. 22.—Rescinding order 5661, Nov. 10, 1908, and directing Berlin and Waterloo St. Ry. to pay the G.T.R. 85 cents a day from Dec. 12, 1905, to May 1, 1907; and that the Light Commissioners of Berlin, Ont., pay the G.T.R. 90 cents a day from May 1, 1907, re wages of watchman.

5886. Dec. 22.—Authorizing Quebec, Montreal and Southern Ry. to construct spur line to the Distillery Packing and Vinegar Co.'s premises, St. Hyacinthe, Que.

5887. Nov. 4.—Authorizing St. John Ry. upon maintaining a semaphore at the crossing, to operate its line across the C.P.R. in Lancaster parish, county and city of St. John, N.B., without installing an interlocker or other similar appliance, for 12 months from Nov. 4, 1908.

5888. Dec. 16.—Regulations for protection of railway employes. (See pg. 95.)

5889. Dec. 22.—Authorizing C.P.R. Co. to construct revised location of its railway from lot 59, con. 2 E, Glenelg tp., Ont., to park lot 1, north of George St., Durham, Ont.

5890. Dec. 18.—Authorizing C.N.O.R. and G.T.R. to operate trains over crossing near Beaverton, Ont., without being brought to a stop.

5891. Dec. 22.—Authorizing C.N.O.R. to construct branch line partly within Hawkesbury town and partly within West Hawkesbury tp., Ont., from its main line to a junction with the G.T.R. at Riordan's Mills; the branch line to be completed within two years from date of order.

5892. Dec. 1.—Authorizing Toronto and Niagara Power Co. to erect wires across Toronto Suburban Ry. at the Weston Road, York County, Ont., subject to certain conditions.

5893. Dec. 21.—Authorizing the C.N.Q.R. to erect telegraph wires across C.P.R. at crossing east of Lorette, Que.

5894. Dec. 21.—Authorizing the Niagara, St. Catharines and Toronto Ry. to construct a spur from Hedley-Shaw Milling Co.'s mills, Thorold, Ont.; and to complete its branch line within two years from date of order.

5895. Dec. 21.—Authorizing C.N.O.R. to place telegraph wires across G.T.R. at Hawkesbury, Ont.

5896. Dec. 23.—Authorizing G.T.R. to construct spur branch line and two spurs therefrom to the Provincial Steel Co.'s property, Cobourg, Ont.

5897. Dec. 21.—Authorizing the Bell Telephone Co. to place wires across M.C.Rd. near Inwood station, Ont.

5898. Dec. 21.—Authorizing the Bell Telephone Co. to place wires across C.P.R. at Main Road, Megantic, Que.

5899. Dec. 21.—Authorizing Bell Telephone Co. to place wires across G.T.R. at Powassan, Ont.

5900-5903. Dec. 21. — Authorizing the Bell Telephone Co. to place wires across C.P.R. 4½ miles west of Holland Centre, Ont.; 1 mile east of Chatsworth station, Ont.; 5 miles west of Holland Centre, Ont.; and ¼ mile east of Chatsworth station, Ont.

5904. Dec. 21.—Authorizing Claremont and Ashburn Telephone Co. to place wires across C.P.R. at Claremont, Ont.

5905. Dec. 21.—Authorizing the Saskatchewan Government Telephones to erect wires across C.P.R. between secs. 10 and 15, tp. 8, r. 5, w. 2nd m., Sask.

5906. Dec. 21.—Authorizing Bell Telephone Co. to place wires across G.T.R. tracks ⅞ mile east of Beaconsfield station, Que.

5907, 5908. Dec. 21.—Authorizing the Saskatchewan Government Telephones to place wires across the C.P.R. between secs. 8 and 11, tp. 8, r. 4, w.p.m., Sask.; and between sec. 18, tp. 8, r. 5, and sec. 13, tp. 8, r. 6, w. 2nd m., Sask.

5909. Dec. 21.—Authorizing Claremont and Ashburn Telephone Co. to place wires across C.P.R. at Dagmar, Ont.

5910-5912. Dec. 21.—Authorizing Barrie and Angus Telephone Co. to place wires across G.T.R. tracks at four points.

5913. Dec. 21.—Authorizing Bell Telephone Co. to place wires across G.T.R. near Strathmore station, Que.

5914. Dec. 21.—Authorizing C.P.R. to construct spur line to Sunbeam Incandescent Light Co.'s premises, Toronto; the spur to be completed within two years from date of order.

5915, 5916. Dec. 24.—Authorizing British Columbia Telephone Co. to place wires across V.V. & E. Ry. at Sapperton and Kamloops, B.C.

5917. Dec. 22.—Authorizing G.T.P.R. to carry freight over the portion of its line from Winnipeg to Battle River, Alta., notwithstanding that such portion has not been opened for carriage of traffic, in accordance with Railway Act, sec. 261; and cancelling order 3780, Oct. 11, 1907.

5918. Dec. 22.—Authorizing G.T.P.R. to carry freight over its line from Fort William, Ont., to end of track, mileage 0.00 to 188.77, Ontario, notwithstanding that such line has not been opened for carriage of traffic in accordance with Railway Act, sec. 261.

5919. Dec. 10.—Authorizing C.P.R. to open for carriage of traffic its Moose Jaw North-west branch, in Saskatchewan, subject to condition that trains be not run at a greater speed than 15 miles an hour.

5920. Dec. 26.—Authorizing Bell Telephone Co. to place wires across C.P.R. near Strathmore station, Ont.

5921. Dec. 26.—Authorizing Vancouver Power Co. to place wires across C.P.R. at or near Barnet, B.C.

5922. Dec. 26.—Authorizing C.P.R. Co. to place telegraph wires across G.T.R. in Bentinck tp., Ont.

5923. Dec. 28.—Authorizing Town of Cobourg, Ont., to lay pipe under G.T.R. tracks on Ontario St.

5924. Dec. 22.—Authorizing Montreal Terminal Ry. to cross C.N.Q.R. opposite Vulcan Cement Co.'s Works, Longue Pointe, Que.

5925. Dec. 22.—Directing that Quebec, Montreal and Southern Ry., be at expense of changing derails at junction of its line with the Rutland Rd. and the G.T.R. at Noyan Jct., Que.

5926. Oct. 20.—Authorizing the M.C. Rd. to construct crossing over its railway on boundary line between C. and F. Slade's farms, Raleigh tp., Ont.

5927. Dec. 24.—Authorizing the M.C. Rd. to construct bridge at Charing Cross, Ont.

5928. Dec. 28.—Rescinding order 5803, Dec. 10, 1908, and authorizing C.N.Q.R. to construct a spur line to Argenteuil Lumber Co.'s mills at Morin Flats, Que., the spur to be completed within two years from date of order.

5929. Dec. 28.—Authorizing the G.T.P.R. to construct a double-track passenger bridge across the Assiniboine River at Winnipeg, Man.

5930-5933. Dec. 28. — Authorizing Manitoba Government Telephones to place wires across C.N.R. at three places northeast of St. Boniface station, and at 7½ miles east of Swan Lake.

5934. Dec. 28.—Approving deviation of G.T.R. spur line from west side of King St., Chesley, Ont., to the Chesley Rake and Novelty Co.'s premises, Chesley, Ont.

5935. Jan. 11. Approving Grand Valley Ry. Co.'s by-law authorizing M. A. Verner, or such officers as the directors may designate, to issue tariffs of traffic tolls.

5936. Dec. 22.—Approving fire extinguisher for use in Central Ontario Ry. cars.

5937. Dec. 22.—Authorizing the Okabena Telephone Association to place wires across C.P.R. in s.w. ¼ sec. 32, tp. 15, r. 23, w. 2nd m., Sask.

5938. July 15.—Authorizing Walkerton and Lucknow Ry. to construct spur lines of railway in Hanover, Ont., to the Knechtel Furniture Co. and Hanover Portland Cement Co.'s premises.

5939. Oct. 6.—Authorizing the G.T.R. to construct a branch line, with spurs therefrom, to the Simonds Canada Saw Co., Jenkins Bros., the Lang Mfg. Co., and other premises, Montreal.

5940. Dec. 22.—Authorizing C.N.O.R. to construct its line across and divert the Montreal road and the sideroad between the counties of Russell and Prescott, at about mileage 28 west from Hawkesbury, Ont.

5941, 5942. Dec. 23. — Authorizing the G.T.P. Ry. Co. to divert highways at various points in Manitoba.

5943. Dec. 16.—Directing St. John's Electric Light Co. to forthwith remove wires placed over C.P.R. at Stevenson St., St. John's, Que.

5944. Dec. 23.—Authorizing C.P.R. to construct a spur line to the Royal Collieries Co.'s premises at Lethbridge, Alta., the spur to be completed within two years from date of order.

5945. Dec. 23.—Authorizing C. E. Knister, of Comber, Ont., to place wires across M.C. Rd. in Tilbury West tp., Ont.

5946. Dec. 23.—Approving by-law passed by M.C. Rd. authorizing C. F. Daly, Vice-President, in respect of freight and passenger traffic; O. W. Ruggles, General Passenger Agent, in respect of passenger traffic, and W. C. Rowley, General Freight Agent, and N. D. Chapin, Chief of Tariff Bureau, in respect of freight traffic, to prepare and issue tariffs of tolls to be charged.

5947. Dec. 22.—Authorizing G.T.P.R. to construct a bridge between Watson Island and Kaien Island, B.C.

5948. Dec. 23.—Approving location of C.P.R station at Coldwater, Ont.

5949-5952. Dec. 23.—Authorizing Saskatchewan Government Telephones to place wires across C.N.R. at four points near Findlater and Bethune, Sask.

5953. Dec. 14.—Dismissing application of the Chapple municipality, Ont., for order directing C.N.R. to place an agent at Barwick.

5954. Dec. 21.—Directing railway companies to file distances between stations. (See pg. 95.)

5955. Dec. 15.—Ordering C.N.R. to file joint tariff on grains and grain products from points on Q., L.L., and S. Rd. & Steamboat Co.'s railway to Pacific Coast terminal points and intermediate stations in British Columbia. (See pg. 95.)

5956. Dec. 22.—Directing Quebec, Montreal and Southern Ry. to prepare plans for new stations at Sorel and Pierreville Que., for the approval of the Board, within two months from the date of order; that the Q.M. & S. Ry., operate its trains according to its timetables, unless prevented from doing so by reason of accidents, snow storms, or causes of a like nature; that all frogs on its line be packed in accordance with the Railway Act; that signboards be erected; and that the company shall be liable to a penalty of $50 a day for a breach of any of the terms of this order.

5957. July 14.—Authorizing Guelph and Goderich Ry. to cross G.T.R. spur at Listowel, Ont.

5958. Dec. 23.—Authorizing Saskatchewan Government Telephones to place wires across C.N.R. near Disley, Sask.

5959. Dec. 15.—Dismissing application of City of Chatham, Ont., for order directing C.P.R. to provide gates at certain street crossings, and electric bells or other systems of warning at other crossings.

5960. Dec. 23.—Authorizing Saskatchewan Government Telephones to place wires across C.N.R. at Chamberlain, Sask.

5961. Dec. 22.—Amending error in plan and book of reference in connection with order 4498, dated Mar. 24, 1908, wherein, through mistake, Jos. Charron is named as owner of lands instead of F. Charron.

5962. Dec. 23.—Authorizing C.P.R. to operate bridges on its Fort William section at mileages, namely: 30.44, 64.4, 58.5, 72.27, 31.98, 88.73, 30.08, 31.62, 111.45, 112.89, 68.61, 139.98, 28.63, 101.11, 106.17, 48.24, 97.83, and 94.06.

5963. Dec. 23.—Extending until June 1, 1909, time within which C.N.Q.R. shall do the work required in order 5742 of Dec. 1, 1908.

5964. Dec. 29.—Dismissing application of Grenfell Milling and Elevator Co., Grenfell, Sask., for leave to erect electric light wires across C.P.R.

5965. Dec. 29.—Dismissing application of City of Saskatoon, Sask., for permission to lay water main under C.N.R. tracks.

5966. Dec. 29.—Authorizing Manitoba Government Telephones to place wires across C.N.R. 4½ miles northeast of St. Boniface station,

5967. Dec. 29.—Dismissing application of Village of Mannville, Alta., for order directing C.N.R. to provide a street crossing.

5968. Dec. 29.—Authorizing Manitoba Government Telephones to place wires across C.N.R. near Altamount.

5969. Dec. 29.—Authorizing Bell Telephone Co. to place wires across C.N.R. at Prince Albert, Sask.

5970. Dec. 29.—Authorizing C.P.R. to place stop-block 267 feet from switch leading to McIntosh-Gullett Co.'s siding at North Toronto, key of which shall be in custody of McIntosh-Gullett Co., who shall be responsible for seeing that the stop-block is at all times closed and locked when not in use.

5971. Dec. 24.—Approving revised location of the G.T.P.R., Prince Rupert easterly, mileage 10.64 to mileage 50, Coast District, B.C.

5972. Dec. 18.—Approving Orford Mountain Ry. Standard Passenger Tariff C.R.C. no. 20.

5973. Dec. 23.—Authorizing M.C. Rd. to use the interlocking plant at crossing just west of Ross St., St. Thomas, Ont.

5974. Dec. 23.—Authorizing Manitoba Government Telephones to place wires across C.N.R. at Oakville, Man.

5975. Dec. 29.—Authorizing C.N.R to open for traffic the portion of its line from Lumsden to Disley, Sask., the company undertaking to do before July 1, 1909, all fencing necessary.

5976. Dec. 29.—Dismissing application of Hinton Electric Co. for leave to erect wires across C.P.R. in Enderby, B.C.

5977. Dec. 29.—Authorizing the removal of the east derail and home semaphore at Walkerville Jct., Ont., 375 and 428 ft. respectively, from the Pere Marquette crossing with the C.P.R.

5978. Dec. 29.—Directing C.N.R. to construct certain highway crossings over its Oak Point branch, and pending the completion of a permanent highway crossing at mileage 27, the company to provide at once a temporary crossing and put it in such shape that teams may cross in safety during winter.

Saskatchewan Dept. of Railways, Etc.

The Department of Railways, Telegraphs and Telephones for Saskatchewan was created in May, 1908, by an act of the Legislature, which provides for the appointment of a member of the Executive Council by the Lt.-Governor to act as commissioner and of a deputy commissioner by the Lt.-Governor in Council, who shall have jurisdiction over all matters connected with railways over which the Provincial Government may have control, and over every telegraph and telephone system which may be constructed or acquired by the commission, unless otherwise provided. Power is also vested in the commission to construct, equip and operate telegraph and telephone systems, and to purchase, either in whole or part, any existing systems. The commissioner may summon witnesses, require deliveries of documents, and hear evidence on oath, penalties being provided in the event of refusal in the first two cases.

The chief work during the past year has been in connection with the Government telephone system. Long distance lines are in course of construction between Regina and Antler, and Lumsden and Saskatoon, and will shortly be completed. Twenty-one companies had been organized and incorporated under the Rural Telephone Act to the end of 1908, and about 20 companies are in course of organization. Hon. J. A. Calder is the Minister of the Department; S. P. Porter, Deputy Commissioner; J. Sutherland, Superintendent of Telephones; W. Warren, Engineer; D. C. McNab, Inspector of Rural Telephone companies; C. F. Smith, Accountant; R. Chown, Draughtsman; and H. Willsmer, Chief Clerk. The Department also maintains a staff of line inspectors, pole inspectors, storekeepers, etc.

St. Clair Tunnel Operating Results.

In our Dec. issue we devoted a large amount of space to an illustrated description of the electrification of the St. Clair Tunnel. We are now able to present some information as to the results of the operation of the tunnel by electric locomotives as compared with steam locomotives.

Electrification has increased the capacity of the tunnel fully 30%; it has removed a serious handicap from the passenger service and reduced the operating expenses. These improvements have been effected by the single-phase locomotive. The electric locomotives handle 1,000 ton trains, where the steam locomotives handled 700 ton trains. The electric locomotives climb the 2% grades with these trains at 10 miles an hour, where the steam locomotives were barely able to pull out at 3 miles an hour. Under electric conditions the average time from summit to summit is 10 minutes, and the average number of cars per train is 27.3, and this number can be increased. Under steam conditions the average time from summit to summit was 15 minutes, and the average number of cars per train was 19.7. During the first 24 hours of continuous electric service 1,529 freight cars and the usual number of passenger trains were put through the tunnel. This was done without any attempt to establish a record. The record under the steam conditions (exclusive of one for which extraordinary preparations were made) was 1,501 freight cars and the usual number of passenger trains. The average number of freight cars per day in Jan., 1908 (steam service), was 937, the average in Feb. was 682, in March 923. The low average in Feb. was due mainly to snow blockades resulting from 11 blizzards that occurred during that month. During the first half of March the business that offered exceeded the capacity of the tunnel. Just after the middle of March an 18-hour-per-day electric service was instituted. The first time the service was carried through 24 hours (March 23), the result indicated above was obtained. For several years past the business offered during the season of closed lake navigation has at times exceeded the capacity of the tunnel. With the electric service the capacity of the tunnel exceeds the capacity of the terminals. A run can be made through the tunnel every 15 minutes. Assuming 70% of these runs to be freight, and the average number of cars per train to be 30, the total is 2,016 freight cars a day, which is more than 30% greater than was the steam capacity of the tunnel.

The electric locomotives have transformed the atmospheric conditions of the tunnel. The air has been cleared of the exhaust steam and the gases of combustion. The tunnel is now as clean and well lighted as a city street, and the air is as pure as the St. Clair River air. Air brakes can now be used on all the trains. With the steam service hand brakes had to be used on freight trains. Had the air brakes been used, a break-in-two in the tunnel would have held the engine in the tunnel beyond the danger limit. Fortunately no accident ever occurred to a passenger train during the 18 years of steam service. There have been, of course, numerous break-in-twos and occasional derailments with freight trains, some of which accidents were accompanied with results that gave the tunnel a sinister reputation. With the electric service the tunnel trip is a safe and comfortable one. Moreover, the elimination of the exhaust steam and the corroding fumes has done away with what was a source of depreciation on the passenger rolling stock. A further saving in operation has been effected, due to the fact that the electric locomotives are less severe on the rails than the steam locomotives were.

MANUFACTURED ONLY BY

THE McCONWAY & TORLEY CO.

PITTSBURGH, PA., U.S.A.

The fuel bill for the locomotives during the last six months of steam service averaged $4,956 a month. The fuel bill for the first six months of electric service averaged $1,152.60 a month. Hard coal costing $6 a ton was used on the steam locomotives; bituminous coal costing $2 a ton is used in the tunnel power station. The maintenance of the steam locomotives averaged 13.6c. per locomotive mile. The maintenance of the electric locomotives during the first six months of service was 4.3c. per locomotive mile. There has been a 15% reduction in the total wages paid to locomotive crews, and 23% reduction in the total wages paid to train crews. The first six months of electric operation shows a 44% reduction on the cost of steam operation.

The electric locomotives have handled the entire tunnel service since May 17, 1908, prior to which date there were two months of 18-hours-per-day electric service, and prior to which period there was some preliminary electric operation. The transition period occupied about 10 weeks, continuous electric service not being inaugurated until the men and equipment were thoroughly seasoned. Gradual transition was, of course, but common prudence, as the results have abundantly proved. The change-over was made with practically no interference to traffic, and the new service has been a success from the start. Each one of the five original locomotives has made more than 23,000 miles. The wear on the gears is inappreciable, and the pinions, from present indications, will each make 50,000 miles. Main motor brushes are making 15,000 miles and the pantagraph shoes average 2,000, some have made 3,400 miles. The life of the brake shoes has been quite variable, however. The original shoes made from 5,000 to 6,000 miles. Steel shoes have been found to be quite unsatisfactory. Various kinds of cast iron shoes are now being tried. Their life is ranging from 400 to 2,000 miles. The commutation of the motors is good. The control system is practically troubleless. There has been some weeding out of defects that were not discovered during test, but the amount has been small. Two main motors and one auxiliary motor have failed. The trouble in each instance seems to have been due to defective workmanship. During the last six months there have been 34 delays to traffic, nine of which were chargeable to the electric locomotive. The power consumption for the passenger service is averaging about 38 watt hours per ton mile, and for the freight service about 35 watts per ton mile. Trouble with the overhead construction outside the tunnel has been limited to several lightning arrester failures, and the replacement of some three or four trolley ears. In the tunnel but two insulators have failed since the commencement of the service. On one occasion the trolley wire was burnt in two through the careless resetting of the pantagraph of a work train locomotive standing in the tunnel. On another occasion a box car with an extraordinarily high handbrake wheel grounded the tunnel trolley. The trolley breaker cleared the trouble, and no damage to the construction resulted. The wear on the trolley wire is insignificant.

The foregoing is extracted from a paper by H. L. Kirker, who was resident engineer for the Westinghouse Co. in connection with the installation of the electric equipment, etc.

The C.P.R. is considering the withdrawal or, at any rate, the curtailment of the half-fare rate extended on its western lines to clergymen and ministers. All permits have been cancelled pending a decision as to the company's policy. It is stated that the half fare privilege will be extended only to certain districts of Saskatchewan and Alberta for the future.

Grand Valley Railway Tariffs.

The Board of Railway Commissioners passed the following order 5882, Dec. 21: In the matter of the tariff of tolls of the Grand Valley Railway Co., the company not having filed its tariff of tolls with the Board in accordance with the provisions of the Railway Act, although it has been requested to do so by letter from the Secretary of the Board on several occasions: It is ordered that the Company file its tariff of tolls with the Board, pursuant to sec. 314 of the Railway Act, within 15 days from the date of this order. And it is further ordered that the President, the Secretary, and the directors of the Company shall have the tariff of tolls of the Company filed with the Board in accordance with the provisions of this order. Any person wilfully omitting or failing to comply with the provisions of this order shall be liable to a penalty of $100 for every day that he shall omit or fail to comply with the provisions of this order."

Distances Between Stations.

The Board of Railway Commissioners passed the following order 5954, Dec. 21: In pursuance of powers conferred upon it by secs. 26, 30, 322, 326, 330 and 339, of the Railway Act, and of all other powers possessed by the Board in that behalf: Upon the report and recommendation of the Chief Traffic Officer of the Board it is ordered that railway companies subject to the Board's jurisdiction file with the Board, within three months from the date of this order, the exact distances, to not exceeding two decimal points, between their stations, such tables to bear a C.R.C. number in both the freight and passenger tariff series, and to be in the form, size, and style prescribed by the Board for freight and passenger tariffs. And it is further ordered that the said railway companies shall deposit and keep on file a copy of such tables at the places and in the manner provided by sec. 339 of the Railway Act, in respect of tariffs of tolls.

Effect of Flat Wheels on Rails.

By H. H. Vaughan, Assistant to the Vice-President C.P.R.

An article by E. L. Hancock appeared in the American Engineer a few months ago discussing the effect of a flat wheel on a rail in which it was calculated that the blow delivered by the wheel was exceedingly serious in its amount and increased very considerably with the speed. This calculation was based on two assumptions, namely, that the weight carried by the wheel could be considered as a weight concentrated at the centre of the axle, and that the leading edge of the flat spot remained in contact with the rail while this weight described a circle round it. Neither of these assertions is justifiable. In the first place, allowing that the wheels, together with such other parts of a car or tender as are carried below the springs, may be considered as concentrated at the axle, the body of the car is spring supported and cannot be considered as acting in the manner assumed, and in the second place the edge of a flat spot on a wheel with any given weight concentrated at its centre would not remain in contact with the rail after a certain critical speed is reached. A more reasonable method of considering this problem is to assume that the weight supported by each wheel below the springs is concentrated at the centre of the axle and that this weight is pressed down by a force equal to the weight supported by each wheel above the springs and these quantities may be roughly taken at 1,600 and 14,400 lbs., respectively, giving a total weight per wheel of 16,000 lbs., or of 128,000 lbs. per car. On this basis the problem has been thoroughly worked out by L. S. Spilsbury, of the office of the Engineer of Bridges, C.P.R., whose mathematical discussion is given below. The results of this thorough and ingenious analysis are entirely different from those previously obtained and may be summarized as follows:

The striking velocity of the trailing edge of the flat spot on the rail increases proportionately to the speed up to a critical speed at which the leading edge leaves the rail. This critical speed under the assumption as to weights, etc., specified above, is about 21 ft. per second, or 14.5 miles per hour for a 33-in. wheel. After this critical speed is reached, there is a small range of higher speeds during which the leading edge of the flat spot after leaving the rail hits it again almost instantly, then one slightly higher speed at which the flat surface strikes the rail, after which the leading edge of the flat spot, after leaving the rail, does not again touch it, and the wheel leaves the rail until the trailing edge of the flat spot strikes this last condition continues indefinitely as the speed increases. After this last condition is reached the velocity with which the leading edge of the flat spot strikes the rail is constant. It varies, for small flats, directly as the square root of the flat, directly as the square root of the ratio between the total weight supported by the wheel to the weight below the springs and inversely as the square root of the radius of the wheel. For a 33-in. wheel supporting a total weight equal to 10 times the weight below the springs, this constant and maximum striking velocity is as follows:

For 3 " flat spot..... 3.8 feet per second.
For 4½" flat spot..... 5.7 feet per second.
For 6 " flat spot..... 7.6 feet per second.

The blow delivered by the wheel at these velocities corresponds to that delivered by a weight of 1,600 lbs. falling through the following distances:

For 3 " flat spot..... 0.22 feet.
For 4½" flat spot..... 0.50 feet.
For 6 " flat spot..... 0.89 feet.

The results of these calculations are in close accordance with practical experience, and the curious fact that the blow delivered by a flat spot is constant after a certain speed is reached corresponds with the sound given at varying speeds. The blow delivered on a rail by a flat spot while severe is not to be compared with that of a 2,000-lbs. weight falling through several feet, and is well within the capacity of any sound rail to withstand. The regulations of the Master Car Builders' Association give ample protection against excessive blows and do not allow wheels to run in a condition that may prove injurious to the rail. Mr. Spilsbury's calculations are as follows:

C C_1 C_2 is path of centre of wheel from when CO is vertical until CP is vertical.

Let R = radius of wheel in feet.
l = length of flat spot in feet.
d = depth of flat spot in feet.
V = velocity of centre of wheel parallel to rail in f. s.
$w = \text{angular velocity of wheel} = \frac{V}{R}$
P = pressure of spring on wheel when motion is steady, in lbs. (This is assumed constant throughout.)
W = weight of wheel in lbs.

Then $(2R - d)\,d = \frac{l^2}{4}$ (See fig. 1.)

$$a = \frac{\pi}{2} - 2\phi = \frac{\pi}{2} - 2\sin^{-1}\frac{l}{2R}$$

When the wheel is in position shown in fig. 1 it is instantaneously turning about O, and the resultant upward acceleration $= \frac{V^2}{R}$ f. s. per sec.

It also has a downward acceleration due to the spring $= \frac{P+W}{W}\,g = f$.

So the point O will rise off the rail as soon as $\frac{V^2}{R} > f$

i.e., when $V > \sqrt{f\,R}$.

So the limiting speed, $V_{Lt} = \sqrt{f\,R}$ f. s.

I. Before the limiting velocity is reached.

V_s = striking velocity of pt P $= \frac{V}{R}\,l$.

So for any given wheel and flat spot, V, will increase uniformly until the limiting vel. is reached, when

$$V_s = V_{Lt} \times \frac{l}{R} = l\sqrt{\frac{f}{R}}$$

II. After the limiting velocity is reached.

Let t secs. = time taken from when O leaves the rail to when P strikes the rail.

Downward accel. of wheel $= f = \frac{P+W}{W}\,g$ f. s. per sec.

The motion of point P (see fig. 2) is made up of two distinct motions:

(a) Translation. That of the wheel as a whole which moves Vt. ft. horz. forward and $\frac{1}{2}$ ft.^{2} ft. vert. down.

(b) Rotation of wheel about its centre through angle wt, during which P moves from P_0 down to the rail at P_1.

We have $P_0P_1 = 2R\sin\frac{wt}{2}$

$$\gamma = a + \frac{wt}{2}$$

$$P_0N_1 = P_0P_1\cos\gamma = 2R\sin\frac{wt}{2}\cos\left(a+\frac{wt}{2}\right)$$

$$P_1N_1 = P_0P_1\sin\gamma = 2R\sin\frac{wt}{2}\sin\left(a+\frac{wt}{2}\right)$$

Now $L_1M + MP_0 + P_0N_1 = CO = R$

$$\therefore \tfrac{1}{2}ft^2 + R\sin a + 2R\sin\frac{wt}{2}\cos\left(a+\frac{wt}{2}\right) = R,$$

or $\frac{1}{2}ft^2 + R\sin(a+wt) = R$ ..... (A)

Distance between points of departure and strike:
$= OP_1$
$= ON + NP_1$
$= Vt + R\cos(a+wt)$

At the instant of striking, vertical velocity of the wheel as a whole = ft. downwards.

The velocity of P_1 due to rotation is V perpendicular to C_1P_1. Its vertical component = V cos $(a + wt)$.

$\therefore V_s = ft + V\cos(a+wt)$ ..... (B)

From (B) we get:

$V_s = ft + Rw\cos(a+wt)$
$= ft + Rw\sin\left[\frac{\pi}{2} - a - wt\right]$
$= ft + Rw\left[\frac{\pi}{2} - a - wt\right]$, since $\left[\frac{\pi}{2} - a - wt\right]$ is very small
$= t(f - Rw^2) + Rw\left[\frac{\pi}{2} - a\right]$ ..... (C)

From (A) we get:

$\frac{1}{2}ft^2 + R\cos\left[\frac{\pi}{2} - a - wt\right] = R$

or $\frac{1}{2}ft^2 + R\left\{1 - \frac{\left(\frac{\pi}{2} - a - wt\right)^2}{2}\right\} = R$, since $\left[\frac{\pi}{2} - a - wt\right]$ is small.

or $t\left\{w + \sqrt{\frac{f}{R}}\right\} = \frac{\pi}{2} - a$

Substituting in (C) for t, we get:

$$V_s = \left[\frac{\pi}{2} - a\right]\left\{\frac{f - Rw^2}{w + \sqrt{\frac{f}{R}}} + Rw\right\}$$

$$= \left[\frac{\pi}{2} - a\right]\left\{\frac{f + Rw\sqrt{\frac{f}{R}}}{w + \sqrt{\frac{f}{R}}}\right\}$$

$$= 2\sin^{-1}\left(\frac{1}{2R}\right) \times \sqrt{f\,R}$$

For small flats, $\sin^{-1}\frac{l}{2R} = \frac{l}{2R}$

$$\therefore V_s = 2\,\frac{l}{2R} \times \sqrt{f\,R} = l\sqrt{\frac{f}{R}} \quad \text{..... (D)}$$

After the limiting velocity is reached.

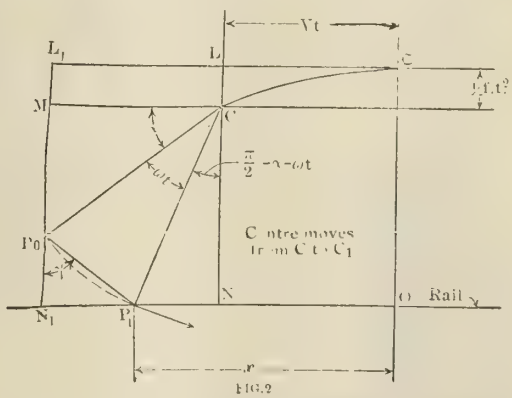

FIG. 2

THE ANGLE INDICATED BY THE GREEK LETTER ALPHA IN THIS DIAGRAM IS DESIGNATED BY THE LETTER *a* IN THE FORMULÆ.

This shows that after the limiting velocity is reached, the striking velocity becomes independent of the wheel's velocity, and is constant for any given wheel and flat spot:

For any given wheel, V_s varies directly with the length of flat spot.

The general result is therefore:

Before limiting velocity is reached

$V_s = \frac{V}{R} - 1$, increasing uniformly from 0 to $l\sqrt{\frac{f}{R}}$

After limiting velocity is reached

$$V_s = l\sqrt{\frac{f}{R}}$$

Railway Commissioners' Traffic Orders.

5955. Dec. 15.—In the matter of the application of the Board of Trade of Prince Albert, Sask., under sec. 334 of the Railway Act, for an order directing the C.P.R. and the C.N.R. to issue a joint tariff on grain and grain products in carloads, so that the new rates will restore to Prince Albert the position that it occupied with respect to Winnipeg and Regina, under the C.P.R. tariff, which was cancelled by that company on Feb. 12, 1908. Whereas, prior to the transfer of the Qu'Appelle, Long Lake and Saskatchewan Railroad and Steamboat Co.'s railway by the C.P.R. Co. to the C.N.R. Co., the C.P.R. had in force certain commodity rates on grain and grain products in carloads, from points on the Q., L.L. & S.R. & S. Co.'s railway to Pacific Coast terminal points, and intermediate stations in British Columbia, as shown in C.P.R. special tariff C.R.C. no. W543, which rates were withdrawn and cancelled by the C.P.R. on Feb. 12, 1908. And whereas the C.N.R. has not substituted therefor a joint tariff of commodity rates between the same points, but has charged and still charges its local rates to its point of connection with the C.P.R. Upon the report and recommendation of the Chief Traffic Officer of the Board, it is ordered that the C.N.R. and the C.P.R. be directed to agree upon and file not later than Feb. 1, 1909, a printer's proof of a joint tariff for the approval of the Board, to apply on such grains and grain products as were covered by C.P.R. special tariff C.R.C. no. W543, from points on the Q., L.L. & S.R. & S. Co.'s railway to Pacific Coast terminal points and intermediate stations in B.C. to which the said tariff applied.

LUMBER INTERSWITCHING AT TORONTO.

6048. Jan 8. In the matter of the application of the R. Laidlaw Lumber Co., Ltd., of Toronto, under the provisions of the Railway Act, for an order directing that order 4988, dated July 8, 1908, be made retroactive, so as to apply to all cars loaded with lumber received at Toronto over the G.T.R., from Feb., 1907, until the interswitching arrangements prescribed by the Board in the said order became effective on Sept. 1, 1908, and switched by the C.P.R. to the applicant's siding at Dundas St., Toronto; also that the railway company refund $42.00, paid by applicant as demurrage on eight carloads received at Toronto in April, 1907. Upon the hearing of counsel for applicant and the railway company, the evidence adduced, and what was alleged—it is ordered that the application be dismissed.

The judgment was given by Commissioner McLean as follows: The decision of the Board in this case must be governed by the decision in the joint switching rates case; Canadian Manufacturers Association vs. Canadian Freight Association, VII Canadian Railway Cases, 302. While the question of interswitching was dealt with in the London case: G.T.R. Co. vs. C.P.R. Co. and City of London, VI Canadian Railway Cases 327, the Board was careful to limit itself to the mere facts of the particular case before it. For it refused to deal in a general way with the question of the division of interswitching rates in reference to all the points in Canada where the railways of the two companies concerned connected.

It is admitted in case 1356, that it had, for a considerable period, been the practice of the railways in Toronto to absorb the interswitching charges. In the hearing at Toronto it was suggested that the applicant company had furnished sufficient antecedent consideration for the continuation of the practice of absorption. This was, however, by the way and not material. In addition the late Chief Commissioner held that the existence of such a practice of absorption for a period of time did not preclude railways changing the practice. Canadian Manufacturers' Association vs. Canadian Freight Association, ut supra 308.

In the absence of a joint tariff, including the switching charges, it was open to the railway to charge its standard tariff, and in addition thereto switching rates. Ibid, 308, 306.

While a comparatively sudden change from the practice of absorption of the switching charges to a practice of charging the shippers for the switching services may have been arbitrary, the railway was within its legal right in so acting.

It is alleged that the interswitching tariff of the Grand Trunk, effective March 1, 1907, was simply a tariff as between the railways, and not having been properly filed was illegal. While it was advisable that switching tariffs should be filed with the Board, the non-filing of such tariffs was not illegal prior to the issue of the order of July 8, 1908, by the Board. Ibid, 308.

While the Board may require the two railway companies to treat traffic involving interswitching as joint traffic, it was not illegal, in the absence of the filing of a joint tariff, covering switching services, for the railway to charge an additional sum for its switching services, which are something distinct from the ordinary work of transportation, although such switching charges might not have been filed. The argument then from the switching tariff, as between the railways themselves, fails.

Under an order of the Board of July 8, 1908, effective Sept. 1, 1908, there were established regulations in regard to the switching charges on traffic both competitive and non-competitive. The applicant claims that in so far as the interswitching rates charged by the railways were in excess of those established by the Board's order, there should be a refund. The first portion of the complaint of the applicant, namely, that dealing with the conditions under the tariff effective March 1, 1907, has already been dealt with. There is no complaint that the G.T.R. tariff, effective June 5, 1907, was not properly filed, or that it did not properly notify the public. While the subsequent order of the Board did reduce the switching rates on non-competitive traffic, the Board has no power to make a retroactive alteration in a tariff, which is not contrary to any of the provisions of the Railway Act, so as to apply the alteration to past transactions. Dominion Cement Co. vs. C.P.R. Co., VI Canadian Railway Cases 516.

It is clear that the law in regard to interswitching had been in an inchoate condition. The order of July 8, 1908, was the outcome of a series of investigations and reports which dates as far back as 1904. In view of this and of the established policy of the Board in regard to refunds, it is impossible to grant any such retroactive order as is asked for, and the complaint of the applicant should, therefore, be dismissed.

Railway Lands Patented.—Letters patent were recently issued covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon as follows:

	Acres.
Calgary and Edmonton Ry.	747.71
C.N.R.	6,675.52
C.P.R. grants	16,243.40
" " Souris branch	618.13
G.T.P.R.	11,950.31
Manitoba Southwestern Col. Ry	282,645.30
Qu'Appelle, Long Lake and Saskatchewan Rd. & Steamboat Co.	639 00
Total	319,519.37

R. E. Tully, formerly C.P.R. agent at Emerson, Man., has been sentenced to one month imprisonment for having charged excessive rates on tickets and converted the difference to his own use.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Hart-Otis Car Co., Ltd., Montreal, has issued a large hanging calendar, illustrated with a number of half-tone views of Hart convertible and Otis dump cars.

The Canadian Westinghouse Co., Ltd., has issued circular no. 1118, describing its CCL polyphase induction motors, with squirrel-cage rotors, and constant speeds as applied to various machine tools.

Robert W. Hunt & Co., Chicago, Ill., and Montreal, have been awarded the contract for the inspection and testing of all materials entering into the constructive work of the terminal buildings being erected at Chicago by the Chicago and Northwestern Ry.

The B. Greening Wire Co., Ltd., Hamilton, Ont., has issued a wall calendar, following its usual style, a large pad of sheets for the various months, with a view of the works. The company will have ready for distribution in Feb., new catalogues for all branches of its business.

The Dougall Varnish Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $150,000, to acquire and carry on the business of McCaskill, Dougall & Co., of Montreal. The officers of the company are: President, J. S. N. Dougall; Vice-President, G. Gylling: Sec.-Treas., W. A. McGuinness.

The Hart-Otis Car Co., Ltd., Montreal, holders of a number of Canadian patents for dump cars, ballast spreading cars, combination freight and dump cars, railway cars, and end sills for cars, will apply at the next session of the Dominion Parliament for an act providing that such patents be made subject to the conditions set forth in pars. a, b, c, and d, sec. 44, cap. 69, R.S.C. 1906, instead of par. a, sec. 38, as heretofore.

The International Marine Signal Co., Ltd., Ottawa, Ont., has issued "As Others See Us," a book of nearly 100 pages, containing the testimony of mariners regarding the efficiency of the company's automatic acetylene gas buoys and beacons in various parts of the world. Although the company has only been in active business for about four years, and in the export field for about 18 months, it has sold 277 buoys and 50 beacons, which are located in Canada on the Great Lakes and the St. Lawrence River and on the Atlantic and Pacific coasts, in the United States on the Atlantic coast, in Panama, Brazil, Guatemala, England, Austria, India and Korea.

The American Locomotive Co. has purchased 130 acres of land at Gary, Ind., and plans are being drawn for a plant which officers of the company say will be the most complete and best equipped locomotive works in the world. The land purchased is twice the extent of that occupied by the largest of its present plants, and when fully occupied will give employment to from 12,000 to 15,000 men. The site was selected 24 miles from Chicago, to provide for the territory where the largest number of railways converge to a single commercial centre. The Chicago district is a great railway centre and that district is rapidly developing in manufacturing importance, which renders it favorable as a location for securing material for building locomotives. The company now operates plants in Schenectady and Dunkirk, N.Y.; Pittsburgh and Scranton, Pa.; Richmond,

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from _____ the Master Mechanic here, that an engineer running between _____ and _____ discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

PYLE-NATIONAL ELECTRIC HEADLIGHT CO.
MONADNOCK, CHICAGO

POLSON IRON WORKS
LIMITED
TORONTO, CANADA

Steel Shipbuilders, Engineers and Boilermakers

Hydraulic and Dipper Dredges, Steel and Composite Steamers and Yachts, Marine and Stationary Engines and Boilers

OFFICE AND WORKS

ESPLANADE STREET EAST, TORONTO

Va.; Paterson, N.J.; Manchester, N.H.; and Montreal, Que. The selection of a location in the Chicago district provides additional locomotive building capacity where it is most needed for prompt and direct delivery to a large number of railways. The size of the new plant will be sufficient to provide liberally for the growing needs of the railways for years to come.

February Birthdays.

Many happy returns of the day to—

S. A. Baker, Canadian Freight and Passenger Agent, Chicago Great Western Ry., Toronto, born at Morrisburg, Ont., Feb. 1, 1877.

B. H. Bennett, General Agent Chicago and North-Western Ry., Toronto, born at Cobourg, Ont., Feb. 6, 1858.

F. L. C. Bond, Resident Engineer G.T.R., Montreal, born there Feb. 21, 1877.

Thos. Britt, General Fuel Agent C.P.R., Montreal, born there Feb. 3, 1871.

F. W. Churchill, C.P.R. ticket agent, Collingwood, Ont., born in London, Eng., Feb. 6, 1853.

H. R. Charlton, Advertising Agent G.T.R., Montreal, born at St. John's, Que., Feb. 9, 1866.

F. W. Cooper, Resident Engineer C.P.R., London, Ont., born there Feb. 16, 1880.

R. Crawford, Northwest Agent Northern Navigation Co., Winnipeg, Man., born at Kingston, Ont., Feb. 21, 1870.

E. A. Evans, General Manager and Chief Engineer Quebec Ry., Light and Power Co., Quebec, born at Kensington, London, Eng., Feb. 26, 1855.

E. H. Fitzhugh, Third Vice-President G.T.R. and Vice-President Central Vermont Ry., Montreal, born in Montgomery County, Mo., Feb. 1, 1853.

L. O. Genest, General Storekeeper, C.P.R. Western Lines, Winnipeg, Man., born at St. Henri, Levis County, Que., Feb. 16, 1856.

W. Jackson, C.P.R. ticket agent, Clinton, Ont., born there Feb. 4, 1860.

C. Gardiner Johnson, Lloyd's Agent for British Columbia, Vancouver, B.C., born at Dumblane, Perthshire, Scotland, Feb. 8, 1857.

R. S. Logan, Assistant to 2nd Vice-President and General Manager G.T.R., Montreal, born at St. Louis, Mo., Feb. 13, 1864.

D. MacPherson, Assistant Chief Engineer Transcontinental Ry. Commission, Ottawa, born at Bath, Ont., Feb. 2, 1858.

C. S. Maharg, Superintendent District 2, Western Division C.P.R., Medicine Hat, Alta., born in Dufferin County, Ont., Feb. 4, 1867.

T. McNabb, Master Mechanic Alberta Ry. and Irrigation Co. at Lethbridge, Alta., born in Scotland, Feb. 16, 1849.

J. K. McNeillie, Superintendent District 1, Ontario Division, C.P.R., Toronto, born there Feb. 23, 1874.

A. H. Robinson, Superintendent Elgin and Havelock Ry., Havelock, N.B., born at Elgin, N.B., Feb. 2, 1862.

A. E. Rosevear, Assistant General Freight Agent G.T.R., Montreal, born Feb. 20, 1863.

H. H. Schaefer, Division Freight Agent Intercolonial Ry., St. John, N.B., born at Cologne, Germany, Feb. 10, 1848.

J. G. Scott, ex-General Manager Quebec and Lake St. John Ry., Quebec, born there Feb. 13, 1847.

G. Spencer, Superintendent District 1, Lake Superior Division, C.P.R., North Bay, Ont., born in London, Eng., Feb. 21, 1865.

H. E. Suckling, Treasurer C.P.R., Montreal, born at Gibraltar, Feb. 27, 1851.

Hugh Sutherland, Executive Agent Canadian Northern Ry., Winnipeg, Man., born at New London, P.E.I., Feb. 22, 1845.

Sir Wm. C. VanHorne, K.C.M.G., Chairman C.P.R. and President Cuba Co., Montreal, born in Will County, Ill., Feb., 1843.

Railway Finance, Meetings, etc.

Alberta Ry. and Irrigation Co.—Approximate net profits, exclusive of land sales for Nov., 1908, $50,870, against $42,532 for Nov., 1907. Total net profits for 5 months ended Nov. 30, 1908, $179,438. Approximate railway receipts for Dec., 1908, $31,523, against $23,671 for Dec., 1907.

Alexander Gibson Ry. and Mfg. Co.—The annual meeting was held at Fredericton, N.B., Jan. 9. Following are the officers and directors for the current year: President, H. H. McLean, M.P.; other directors, A. Gibson, A. Gibson, jr., J. S. MacLaren, G. W. Massey; Secretary-Treasurer and Manager, A. Rowley.

Calgary and Edmonton Ry.—D. D. Mann, Vice-President Canadian Northern Ry., was quoted recently as having stated that the C.N.R. had no intention of purchasing the Calgary and Edmonton Ry., which is operated by the C.P.R. under a lease, approved by the bondholders at a meeting held in London, Eng., Feb. 6, 1903, for 99 years, and renewable for a further period of 99 years, at a rental equal to 4% of the bond issue. Following the signing of this agreement the C.P.R. purchased for $500,000 the entire capital stock of the C. and E.R. Co. The newspaper reports were to the effect that the lease of the C.P.R. of the line would expire in June, 1910, and that a clause in the original contract was that in the event of a sale of the line the contractors were to have the first chance of purchasing. The contractors were Mackenzie, Mann & Co., and the reports stated that they had an option on the line. If the statement had any foundation in fact, it would presumably have come to light in 1903 when the C.P.R. acquired the line.

Central Ontario Ry.—A mortgage made by the company in favor of the Trusts and Guarantee Co., Toronto, to secure a bond issue of £200,000, has been deposited with the Secretary of State at Ottawa, as required by sec. 140 of the Railway Act, chap. 37, R.S.C., 1906.

A meeting of the shareholders has been called to be held at Trenton, Ont., Feb. 10, for the purpose of authorizing the directors to issue bonds to the amount of $500,000, such bonds to constitute the second bond issue, and to be subject to the issue of £200,000 dated Jan. 1, 1909. The object of the issue is to provide for the completion of the extension of the railway and for other purposes.

Columbia and Western Ry.—The proceedings in the case in which the C.P.R. sought to compel F. A. Heinze to select his half of the land grant, will be fought out before the Imperial Privy Council. At the first trial the C.P.R. obtained a verdict, but on appeal reversed this decision, it being held that under the agreement Heinze has several years in which to make the selection.

Dominion Atlantic Ry.—Gross earnings for Nov., 1908, $97,000, against $99,916 for Nov., 1907. Gross earnings for 11 months ended Nov. 30, $1,168,300, against $1,205,555 for same period 1907.

Duluth, Rainy Lake and Winnipeg Ry.—A Duluth, Minn., press despatch recently stated that the amalgamation of the Meyerhauser and Hines Lumber and the Virginia Lumber Co. had been effected, the capital involved being $20,000,000. In closing up the deal the Duluth, Rainy Lake and Winnipeg Ry., controlled by the Virginia Lumber Co., was sold to the Canadian Northern Ry.

Intercolonial Ry.—The daily press has been giving considerable space of late to a discussion of a projected lease or sale of the Intercolonial Ry., either in whole or in part. Replying to the whole of the reports the Minister of Railways said, Jan. 13, no negotiations had taken place either for the sale or the leasing of the line to Mackenzie, Mann & Co., nor to anyone else, and no offer had ever been made by Mackenzie, Mann & Co. for the line; and on Jan. 15 he said: "If changes be decided on they will not include either the sale or the lease of the Government line.

Lake Superior Corporation.—The announcement was made officially, Jan. 14, that the Canadian Improvement Co. had paid in $1,000,000, and the Moreton Trust Co. of New York gave certificates that all guarantee certificates are cancelled and the matter closed. This, the Premier of Ontario states, puts an end to the liability of the province in regard to the guarantee of $2,000,000, given some years ago to assist the industries at Sault Ste. Marie, Ont.

The guarantee has been released owing to the introduction of new capital by R. Fleming, of Edinburgh, Scotland, and his London, Eng., and New York associates. A statement from New York set out that the interest acquired by this syndicate in the company is that formerly held by certain Philadelphia banking institutions, as security for advances, about which there was considerable litigation a year ago, the point in dispute being with respect to the voting power thereon. The arrangements for the reorganization of the company necessitated by the introduction of this new capital are being made.

The company owns, in addition to a number of industrial concerns, the Algoma Central and Hudson Bay Ry., and its steamship line on the Great Lakes; the Manitoulin and North Shore Ry.; the British America Express Co., the International Transit Co., and the Trans St. Mary Traction Co., these two latter being the street railways in Sault Ste. Marie, Ont., and Sault Ste. Marie., Mich.

London and Port Stanley Ry.—The annual general meeting of shareholders was held in London, Ont., Jan. 18. At the last meeting of the directors for 1908, the final reports of the year's operation were received. These showed that the city council would receive $19,549.69 as a return for its investment in the line, and that the remainder of the income, $153, was absorbed by current charges. The rental for the year from the Pere Marquette Rd., which operates the line under lease, is $10,000, and the other receipts include $2,596.60 for interest as rental, and $6,706 percentage of earnings of P.M.R. for 1907; the percentage on earnings for 1908 not being due for some time. The railway is practically owned by the city of London, the city council appointing the directors.

New Brunswick Southern Ry.—The annual meeting was held Jan. 11. Following are the officers and directors for the current year: President and General Manager, H. H. McLean, M.P.; other directors, F. R. Taylor, M. B. Edwards; Secretary-Treasurer, O. Ring.

Pere Marquette Rd.—Reports are again current that the P.M.R., which includes the old Lake Erie and Detroit River Ry. in Canada, will shortly be absorbed by another company. H. B. Ledyard, chairman of the Board, Michigan Central Rd., said recently there was absolutely no foundation for the report so far as that company was concerned. His connection with the P.M.R. as a director was entirely a personal one, and at the request of J. P. Morgan. The other report, which has been denied more than once already, is that the line will be taken over by the C.P.R.

Quebec Central Ry.—Gross earnings for Oct., $78,935.41; expenses, $57,238.95; net earnings, $21,696.46; gross earnings for Nov., 1908, $65,615.98; expenses, $49,815.34; net earnings, $15,800.64, against $88,256.89 gross earnings; $62,592.13 expenses; $25,664.76

net earnings for Oct., and $85,012.63 gross earnings; $61,473.83 expenses; $23,538.80 net earnings for Nov., 1907. Gross earnings for 5 months ended Nov. 30, 1908, $480,076.58; expenses, $321,145.52; net earnings, $158,931.06; against $497,291.54 gross earnings; $324,701.44 expenses; $172,590.10 net earnings, for same period 1907.

St. John Bridge and Railway Extension Co.—The annual meeting was held at St. John, N.B., Jan. 12. Following are the officers and directors for the current year: President, D. McNicoll; Vice-President, W. Downie; Secretary-Treasurer, H. H. McLean, M.P.; other directors, R. Meighen, W. H. Thorne, H. E. Macdonell.

Temiscouata Ry.—Total traffic receipts for Dec., 1908, $15,720.30; aggregate for 12 months ended Dec. 31, 1908, $225,556.26.

Temiskaming and Northern Ontario Ry.—The report of the operations of this line during 1908, it is stated, shows that there were 487,051 passengers and 475,000 tons of freight carried, against 518,678 passengers and 393,589 tons of freight in 1907. The decrease in revenue from passengers is about $40,000, but there is an increase of about $100,000 in the receipts from freight. The Commissioners have paid over to the Government about $350,000 as the net receipts for the year, against $235,000 in 1907.

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-08, from July 1, 1908:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.
July..	$728,500	$ 525,600	$ 202,900	$159,000–
Aug..	747,400	561,300	186,100	30,400–
Sept..	901,700	650,600	251,100	42,000+
Oct...	1,172,700	752,600	420,100	110,200+
Nov..	1,156,900	744,300	412,600	144,300+
Dec..	927,900	642,800	285,100	42,400+
	$5,635,100	$3,877,200	$1,757,900	$149,500+
Inc.... or Dec....	$ 126,800	$ 84,40c	$ 42,400	.....

Approximate earnings for 3 weeks ended Jan. 21, $378,400, against $414,800 for same period 1908.

C.P.R. Earnings, Expenses, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-8, from July 1, 1908:—

	Earnings.	Expenses.	Net Profits.	Net Increase or Decrease.
J'ly	$6,292,880.82	$4,018,307.57	$2,274,573.25	$232,279.41–
Aug.	6,385,956.69	3,807,057.98	2,578,898.71	8,623.56+
Sept.	6,391,672.48	4,277,064.71	2,114,607.77	36,745.58–
Oct..	7,381,970.41	4,726,703.70	2,655,266.71	25,050.93–

Inc.. or Dec..	..... $ 143,838.36	$216,006.87	..... $389,845.23	....

Approximate earnings for 3 weeks ended Jan. 21, $3,107,000; against $3,062,000 for same period 1908.
Mileage operated 9,844 miles.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross earnings for Nov., 1908, $237,816.12; expenses, $163,728.11; net earnings, $74,088.01, against $263,465.45 gross earnings; $201,458.98 expenses; $62,006.47 net earnings for Nov., 1907. Gross earnings for 5 months ended Nov. 30, $1,203,374.47; expenses, $847,208.73; net earnings, $356,165.74, against $1,553,516.35 gross earnings; $1,126,168.74 expenses; $427,347.61 net earnings for same period 1907. Approximate earnings for Dec., 1908, $223,671, and for 3 weeks ended Jan. 21, $134,222, against $225,142 and $133,512 for same periods 1907 and 1908 respectively.

MINERAL RANGE RD.—Operating earnings for Nov., 1908, $66,326.16; expenses, $54,726.52; net earnings, $11,599.64; against $68,873.15 operating earnings; $53,449.93 expenses; $15,423.22 net earnings for Nov., 1907. Operating earnings for 5 months ended Nov. 30, $362,502.84; expenses, $284,978.77; net earnings, $77,524.07, against $359,240.60 operating earnings; $282,575.33 expenses; $76,665.27 net earnings for same period 1907. Approximate earnings for Dec., 1908, $68,408, and for 3 weeks ended Jan. 21, $43,069, against $61,993 and $39,000 for same periods 1907 and 1908 respectively.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for Nov., 1908, $1,180,183.63; expenses, $591,899.00; net earnings, $588,284.63, against $1,106,255.89 gross earnings; $677,639.80 expenses; $428,616.09 net earnings for Nov., 1907. Gross earnings for 5 months ended Nov. 30, 1908, $6,108,328.06; expenses $3,087,708.36; net earnings $3,020,619.70, against $5,692,760.92 gross earnings; $3,376,374.56 expenses; $2,316,386.36 net earnings for same period 1907. Approximate earnings for Dec., 1908, $897,374, and for 3 weeks ended Jan. 21, $515,000, against $896,480 and $506,589 for same periods 1907 and 1908 respectively.

Grand Trunk Ry. Earnings, Expenses, etc.

The following figures give the earnings of the G.T.R., the C. A. R., the G. T. Western Ry., and the D. G. H. & M. Ry., separately, for Nov., as compared with Nov., 1907:

	1908	1907
GRAND TRUNK RAILWAY.		
Earnings	$2,814,700	$3,056,400
Expenses	1,982,300	2,224,400
Net earnings	$ 832,400	$ 832,000
CANADA ATLANTIC RAILWAY.		
Earnings	$ 167,800	$ 202,400
Expenses	123,900	189,100
Net earnings	$ 43,900	$ 13,300
GRAND TRUNK WESTERN RAILWAY.		
Earnings	$ 436,100	$ 528,400
Expenses	386,900	438,100
Net earnings	$ 49,200	$ 90,300
DETROIT, GRAND HAVEN & MILWAUKEE RY.		
Earnings	$ 137,000	$ 147,400
Expenses	121,600	121,200
Net earnings	$ 15,400	$ 26,200

Approximate earnings for Dec., 1908, $3,200,624, against $3,659,296 for Dec., 1907; and for 3 weeks ended Jan. 21, $1,806,208, against $1,909,089 for same period 1908.

TRAFFIC RECEIPTS OF THE SYSTEM.

Aggregate from July 1 to Dec. 31, 1908:

	1908.	1907.	Increase.	Decrease.
Grand Trunk	£3,329,571	£3,781,097	....	£451,526
Canada Atlantic	203,791	244,878	...	41,087
G. T. Western	586,362	690,172	....	103,810
D., G. H. & M.	181,259	206,335	....	25,076
Total.....	£4,300,983	£4,922,482		£621,499

A circular letter issued by H. H. Norman, Secretary, from the company's head office, intimates that in accordance with the Dominion Government's revised classification, the published earnings and expenses will in future differ from those previously published by the elimination from the gross earnings of rents payable by other companies for the use of the companies' system, and from the working expenses, of the amounts paid to or received from other companies on account of car mileage and hire of equipment. These items will be included in the net revenue accounts each half-year. For purposes of comparison, the figures quoted for 1908 will be shewn on a similar basis.

Viaduct Ordered for Toronto.

The Board of Railway Commissioners issued the following draft order, Dec. 31: "In the matter of the application of the City of Toronto for an order directing the G.T.R. Co., and the C.P.R. Co., to carry York St. and certain other streets in the said city under the tracks of the said companies: Upon the hearing of evidence and of counsel for the city, the railway companies, the Toronto Board of Trade, and a number of landowners in the city, it is ordered and directed:

"That the railway companies submit to the Board, within 60 days from the date of this order, a plan showing at least four tracks of railway elevated and carried over the streets now open in the city between York and Cherry Sts., both included, at a height sufficient to give a clear headway not less than 14 ft. between the present level of the street and the superstructure at each crossing, and showing John St., Spadina Ave., and Bathurst St. carried over the railway tracks by bridges at a height sufficient to give, under each bridge, a clear headway of 22½ ft. above rail level.

"That within two years from the date of the approval of the plan by the Board, York St. be extended from its present terminus southerly to the waterfront.

"That within two years from the date of the approval of the plan by the Board, the railway companies alter and arrange their yards and sidings so that no tracks on the ground level shall cross York, Bay, Yonge or Church Sts.

"That, after two years from the date of the approval of the plan by the Board, no locomotive or car be moved on tracks at ground level between Church and York Sts., except between 10 p.m. and 6 a.m., during the season of lake navigation, and between 7 p.m. and 6 a.m. during the remainder of the year—provided, however, that cars containing fruit or other perishable merchandise may be moved across streets within the said limits between 6 a.m. and 10 p.m. when a flagman, on foot, precedes the train (engine, car or cars) to warn persons on such streets that a train is approaching.

"That no amount be paid to the city as damages or otherwise for any city property which may be taken or used by the railway companies in the elevation of their tracks or the re-arrangement of their terminals as shown on the said plan.

"That the city pay one-third of the cost—of the elevation of four tracks, excepting rails and tracklaying, of the elevation of the bridges at John St., Spadina Ave. and Bathurst St., and of the substructure for the elevation of necessary tracks at the proposed new union station, with a concourse such as that suggested in the plan submitted by the city.

"That all consequential damages (other than those of the city and the railway companies) recoverable by reason of the elevation of the tracks of the railway companies in accordance with the plan approved by the Board, be adjusted or settled by the city, and that, after settlement, two-thirds of the amount required to make such settlement be paid to the city by the railway companies.

"That the manner and expense of removing York St. bridge, and the extension of York St. as herein ordered, be arranged between the city and the railway companies, and that in case they fail to agree, the points at issue be referred to and settled by the Board.

"That the proportion which each railway company shall pay of the cost of carrying out the provisions of this order, and the amount which either of the railway companies shall pay to the other for consequential damages suffered by it through the carrying out of the provisions of this order, be determined by mutual agreement between the railway companies and that, in the event of their failing to agree, the questions in dispute be settled by arbitration, pursuant to the arbitration clauses of the railway act or by an expert to be chosen by the railway companies or by the Board."

At a sitting of the Board at Ottawa, Jan. 12, an order was issued requiring the companies to file plans with the Board within 90 days from that date. This order, we are informed, will be complied with, and in the meantime the question of an appeal to the Supreme Court, as to the jurisdiction of the Board regarding the matter remains quiescent. It is contended that any steps which the companies are taking towards compliance with the order for filing plans, etc., will not prejudice them, should an appeal on the Board's jurisdiction be proceeded with at a later date.

The reconstruction of the Union Stock yards at West Toronto, Ont., is to be taken in hand at once. The new buildings will be constructed of cement.

The Ontario Lumbermen's Association held a meeting recently in Ottawa, in regard to the details of the adjustment of railway rates on lumber, which is being dealt with by the Board of Railway Commissioners.

A press despatch from Winnipeg, Jan. 11, announced that the Tribune, a daily paper in that city, had been sold to C.P.R. interests announced the appointment of a new editor, and gave other details of a reorganization. Sir Thos. G. Shaughnessy, President C.P.R., stated, Jan. 12: "We have no intention of going into the newspaper business, and the paper would be of absolutely no use to the C.P.R. R. L. Richardson, principal owner of the Tribune, said he was not even negotiating for its sale.

Salary-Raising Training For Railroad Men

There is no profession in which promotion depends in any higher degree upon a man's real ability and technical knowledge than in railroading. Quick promotion then for the railroader is the result of quick and also thorough acquirement of that technical training which will qualify him to hold a higher position. In no way can the ambitious railroad employe secure this technical knowledge so quickly and yet so simply as through the I. C. S. Courses of home training. These Courses have been written by the best railroad experts on this Continent and are taught after a manner that 15 years' experience in training hundreds of thousands of ambitious men for promotion and better earnings has proved to be the most practical and efficient. These Courses include instruction in LOCOMOTIVE MANAGEMENT, LOCOMOTIVE BOILERS, STEAM CYLINDERS, and VALVE GEARS, BREAKDOWNS, COMPOUND LOCOMOTIVES, TRAIN RULES, WESTINGHOUSE and NEW YORK AIR BRAKES, CAR LIGHTING and HEATING, and ELECTRIC HEADLIGHTS.

If **YOU** wish to secure the training in your own home, in your spare time, and at an insignificant cost, that will qualify you for promotion to the highest positions in your profession, simply mark and mail this coupon and we will tell you how you can do so. The fact that we have enabled hundreds of other railroad men to secure promotion in itself warrants your careful investigation of our plan if you really wish to better yourself. Don't let a postage stamp stand between you and a better position. **Mark and mail this coupon NOW.**

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Abitibi and Hudson Bay Ry.—The Dominion Parliament will be asked to pass an act extending the time within which the company may construct the lines authorized by sec. 7, chap. 55, of the statutes of 1907. H. Fisher, Ottawa, is solicitor for the applicants. (May, 1907, pg. 323.)

Alberta Central Ry.—The Red Deer, Alta., Board of Trade is taking active steps to support this company's application to the Dominion Parliament for an extension of time for the construction of the projected railway from Red Deer towards Rocky Mountain House. A delegation from the Board has been visiting a number of districts through which the line would pass and the speakers stated that the Board had satisfied itself there was a bona fide prospect of the company starting active operations in the near future, and of the placing in operation of the section of the line which would serve the Medicine River country, within the next two years. They stated that negotiations had been going on with one of the transcontinental systems, and the company was advised that if proper gradients could be secured to make the proposed line equal to any of the transcontinental lines, the question of financing would be arranged. As a result of the visit of the delegates several settlements which had decided to petition against the granting of any further extension of time for the construction of the line have withdrawn their opposition. The projected line, it is stated, will serve a large and fairly well-populated district, besides striking some good coal areas and timber berths, and opening up a large area of high-class agricultural land. (Jan., pg. 17.)

Algoma Central and Hudson Bay Ry.—In connection with the discharge of the loan of $1,000,000 by the Ontario Government to the Lake Superior Corporation, the President, C. D. Warren, of Toronto, stated, Jan. 9, that there would be some change in the directorate, and that an announcement would be made as to plans of extension. A press report states of the $5,000,000 which it is proposed shall be expended on the company's plant, etc., at Sault Ste. Marie, Ont., a considerable proportion will be utilized on the extension of the A.C. and H.B. Ry. to the C.P.R., and that the work will be started early in the spring. F. H. Clergue was quoted, Jan. 7, as stating that within two years the railway will be constructed right through to connect with the C.P.R. The surveys for the entire distance to connect the detached portions of the line and the C.P.R. have been completed; grading has been done on a considerable portion of this location, and some track has been laid. (Jan., pg. 17.)

Arnprior and Pontiac Ry.—Application will be made to the Dominion Parliament for an act incorporating a company with this title to construct a line of railway from the Pontiac Pacific Junction Ry., between Quyon and Campbell's Bay, Que., southerly across the Ottawa River to Fitzroy Harbor, Ont., thence westerly via Arnprior to, or near, High Falls, on the Kingston and Pembroke Ry., also from Fitzroy Harbor easterly to Britannia, on the C.P.R., and to South March, on the G.T.R., with power to construct a bridge over the Ottawa River at Chats Falls; to operate steam and other vessels, wharves, elevators, telegraph and telephone lines, etc. Perkins, Fraser and Gibson, Ottawa, are solicitors for applicants.

The Atlantic, Quebec and Western Ry. is proceeding with the construction of the line from Port Daniel to Gaspe, Que., 82 miles. During 1908 it completed tracklaying on five miles of line between Port Daniel and Anse à la Barbe, and two miles between Grand Pabos and Anse aux Canards. The steel superstructures on nine bridges between Port Daniel and Pabos are in course of erection, and the tracklaying is being proceeded with on the remaining 14 miles between these two points. The New Canadian Co. (Ltd.), New Carlisle, Que., has the contract, and W. L. Bravue is the Chief Engineer in charge of construction.

Bruce Mines and Algoma Ry.—Application will be made next session of the Ontario Legislature, for an act extending the time for the construction of the lines authorized for five years from April 1, 1909, and to declare the act incorporating the company, 62 Vic., cap. 93, as amended by 5 Edward VII, chap. 91, to be in force notwithstanding any neglect or default in complying with the provisions of the amending act.

Burrard, Westminster Boundary Ry. and Navigation Co.—Application will be made to the Dominion Parliament for an act extending the time within which the company may commence and complete the railway authorized by its act of incorporation, chap. 68 of the Statutes of 1907; to authorize it to enter into any agreement with the Vancouver, Westminster and Yukon Ry. Co.; and to construct a branch line from the authorized main line easterly and northerly through Yale, Lillooet and Cariboo districts to the most convenient point where a junction can be made with the branch of the Vancouver, Westminster and Yukon Ry., which is projected to run from the main line of that railway easterly to Edmonton.

Cabano Ry.—Application is being made to the Dominion Parliament for an act incorporating a company with this title, with power to construct, equip, and operate a railway from Long Lake, Temiscouata Co., Que., on the National Transcontinental Ry., thence easterly through Temiscouata county, following the valley of the Cabano River to Cabano, on Lake Temiscouata, the railway to be declared a work for the general advantage of Canada. A. Fraser, Cabano, Que., is solicitor for applicants.

Canada and Gulf Terminal Ry.—See Matane and Gaspe Ry.

Central Ontario Ry.—During the past year eight miles of track have been laid upon the extension of the line northerly to Whitney, Ont., the mileage laid being from Maynooth to Lake St. Peter. The extension from Lake St. Peter to Whitney, a distance of about 20 miles, is under construction, and work will be proceeded with during the coming season.

Cobalt Range Ry.—The Dominion Parliament will be asked for an act extending the time fixed for the commencement and completion of the lines authorized by the company's act of incorporation; giving permission for the extension of its authorized line northerly from Ville Marie, Que., to or near Opasitica Lake and thence northerly to a junction with the National Transcontinental Ry.; and power to construct a line from Haileybury, Ont., to or near Elk Lake, via the townships of Bucke, Firstbrook, Barr or Hudson, Lundy, Auld, Cane or Henwood, Barber, Tudhope or Bryce and James, all in the Nipissing district, and thence to or near Gowganda Lake via the township of Smyth, and unsurveyed portions of the Nipissing district. MacCraken, Henderson, McDougal and Greene, Ottawa, are solicitors for the company.

Collingwood Southern Ry.—Application will be made to the Dominion Parliament for an act extending the time within which the company may construct the lines authorized by sec. 8, chap. 77 of the Statutes of 1907. (Oct., 1908, pg. 711.)

Eastern British Columbia Ry.—During 1908, tracklaying was commenced and completed on this line from McGillvray station on the C.P.R., Crow's Nest branch, southerly along Michel Creek to Corbin Mines, 14 miles. (Oct., 1908, pg. 711.)

Farmers Ry.—The Saskatchewan Legislature will be asked this session to pass an act incorporating a company with this title to construct a line or lines of railway from Regina North, on the west side of Last Mountain Lake to or near Humboldt, and thence to Melfort; from Melfort northerly along the Carrot River to the eastern side of the province; from near the Carrot River west to Prince Albert; from near Humboldt to Saskatoon, and from Saskatoon northwesterly to the west side of the province; from or near the south end of Last Mountain Lake to Moose Jaw and from Moose Jaw south to the International boundary, and to extend the line from Regina southeasterly to the International boundary. Authority will also be asked to purchase and operate a system of steamboats and ferries in connection with the railways, and for other powers. D. W. Hines, Nokomis, Sask., is solicitor for the applicants.

Flathead River to Kootenay Pass.—The British Columbia Legislature will be asked to pass an act incorporating a company with power to construct a railway from the International boundary in East Kootenay, near the intersection of the boundary and the Flathead River, to a point near the boundary between British Columbia and Alberta, where it is intersected by the North Kootenay Pass. It is also desired to have authority to construct branch lines; to acquire steam and other vessels; to construct wharves, docks, etc.; to operate telegraph and telephone lines, and all the other powers usually conferred upon railway companies. Wilson, Senkler and Bloomfield, Vancouver, B.C., are solicitors for the applicants.

Graham Island.—Application will be made to the British Columbia Legislature for an act incorporating a company with power to construct a railway from near Masset, on the north coast of Graham Island, one of the Queen Charlotte Islands, lying east of the Masset Inlet, southerly to near Skidegate, on the same island; thence northerly and westerly by the southwest shore of Masset Inlet to or near Naden Harbor, thence westerly to the west coast of Graham Island, with power to construct branch lines from any point on the line, not exceeding in any one case 50 miles. The company also asks power to construct or acquire docks, wharves, etc.; to operate steam and other vessels; to construct telegraph and telephone lines, and other necessary and incidental powers. Wilson, Senkler and Bloomfield, Vancouver, B.C., are solicitors for the applicants. (See also Queen Charlotte Islands Ry., June, 1907, pg. 409.)

Grand Lake and Bell River Ry.—Application is being made to the Quebec Legislature for an act to incorporate a company with this title to construct and operate a line of railway from a point on the National Transcontental Ry. near Bell River, to Twenty-one Mile Bay, an arm of Grand Lake, or to Rabbit Lake on the Ottawa River, including a branch line not more than 12 miles in length. Power will also be asked to operate steam and other vessels, docks, wharves, etc., in all places on the railway or connected with it, and to erect and operate telegraph and telephone lines, acquire and transmit power, and operate boarding houses, etc. C. B. Devlin, Hull, Que., is solicitor for the company.

Halifax to Guysboro.—The property of the Alfred Dickie Lumber Co., of Nova Scotia, has been sold to a British syndicate, the purchase price being $1,567,500. The property transferred includes 405,000 acres of land, and it is stated that according to the contract of sale the purchasers are to construct a railway connecting Halifax, Country Harbour,

Guysboro, and other points in the Musquodoboit Valley, and possibly to the Straits of Canso, connecting up all the various properties. The construction of such a line has been under consideration for years under various titles, and while many surveys have been completed, and plans filed by the several companies, no construction has been done. The Nova Scotia Government finally took the matter in hand and after going over all the old surveys, and making some new ones, took power in a general act to finance liberally any company undertaking the construction of a line in the district according to a specified general plan. The principal man in the syndicate is Sir Thos. Troubridge, a British engineer, who is one of the principal promoters of the All Red route via Black Sod Bay, Ireland. The terminal port of the steamship line in Canada was to be Halifax, all the year round. Whether the purchase of these properties has anything to do with the development of the project has not been disclosed. (Nov., 1908, pg. 711.)

International Ry. of New Brunswick.—Track was laid during 1908, on 27 miles of this line, from mileage 35 to 62. The line as projected is from Campbellton, N.B., on the Intercolonial Ry., to a point on the St. John River, between Grand Falls and Edmundston, N.B., a total distance of about 110 miles. A Dominion subsidy was granted last session for the construction from mileage 20 to the point above named, not exceeding 90 miles. Grading has been done on an additional 42 miles, work having been carried on from both ends. T. Malcolm, Campbellton, N.B., is the general contractor. (Nov., 1908, pg. 793.)

Joliette and Lake Manuan Colonization Ry.—Application will be made to the Dominion Parliament for an act to extend the time within which construction of the railway authorized by sec. 2, ch. 111, R.S.C. 1905, may be commenced and completed. Desaulniers and Vallée, Montreal, are solicitors for applicants.

Kapitchouan Ry.—Application is being made to the Dominion Parliament for an act to incorporate a company with this title, to construct a railway from the National Transcontinental Ry. near Lake Kapitchouan, Que., southeastwardly to Montreal, with branch lines of about 12 miles in length. Power to operate steam and other vessels, wharves, elevators, telegraph, and telephone lines will also be sought. G. Desaulniers is solicitor for applicants.

Kettle Valley Lines.—Application will be made to the Dominion Parliament by the K.R.V. Ry. Co., owning the lines operated under the title of the Kettle Valley Lines, for an act authorizing it to construct a railway from or near Penticton, on Okanagan Lake, to or near Nicola, B.C., on the Nicola, Kamloops and Similkameen Coal and Ry. Co.'s railway.

We have been informed that there has been paid to the Kettle River Valley Ry., the company operating the line during 1908, $97,000 on account of subsidy by the Dominion Government, towards the construction of 40 miles of line from Grand Forks towards Penticton, B.C. This extension was expected to be open for traffic by Jan. 31. The mileage of the lines owned by the company in Canada previously was 3.86 miles, this line connecting at the International boundary with a line to Republic, Wash.

Application will be made to the British Columbia Legislature for an act to incorporate the Kettle River Valley Ry., with power to construct a railway to be operated by steam, electricity or any other power, from, at or near Midway, thence to Penticton, a distance of about 120 miles; and commencing at or near Penticton, on Okanagan Lake, thence to or near Nicola, a distance of about 150 miles, with all the powers usually conferred upon railway companies.

The Kettle River Valley Ry. Co. is the title of a company chartered by an act of the Dominion Parliament to construct certain railways along the valley of the Kettle River, which company will make application to Dominion Parliament this session for power to construct the line above-mentioned. The lines of railway already constructed in Canada by the K.R.V.R. Co., and operated as the Kettle Valley Lines, were constructed under the act incorporating the Grand Forks and Kettle River Ry. Co., passed by the B.C. Legislature in 1900. (Jan., pg. 17.)

Matane and Gaspe Ry.—Application will be made to the Quebec Legislature for an act changing the name of the company to Canada and Gulf Terminal Ry. Co.; designating St. Flavie instead of St. Octave de Metis as a connecting point with the Intercolonial Ry.; designating the connecting points with the National Transcontinental Ry. in the counties of Temiscouata and Kamouraska; giving the right to continue its main line or branches to the head of the Matane River, and continuing towards the east to the head of the Ste. Ann and Magdalene Rivers, thence to Mount Louis village, Gaspe County, and on to Gaspe Basin, either by the river, or starting from the main line behind Tourelle, Christie and Duchesner tps. It is also desired to have power to change the place of the company's head office; and to increase its capital to $4,000,000 in $100 shares instead of $50 shares.

The line is under construction from St. Flavie to Matane, Que., 37 miles; the contractors being the H. J. Beemer Co., Windsor Hotel, Montreal, and 42 Broadway, New York. The company has also under survey routes for a line from Matane up the river to Mount Louis, about 138 miles; and for a line from Mount Louis to Gaspe Basin, about 78 miles. (Dec., 1908, pg. 865.)

Michigan Central Rd.—A Detroit, Mich., press report states that it has been decided to make some important alterations in the operation of this railway. This change will involve the electrification of all the terminals in Detroit, and of the main line as far west as Ypsilanti, Mich., 30 miles. Electric power, it is said, will be generated by water power on the Huron River at Chelsea, Mich.

We are advised that during 1908, the company laid 6.50 miles of track in the new yards being constructed at Windsor, Ont., in connection with the Detroit Tunnel works. In addition a number of industrial sidings or spurs were laid, but none of them are of any consequence.

Montreal-Longueuil Bridge.—In an article on bridges between Montreal and the south shore, the Montreal Witness says: "The Montreal and Longueuil bridge was the first to die. The other lived till last year, when the offices of the bridge company were closed and the Royal Albert project was once more interred." The article reviewed the work done in connection with the promotion of these bridge schemes since 1876, when the Royal Albert bridge was promoted by Hon. John Young, then chairman of the Montreal Harbor Commissioners. This bridge was to be a double-decked structure, and was to be carried from the foot of Delorimier Ave., across Ile Ronde to Longueuil. In 1892 the Montreal-Longueuil bridge scheme was projected, the proposal being to construct a bridge from the end of the guard pier across the channel to St. Helen's Island, and then on to Longueuil, and construction was actually decided upon in 1898. Various attempts were subsequently made to revive the project, but without success.

North Eastern Ry.—Application will be made to the Quebec Legislature for an act extending the time within which the company may construct the lines authorized. Desaulniers and Vallee, Montreal, are attorneys for the company. (Sept., 1908, pg. 617.)

North Lanark Ry.—A press report states that this railway will be completed to Darling, Ont., during the year. Jas. Bell, of Arnprior, Ont., is President of the company. (Feb., 1908, pg. 99.)

Prince Albert and Hudson Bay Ry.—Application will be made to the Dominion Parliament for an act to incorporate a company with this title, to construct and operate a railway from near Prince Albert, Sask., to the mouth of the Nelson River, or to York Factory on Hudson Bay, by way of a crossing of the Saskatchewan River, and thence northeasterly. Power will also be sought to construct or otherwise acquire and to operate steam and other vessels on all navigable waters touching on the proposed railway, to acquire and utilize steam and water power for the development of electricity for motive or other power, to erect and operate telegraph and telephone lines, to construct railway bridges, etc., and to enter into contracts with other railway companies. It is sought to have the foregoing works declared to be for the general advantage of Canada. F. W. Halliday, Prince Albert, Sask., is solicitor for applicants.

Prince Edward Island Ry.—Tenders are under consideration for the erection of a freight shed on the wharf at Charlottetown. (Jan., pg. 17.)

Quebec County Ry.—The Quebec Legislature will be asked for an act extending the time with which this projected railway may be constructed and for other amendments to the charter powers. R. Campbell, Quebec, is attorney for the company.

Quebec Eastern Ry.—We are advised that F. N. McCrea, of Sherbrooke, Que., who is interested in the Lotbiniere and Megantic Ry., is also interested in negotiations now in progress for the construction of a railway from Quebec to Sherbrooke, Que., in the territory covered by the charter granted to the Q.E. Ry. Co. C. B. Hibbard, formerly General Manager of the Quebec, Montreal and Southern Ry., has been appointed Second Vice-President of the Q.E.R. Co., which, however, is not yet in a shape to commence operations. The act of incorporation gives the company power to acquire the Lotbiniere and Megantic Ry., and to utilize it as part of the projected line. (Feb., 1908, pg. 99.)

Quebec, Montreal and Southern Ry.—The Board of Railway Commissioners has made an order giving this company, which is controlled by the Delaware and Hudson Co., two months in which to file plans for new stations at Sorel and Pierreville, Que., and for carrying out other improvements. During the year track was laid on the extension towards Levis, Que., for 48.50 miles, from Pierreville to St. Philomene. The route of the extension from St. Philomene to Levis, 48 miles, has been located. (Jan., pg. 17.)

The Quebec Oriental Ry. Co. is applying to the Dominion Parliament for an act amending former acts respecting the company, by extending the time within which construction of the authorized lines may be commenced and completed, and by authorizing it to construct and operate a railway from its authorized line near Rivière du Loup, Que., thence southeasterly through Temiscouata county to a junction with the National Transcontinental Ry. near the boundary between Temiscouata and Kamouraska counties, and to empower the company to buy from the Royal Trust Co., or the owners for the time being, the railway lines from Metapedia to Caplin, and from Caplin to Paspebiac, heretofore known as the Baie des Chaleurs section of the Atlantic and Lake Superior Ry.

Power is also being asked to provide that the head office may be either in Canada or England; and for authority to fix the number of directors, which shall not be less than three

nor more than seven; to change the date of the annual meeting to the last Wednesday in Oct. of each year, and to increase the bonding powers of the company to $45,000 a mile.

The Q.O.R. Co. was originally incorporated in 1903, by the Quebec Legislature. The act was amended in 1905, and the company was granted a Dominion charter in 1907. Power was granted to construct a railway from Rivière du Loup, Que., on the Intercolonial Ry., to a point on the same railway near Metapedia, passing through Temiscouata and Rimouski counties, the northern part of New Brunswick, Bonaventure county and along the Metapedia River to St. Laurent de Metapedia, and the time within which the construction of the line was to commence and be completed was extended to 1909 and 1912 respectively. Provision was also made, in the event of the company desiring to purchase the Baie des Chaleurs Ry., as to the conditions on which such transfer should be made.

Railway to Hudson Bay.—Reports received at Ottawa with respect to the progress of the survey for the projected railway to Hudson Bay, show that very rapid progress has been made. R. D. Fry, E. Morrier, and F. Peters, arrived in Gimli, Man., from Fort Churchill, Jan. 5. The first named was one of the engineers on the railway survey, and he states that the distance of about 1,100 miles was accomplished in 45 days by dog train. With the exception of the last few days, which were stormy, the weather was fine and agreeable. The members of the party left behind to complete the work of the survey were reported all well. (Jan., pg. 19.)

Royal Collieries Ltd.—Application will be made to the Alberta Legislature for an act authorizing the Royal Collieries Ltd. to construct a railway from the C.P.R. Crow's Nest branch, 2,123 ft. west of Lethbridge Junction, to the s.w. ¼ of sec. 32, tp. 9, range 21, west of the 4th p. m., and to acquire by purchase, lease or otherwise, the spur line now under construction between the same points, together with all powers incidental to the construction, operation and acquisition of the said line of railway as are necessary. J. B. Wilkie, Lethbridge, Alta., is Secretary of the company.

Saskatchewan Central Ry.—Application will be made to the Saskatchewan Legislature for an act extending the time within which the lines of railway authorized by the company's act of incorporation of 1906 may be constructed. Allan, Gordon and Bryant, Regina, Sask., are solicitors for the applicants.

Application will be made to the Saskatchewan Legislature for an act incorporating another company with this title for the purpose of constructing the following lines of railway: (1) From or near the authorized line of the Canadian Northern Ry., between Prince Albert and Battleford, northerly to Crooked Lake. (2) From the Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co.'s line between Findlater and Davidson, thence northerly and westerly to the provincial boundary. (3) From the Canadian Northern Ry. between Findlater and Davidson, westerly to the western boundary of the province south of the Saskatchewan River. (4) From or near Moose Jaw southerly or easterly to the International boundary. (5) From between ranges 1 and 12 west of the second meridian on or near the authorized line of the Canadian Northern Ry., southerly to the Souris coalfields and the International boundary. The company desires to have power to make agreements with other railway companies for amalgamation, or otherwise, with other necessary and usual powers, rights and privileges. Balfour, Martin and Casey, Regina, Sask., are solicitors for the applicants.

The above information is taken from the Saskatchewan Gazette, and the second notice would suggest that it is proposed to ask for the incorporation of a new company with the title of the Saskatchewan Central Ry. There is nothing to suggest that there is any connection between the owners of the charter granted in 1906 and the applicants for the additional one. In Manitoba, notice has been given of an application for the extension of time for the Midland Ry. of Manitoba, as well as for the incorporation of a new company with the same title, but there is a connection disclosed between the two; and some few years ago applications were made for legislation affecting the Central Ontario Ry. by two different sets of shareholders whose interests conflicted.

South East Kootenay Ry.—The British Columbia Legislature will be asked for an act extending the time for the construction of this projected railway. Barnard and Robertson, Victoria, B.C., are solicitors for the applicants.

Superior and Western Ontario Ry.—Application will be made to the Dominion Parliament for an act to incorporate a company under this name, with power to construct railways from the G.T.P.R., Lake Superior branch, about 154 miles northwest of Fort William, Ont., to the National Transcontinental Ry., north of Sturgeon Lake. Power will also be sought to operate steam and other vessels, wharves, elevators, telegraph and telephone lines, etc., and to have the work declared to be for the general advantage of Canada. McDougall and Honeywell are solicitors for applicants.

Sydney and Louisburg Ry.—Nine miles of track were laid during 1908 on this railway, which is owned and operated by the Dominion Coal Co., as follows: From Grand Lake Jct. to Colliery No. 12, 7 miles; from No. 14 Junction to Colliery No. 14, 2 miles.

The branch line from Grand Lake to Waterford, N.S., and the grading about collieries 10 and 12, have been completed. The contract was carried out by the Lindsay Construction Co. (Mar., 1908, pg. 185.)

Temiskaming and Northern Ontario Ry.—The buildings erected recently at North Bay, Ont., consist of a frame car repairers' shelter, 20 by 40 ft.; and a shed, 30 by 60 ft., of timber frame with corrugated iron sheeting, for iron pipe and castings.

During 1908, tracklaying was completed upon this line as follows: Wateybeag River to Cochrane, Ont., 44 miles; Englehart to Charlton, 8 miles; Cobalt to Kerr Lake, 4 miles; and from milepost 110 to Moore's Cove, on Lake Temiskaming, 2 miles. The engineers have located a line from Charlton to Elk Lake, 20 miles; and a project is under consideration to construct a line from Elk Lake to Gowganda, 38 miles.

A second survey for the proposed extension of the line from Charlton to Elk City has been made, and the Chairman of the Commission recently stated that he expected the report of the engineers would be ready by Feb. 1. Before the line was extended to Elk City, however, he said the Commissioners wished to know whether the traffic would meet the charges against the investment of about $600,000, which it is estimated the extension would cost. If the report was favorable a contract could be closed at once, a good deal of the rock cutting done this winter, and the extension probably completed by the end of the summer. The Commissioners had an exploration party in the field making a survey of the country between Elk City and Gowganda. With regard to the main line between Cobalt and Haileybury, the Chairman at the same time said the Commissioners had been extending the sidings at these points as part of the plan for a second track. The completion of this work would enable the operation of a special hourly service, for which they were looking for a suitable motor car. Several cars had been considered, and it was hoped that a suitable one would be found during the year.

In connection with the project for the extension of the line from Charlton to Elk Lake, 18 miles, it is stated that the principal object of the third survey was to ascertain whether an easier gradient could be obtained. As to the extension from Elk Lake to Gowganda, the principal difficulty in the way of construction is the large amount of rock work which will be required to be done. There will only be one large bridge on the extension, viz., that over the Montreal River at Elk Lake. (Jan., pg. 19.)

The Thessalon and Northern Ry. Co., which was incorporated by the Ontario Legislature in 1907, is applying to the Dominion Parliament for an act declaring the railway which it is authorized to construct, to be a work for the general advantage of Canada, and authorizing it to enter into an agreement with the C.P.R., the G.T.R., or the C.N.R.

Vancouver to Howe Sound, etc.—Application will be made to the British Columbia Legislature for an act incorporating a company with power to construct a railway, to be operated by steam, electricity or any other motive power, commencing at or near Vancouver, thence northerly, following the valley of the Seymour Creek to the watershed north of Loch Lomond, and thence via the valley of the Indian River to the north arm of Burrard Inlet, with power to extend northerly to and through the Pemberton Meadows, and to construct a branch line via Ferry Creek Valley to Howe Sound, and any other short branches that may be needed to mines in the vicinity of the main line and branches. It is also proposed to ask for all other powers which are usually granted to railways. F. C. Wade, Vancouver, B.C., is solicitor for the applicants. (See Howe Sound, Pemberton and Northern Ry., Nov., 1908, pg. 793.)

Vancouver, Westminster and Yukon Ry.—Application will be made to the Dominion Parliament for an act extending the time within which the following projected lines may be constructed: (1) From the main line between Anderson and Green Lakes, running along or near Lillooet Lake, Lillooet River, and Harrison Lake, then southeasterly to the International boundary near Huntington, B.C.; (2) From the main line between Lillooet and Quesnel easterly through Quesnel Lake basin, to Tete Jaune Cache. (3) From the main line between the Cottonwood and Willow Rivers, southeasterly to Barkerville, B.C. (4) From the main line on Willow River, easterly to the Fraser River, along the Fraser River to Tete Jaune Cache, thence through the Yellow Head Pass, and thence by the most convenient route to Edmonton, Alta. It is also desired to have power to enter into agreements with the Burrard, Westminster Boundary Ry. and Navigation Co. (Sept., 1908, pg. 621.)

Winnipeg City Power Plant.—The line of railway along the right-of-way of the power plant has been completed from Lac du Bonnet to Point du Bois, Man., 24 miles.

Yellow Head Pass Coal and Ry. Co.—Application will be made to the Dominion Parliament for an act incorporating a company with this title to acquire and hold timber, mining and other lands in Canada, and to develop the same by the construction of railways, etc. Power is particularly to be asked to construct a railway from the G.T. Pacific Ry. main line west of the crossing of the Pembina River, in Alberta, southwesterly to the Embarras River, thence southerly to the headquarters of the Little Pembina River, a distance not exceeding 100 miles; and a line commencing on the G.T. Pacific Ry., along

the Embarras River southwesterly towards the McLeod River, a distance of 25 miles. J. A. Ritchie, Ottawa, is solicitor for the applicants.

The coal mining properties owned by this company are located around the headwaters of the MacLeod, Pembina and the Embarras Rivers, 30 miles from the Saskatchewan River and about 130 miles from Edmonton, Alta. They will also be about 30 miles from the G.T. Pacific Ry., and the railway located from the mines will connect with that line at Big Eddy. The engineer of the syndicate, —. Landstreet, is reported to have said, recently, that it was hoped to have the line completed by July next, when operations will be started on the development of the coal properties. The gradient of the projected line will be ¼ %.

Protection for Railway Employes.

The Board of Railway Commissioners passed the following order 5888, Dec. 16: In the matter of the Memorial of the Trainmen's Association of Canada, for the adoption of certain regulations by the Board, having in view the protection of employes of railway companies subject to the Board's jurisdiction. Upon the report of the operating officials of the Board, and upon hearing the representatives of the railway companies and of the employes; and in pursuance of the powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf, it is ordered that:

1. No freight train, except work or construction trains of 15 cars or less, now in service, shall be made up or allowed to proceed upon its journey unless at least three-quarters of the cars composing such train have air brakes in good working order.

2. The number of cars that may be drawn in freight trains shall be left entirely to the judgment of the operating officials of such railway companies; in all cases, however, in which it may be found necessary to double-head, the leading engine shall control the train.

3. Every road locomotive engine shall be equipped with a step or steps and handholds on both sides of and at or near the rear ends of tenders; foot-rests shall be provided on the pilots of every such engine, sufficiently wide for a man to stand on; every switching or yard engine shall be equipped with footboards and headlights on the front and rear ends of the engine and tender, such footboards to be not less than 10 ins. wide; the back of such footboards shall be protected by a board not less than 4 ins. high, and if cut in the centre, the inner ends shall be protected in like manner; and footboards and headlights shall be placed on the rear end of the tender of every road locomotive engine used for switching services, except in cases of emergency; in no case, however, shall any engine be continuously used for switching purposes for more than 24 hours without such equipment.

4. The number that shall comprise the switching engine crews shall be left entirely to the judgment of the operating officials; on main lines light engines shall not be run a distance greater than 25 miles in any one direction without a conductor, in addition to the engineer and the fireman; and on branch lines, the operating officials shall determine the necessity of requiring conductors on light engines.

5. Every locomotive engineer of such companies must have at least one year's continuous experience as a fireman, pass a satisfactory examination in regard to the proper care of locomotive engines, the handling of air brakes, and train rules and regulations; be at least 21 years of age, and undergo an eye and ear test by a competent examiner before being eligible for appointment as such engineer. Except in cases of emergency, every conductor of such companies must have at least one year's experience as brakeman or conductor and be at least 21 years of age before being eligible for appointment as such.

6. The telegraph operators of such companies required to handle train orders shall be at least 18 years of age, able to write a legible hand, to send and receive messages at the rate of not less than 20 words a minute, and be thoroughly familiar with and required to pass an examination upon train rules before a competent examiner.

7. Every employe of such railway companies engaged in operating trains shall, before undertaking such duties, be required to undergo a color test by a competent examiner.

8. All railway companies shall strictly conform to the rules and regulations from time to time approved by the Master Car Builders' Association, governing the loading of lumber, logs, and stone on open cars, and the loading and carrying of structural material, plates, rails, and girders. No material of any kind shall be carried upon the roofs of cars.

9. All open drains crossing tracks in the yards of such companies shall be covered for 5 ft. on each side of the rails, except in times of flood, when temporary open drains may be provided; semaphore and signal wires, when they cross under tracks, shall be carried in pipes or boxes; new buildings and semaphores and poles erected shall be placed not less than 6 ft. from the rail of the main track; water stand supply pipe shall be fastened parallel with the main line, and enginemen shall be required to see that this is done after using such pipes.

10. Every person or company offending against any of the foregoing provisions shall forfeit and pay $50 for every such offence.

Great Northern Railway Lines in Canada.

In a recent interview J. J. Hill stated that it was the determination of his company to push railway construction in Western Canada generally, and in Manitoba particularly. It is said that as soon as spring opens work will be begun on some additional lines under the Midland Ry. of Manitoba's charter. This work, a Winnipeg despatch says, will probably be on a line from Emerson to Winnipeg, and upon the laying out of terminals and a station in Winnipeg. The company purchased land in Winnipeg for terminals, and for an entrance into the city, nearly three years ago, but beyond some clearing nothing was done. The company's operations in Manitoba are being carried on under the charters of the Midland Ry. Co. of Manitoba, and the Brandon, Saskatchewan and Hudson Bay Ry., and probably under some other charters not yet identified.

Midland Ry. Co. of Manitoba.—Application will be made next session of the Manitoba Legislature for an act incorporating a company with this title, with authority to acquire and operate the existing constructed lines of the Midland Ry. of Manitoba, viz.: the line from Gretna, at the International boundary, to Portage la Prairie, and from Morden to the southern boundary of the province; and to construct the following additional lines: From or near Winnipeg, westerly to Brandon; thence westerly to near Elkhorn, and thence westerly to the western boundary of the province; a line from near Morden, running northwesterly to near Rathwell, thence northwesterly to the first mentioned line. It is also desired to obtain authority to construct and operate telegraph and telephone lines in connection therewith, and all other powers necessary or incidental thereto. Fisher, Wilson, Battram and Hamilton, Winnipeg, are solicitors for the applicants.

Notice is also given for the Midland Ry. Co. of Manitoba, by the same firm of solicitors of intention to apply to the Legislature for an Act empowering the company in connection with its authorized line of railway between Winnipeg and the International boundary, to construct and operate a branch line from some point on the east side of the Red River, in tp. 1, range 2, or 3, to the International boundary, on the west side of the river in range 2 e. It is also desired to have power to sell its existing lines, viz., from Gretna to Portage la Prairie, and from Morden to the International boundary, to another company.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—During 1908, the company completed tracklaying on the section of the line from the International boundary to Olivers, B.C., 11.33 miles (of this distance 0.86 mile was laid in 1907); and from Olivers to Brownsville, B.C., 9.72 miles (of which 5.22 miles was laid in 1907). On this portion of the line grading is in progress between Keremeos and Princeton, 40.3 miles. Tracklaying was expected to be well in hand between Keremeos and Princeton, Jan. 31. Beyond Princeton surveys only are being made, but south of New Westminster, and in the vicinity of Vancouver, construction is going on, in connection with the lines amalgamated with the V.V. and E. Ry. and N. Co., and formerly known as the Vancouver, Westminster and Yukon Ry., and the Victoria Terminal Ry. and Ferry Co. The work there has been the completion of tracklaying on the line from Cloverdale to Sumas, of 29.28 miles, of which 1.38 miles were laid in 1907.

Vancouver press reports state that the G.N.R. proposes to expend $3,000,000 during the current year on terminals in that city. This report arises out of the recent purchase by G.N.R. and Northern Pacific Ry. interests of False Creek waterfront property valued at about $350,000. The property involved in the purchase comprises all the waterfront on the north side of the upper basin of False Creek lying between Heatley Ave. on the east and Boundary Ave. on the west. L. C. Gilman, of Seattle, Wash., attorney for the G.N.R., who made the purchases, is quoted as saying: "In making these purchases the company had in view not only its own requirements in Vancouver, but also those of the Northern Pacific Ry., which has the intention of entering the city, and doing business directly here. What we expect to do now is to go to the Northern Pacific people and endeavor to join with them in some plan for the location of joint facilities for terminal purposes at some convenient spot on the shores of False Creek." (Jan., pg. 35.)

Jeffery Hennigar, C.P.R. Freight Office, Fort William, Ont., in renewing his subscription to The Railway and Marine World, says: "Your paper certainly covers the railway field in a manner which no other even approaches."

The Grand Trunk Development Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $500,000, to purchase or otherwise acquire lands, etc., from the B.C. or any other Government; to erect and operate manufacturing concerns, to develop such properties, to carry on the general business of importer and exporter, to construct and operate railways or tramways, logging railways, telegraph and telephone lines, barges, boats, docks, wharves, etc., and for other purposes.

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

Over a million and a half bolts in service on over 100 railroads throughout the United States

Manufactured and Sold in Canada by

CANADA FOUNDRY COMPANY, Limited
TORONTO, ONT.

AGENTS FOR THE

Flannery Bolt Company, = Pittsburgh, Penn., U.S.A.

We Carry the Largest and Most Extensive Assortment of Supplies of all Kinds Handled by any House in Canada

Babbit Metal, Valves, Steam-cocks, Gauges, Washers, Waste, Packing of all kinds, Car Bits, Braces, Angle Braces, Augers. All kinds of Carpenters' Tools, Machinists' Tools, Lathe Tools, Drills, Wrenches, etc.

LET US HAVE YOUR ENQUIRIES, OUR PRICES WILL CONVINCE YOU

RICE LEWIS & SON, LTD., TORONTO

C. P. R. Betterments, Construction, Etc.

Woodstock Branch.—During 1908 the company completed the following changes of line on the Woodstock branch in New Brunswick: Between mileage 55.3 and 59.8, a distance of 4.5 miles, not yet opened for traffic; between mileage 62.5 and mileage 64.0, a distance of 1.5 miles, which has been opened for traffic.

Northern Colonization Ry.—Track was laid on the extension from Nomining, Que., towards Rapide de L'Orignal, during 1908, from two miles north of Nomining to mileage 30.74, a distance of 28.74 miles. The total distance from Nomining to Rapide de L'Orignal is 34.6 miles. The contractors were the Toronto Construction Co. The extension has not yet been opened for traffic.

Place Viger Hotel and Terminals.—The proposal to enlarge and rearrange the hotel and terminals at Place Viger, Montreal, is reported to be taking definite shape, and it is said that a recent visit of D. McNicoll, Vice-President, to New York, was for the purpose of inspecting hotels and terminals there, before finally adopting plans for the work.

Montreal-Toronto Second Track.—During 1908 there was completed 10 miles of second track work upon the contract between Vaudreuil and Dalhousie Mills, a distance of 22.5 miles. J. P. Mullarkey, Montreal, is the contractor.

The second track construction between Finch and Smith's Falls, Ont., 50 miles, has been completed, track having been laid during 1908 upon the last 23.5 miles of the distance. The Toronto Construction Co. had the contract.

Georgian Bay and Seaboard Ry.—There was completed, during 1908, a line from Coldwater Junction, on the Toronto-Sudbury line, to the west side of Victoria Harbor, on Georgian Bay, 11.5 miles. The contractors were the Toronto Construction Co. The line has not yet been opened for traffic.

Walkerton and Lucknow Ry.—During 1908, tracklaying was completed on this line from mileage 26.2 to Walkerton, Ont., 11.5 miles, enabling the whole line from Saugeen, on the company's Owen Sound line, to Walkerton, 37.7 miles, to be opened for traffic. The contractor was Randolph MacDonald Co., Ltd., Toronto.

St. Mary's and Western Ontario Ry.—This line, completed during 1908, extends from St. Mary's to Embro, Ont., 15.9 miles. It effects a junction at Embro village with the extension of the T.L.E. and P. Ry. from Code Junction, and trains are being operated over these two lines, a total distance of 21.68 miles.

An application will be made to the Dominion Parliament for an act to amend the act of incorporation by giving the company power to construct the following lines: From Woodstock to Brantford; from near St. Mary's to near Stratford; from the company's main line between St. Mary's and Exeter in northerly and westerly direction through Perth and Huron counties to the Guelph and Goderich Ry. between Milverton and Goderich; and from the company's main line near Exeter to Grand Bend harbor, Lake Huron; and for further and other powers.

A freight shed is being erected at St. Mary's, Ont. A supplemental agreement under the act granting subsidies to certain railways was entered into Dec. 10, 1908, with the Dominion Government, with respect to the construction of a railway from Woodstock to Exeter, Ont., 45 miles.

Tillsonburg, Lake Erie and Pacific Ry.—The extension of this line, which was completed during 1908, leaves the main line, London section, at Code Junction, and extends to Embro village, Ont., 5.69 miles, where a junction is effected with the St. Mary's and Western Ontario Ry.

Sudbury to Gowganda.—It was stated in Montreal recently that while no actual decision on the matter had been reached, the C.P.R. was prepared to construct a branch line, without a subsidy, from Sudbury, northeasterly into the heart of the Gowganda district.

North Bay to Fort William.—A Montreal dispatch stated recently that the company "will have to build a line around Lake Superior, say from North Bay to Fort William, so as to be able to compete in hauling capacity with the G.T. Pacific Ry. . . . The proposed improvement will be undertaken and completed almost as soon as the G.T. Pacific will be finished from Ottawa to Lake Superior." It is stated "that it would be impossible for the C.P.R. either to double-track their present line around Lake Superior or to improve the grades and curves without entailing tremendous cost, and that the cheaper way would be to build a new line beyond the height of land." There are two mis-statements of fact in the item quoted which stamp the whole of it as the invention of an uninformed newsmonger making copy. The G.T. Pacific Ry. is not under construction from Ottawa to Lake Superior, its nearest point to Ottawa being 200 miles to the north; and if the C.P.R. were to decide to construct a line from Fort William easterly beyond the height of land, it would pass a considerable distance north of North Bay.

Fort William Terminals.—Application will be made next session of the Dominion Parliament for an act ratifying an agreement made Dec. 1, 1908, between the C.P.R. and the G.T. Pacific Ry. providing for joint terminal facilities at Fort William, Ont.

The agreement between the C.P.R. and the Fort William city council with respect to the extension of terminal facilities at that place, fixing a basis of taxation and other matters, has been signed. The terms of the agreement have not been made public.

Manitoba and Northwestern Ry.—Application is being made to the Dominion Parliament for an extension of time within which the company may construct the lines authorized by sec. 9, ch. 52, R.S.C. 1893, and sec. 2, ch. 104, R.S.C. 1907, and for other purposes.

Wilkie, Sask.—At this point, the present end of steel on the line westerly from Saskatoon, which is to be connected up with the branch from Wetaskiwin, Alta., now terminating at Hardisty, considerable activity prevails. A roundhouse, machine shop, station building, coal chutes and other necessary buildings are being put up. Construction on the line westerly is expected to be resumed as soon as spring opens up.

Weyburn, Milestone, etc.—Residents in Milestone and other points in southeastern Saskatchewan have sent petitions to C.P.R. officials asking that the line be extended from Weyburn westerly, so as to serve that territory. Farmers are said to be hauling wheat for distances up to 70 miles in order to reach a market.

Moose Jaw Northerly.—In connection with the construction of the line northerly from Moose Jaw, which has now reached Outlook, Sask., a roundhouse is being built, and other terminal facilities are being provided. A large staff of engineers is quartered in the town, in connection with the extension. The construction of a bridge across the river is necessary, and local reports state that work will be started this winter on the abutments.

Cardston to Great Falls, Mont.—In connection with the report mentioned on pg. 17 of our Jan. issue, we are advised that there is no foundation for the report that the C.P.R. was contemplating the construction of a line "from Cardston to Macleod, and the International boundary, and thence southerly almost in a straight line to Great Falls, Mont."

Western Lines Work for 1909.—W. Whyte, Second Vice-President, in the course of an interview at Montreal, Jan. 21, stated that the more important proposals regarding extensions and betterments of the western lines had been settled, but that several smaller extensions had not then been decided upon. One of the most important of the new lines will be through Southern Saskatchewan and Alberta, about midway between the main line and the International boundary. This line will start from Weyburn, southeast of Moose Jaw, and go across country to Lethbridge, about 400 miles. Construction will be started in the spring from Weyburn, and it is expected that from 20 to 25 miles will be completed this year.

The line from Saskatoon to Edmonton now has a gap in the centre of it of 130 miles. All the grading on this gap has been completed and rails are to be laid immediately, so that the whole of this line will be in operation in the spring, giving a new short line between Winnipeg and Edmonton.

There has been a great deal of new settlement in the fall wheat district of Alberta, particularly east of the line running up north from Macleod to Calgary. The company has decided to build another line up through this district, starting from Lethbridge, and joining the Macleod to Calgary line a little north of High River station. The total distance is about 80 miles, and 30 miles of this are to be built this season, taking the line up to the Little Bow River.

The bridge which the company is building at Lethbridge, over a mile long and 300 ft. high, will be completed early this year.

Another district in which there has been much new settlement is east of the line from Calgary. The company will therefore build a branch northwards from Cheadle—which is on the main line east of Calgary—and eventually connect it with the line east from Lacombe, at Alix. This line will be 100 miles long, and it is intended to carry it as far as the Ghost Pine Creek this year—a distance northward from Cheadle of from 35 to 40 miles. The Lacombe-Stettler line will also be extended easterly about 35 miles.

These are the most important extensions decided on, but there will be a lot of betterment work done this year throughout the west in replacing light rails with heavy ones and in building new stations. In the matter of improvements at any one place the plan for the development of the company's terminals at Fort William will take first place. The foundation of the extensions contemplated there are to be laid this year. Mr. Whyte did not think it advisable to state the total amount of money decided on for the western appropriations, but there was no objection to saying that it ran into millions.

Esquimalt and Nanaimo Ry.—The steel superstructure for the bridges across the Nanaimo and Chemainus Rivers have been delivered, and will be put up as early as possible. These bridges are to replace wooden trestles. The superstructure for the bridge over the Cowichan River was expected to be delivered by Jan. 31. The substructure for this latter bridge is completed. In respect of works of betterment to be undertaken during the coming year, it is expected that the appropriations will include amounts for the replacing of the wooden trestles between Victoria and Shawinigan Lake with steel span bridges. These and the other steel spans being erected on the line are light bridges which are being replaced on the C.P.R. transcontinental

MANAGER

line by larger and heavier bridges necessary to carry the increasing traffic.

Great progress is reported to have been made with the clearing of the company's lands in the vicinity of Ladysmith, and their preparation for sale to settlers in small lots.

British Columbia Southern Ry.—Application is being made to the Dominion Parliament for an act granting an extension of time within which the company may construct an extension of its railway to the 49th parallel and the Tobacco Plains, authorized by ch. 55, R.S.C. 1899; the western section of its railway and the branches to Nelson and Martin Creek, authorized by sec. 1, ch. 52, R.S.C. 1900; and authorizing the construction or acquirement of a branch line from near Michel northerly through Kananaskis Pass to a point of junction with the C.P.R. main line near Kananaskis, about 120 miles.

Kootenay and Arrowhead Ry.—Application will be made to the Dominion Parliament for an act extending the time within which the company may construct the lines authorized by sec. 7, ch. 70, R.S.C. 1901, and for other purposes.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—An announcement was made Jan. 10 by Vice-President and General Manager Pennington, that the company's extension into Duluth was expected to be completed and opened for traffic by July 1. (Jan., pg. 15.)

During 1908, the company laid track upon its extension to Superior and Duluth, Minn., upon 91 miles between Mississippi River and Moose Lake, Minn. The remaining mileage of the extension, which leaves the main line at Brooten, from Moose Lake to Superior-Duluth, a distance of 47 miles, is under construction. Foley Bros., Larsen & Co., St. Paul, Minn., are the contractors.

Duluth, South Shore and Atlantic Ry.—Exclusive of sidings and logging tracks for temporary purposes, the company, during 1908, laid the following lengths of permanent track: A branch from milepost 79, about 1.50 miles east of Humboldt, Mich., to the Boston-American Mine, 2 miles; and a branch from Ahmeek Mine track to Kearsarge Mine, no. 4 shaft, 1 mile. The company has no branches nor extensions now under construction.

Bridge Engineering—Roof Trusses.

This is the title of a work of 384 pages, by F. O. Dufour, C.E., which has been adopted as a text-book at the University of Chicago. It is a manual of practical instruction in the calculation and design of structural steel truss and girder bridges for railways and highways, and includes also chapters on the analysis and design of roof trusses and other details of mill building construction. The treatment of the complicated problems involved in the calculation and design of modern steel structures is exceedingly clear and concise and free from the abstruse mathematical calculations that usually overburden other works in this difficult field. Special stress is laid on the practical side of the subjects treated of as distinguished from a mere theoretical or academic discussion. The section on bridge engineering treats fully of analysis and design of all kinds and descriptions. Every detail is clearly explained by the aid of diagrams, while graphic methods are chiefly used in the computations. The same practical and concise treatment marks the section on roof trusses. Photographs of typical structures are given with full explanation of the methods followed in their design, and in some cases statements of cost. There are 340 illustrations. The volume is published by the American School of Correspondence, Chicago, and may be obtained through THE RAILWAY AND MARINE WORLD's book department, the price being $3.

President Hays on the G.T.P.R.

In a recent interview, C. M. Hays, President G.T. Pacific Ry., referring to his last inspection trip as far west as Prince Rupert, B.C., said, among other things:

"We are doing very well, indeed. The various contractors are in good spirits and well abreast of their dates. Indeed, the financial disaster in New York a year ago was for us a blessing in disguise. Large numbers of men have come north seeking work. Labor is abundant and is more productive, at lower wages. Already our trains are running regularly over the whole section 660 miles west of Winnipeg into Alberta. The newly arrived settlers have harvested a great wheat crop—great both in quantity and in quality, greater still for the price it is bringing. At our Pacific terminus, Prince Rupert, good progress is being made with the grading of the first 100 miles east, and I see no reason to doubt that by the autumn of 1911 our first train will break through to tide-water, passing from the Atlantic to the Pacific.

"We carry our road from Winnipeg over the Rockies to Prince Rupert with a maximum gradient of 26 ft. to the mile going west and 21 to the mile going east. The immense economy in hauling freights with gradients so remarkable, every railway man must recognize. We shall be able to put 2,000 tons of freight into Prince Rupert from Winnipeg behind a single engine. Of the seven great railroad systems which to-day cross the Rockies and reach the Pacific, the Union Pacific with grades of 116 ft. eastbound and 105 westbound, comes nearest to us. I will tabulate for you the grades of our six competitors and the dynamics of an engine on each.

Railroad.	Max. Grade.	Tractive Resistance in Pounds Per Ton.	Gross Capacity of Engine in Tons.
Grand Trunk Pacific	26	14	2,041
Great Northern	116	50	572
Northern Pacific	116	50	572
Union Pacific	116	50	572
Santa Fe	185	76	376
Canadian Pacific	237	96	298

"In other words, the same engine could haul up the maximum grade of the G.T. Pacific nearly four times more freight in a train than either the Great Northern, Northern Pacific, or Union Pacific, over five times more than on the Santa Fe, and about seven times more than on the C.P.R. These are very remarkable figures, I am aware, and I accept the responsibility for putting them on record. You can read in these figures the reason for our so-called 'generous expenditures.' The interest on the cost of such a line will be returned to us ten times over in the economy of our operations and in the increased safety of our passengers.

"We expect that our easy gradients, which are due not only or chiefly to our 'generous expenditures,' but to our possession of the Yellow Head Pass through the Rockies, will in a few years twist around a great portion of the wheat export trade of the Northwest, and with the opening of the Panama Canal in 1914, send wheat to Europe (let alone to Asia) by way of the Pacific. At present the wheat crop is either hurried to the ports on the great lakes, Duluth, Fort William, and Chicago, during the few weeks between threshing and the closing of lake navigation in November, or it is held up for six months in elevators at a considerable cost, or again, if it is carried through to the Eastern seaboard in winter, when the St. Lawrence route is closed by ice, the long haul through heavy snows makes the operation difficult, costly, and even disastrous both for the railway and to the farmer. Westbound from Saskatchewan and Alberta to Prince Rupert, the grades are easy; there is very little snow in winter, so that when the Panama Canal opens in six years I look to see Prince Rupert one of the very great grain ports of the world. I have more than once ventured the prediction that in my lifetime we shall haul to the Pacific as much grain as we shall haul to the Atlantic."

Mr. Hays declared that this diversion of traffic would not seriously diminish the earnings of the G.T.P.R. Eastern Division. "The volume of traffic," said he, "coming out of the new Northwest, if we may judge from the way settlers are already swarming in, will throw far more business upon our existing lines than they can possibly handle. The present cultivated area is but six million acres, a mere patch this on a farm of 300,000,000 acres. As yet we have but scratched the surface. We shall require very shortly to do what the C.P.R. is already doing in Manitoba, that is, double-track our road to enable us to handle the traffic. Thus the diversion of a large portion of the far western wheat trade will advantage every section of our road; it will even enable us to give settlers much lower rates, because we shall even up our loads, sending full cars both east and west, instead of only east. While we send cattle, grain, and minerals west to Prince Rupert, we shall haul back east the coal and the lumber which the settlers on that three hundred million-acre farm need.

"When Prince Rupert has been connected with Sydney across the Pacific by a good line of steamships—and that will come soon—the connection will have been completed of the two very finest harbors in the British Empire. Our route cuts off to the Far East—say Yokohama—1,500 miles from New York, compared with the San Francisco route, and 500 miles over the Vancouver route, and the saving of two or three days will often decide the choice. The climate of the place is neither hot in summer nor cold in winter; the mercury rarely, if ever, goes to zero."

[EDITOR'S NOTE—Mr. Hays' statement in regard to the maximum gradient on the C.P.R. is misleading, and we do not consider it fair to the latter line to publish his comparison without explanation. The gradient of 237 ft. to the mile which he mentions is the original gradient between Field and Hector, B.C., eastbound. In September, 1907, we published an article describing the work of grade revision which the company was then about to undertake there. This work will reduce the gradient to 116 ft. to the mile on tangents which, on account of compensation for curvature, will give an actual rise of about 103 ft. to the mile. This work is practically completed, and the new line will, it is expected, be opened for traffic early this summer, before the G.T.P.R. mountain section is completed. In making a comparison of the gradients on the two lines, the reduction on the C.P.R. should in all fairness be taken into account.]

Corrections for the Erring.

"Following the announcement in The Globe yesterday as to changes in the staff of the C.P.R. at West Toronto, the company has issued a circular giving a number of other changes which will take effect to-day. Mr. Allen Cameron, a former resident of this city, has been transferred from London, Eng., to New York, where he will be general traffic manager, while Mr. E. V. Skinner, of Montreal, will succeed him in London. Mr. G. McL. Brown, of Hamilton, will be general passenger agent for the C.P.R.'s Atlantic lines and will also be located in London."—Toronto Globe, Jan. 1.

Allan, not Allen, Cameron has been appointed General Traffic Agent, not General Traffic Manager, at New York. E. V. Skinner was not "of Montreal," never having lived there. He was Assistant Traffic Manager at New York. He has not been appointed to succeed Allan Cameron in London, the principal reason being that he died Nov. 7, 1908. Allan Cameron succeeds him in New York under a different title. G. McL. Brown has not been appointed General Passenger Agent for the C.P.R. Atlantic Lines with headquarters at London. He held that position in Montreal, but he has been transferred to London to succeed Allan Cameron as General Traffic Agent.

Canadian Northern Ry. Construction, Etc.

Canadian Northern Quebec Ry.—Application will be made to the Dominion Parliament for an act extending the time for the construction of the proposed line from Rawdon to Lake Archambault and for the line from Quebec to James Bay, with branches to Chicoutimi and Tadousac, Que.

Canadian Northern Ontario Ry.—The Dominion Parliament will be asked for an act to authorize the construction of the following lines of railway: (1) From or near Nipigon Bay northerly to a junction with the National Transcontinental Ry., with two branches to reach water connections at the northerly and southerly ends of Lake Nipigon. (2) From the authorized line between Montreal and French River, in or near Chisholm tp., northerly and westerly to the company's Hutton branch, in or near Capreol tp. (3) From the authorized line between Sudbury Jct. and Port Arthur, near the source of Vermillion River, northerly and easterly to a junction with the National Transcontinental Ry. near its crossing of the Abitibi River. (4) From the last mentioned line between its starting point and the great northern bend of the Montreal River, southerly and easterly to near the south end of Lake Temiskaming. It is also desired to obtain an extension of time within which the following lines may be constructed: (1) Washago to Kincardine; (2) Arnprior to Gananoque; (3) Pembroke to Port Hope or Cobourg; (4) Pickering tp. to Owen Sound; (5) from near Toronto to Windsor, with a branch from London to St. Thomas and Sarnia, and a branch or loop north of Toronto; (6) Niagara River to Goderich; (7) from between Dunnville and Port Dover to Owen Sound or Meaford; (8) Washago to Midland; (9) Hawkesbury to the Ottawa-Toronto line in Leeds or Lanark; (10) Parry Sound to North Bay; (11) the line authorized in 1902 from French River to Batchawana Bay; and (12) the line authorized in 1905 from Toronto to Ottawa.

The sleigh road which the company is constructing from Sellwood Jct., on its line near Sudbury, Ont., into the Gowganda country, is expected to be completed at an early date. It was reported, Jan. 11, that 12 miles of the road had been completed and that it was expected to complete 53 miles by Jan. 31. The work of making the sleigh road available for waggon traffic is expected to be completed by spring, and traffic will be carried on by means of waggons until the steel is laid for the railway. The railway line will follow the sleigh road as nearly as possible. It is stated that there have been some 3,000 claims staked out, and that there is a population of about 4,000 people in the district. These are at present being supplied largely from Sudbury, from which point the C.N.O.R. is operating by sleighs, a passenger, freight and express service.

In a recent interview, D. D. Mann, Vice-President C.N.R., stated that the next project which was absolutely essential to the carrying out of the company's programme was the construction of the line between Sudbury and Port Arthur, Ont. The company had to get assistance from the Government for this and he added: "We shall get after it as soon as Parliament meets." W. H. Moore, Secretary of the company, was in Ottawa recently, and it was said that his visit had to do with the obtaining of a subsidy for the construction of this line.

W. Mackenzie, President, in an interview at Montreal, Jan. 15, said the company was going to construct the line in the near future. The company's engineers had already permanently located a good portion of the route from Port Arthur eastward. A first-class route had been found, its location being between the C.P.R. and the National Transcontinental Ry. At some points the route would be nearer the N.T. Ry. than the C.P.R. We have reason to believe that about 37 miles of line will be built this year, from Sellwood Jct. 3 miles east of the present terminus at Sellwood westerly.

Canadian Northern Ry.—The Mayor of Port Arthur, Ont., was in Winnipeg, Jan. 1, in conference with W. Mackenzie, and other officers and officials of the C.N.R., discussing matters affecting the railway interests of the city. It was stated that as a result of the conference an agreement had been signed for the transfer of a piece of the city property to the company upon which is to be built an hotel at a cost of $250,000. It is said the erection of this hotel is to be started early in the season. The company is reported to have also agreed to make considerable extensions of its terminal tracks, and to do a good deal in the way of dredging in the harbor. To increase the freight storage capacity, a shed is being built over the steel dock. A new dock is to be built just south of the present one; the work is to be started as soon as possible, and it is expected to have it completed for the summer trade.

Negotiations are said to be in progress with the Dominion Government for the purchase of the mounted police barracks in Calgary, Alta., which it is proposed to use as a union station by the C.N.R. and the G.T. Pacific Ry.

The Edmonton Board of Trade is pressing the company to extend the Unionville branch to Athabasca Landing, Alta., and it is expected that work will be put in hand during the coming season. (Jan., pg. 27.)

Edmonton and Slave Lake Ry.—Application will be made to the Dominion Parliament for an Act extending the time within which the company may complete and put into operation the lines which it was authorized to construct by sec. 8, chap. 66, of the statutes of 1899. G. F. Macdonnell, Toronto, is solicitor for the applicants. (Sept., 1907, pg. 663.)

C.P.R. Industrial Department.

F. W. Peters, Assistant to the Second Vice-President, C.P.R., Winnipeg, has issued the following circular:

FORT GARRY STATION, WINNIPEG

Now being erected by the Canadian Northern Ry. for joint use of Canadian Northern Ry. and Grand Trunk Pacific Ry.

"This company, with a view to encouraging the development of the cities, towns and villages along its lines in the West, and supplying their needs, has established an Industrial Department. Enquiries are constantly coming in through the company's various departments from manufacturers, importers, wholesale merchants and individuals in Eastern Canada and elsewhere, as to the openings in the West for manufactories, wholesale and retail houses, etc. Many of the new, as well as the older established points along our main line and branches throughout the West, are desirous of securing industries which will supply their needs and assist in their growth and prosperity. Our desire is, therefore, to obtain from all stations along our Western lines full information as to their requirements and the attractions their particular localities present to settlement, as well as to manufactories, jobbing or any industry that will assist in the development of our great west and bring a profitable return for investment. Secretaries of boards of trade are invited to correspond freely with the undersigned and furnish all particulars possible as outlined above, and manufacturers or intending investors are also asked to communicate with me if they desire any information. Such enquiries will receive the most careful and prompt attention, and it will be my endeavor to give information that will be reliable."

The G.T. Pacific Ry., between Dec. 18 and Jan. 16, received 225 box cars, nos. 307925 to 308149.

The Temiskaming and Northern Ontario Ry. has ordered 4 first-class coaches to be rebuilt by the Preston Car and Coach Co., Preston, Ont.

The J. D. McArthur Co., contractors, Winnipeg, has ordered 50 flat cars, 30 tons capacity, from the Crossen Car. Mfg. Co., Cobourg, Ont.

The Canadian Northern Ry. has ordered 4 60-ft. combination baggage and mail cars, and 2 second-class cars from the Preston Car and Coach Co., Preston, Ont.

The Intercolonial Ry. has ordered 2 60-ft. baggage cars from the Preston Car and Coach Co., Preston, Ont., and 3 baggage cars from the Crossen Car Mfg. Co., Cobourg, Ont.

The Preston Car and Coach Co., Preston, Ont., is rebuilding one 70-ft. baggage, and one 70-ft. sleeping car for a theatrical touring company; has delivered one carload of platform sleighs to the Canadian Express Co., one station platform truck to the C.P.R., and is building 10 taximeter cabs for the Berna Commercial Motors and Taxicabs of Toronto.

The C.N.R., between Dec. 15, 1908, and Jan. 15, ordered the following rolling stock: 1,000 box cars (mentioned in our last issue), and 15 cabooses, from Rhodes, Curry and Co., Amherst, N.S.; 25 stock cars from the Crossen Car Mfg. Co., Cobourg, Ont.; 4 mail and express and 2 second-class coaches from the Preston Car and Coach Co., Preston, Ont.

The Dominion Bridge Co., Montreal, has ordered one 4-wheel locomotive from the Montreal Locomotive Works. Following are the chief dimensions:

Cylinders	13″ by 18″
Drivers, diar	36″
Boiler, type	straight top.
" pressure	160 lbs.
Firebox	40 3/16″ by 38⅜″
Wheels, drivers	69″ diar.
" trailers	44″ diar.
Boiler, type	Extended wagon top.
" pressure	200 lbs.
Firebox	94⅛″ by 69⅞″
Tubes, no. and diar	193–2¼″, 22–5″
" length	19′ 6″
Driving wheel base	13′ 0″
Engine wheel base	33′ 7″
Engine and tender	59′ 11¾″
Weight on drivers	135,000 lbs.
Total weight	214,200 lbs.
Tank capacity	5,000 imp. galls.
Superheater	Vaughan-Horsey.

Following are chief particulars of the 750 box cars which the Canada Car Co., Montreal, is building for the C.N.R.:

Length over end sills	36′ 9¾″
Width over side sills	9′ 0¾″
Height from top of sill to bottom of plate	7′ 10¾″
Length inside	35′ 10¾″
Width inside	8′ 6″
Height from top of floor to bottom of car line	8′ 0″
Outside of end sill to centre of bolster	5′ 0″
Centre to centre of cross ties	7′ 6″
Door opening	6′ 0″
Wheel base of truck	5′ 2″
Height from top of rail to centre of drawbar	2′ 10½″
Height from top of rail to top of brake mast	14′ 0″
Height from top of rail to top of running board	13′ 3″
Width over eaves	9′ 7⅜″
Body and truck bolsters	Simplex
Brake beams	Simplex

ONE OF THE STEAM LOCOMOTIVES USED IN THE ST. CLAIR TUNNEL PRIOR TO ITS ELECTRIFICATION

During Jan., the Montreal Locomotive Works shipped to St. Thomas, Ont., 3 locomotives for the Michigan Central Rd., and completed 10 locomotives for the Canadian Northern Ry.

The C.P.R., between Dec. 21 and Jan. 13, received the following additions to rolling stock: 109 box cars and 1 snowplow from its Angus, Montreal, shops, and 18 vans from its Farnham, Quebec, shops.

The G. T. Pacific Ry., in addition to the 25 eight-wheel locomotives ordered with the Montreal Locomotive Works, details of which are given, has ordered 25 mogul locomotives from the Canadian Locomotive Co., Kingston, Ont., a total of 50 locomotives for delivery this year.

The C.N.R., between Dec. 15 and Jan. 15, received the following additions to rolling stock: 11 consolidation locomotives, 7 of which were from the Canadian Locomotive Co., Kingston, Ont., and 2 snowplows from the Crossen Car Mfg. Co., Cobourg, Ont.

The C.P.R., between Dec. 21 and Jan. 13, placed orders for the following rolling stock: 70 box cars, 1 colonist car, 6 stock cars, 3 refrigerator freight cars, at its Angus, Montreal, shops; 3 vans at its Farnham, Que., shops, and 5 steel coal cars and 3 Hart-Otis ballast cars, with the Dominion Car and Foundry Co., Montreal.

Tubes, no. and diar	92–2″
" length	9′ 9″
Wheel base	6′ 3″
Weight	51,000 lbs.
Tank capacity	950 U.S. galls.

M. P. and J. T. Davis, railway contractors, Quebec, have ordered two 4-wheel locomotives from the Montreal Locomotive Works. Following are the chief particulars:

Cylinders	15″ by 24″
Drivers, diar	44″
Boiler, type	straight top.
" pressure	160 lbs.
Firebox	72″ by 33⅜″
Tubes, no. and diar	137–2″
" length	9′ 7″
Wheel base	7′ 0″
Weight	75,420 lbs.
Tank capacity	1,000 U.S. galls.

The G.T. Pacific Ry. has ordered 25 American type locomotives from the Montreal Locomotive Works. Following are the chief dimensions:

Cylinders	18″ by 24″
Drivers	69″ diar.
Boiler, type	Extended wagon top.
" pressure	200 lbs.
Firebox	95¾″ by 41⅞″
Tubes, no. and diar	210–2″
" length	11′ 2¾″
Driving wheel base	8′ 10″
Engine wheel base	23′ 8½″
Engine and tender	50′ 11¾″
Weight on drivers	74,770 lbs.
Total weight	120,700 lbs.
Tank capacity	7,000 U.S. galls.

The C.P.R. has ordered 30 Pacific type locomotives from the Montreal Locomotive Works. Following are the chief dimensions:

Cylinders	21″ by 28″
Side bearings	Susemihl, roller
Couplers	Latrobe steel
Air brakes	Westinghouse
Journal boxes	McCord

The locomotives, nos. 1301 to 1304, used by the G.T.R. for the operation of the trains through the Sarnia tunnel, which have now been retired in favor of electric traction, and one of which is illustrated on this page, are of the 10-wheel type, 22 x 26 in., with 50½ in. drivers. Their general dimensions are as follows:

WEIGHT.—On drivers—42,150 lbs., 40,050 lbs., 32,400 lbs., 29,400 lbs., 29,100 lbs., on each pair of drivers from front to rear; total weight of locomotive, loaded, 173,000 lbs.; the engine being weighed with three gauges of water. Weight of tender loaded, 62,500 lbs.; total weight of locomotive and tender, 235,600 lbs.

LENGTH.—Wheel base of locomotive, 18 ft. 5 in.; wheel base of tender, 16 ft. 3 in.; total wheel base of locomotive and tender, 48 ft. 2 in. Total length of locomotive, 42 ft. 7½ in.; length of tender 19 ft. 11½ in.; total length of engine and tender, 62 ft. 7 in. Height, 14 ft. 9 in.; width of locomotive over all, 10 ft. 4 in.

BOILER.—Outside diameter, 74 in.; working pressure, 165 lbs. to the square inch.

HEATING SURFACE. — Firebox, 180 sq. ft.; tubes, 1,905.5 sq. ft.; total, 2,085.5 sq. ft. Grate area, 37.3 sq. ft.

TENDER.—Capacity, 2,925 U.S. galls. of water.

The Minister of Railways stated, Jan. 5, that the reduction, on Jan 1, from 10 hours to eight hours, with a corresponding reduction of pay, in the Intercolonial Ry. shops, is merely temporary, and will probably not last more than a month or two.

H & E PATENT BALL-BEARING LIFTING JACKS

For Railway and Bridge Work, Contractors' and Builders' Use

Foot-Lift

For Convenience, Speed and General Efficiency these Jacks are Unequalled. Are fully guaranteed. Being made of the best grades of Malleable Iron and Steel are strong and durable. Working parts entirely protected insure long wearing qualities. Sizes from 8 to 50 tons now complete. Send for prices and discounts.

LOCOMOTIVE CYLINDER REPAIRED WITH THERMIT

WELDING

Locomotive Frames, Connecting Rods, Driving Wheel Spokes, and Mud Rings

By the THERMIT PROCESS, welds may be made to all kinds of steel sections without removing the broken part. Locomotive frames and mud rings may be welded without dismantling the engine. Stern-posts and rudder frames of steamships may be quickly repaired without removing them from the ship. Furthermore, all this may be accomplished in one or two days, depending on conditions.

Write for descriptive pamphlet No. 18-N and for "REACTIONS," the Thermit Quarterly.

MAINLY ABOUT PEOPLE.

J. W. Leonard, General Manager C.P.R. Eastern Lines, who has been ill, is recuperating at Preston Springs, Ont.

J. O'Connor, an old G.T.R. employe at Montreal and Brockville, Ont., died at the latter place Dec. 28, 1908, aged 65.

J. B. Jones, who was engaged on C.P.R. surveys in Manitoba in the company's early days, died in Winnipeg Dec. 25, 1908.

M. Donohue, an employe of the old Northern Ry. prior to its absorption by the G.T.R., died in Toronto recently, aged 80.

R. K. Sperling, of London, Eng., a director of the B.C. Electric Ry. Co., and a brother of R. H. Sperling, its General Manager, died recently.

Mrs. Wm. Mackenzie, wife of the President C.N.R., has been elected Vice-President of the St. Elizabeth Visiting Nurses' Association Toronto.

J. J. Hill, Chairman of the Board, Great Northern Ry., has contributed $1,000 towards the building fund of the Friends' College at Newmarket, Ont.

D. D. Mann, Vice-President Canadian Northern Ry., recently presented to each official of the company, a set of three volumes of Queen Victoria's Letters.

Miss Elizabeth Vickers, who died at Dublin, Ireland, recently, aged 89, was the only sister of the late J. J. Vickers, of Toronto, founder of Vickers' Express.

Geo. Jackson, who died in Toronto Jan. 6, aged 74, was father of H. A. Jackson, Assistant General Freight and Passenger Agent, Great Northern Ry., at Helena, Mont.

Robert Tinsley, who has been appointed Manager Pullman Car Works, Chicago, Ill., is a son of E. Tinsley, Superintendent Ontario Game and Fisheries Department.

Lord Strathcona has subscribed $5,000, and Lord Mount Stephen $2,500, to the Mansion House Fund, London, Eng., for the sufferers by the recent earthquake at Messina, Italy.

Winnipeg press reports mention Andrew Strang, a merchant of that city, as a likely appointee to the Board of Railway Commissioners to fill the vacancy caused by T. Greenway's death.

J. E. Quick, General Baggage Agent G.T.R., left Toronto, Jan. 20, for St. Augustine, Fla., to attend the meetings of the Association of General Baggage Agents of America, of which he is Secretary.

G. Johnson, C.E., a native of Belleville, Ont., who has for some years been engaged on railway construction work in China, has been appointed to take charge of a large irrigation project in Mexico.

A fire occurred at the residence of S. Higgins, General Manager New York, New Haven and Hartford Rd., New Haven, Conn., Jan. 13, in which his mother lost her life, and other members of the family were injured.

Judge Gunn, of Ottawa, has been appointed Chairman, and J. L. Whiting, K.C., and J. G. O'Donoghue, members of a board of conciliation to deal with a dispute between the Kingston and Pembroke Ry. and its telegraphers.

F. Nicholls, Vice-President Toronto Ry., and associated with other transportation interests, had a narrow escape from a serious accident in Toronto, Jan. 7, when his automobile was struck by a street car and badly damaged.

Dr. W. J. McGuigan, who died Dec. 25, 1908, at Vancouver, B.C., was from 1885 to the completion of the construction of the transcontinental line, C.P.R. Medical Superintendent on construction work within the province.

T. S. Acheson, General Grain Agent C.P.R., Central and Western Divisions, was, from 1895 to 1904, Agent; 1904 to 1905, Supervisor of Agencies; 1905 to Jan. 1, 1909, Travelling Freight Agent Central Division C.P.R., Winnipeg.

B. W. Folger, General Manager Niagara Navigation Co., Toronto, with Mrs. Folger and family, left Toronto Jan. 3, and sailed from New York for Europe. They will spend some time in Munich, Bavaria, probably returning in March.

Judson Harmon, who was receiver of the Pere Marquette Rd., as well as of the Cincinnati, Hamilton and Dayton Rd., when they were operated jointly, and who still retains the latter office, has been elected Governor of the State of Ohio.

D. Sutherland, General Agent C.P.R., Prince Rupert, B.C., was prior to entering C.P.R. service, General Freight Agent Reid Newfoundland Co., St. John's, Nfld., and until Jan. 1, was Travelling Freight Agent C.P.R., Vancouver, B.C.

J. H. Gordon, Travelling Freight Agent Eastern Manitoba, C.P.R., Winnipeg, has been in the company's service eight years, during which time he has been in the operating and traffic departments, and was, until Jan. 1, Soliciting Freight Agent at Winnipeg.

Imperial Service Medals have been awarded to the following Government railway employes for long and meritorious service: J. C. Clarke, section foreman; A. McCabe, engineman; J. G. McDonald, engineman, and E. Shaw, crossing watchman, all of the Intercolonial Ry.

Miss L. Begy, daughter of G. A. Begy, St. Catharines, Ont., who was connected with the construction of the Nicola, Kamloops and Similkameen Ry., and is interested in other railway projects in Canada, was married Jan. 11 to F. Ritchie, Brockville, Ont.

C. Graham Drinkwater, heretofore Manager railway and contractors' department, Canadian Fairbanks Co., Montreal, has been appointed Manager of the company's Montreal house, vice C. M. Rudel, resigned. Mr. Drinkwater is a son of the late C. Drinkwater, Secretary C.P.R.

F. A. Miller, claims clerk, G.T.R., Montreal, was presented, Jan. 15, by the clerical staff at the Montreal freight terminals, with a gold watch and chain, on his retirement under the provisions of the Pension Fund. He was in the G.T.R. employ for 36 years and will in future reside in England.

In a list of railway stockholders of the U.S., recently published in New York, Lord Strathcona appears as the holder of $4,000,000 of Northern Pacific and $2,880,000 of Great Northern stock, and his daughter, Hon. Mrs. Howard, as owner of $1,990,000 of Northern Pacific and $1,700,000 of Great Northern stock.

Additional subscriptions recently received for the Hammond Endowment Fund, inaugurated by H. C. Hammond, President Northern Navigation Co., for the Toronto Free Hospital for Consumptives, include: S. H. Blake, K.C., $300; D. D. Mann, $200; G. T. Blackstock, K.C., $100; Z. A. Lash, K.C., $100; Angus Sinclair, $50.

Mrs. J. L. Englehart, wife of the Chairman of the Temiskaming and Northern Ontario Ry. Commission, died at Toronto, Dec. 31, after a somewhat lengthy illness. The funeral, which took place at Petrolea, Ont., Jan. 4, was attended by F. Dane, one of the Commissioners; A. J. McGee, Secretary-Treasurer; J. H. Black, Superintendent, as representing the railway.

I. Randolph, Chicago, Ill., who was retained by the City of Toronto as an expert in the recent application to the Board of Railway Commissioners for an order to compel the railway companies to construct a viaduct across the city, has been appointed one of the six engineers who have been instructed to proceed to Panama to prepare a report on the progress of the canal project.

In our issue of October last, reference was made to the death at Red Deer, Alta., of Jos. Wallace, formerly General Agent G.T.R., Hamilton, Ont., from which position he retired in May, 1905. The item was based on information which we believed to be authentic, but we have since learned that it was incorrect, and we very much regret having published it. We were recently advised that Mr. Wallace was still living at Red Deer, and in good health.

W. H. Estano, who has been appointed acting Traffic Auditor, Intercolonial Ry., Moncton, N.B., was born at Halifax, N.S., Sept. 29, 1874; educated at Moncton, N.B., and entered the I.C.R. Traffic Auditor's office, Moncton, Oct., 1892, occupying various positions, these including those of clerk in charge of interline, passenger, parlor and sleeping cars; statistical and outstanding accounts, travelling auditor, etc. He was appointed chief clerk, Accounting Department, Mar. 1, 1907, which position he held until Jan. 1, 1909.

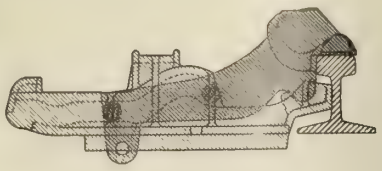
The Montreal Transportation Co.'s directors, at a meeting Jan. 7, passed the following resolution: "That the directors of this company wish to place on record the great loss they have sustained through the death of J. A. Cuttle, the Managing Director. He had been in the employ of the company for 34 years, and his ability, foresight, and single-minded devotion to the company, and its interests, have done much for its advancement, and his sudden death is not only a great loss to this company, but to the business interests of Montreal."

John Halstead, General Freight Agent C.P.R., Calgary, Alta., entered C.P.R. service Jan. 7, 1892, and was to Sept., 1901, in the Local and General Freight office, Toronto; Sept., 1901, to April, 1902, chief clerk General Freight office, Winnipeg, and during the latter portion of that time he was Travelling Freight Agent there; 1902 to 1906, chief clerk General Freight office, Vancouver, B.C., and during the latter part of 1906 was General Agent Freight and Passenger Department, Tacoma, Wash.; 1906 to Jan. 1, 1909, Assistant General Freight Agent, Calgary, Alta.

F. L. Hay, whose appointment as Superintendent Sleeping and Dining Cars and News Service, district 5, Pacific Division, C.P.R., at Vancouver, B.C., was announced in our Jan. issue, was born at Portland, Ore., Jan. 16, 1868, and entered the Pullman Co.'s service at Chicago in 1887, where he remained until July, 1895, since when he has been till July, 1908, in the Dining Car Dept., Pennsylvania Rd., Jersey City, for the last eight years as Assistant Superintendent of Dining Cars and Restaurants; July to Dec., 1908, acting Superintendent, Sleeping and Dining Cars and News Service, C.P.R., Vancouver, B.C.

G. H. Middleton, C.E., who died at Edinburgh, Scotland, Dec. 17, 1908, was engaged in 1871 in construction work on the St. Lawrence district of the Intercolonial Ry., and subsequently in C.P.R. construction north of Lake Superior. On the completion of this latter work he entered into partnership with the late Sir Robert G. Reid, in connection with the railways in Newfoundland. For several years he has been engaged in railway work in South Africa. He married a daughter of the late S. Hazlewood, some time District Engineer Intercolonial Ry., one son being on the C.P.R. engineering staff at Lethbridge, Alta.,

J. W. Donald, formerly District Passenger Agent, Chicago and Alton Rd., Detroit, Mich., whose death was mentioned in our last issue, was born at St. John, N.B., Dec. 22, 1857, entered railway service in 1877, and was to 1881 Travelling Passenger



Simplicity in a track device is a prime requirement. As parts are added troubles multiply. Two pieces are all that go to make up a complete Hayes Derail of the pipe-operated models. The guide box is readily made a fixed part of the track; the derail block moves back and forth with little effort and with the usual switch stroke. When on the rail it is firmly locked in position by the seats in the front end of the guide box.

The derail block clears its path of snow when moving in either direction. This feature makes the Hayes Derail preëminent for economy in winter.

We make prompt shipments from our works at Hamilton, Ontario.

Address: Hayes Track Appliance Co., Geneva, N.Y.

The "Railway Greyhound of Canada," the finest and fastest train in the Dominion, runs every day in the year between Montreal and Chicago.

The Lines of this Great System reach all the Principal Cities and Towns in Quebec and Ontario.

W. E. DAVIS, Passenger Traffic Manager, MONTREAL. G. T. BELL, General Passenger and Ticket Agent, MONTREAL, QUE.

Agent C.P.R., St. John, N.B., and at Bangor, Me., 1881 to 1887, Travelling Passenger Agent, Atcheson, Topeka and Santa Fe Rd., Boston, Mass.; 1887 to 1901, General Agent Passenger Department, Chicago and Alton Rd., Boston, Mass.; 1901 to 1904, District Passenger Agent, same road, Buffalo, N.Y.; 1904 to Nov. 20, 1908, District Passenger Agent, in charge of Michigan and Ontario territory, same road, Detroit, Mich.

G. D. Robinson, whose appointment as Assistant Export and Import Freight Agent C.P.R., Toronto, was announced in our last issue, was born at St. John, N.B., Dec. 7, 1877, and entered C.P.R. service Nov. 25, 1895, since when he has been, to Dec., 1901, in the General Freight Agent's office, St. John, N.B.,; Dec., 1901, to Aug., 1903, Travelling Freight Agent, covering territory east of St. John in New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland; Aug., 1903, to Aug., 1907, chief clerk, General Freight Agent's office, St. John, N.B.; Aug., 1907, to Jan. 1, 1909, chief clerk, General Foreign Freight Agent's office, Montreal.

J. K. Savage, whose appointment as Chief Train Dispatcher, District 3, Central Division C.P.R., Brandon, Man., was announced in our Jan. issue, was born at Forreston. Ill., Oct. 5, 1876. He entered the C.P.R. service Mar. 1, 1890, as station agent at South Stukely, Que., since when he has been successively to May 1, 1894, station agent and operator at various stations in Quebec Province; May 1, 1894, to May 24, 1897, train dispatcher, Farnham, Que.; Jan. to Sept., 1904, Night Chief Train Dispatcher, Toronto; Sept., 1904, to Sept., 1906, Inspector Train Dispatching Western Lines, Winnipeg; Sept., 1906, to Mar. 1, 1907, Chief Dispatcher, District 1, Central Division, Kenora, Ont.; Mar. 1, 1907, to Dec., 1908, Trainmaster District 3, Central Division, Brandon, Man.

H. C. Hammond, President Northern Navigation Co., who has been suffering from cancer of the throat since June last, died in Toronto Jan. 26. He was born at Grafton, Ont., Oct. 19, 1844; educated at Cobourg Grammar School and Upper Canada College, and began his business career in the Cobourg branch of the Bank of Montreal, passing to the Quebec Bank, and subsequently to the Bank of Hamilton. He entered into partnership with E. B. Osler in Toronto in 1872, and took a leading part in many important commercial and financial projects. In 1904 he was elected President Northern Navigation Co., at a time of exceptional difficulty in that company's career, and the strong position it now occupies is due in a great measure to the energy of the late President.

W. M. Ansley, whose appointment as Trainmaster, district 3, Central Division, C.P.R., Brandon, Man., was announced in our Jan. issue, was born June 15, 1873, at Flesherton, Ont. He entered railway service April 6, 1897, as wiper on the Canada Atlantic Ry., at Depot Harbor, and was subsequently transferred to the mechanical department until Dec., 1900, when he engaged with the Algoma Central and Hudson Bay Ry., Sault Ste. Marie, Ont., and later left railway service. He re-entered it in 1901, since when he has been: Aug. 4, 1901, to Mar. 17, 1903, brakeman, C.P.R., Kenora, Ont.; Mar. 17, 1903, to Aug. 19, 1907, conductor, same road; Aug. 19 to Nov. 3, 1907, Assistant Trainmaster, same road, Brandon, Man.; Nov. 3, 1907, to completion of construction, Trainmaster, Sheho extension, same road, Saskatoon, Sask.; from then to Oct. 1, 1908, Trainmaster, district 5, Central Division, Saskatoon, Sask.; Oct. 1 to Dec. 1, 1908, Trainmaster district 4, Central Division, Souris, Man.

The Winnipeg Tribune, under the heading "Ten Years Hence," recently published the following: "The report that Sir George J. Bury has accepted the presidency of the Winnipeg, Hudson's Bay and Liverpool Aerial Navigation Co., is premature. Sir George explains that the offer from a monetary point of view was extremely flattering, but the condition that obliged him to demur was that the president should sit in the stern of the air train and steer the thing across the Atlantic on the initial trip. While he was fond of sea bathing at Atlantic City, Old Orchard, or Pawm Beach, providing the conditions and company were agreeable, he did not fancy a dip among the icebergs in the northern inland sea, or along the Labrador coast. He had been reading up the history of northern navigation from Sir Henry Hudson's voyage, down on past Sir John Franklyn's expedition, and those which went out to find him, and Sir George fancied that, all things considered, he would quietly and unostentatiously remain with horizontal navigation as near to terra firma as possible."

Shipment of Long Materials and Stones.

The Board of Railway Commissioners has sent out the following draft of an order which it proposes to issue, stating that the matter will be taken up at the sittings in Ottawa, April 6:

Whereas the attention of the Board has been called to a number of accidents, in some instances fatal, caused by defects in the flat and open cars of railway companies, used for shipments of long materials and stone, not affording proper safeguards for the handling of such traffic. Upon the report and recommendation of its inspectors, and in pursuance of the powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf, it is ordered that every railway company subject to the legislative authority of the Parliament of Canada operating a railway by steam power, adopt the following rules and regulations to govern the loading of lumber, logs and stone on flat or open cars, namely:

1. That cars be so loaded that one handbrake shall always be accessible and operative; and that there be at least 6 inches between the brake wheel and the lading.

2. That all stakes, clamping pieces, bearing pieces, and braces be sound, straight grained lumber (hardwood preferred), and free from knots that would materially impair their strength. (Hemlock must never be used.) Care must be taken to keep the stakes from spreading at the top while cars are being loaded, and in no case must the load exceed the width of the car. Unless otherwise specified, stakes must not be less than 4 ins. wide by 5 ins. deep, or saplings 5 ins. in diameter at the centre, tapered at the ends to fit accurately, extend through and completely fill the stake pockets, which should not be less than 3½ ins. wide by 5 ins. deep.

3. That opposite stakes be always fastened together. When the specified fastening is by means of boards, there must be two boards on opposite sides of every pair of stakes, each board not less than 1 by 6 ins. in dimension, unless otherwise specified, and fastened at each end by not less than 3 ten-penny wire nails. (Hemlock must never be used.) When the specified fastening is by means of wire, the wire used, unless otherwise specified, must be equal to 6 strands or three wrappings of no. 8 telegraph wire (or wire of equal strength), and the wire must be secured, to prevent it from slipping.

4. (a) That all large flagging block, or breakwater stone, with approximately straight face, loaded on flat or open cars, be placed on strips spaced 18 ins. apart, placed crosswise on the car, and of sufficient thickness to keep the stone clear of the car floor—cars so loaded to be provided with hardwood stakes or cleats, to prevent the stone from shifting; (b) that all large block or breakwater stones resting on uneven face be wedged to prevent them from rocking, and that cars so loaded be provided with hardwood stakes or cleats, to prevent end and side shifting; (c) and that when small-sized stone, such as rip rap, spawls, paving blocks, etc., is loaded on flat or open cars, such cars be provided with side and end boards securely staked and fastened, that is to say, the boards and stakes are to be high enough and strong enough to carry the load safely, and not allow any of it to fall from the car during transit or switching, the side and end boards 10, 20, or 30 ins. in height, as the load may require, to be securely fastened to the stakes by the use of clamps or nails so that the ends and sides of the car shall be securely closed.

5. That if the load on a car shifts in transit, the train crew shall see that it is readjusted in accordance with this order before the same is allowed to proceed.

6. That shippers and the railway companies and their operators and employes shall see that all open and flat cars are loaded, and the loads protected in accordance with the terms of this order.

7. That every such railway company shall be liable to a penalty not exceeding $50 for every failure to comply with the foregoing regulations.

8. That every employe of such railway company and every shipper shall be liable to a penalty of not exceeding $25 for every failure to comply with the foregoing regulations.

Railway Interests in Parliament.

The speech of the Governor-General at the opening of the Dominion Parliament, Jan. 20, contained the following references to railway interests:

"The rapid settlement of the new provinces calls for new lines of transportation. The construction of the Transcontinental Railway has been vigorously pressed forward during the last year. The line was open for the carrying of the crops from Winnipeg to the Battle River, a distance of 675 miles.

"Exploratory surveys for a railway from the western wheat fields to Hudson Bay are being pushed energetically. Four parties have been at work since August last. Upon the report it will be possible to reach a decision as to both the route to be followed and the approximate cost. The provision of the Dominion Lands Act of last session for the sale of pre-emptions and purchased homesteads has created a new source of revenue that will be sufficient to bear the cost of the railway to Hudson Bay without burdening the ordinary revenue. From Sept. 1, when the Act came into force, until Jan. 1, sales of pre-emptions and purchased homesteads amounted to over two million acres, all subject to homestead rules.

"In pursuance of an announcement made during the concluding session of last Parliament, a commission was appointed to examine various lines of railway connected with the Intercolonial Ry., and which might become valuable feeders thereto. The report of this commission has been received and will be placed before you."

Canadian Lake Line.—The following appointments have been made: W. Askin, formerly General Agent, Montreal and Lake Superior Line, Montreal, to be Western Agent at Winnipeg, vice J. McLerie, resigned. W. J. Rochford, Travelling Freight Agent for Western Ontario, with headquarters at Windsor, Ont. The Oceanic Transit Co., General European Agent, London, Eng. The Traffic Manager, H. A. Young, has removed from the wharf office at the foot of York St., Toronto, to 18 Wellington St. East, where the offices of the Canadian Lake and Ocean Navigation Co. and the Canadian Lake Transportation Co. are now located.

Railroad Contractors!!!

Do you require a Steam Shovel for railroad ditching, sloping, road building, digging irrigation ditches, removing landslides, etc.? If so, we have just what you want in our VULCAN "GIANT" REVOLVING SHOVEL, made in four sizes, viz: No. 0, No. 1 Special, No. 1 Standard and No. 2. This type of shovel has many advantages over the ordinary steam shovel for the work above mentioned, full particulars of which are given in illustrated pamphlet which we will be pleased to send you on receipt of your request. We can also give very close quotations on Dump Cars and "Dinkey" Locomotives.

N. J. HOLDEN CO., LIMITED

42 York St., Toronto **302 St. James St., Montreal**

National Transcontinental Railway.

H. J. Mackenzie, divisional engineer for the first 40 miles of the main line easterly from Superior Junction, recently stated in Winnipeg, that the contractors on several portions of District F, were busily engaged in taking in their supplies from various points on the G.T. Pacific Ry.'s Lake Superior Branch, toting roads having been cleared for this purpose. The principal route used is from Waco. On the contract easterly from Superior Junction, 138 miles, the work is in the hands of O'Brien, Fowler & McDougall, who have about 1,000 men at work upon the first 50 miles. About 20 miles of bush clearing had been completed at the end of 1908, and some 16 miles of grading was being progressed with. There was a good deal of rock cutting along the 50 miles, and work will be proceeding on all the cuts throughout the winter.

S. R. Poulin, Engineer of District F, on his recent visit to Ottawa, stated that the Commissioners were determined to leave no stone unturned to have the track laid from Winnipeg to Superior Junction in time to move the western crop of 1909.

GRAND TRUNK PACIFIC RY.

An official statement has been issued by the company showing the total mileage of the company's line, the mileage of track laid in 1908, the mileage under contract, and the mileage surveyed, but for which contracts have not been let. This statement shows that on Jan. 1, 1908, the company had laid track on 418.3 miles of line, and that on Dec. 31, track had been laid on 878.8 miles, the mileage laid in 1908 therefore being 460.5 miles. This was distributed as follows:

	Miles.
Ont., mileage 99.6 to mileage 188.8	89.2
Man., Winnipeg to mileage 45	45.0
Sask., mileage 312 to mileage 414.9	102.9
Sask., mileage 466.6 to mileage 627.1	160.5
Alta., mileage 627.1 to mileage 685.0	57.9
Alta., mileage 786.6 to mileage 791.6	5.0
	460.5

The new line upon which construction was proceeded with or completed during the year includes the following distances: Winnipeg to mileage 45; mileage 312 to 414.9, a distance of 102.9 miles; mileage 466.6 to 916, a distance of 449.4 miles, of which the last 231 miles was placed under contract in 1908; mileage 1655 to 1755, a distance of 100 miles; Lake Superior branch, mileage 99.6 to 188.8, a distance of 89.2 miles; and Pacific Northern and Omineca Ry., from Kitimat, B.C., to mileage 53.7. The contractors now at work on the line are Foley, Welch and Stewart, their headquarters being Stoney Plains, Alta., and Prince Rupert, B.C. The company has had under survey during 1908, mileage 916 to 1655, a distance of 739 miles; of which the 609 miles from mileage 1045 was still marked as being under survey Dec. 31, 1908.

The Ontario Railway and Municipal Board, Jan. 5, gave a certificate to the company for presentation to the Provincial Treasurer, to enable it to obtain the bonus of $2,000 a mile and 3,000 acres of land granted by the Ontario Legislature towards the construction of the line. The certificate given covers the first 122 miles out of Fort William. It was anticipated that the town of Port Arthur would have opposed the granting of the certificate, on the ground that that city's interests were being neglected in the laying out of the terminals at the head of the lakes. An understanding, however, had been reached and the Board received a telegram, Jan. 5, to the effect that all opposition had been withdrawn.

Application will be made at the current session of the Dominion Parliament by the C.P.R. and the G.T.P.R. companies for an act ratifying and confirming an agreement, dated Dec. 1, 1908, between the two companies, respecting joint facilities at Fort William, Ont.

With the completion of the bridge across the Battle River, 675 miles westerly from Winnipeg, tracklaying was resumed in the direction of Edmonton. The whole of the grading between Battle River and Edmonton, Alta., has been completed, the last link required to enable tracklaying to be rushed through without a break being forged Dec. 29, when the big bridge at Clover Bar was finished. This bridge has an aggregate length of 663 ft., and consists of 19 spans, varying from 40 to 225 ft. in length, and is 136½ ft. above low water level. The substructure is of concrete, and the spans of steel. It is expected that the track will be laid into Edmonton, and the line opened for traffic early in the summer.

J. W. Stewart, of Foley, Welch and Stewart, stated Jan. 12, that the firm's contract for the grading of the G.T.P. Ry., from Edmonton to the Pembina River, 125 miles westerly, had been completed, and the line was ready for tracklaying.

With regard to the construction on the line easterly from Prince Rupert, J. W. Stewart, of Foley, Welch & Stewart, who have the contract for the first 100 miles, stated in Montreal, Jan. 11, that the grading upon this distance was expected to be completed by Sept. 1, and that tracklaying would probably be started at Prince Rupert in June. All the camps were accessible from the Skeena River, and when he came out at the end of Dec., there were 3,500 men at work and very satisfactory progress was being made.

The railway ferry barge Georgian, the deck of which is laid with three tracks, recently made a trip from New Westminster to Prince Rupert, carrying a load of equipment, including locomotives, dump and flat cars, steam shovels, etc. The locomotives and cars were landed at Prince Rupert Dec. 28.

G.T.P.R. BRANCH LINES.

The statement was made in Edmonton, Alta., Jan. 18, on the authority of D'Arcy Tate, Assistant Solicitor G.T.P.R., that the company would have a route into Calgary before the end of next season. The intention of the company is to construct a line from Wainwright to Calgary, and then on to Coutts, Alta., 330 miles. Work will be started as soon as spring opens and will be pushed through to completion. (See also Saskatchewan-Regina Railways.)

Pacific Northern and Omineca Ry.—Application will be made to the British Columbia Legislature for an act giving the company power to construct a railway from the junction of the Skeena and Copper Rivers to the junction of the Bulkley and Telkwa Rivers, or that vicinity, and to amend the company's act of 1905, by extending the time for the completion of the lines then authorized to be constructed to June 26, 1911. Bodwell & Lawson, Victoria, B.C., are solicitors for the company.

Canadian Ticket Agents' Association.—At a meeting of the Executive Committee in Toronto, Jan. 19, W. Bunton, G.T.R., Peterboro, Ont., was appointed to represent the Association at the next meeting of the American Association of General Passenger and Ticket Agents at Toledo, Ohio, Oct. 19. The C.T.A.A. will hold its next annual meeting at Buffalo, N.Y., Oct. 5 to 7.

The Ontario Government has under consideration plans for a new wing at the Parliament Buildings, Toronto. The new wing would provide accommodation for the Ontario Railway and Municipal Board, the Temiskaming and Northern Ontario Ry. Commission and the Hydro-Electric Commission, as well as some other departments.

Rate Meetings at Niagara Falls.

Three important rate meetings were held at the Clifton House, Niagara Falls, Ont., Jan. 19 to 21. The rate clerks of the lines comprising the Niagara Frontier Summer Rate Committee and the Great Lakes and St. Lawrence River Rate Committee met Jan. 19 and 20 to arrange the details of rates for the current year.

The International Water Lines Passenger Association met Jan. 20. In the absence of the President, C. A. Jaques, of Montreal, C. F. Bielman, of Detroit, Mich., presided.

R. C. Davis, G.P.A. Goodrich Line, on behalf of the Association presented a gavel for the retiring President, which was accepted by Melville Jaques in behalf of his father. The gavel was made of wood from the Allan Line s.s. Grampian, which was wrecked in the St. Lawrence, and which is said to be the first large vessel ever raised by compressed air. The wood was procured by T. Henry, G.T.M. Richelieu and Ontario Navigation Co.

The Tennessee River Navigation Co. and the Temagami Steamboat and Hotel Co. were admitted to membership; other applications are under consideration.

J. Berolzeim, formerly Manager Manitou S.S. Co., and J. F. Chapman, General Passenger Agent Deseronto Navigation Co., were elected honorary members.

The meeting declared itself heartily in favor of uniformity in prepaid ticket orders, but it was felt that until the various railway lines adopt a uniform order the Association could not take any united action and that the matter must be left for individual action on the part of each line.

The question of an improved style of dating stamp was left to each line for individual action, with a recommendation that where possible the new form as suggested by the American Association of General Passenger and Ticket Agents be adopted and put in use as fast as possible.

The question of the advisability of filing the Association's tariff with the Interstate Commerce Commision having been taken up, the Secretary reported that he had a ruling from the Commission as follows: "Under the act to regulate commerce you are not required to file the local tariffs of your steamship line covering transportation from one lake port to another. However, the law does require the filing of joint through tariffs covering transportation partly by rail and partly by water." The Commission does not assume or assert any authority or jurisdiction over the local rates (from port to port) of a steamship line, even though local tariff is filed. But in order to participate in interstate rates, partly rail, and partly steamship, a tariff must be filed. Where a steamship line does not issue a through joint tariff, the filing of a local tariff for interstate business does not in any way affect the Commission's jurisdiction over the local business (from port to port). Again, "Where a carrier has no tariffs on file with the Commission, and does not acknowledge itself subject to the Commission's jurisdiction (on interstate business), the Commission will regard the issuance of passes (by rail lines) to its officers, or employes, as unlawful." It was the consensus of opinion that the Association's tariff entitled "Passenger Fares" be filed with the Commission and that each member line furnish the Association's Secretary with power of attorney to file their tariffs on their behalf. The Secretary submitted correspondence with the Commission regarding the matter, also letters from a large number of railway lines which distributed the tariff among their agents, and which consider it very valuable and requested that it be filed.

The following officers, etc., were elected for the current year: President C. F. Bielman,

A committee was appointed to draft a resolution of sympathy with C. E. Markham, G.P.A. Anchor Line, who has been ill for some time.

THE NIAGARA FRONTIER SUMMER RATE COMMITTEE

met Jan. 21, the chairman, W. J. Lynch, P.T.M. New York Central Lines, Chicago, presiding. A. A. Heard, G.P.A. Delaware and Hudson Co., Albany, N.Y., was elected chairman for the current year and took the chair.

The rates as prepared by the rate clerks, and which contained no important changes beyond adjustments and extension of territory were adopted.

The New York, New Haven and Hartford Rd., the Quebec, Montreal and Southern Ry., and the Prince Edward Island Ry. were elected members.

THE GREAT LAKES AND ST. LAWRENCE RIVER RATE COMMITTEE

met Jan. 21, the chairman, T. Henry, T.M. Richelieu and Ontario Navigation Co., presiding. C. H. Nicholson, T.M. Northern Navigation Co., was elected chairman for the current year and took the chair.

The rates as arranged by the rate clerks were unanimously adopted.

The three Associations decided to hold their 1910 meetings at the same place, viz., Clifton House, Niagara Falls, Ont.

Saskatchewan and Alberta Railways.

The question of railway extensions in the Provinces of Saskatchewan and Alberta has been atracting considerable attention of late. The Premiers of the two provinces had a conference at Winnipeg, early in Jan., with W. Mackenzie, President, and other officers of the Canadian Northern Ry., and it was subsequently stated that the Legislatures of Saskatchewan and Alberta would probably ratify an agreement which would carry a guarantee of bonds to the extent of $10,000 a mile on ordinary mileage, and that where exceptional construction difficulties were encountered, and the Governments were satisfied that the extra cost was necessary, the bonds for these portions would be guaranteed to the extent of $15,000 a mile, but under no circumstances would a higher figure be allowed. The general routes of the lines to be constructed were discussed and it is said that the guarantee of bonds will cover about 500 miles of line, which will give the company access to the coalfields of Southern Alberta. There are said to be few if any engineering difficulties in the way of construction of a line through the southern portions of the provinces. A representative of the C.N.R. is in the territory mentioned looking over the field.

The first official pronouncement as to the proposed extension of lines under provincial guarantee was made in the Saskatchewan Legislature, Jan. 18, when the Government presented bills to aid railway development in the province. The bill authorizing the guarantee of certain securities of the G.T. Pacific Ry. provides that the amount of the securities to be guaranteed shall not exceed $13,000 a mile of railways constructed, at 4%, the principal to be repaid in 30 years. The securities to be issued are to be secured by one or more deeds of trust by way of first mortgage in the usual way. Not less than 50 miles of the lines mentioned in the schedule are to be completed by Dec. 31, and the remaining mileage is to be completed by Dec. 31, 1911, and an agreement is to be made for the operation of the lines so constructed. The standard of the lines is to be not inferior to that of the main line of the Canadian Northern Ry. between Winnipeg and Edmonton, and the routes of the different lines are to be approved by the Government. Provision is also made for the guarantee of an additional $2,000 a mile upon a supplementary deed of mortgage provided the sanction of the Legislature has previously been obtained to the guarantee being affixed thereto. The lines to be constructed by the G.T. Pacific Ry. under this guarantee are as follows: From the western division of the G.T. Pacific Ry. in the vicinity of tp. 22, range 6, west of the second meridian, on the G.T. Pacific Ry., to Yorkton, 40 miles. From between the 108th and 109th degrees of longitude on the G.T. Pacific Ry. to Battleford, 40 miles. From the vicinity of tp. 22, range six, on the western division G.T. Pacific Ry., to Regina, 110 miles.

The bill relating to the guarantee of bonds of the Canadian Northern Ry. is similar in every respect, except that the mileage to be constructed during the current year is 125, and the remaining mileage is to be completed by Dec. 31, 1911. The lines to be constructed under the guarantee are as follows: From Craven, running west of Last Mountain Lake to the Prince Albert branch, between Adams Ferry and Branchpetha. From between Aylesbury and Davidson, northwesterly and westerly to a junction with the Goose Lake branch of the C.N.R. near r. 16, west 3rd meridian, about 100 miles. A line to Roche Percee coalfields, about 25 miles. From Maryfield westerly and northerly to near range 17, west 2nd meridian, for 135 miles. A line from Dalmeny, on the main line of the C.N.R., north and northwesterly for 40 miles. A line from North Battleford northerly for 40 miles.

At the opening of the session of the Alberta Legislature, Jan. 14, the Lt.-Governor in the speech from the throne said: "The great problem of transportation facilities has been receiving the most anxious consideration of my Government. In the vast country to the north of us, with all its agricultural and mineral possibilities, and in the mining and wheat-producing districts of the south, the province has two assets of which the value can only be guessed until they have been penetrated and traversed by railways. The south country is already tapped, but it needs and will need as time goes on in an increasing measure more and more arteries through which its riches can flow. The north has not at present a single line, and without a line it is impossible to measure the vastness of its future. Several bills will be submitted for your approval authorizing my Government to assist the railway development of the country. Both north and south will be found to be cared for in the bills presented. The already existing facilities in the centre of the province will be very considerably supplemented."

An Edmonton dispatch, Jan. 24, said that as a result of a conference between Premier Rutherford and D. D. Mann, Vice-President C.N.R., the following lines would be gone on with at an early date, viz., from Edmonton to Fort Assiniboine on the Athabasca River, and eventually to Lesser Slave Lake and Peace River Crossing; from the eastern boundary of Alberta to Edmonton, running north of the Saskatchewan River, and probably a line from Strathcona to Calgary, meeting a wide detour to the east to Penetal. The guarantee of bonds to be the same as in Saskatchewan.

W. Wainwright, Second Vice-President G.T. Pacific Ry., who has been spending some time in Saskatchewan and Alberta, in connection with the negotiations between the G.T. Pacific Ry. and the two provincial governments, has given out some details of the company's plans. So far as his statement refers to Saskatchewan, it is covered by the proposals of the Government quoted above. With reference to Alberta his statement is to the effect that the line starting from Wainwright will be extended through Alberta, southwesterly to Calgary, and then carried southeasterly to the International boundary.

Packing of Railway Frogs.

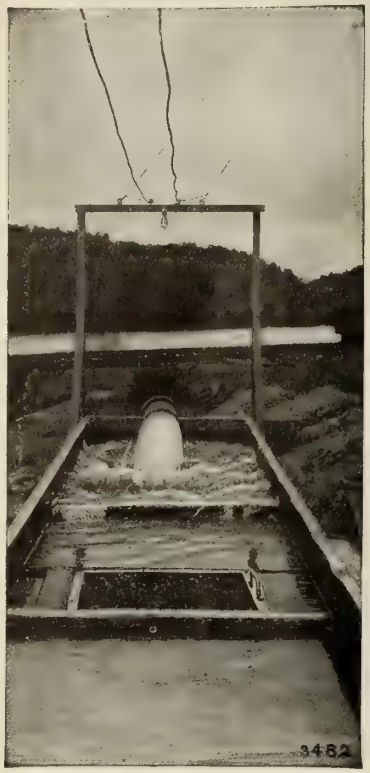
The Railway Act, sec. 288, provides as follows: "The spaces behind and in front of every railway frog or crossing, and between the fixed rails of every switch, where such spaces are less than 4 ins. in width, shall be filled with packing up to the under side of the head of the rail. The spaces between any wing rail and any railway frog, and between any guard rail and the track rail alongside of it, shall be filled with packing at their splayed ends, so that the whole splay shall be so filled where the width of the space between the rails is less than 4 ins. Such packing shall not reach higher than to the under side of the head of the rail. Such packing shall consist of wood or metal, or some equally substantial and solid material, of not less than 2 ins. in thickness, and, where by this section any space is required to be filled in on any railway, shall extend to within 1½ ins. of the crown of the rails in use, shall be neatly filled, so as to come against the web of such rails, and shall be well and solidly fastened to the ties on which such rails are laid. The Board of Railway Commissioners may, notwithstanding the requirements of this section, allow the filling and packing therein mentioned to be left out from the month of December to the month of April in each year, both months included, or between any such dates as the Board, by regulation, or in any particular case, determines."

On Dec. 22, 1905, the Board of Railway Commissioners passed an order permitting the G.T.R. to leave out the filling and packing required by the above section from Dec. to April in each year, both months included. This order was rescinded by the Board, Nov. 4, 1908, and the G.T.R. applied for the restoration of the original order. In giving judgment, Dec. 29, Chief Commissioner Mabee said: "Oral evidence was given in support of the application, the principal ground being that the snow and ice forming on the packing increased the possibility of derailment. No specific instances of such were given. No other railway is asking for the like order. The reasons for requiring packing exist to almost the same extent in winter as in summer; and I am, therefore, of opinion that no sufficient cause has been shown that would justify the Board in relieving the company from complying with the provisions of the section."

The C.P.R. has presented to the London, Eng., County Council Educational Department, a series of 200 pictures of Canadian scenery framed in Canadian woods, which are being utilized for educational purposes, with a view to stimulating interest in the Dominion.

The Board of Conciliation appointed to investigate the complaints of the C.P.R. locomotive engineers consists of Mr. Justice Fortin, Montreal, Chairman; W. Nesbitt, K.C., representing the C.P.R., and J. G. O'Donoghue on behalf of the men. The enquiry commenced Jan. 14.

PUMP YOUR WATER
BY
COMPRESSED AIR



For pumping mines, sand, mine tailings, condensing and factory water, from rivers or lakes having a great rise or fall, the RAND "RETURN AIR" is unquestionably the most economical system known.

Its essential principle, distinguishing it from other pneumatic displacement pumps, is the use of the same charge of air over and over, thus utilizing its expansive power.

No system is so simple to manage or maintains such a high original efficiency indefinitely.

TRANSPORTATION APPOINTMENTS.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Canadian Pacific Ry.—The duties of Mechanical Engineer, locomotive branch, Angus shops, Montreal, heretofore performed by A. W. Horsey, who has been appointed District Master Mechanic, Smith's Falls, Ont., will hereafter be carried on by G. I. Evans, Chief Draughtsman.

D. L. Jones has been appointed Locomotive Foreman at Smith's Falls, Ont., vice B. Pendleton, transferred.

J. R. Nelson, heretofore Superintendent District 2, Ontario Division, London, Ont., has been appointed Superintendent District 1, Ontario Division, vice J. K. McNeillie, transferred. Office, Toronto.

J. H. Mills, heretofore District Master Mechanic, Farnham, Que., has been appointed acting Master Mechanic, Ontario Division, vice R. Preston, who has been granted leave of absence. Headquarters, West Toronto, Ont.

A. Maynes, heretofore District Master Mechanic, District 1, Ontario Division, has been appointed Rule Examiner.

J. R. Spragge, heretofore District Master Mechanic, District 3, Ontario Division, has been appointed District Master Mechanic, District 1, Ontario Division, vice A. Maynes. Headquarters, West Toronto, Ont.

A. E. Stewart, heretofore Trainmaster, Walkerton and Lucknow branch, has been appointed acting District Master Mechanic, District 3, Ontario Division, vice J. R. Spragge, transferred. Headquarters, West Toronto.

F. Rowlandson, heretofore Locomotive Foreman, Brownville Jct., Me., has been appointed Locomotive Foreman, West Toronto, Ont., vice T. Reynolds, resigned.

J. K. McNeillie, heretofore Superintendent District 1, Ontario Division, Toronto, has been appointed Superintendent District 2, Ontario Division, vice J. R. Nelson, transferred. Office, London, Ont.

A. E. Hough, heretofore Locomotive Foreman, Ignace, Ont., has been appointed night shop foreman, Fort William, Ont.

W. F. Lowe has been appointed Locomotive Foreman, Ignace, Ont., vice A. E. Hough, transferred.

T. S. Acheson, heretofore Travelling Freight Agent Central Division, has been appointed General Grain Agent, Central and Western Divisions, and will give direct attention to grain traffic conditions. Office, Winnipeg.

J. H. Gordon, heretofore Soliciting Freight Agent, Winnipeg, has been appointed Travelling Freight Agent, Eastern Manitoba, covering main line and branches east of Brandon, Orcadia, Varcoe, Souris, and Boissevain. Office, Winnipeg.

A. T. McKean, heretofore chief clerk Assistant Freight Traffic Manager's office, Winnipeg, has been appointed Soliciting Freight Agent, Winnipeg, vice J. H. Gordon, promoted.

C. S. Morse, heretofore in charge of export work, General Freight Department, Winnipeg, has been appointed Travelling Freight Agent.

G. Hebb has been appointed Road Foreman, District 2, Central Division, vice A. West, appointed District Master Mechanic at Kenora, Ont.

J. Montgomery has been appointed acting Roadmaster, Miniota and Lenore branches, Rapid City section, and Brandon yard, Central Division, vice R. J. Hood, who has been granted leave of absence.

J. H. Longworth, City Freight Agent, Brandon, and Travelling Freight Agent Western Manitoba, has been assigned the following territory: Broadview section on the main line; Rapid City section, Miniota and Lenore branches; Pheasant Hills section, including Neudorf; Arcola section, Reston and Lyleton branches; and Kemnay to Boissevain via Napinka. Office, Brandon, Man.

W. H. Allinson, heretofore chief clerk, General Freight Department, Winnipeg, has been appointed City Freight Agent, Regina, and Travelling Freight Agent, Southern Saskatchewan, with territory covering the main line from Broadview to Swift Current, both inclusive, Outlook, Portal and Moose Mountain sections; Weyburn branch, and Estevan section, Melita to Estevan. Office, Regina, Sask.

R. W. Drew, District and Travelling Freight Agent, Northern Saskatchewan, has been assigned the following territory, covering Last Mountain, Lanigan, Saskatoon and Sheho sections. Office, Saskatoon, Sask.

John Halstead, heretofore Assistant General Freight Agent, Calgary, Alta., has been appointed General Freight Agent, Western Division; with jurisdiction over freight matters from Swift Current on the main line to Laggan, B.C., and from Dunmore Jct., on the Crow's Nest branch, to Frank, Alta. Office, Calgary, Alta.

A. H. Eager, heretofore District Master Mechanic, Kenora, Ont., has been appointed Locomotive Foreman, Calgary, Alta.,

F. W. Sadlier has been appointed Locomotive Foreman at Field, B.C., vice J. Archibald, transferred to Vancouver.

P. Wade, heretofore General Roadmaster, District 3, Pacific Division, has been appointed Roadmaster covering territory in District 3, as follows: Nelson to Castlegar Jct., not including Castlegar yard; Slocan Jct. to Slocan; Nakusp to Sandon; Nelson to Procter; Lardo to Gerrard. Office, Nelson, B.C. The position of General Roadmaster has been abolished.

T. H. Nichols has been appointed Roadmaster covering territory in District 3, Pacific Division, as follows: Farron to Midway, not including Farron; Eholt Jct. to Phœnix; Greenwood to Motherlode; B.C. Jct. to B.C. Mine; Granby Jct. to Granby Smelter. Office, Eholt Jct., B.C.

J. M. McGreevey has been appointed Roadmaster covering territory in District 3, Pacific Division, as follows: Rossland to Farron, including Farron; Smelter Jct. to Trail. Office, Smelter Jct., B.C.

J. Archibald, heretofore Locomotive Foreman, Field, B.C., has been appointed shop foreman, Vancouver, B.C.

D. Sutherland, heretofore Travelling Freight Agent, Vancouver, B.C., has been appointed General Agent, Prince Rupert, B.C.

R. Main, heretofore Commercial Agent at Pittsburg, Pa., has been appointed District Freight Agent there.

C. S. Richardson, heretofore Travelling Freight Agent, Buffalo, N. Y., has been appointed District Freight Agent there.

B. C. Tucker, heretofore Commercial Agent, Cleveland, Ohio, has been appointed District Freight Agent there.

Central Vermont Ry.—T. McHattie, heretofore Master Mechanic, Eastern Division, G.T.R., Montreal, has been appointed Superintendent of Motive Power and Car Department, C.V.R., vice W. Kennedy, resigned. Office, St. Albans, Vt.

Grand Trunk Pacific Ry.—E. J. Chamberlin, formerly General Manager Canada Atlantic Ry., has been appointed Vice-President and General Manager G.T.P.R., vice F. W. Morse, resigned.

W. H. Ardley, General Auditor, Grand Trunk Ry., has also been appointed General Auditor, G.T.P.R., vice N. J. Power, retired. Office, Montreal.

Grand Trunk Ry.—N. J. Power, General Auditor, after more than 50 years of faithful and continuous service with the company, retired under the provisions of the Company's pension scheme on Jan. 1.

W. H. Ardley, heretofore acting General Auditor, has been appointed General Auditor, vice N. J. Power, retired. Office, Montreal.

J. C. Garden, heretofore general shop foreman, Toronto, has been appointed Master Mechanic, Eastern Division, Montreal, vice T. McHattie, who has entered the Central Vermont Ry. Co.'s service.

L. L. Grabill, heretofore chief clerk General Baggage Agent's office, Toronto, has been appointed Assistant General Baggage Agent. Office, Toronto.

G. Stilson, heretofore Roadmaster at Sarnia Tunnel, has been appointed Roadmaster, 17th District, east of Sand Pit, and 19th District, Port Dalhousie to Port Robinson, Welland Jct. to Port Colborne, vice A. Grills, promoted. Headquarters, Hamilton, Ont.

A. Grills, heretofore Roadmaster at Hamilton, Ont., has been appointed General Roadmaster, Southern Division, vice A. S. Haynes, resigned. Headquarters, St. Thomas, Ont.

G. H. Allen, heretofore section foreman, Ingersoll, Ont., has been appointed Roadmaster, 17th district, west of Sand Pit; 18th district, Komoka to Glencoe, and 19th district, Glencoe to Kingscourt Jct., Middle Division, vice G. Stilson, transferred. Headquarters, Sarnia Tunnel, Ont.

R. Bushby, Eastern Passenger Agent, Cortland, N.Y., has, at his own request, been transferred to other duties.

D. P. Drewery has been appointed Travelling Passenger Agent. Office, 6 Burgess Block, Cortland, N.Y.

Intercolonial Ry.—W. H. Estano, heretofore chief clerk Traffic Auditor's office, has been appointed acting Traffic Auditor, vice J. R. Bruce, Traffic Auditor, who has been placed on the retired list. Office, Moncton, N.B.

Pullman Co.—The following appointments have been made: T. Dunbar, Manager Mechanical Department. C. W. Pflager, Assistant to Manager Mechanical Department. R. Tinsley, Manager Pullman Car Works. F. M. Gunn, Assistant to Manager Pullman Car Works, Chicago, Ill.

Temiskaming and Northern Ontario Ry.—F. Dane, one of the Commissioners, has also been appointed Land Commissioner. Office, Toronto.

Eastern Canadian Passenger Agents' Association.

At the regular meeting in Montreal Jan. 5 reduced fares and uniform arrangements for a number of occasions were considered. In connection with the application for reduced fares, etc., for the Sherbrooke, Que., snowshoe carnival and the Montreal carnival of winter sports to be held in Feb., the following resolution was adopted: Whereas, the extensive advertising of unusual and novel features required to attract any considerable number of visitors to winter carnivals or similar winter events creates wrong or exaggerated ideas regarding winter conditions in Canada, and therefore tends to injure the best interests and permanent growth of the country, it is resolved, that the lines in this Association will not make, or participate in, any special reduced fares for such undesirable enterprises, or otherwise encourage them.

The following officers, etc., were elected for the current year: Chairman, J. W. Hanley; Executive Committee, G. T. Bell, W. Stitt, G. Tombs; Rules Committee, G. T. Bell, W. Stitt, T. Henry, C. Hartigan, E. O. Grundy, F. F. Backus, O. W. Ruggles, J. M. Lyons, and F. E. Barbour. Secretary, G. H. Webster.

for
Railroad Men

PUBLISHED BY

The Engineering News Book Department
220 Broadway NEW YORK

Economics of Railway Operation
By M. L. BYERS
C.E., Ch. Eng. M. of W., Miss. Pac. Ry.

Buckram, 6 x 9 ins.; 672 pages, many figures, diagrams and forms illustrating the best modern practice - $5.00 net

The only publication explaining in detail the operative systems of American railways. Sir William Van Horne says of it: "I regard it as a most useful and valuable book."

Track and Track Work
(Third Edition, Revised and Enlarged)
By E. E. R. TRATMAN
Assoc. M. Am. Soc. C.E.

Cloth, 6 x 9 ins., 520 pages, 232 illustrations, 44 tables and an appendix of statistics of standard track construction on American railways - - $3.50 net

The standard treatise on this subject.

Design of Typical Steel Railway Bridges
By W. CHASE THOMSON
M. Can. Soc. C.E. Assist. Eng. Dominion Bridge Co.

Cloth, 6 x 9 ins., 178 pages, 21 figures, 5 folding plates - - - - $2.00 net

This book has been developed from lectures given by the author, and treats of the commonest types of railway bridges, which were chosen because they seemed best suited to illustrate the problems which occur most frequently to the bridge designer. These include a 60-ft. deck plate girder, a 100-ft. deck Warren girder, a 150-ft. through Pratt truss, a 200-ft. through Pratt truss with curved top chord, a 170-ft. swing bridge and a railway viaduct.

Any of these books will be sent, postpaid, on receipt of price, or further details with full list of contents will be given if desired. We can supply promptly, and at lowest price, any book published

KEEP YOURSELF POSTED ON THE LITERATURE OF YOUR SPECIALTY

For the guidance of technical men we issue, at intervals, notices of **new** and **recommended** books on various subjects, by all publishers. This service is **absolutely free** to all and involves no obligation of any kind whatever.

Mark on the attached coupon the special subjects on which **you** wish to be kept informed regarding **new** publications, adding any subjects not mentioned thereon in which you are interested. Send us this coupon **at once** and we will send you these notices as issued.

New Trails to the
Canadian Game Lands

Before the six railways of the Canadian Northern System followed the old fur trails into the Canadian game lands, only a hardy few dared to go in. But now, the back places of the woods—wealthy in moose, caribou, deer and bear—may be quickly and easily reached. The Canadian Northern system serves a wide range of undisturbed territories. Here are a few suggestions:

The country between Parry Sound and Sudbury, traversed by the CANADIAN NORTHERN ONTARIO RAILWAY, is a land of lonely muskeg and brulé, the native country of the white-tailed deer. From Sudbury north to Sellwood this same line goes in through a moose hunting territory unequalled in Ontario.

The CANADIAN NORTHERN QUEBEC and QUEBEC AND LAKE ST. JOHN RAILWAYS span the native country of the ouananiche, northern brook trout, and the spruce-shored lakes of the Roberval country, where moose and caribou abound.

The eastern shore of Nova Scotia, from Yarmouth to Halifax, is served by the HALIFAX AND SOUTH WESTERN RAILWAY. On the barrens, slightly inland from the railway, are some of the best places for big moose in the east.

THE CANADIAN NORTHERN RAILWAY from Port Arthur to Edmonton, with many branches, griddles almost undisturbed haunts of moose, caribou, deer, wolves, bear, and all species of four-footed and feathered game.

For Information, General and Special, Address the Information Bureau, Canadian Northern Railway, Toronto

Railway Commissioners' Traffic Orders.

6073. Jan. 13.—In the matter of the application of the Pere Marquette Rd., by its General Freight Agent at Detroit, for permission to refund to Parke, Davis & Co., of Montreal, 8c. per 100 pounds on a shipment of pharmaceutical goods from Walkerville to Montreal. Upon reading what was alleged in support of the application; and upon the report of the Chief Traffic Officer of the Board, it is ordered that the application be dismissed.

BRICK RATES FROM CASSELMAN, ONT.

6096. Jan. 12.—In the matter of the complaint of Hyde & Webster, of Montreal, alleging that the G.T.R. had increased the rate on bricks from Casselman, Ont., to Montreal, from 4½c. per 100 lbs. to 6c. per 100 lbs., for delivery by the C.P.R., and applying for an order directing the G.T.R. to restore its former rate of 4½c. per 100 lbs.: Whereas the G.T.R. has, since the filing of the complaint, established a special joint rate of 5c. per 100 lbs. on brick (except enamelled and glazed), in carloads, from Casselman for C.P.R. deliveries at Montreal, Atwater, Westmount, Montreal Jct., Mile End, and Angus shops, Que. Upon the hearing of Counsel for the G.T.R. and the C.P.R., the complainants appearing in person, the evidence adduced, and what was alleged—It is ordered that the application for a less rate between the said points than the said special joint rate of 5c. per 100 lbs. be dismissed.

DOMINION ATLANTIC RY. STEAMSHIP FARES.

6097. Jan. 18.—In the matter of the complaint of the Board of Trade of St. John, N.B., against the increase by the Dominion Atlantic Ry. of its passenger fare on its steamship line between St. John, N.B., and Digby, N.S., from $1.50 to $1.75 per capita: No one appearing at the hearing on behalf of the complainant, although notified by the Secretary of the Board that the complaint had been set down for hearing at St. John, N.B., it is ordered that the complaint be dismissed.

PULPWOOD RATES, ST. STEPHEN TO MILLTOWN.

6098. Jan. 18.—In the matter of the complaint of I. R. Todd, of St. Stephen, N.B., complaining against the rate charged by the C.P.R. on pulpwood from St. Stephen to Milltown, N.B.: No one appearing on behalf of complainant, although notified by the Secretary of the Board that the complaint had been set down for hearing at St. John, N.B., it is ordered that the complaint be dismissed.

CANADIAN FREIGHT CLASSIFICATION.

6080. Jan. 18.—In the matter of the requirements of the Board in connection with the proposed additions to and changes in the Canadian classification of freight traffic: It is ordered that the following rules be, and they are hereby, prescribed: 1. The printer's proof of the proposed classification or supplement shall show and include: (a) A list of the articles not previously provided for which it is proposed to add to the classification, and the ratings therefor, the said list to be headed "Additions." (b) The proposed advances, reductions, or other changes in the rules, ratings, or minimum weights, and in a parallel column those previously approved by the Board.

2. The Board shall be furnished with at least 10 copies of the aforesaid proof, and in one of these the proposed changes shall be underscored as follows, namely, the advances in black, the reductions in red, and the other changes in green.

3. The Board shall, at the same time, be furnished with the reasons for the proposed advances stated fully and separately in manuscript.

4. The applicants shall arrange for two consecutive publications of the proposed advances in The Canada Gazette, and shall, simultaneously with the submission of the aforesaid proofs, furnish the Board with copies of the communication and enclosure to the King's Printer.

Board of Railway Commissioners.

Since the sittings of the Commissioners with reference to the construction of a viaduct along the waterfront in Toronto, and the consideration of the express rates, both of which are dealt with elsewhere, the Commissioners held sittings at Montreal, Jan. 4; Ottawa, Jan. 12; and Toronto, Jan. 27. The principal case at the last sitting, so far as Toronto is concerned, had to do with the proposal to depress the tracks west of Bathurst St., and other works connected therewith westerly to the Toronto Bolt and Forging Co.'s works at Windermere Ave., and the proposed high level bridge at Queen St. East. These matters are all closely associated with the construction of the viaduct along the waterfront in the central part of the city. Since the order of the Commissioners as to the viaduct was made, there appears to be a disposition on the part of the city council and the railway companies to reach such a settlement as will enable a complete job to be made and to prevent any litigation between the two interests. While there is an appeal pending as to the jurisdiction of the Board to order the construction of a viaduct, the railway companies show a disposition to accept the order, but in doing so they are desirous of having other matters arranged. The whole question is under discussion, and while both sides talk as to rights and privileges, and what action may be taken, they are averse to making an authoritative statement as to the real position of negotiations. Immediately following the sittings at Toronto, some of the Commissioners proceeded to the West, the dates fixed for the holdings of sittings being: Winnipeg, Feb. 1; Regina, Feb. 11; Medicine Hat, Feb. 15; Calgary, Feb. 17; Edmonton, Feb. 18; Vancouver, Feb. 23; Victoria, Feb. 27. The dates for the holding of sittings at Nelson and Lethbridge are to be fixed later.

Railway Commissioners' Districts.

An Ottawa dispatch says the Dominion has been divided into districts, each of which has been placed in charge of one of the members of the Board of Railway Commissioners as to routine applications, Chief Commissioner Mabee having a general supervision over the whole:

Ontario, with exception of Port Arthur and west thereof, and the City of Montreal, under D'Arcy Scott, Assistant Chief Commissioner, with J. Ogilvie and J. Clarke as Inspectors.

Quebec Province, except City of Montreal, New Brunswick, Nova Scotia and Prince Edward Island, under Hon. M. E. Bernier, Deputy Chief Commissioner, with E. C. Lalonde, as Inspector.

Manitoba, Saskatchewan and the portion of Ontario west of and including Port Arthur, under Commissioner S. J. McLean, with W. S. Blythe as Inspector.

Alberta and British Columbia, under Commissioner Mills, with M. J. McCaul as Inspector.

Since the above was put into type we have been officially advised that the dispatch quoted is entirely erroneous and misleading, no such arrangement as that referred to having been made. For the purposes of convenience, the Board's Inspectors of Accidents have been located at the following points to investigate and report on accidents and rolling stock: Calgary, Alta., M. J. McCaul; Winnipeg, W. S. Blyth; Ottawa, J. Ogilvie and J. Clarke; Montreal, E. C. Lalonde.

It is reported from Edmonton, Alta., that D. Marshall, managing editor Edmonton Bulletin, will probably be appointed Railway Commissioner, to carry out the extensive plans of railway development contemplated by the Provincial Government.

The G.T.P.R. Management.

Great surprise was expressed, especially in railway circles, at the announcement made in Montreal, Jan. 22, by C. M. Hays, President Grand Trunk Pacific Ry. Co., that F. W. Morse, Vice-President and General Manager, had resigned. Mr. Morse tendered his resignation to Mr. Hays before leaving Montreal, Jan. 18, for New York, from which port he sailed on Jan. 21, on the s.s. Carmania, for a three months' trip to the Mediterranean, accompanied by his mother, who is in poor health. It was stipulated that the resignation was not to be announced until after he had sailed and he left the following statement to be given to the press:

"Mr. Frank W. Morse has asked to be relieved from his duties as Vice-President and General Manager of the Grand Trunk Pacific and constituent properties, and just before leaving for a trip to the other side tendered his resignation, to become effective at such date as should be decided. He is not prepared to announce what his future plans may be, but that will doubtless be known on his return."

In an interview Mr. Hays expressed regret at Mr. Morse's resignation, but assigned no cause for it. He denied that there was any trouble between himself and Mr. Morse, and said the resignation was purely voluntary. There is a great deal of speculation as to the real reason, friction with the Dominion Government and many other things being guessed at, but no definite information is obtainable.

On Jan. 25, it was officially announced that E. J. Chamberlin, who was General Manager of the Canada Atlantic Ry. at the time of its absorption by the G.T.R., had been appointed to succeed Mr. Morse. He had been in California on a visit, but was wired for and assumed his new position in Montreal, Jan. 26, when he stated that he had not sought the appointment, and that after spending a few days in picking up the ends of the business, the work would proceed as hitherto.

Frank W. Morse entered railway service in 1885, with the Wabash Rd., at Springfield, Ill. Promotions from time to time took him to Quincy, Ill.; Des Moines, Iowa, and St. Louis, Mo. In 1887 he severed his connection with the Wabash and entered the service of the Pan Handle Rd., which was composed of the Denver, Texas and Gulf; Denver, Texas and Fort Worth and Fort Worth and Denver City railroads, at that time being under construction. After it had been completed and successfully operated, he, at the solicitation of C. M. Hays, at the time of the consolidation of the Wabash Western and Wabash railroads into the present Wabash System, returned to that company, and was located at Fort Wayne, Ind., remaining until Mr. Hays called him to Canada in 1896, to become Superintendent of Motive Power, G.T.R. He was appointed Third Vice-President in 1902, and went over the route of the projected G.T.P. Ry. in 1902-03. He was elected Vice-President on the organization of the G.T.P. Ry. Co. in Aug., 1904, and was also appointed General Manager, Jan. 1, 1905.

E. J. Chamberlin, was born at Lancaster, N.H., and entered railway service in 1871, since when he has been consecutively to 1872, timekeeper in car shops; 1872 to 1875, clerk in Paymaster's and Superintendent of Transportation's offices; 1875 to 1876, corresponding secretary to General Superintendent; and 1877 to 1884, private secretary to General Manager Central Vermont Ry., St. Albans, Vt.; April, 1884, to Sept., 1886, Superintendent Ogdensburg and Lake Champlain Rd., and Central Vermont Line steamers running between Chicago and Ogdensburg; Sept. 1, 1886, to Oct., 1905, General Manager Canada Atlantic Ry. Since the absorption of the C.A. Ry. by the G.T.R., he has been connected with lumber, contracting and mining interests.

The Wisconsin Central Railway.

Sir Thos. G. Shaughnessy, President C.P.R., stated, Jan. 15, that the C.P.R. is not acquiring any additional property in the United States, but that the Minneapolis, St. Paul and Sault Ste. Marie Ry., which is closely associated with the C.P.R., has been negotiating for the Wisconsin Central Ry., and that he had every reason to believe the negotiations have reached an advanced stage." This is generally understood to be a diplomatic way of stating that the M., St. P. and S.S.M. Ry., in which the C.P.R. holds a controlling interest, has purchased from N. Erb, of New York, the controlling interest in the Wisconsin Central Rd., an option which he has held for some time past.

The Wisconsin Central Ry. operates 977 miles of railway, and extends from Chicago, Ill., to Minneapolis, Minn., with the following branch lines: Rugby Junction to Milwaukee; Neenah to Manitowoc; Stephens to Portage, with a stub branch to Montello; Marshfield to Nekoosa; Marshfield to Greenwood; Abbotsford to Ashland, with branches from Chester to Hib Lake, and from Melton to Bessemer; from Owen to Ladysmith, and a projected extension from Ladysmith to Superior and Duluth; from Chippewa Falls to Eau Claire. The company also operates over a number of logging spurs.

The W. C. Ry. Co. was chartered Dec. 27, 1897, and on July 13, 1899, acquired title of the property of the Wisconsin Central Co.; Wisconsin Central Rd. Co.; Packwaukee and Montello Rd.; Milwaukee and Winnebago Rd.; Chicago, Wisconsin and Minnesota Rd., and Central Car Co., under the plan of reorganization. The Marshfield and Southeastern Rd., 32.61 miles, was purchased May 1, 1901. In July, 1906, the company acquired all the property and rights of the Owen and Northern Ry. Co. and the Lake Superior and Eastern Rd., which was organized to construct an extension from Owen through Ladysmith to Superior and Duluth, a distance of 160.5 miles. The line from Owen to Ladysmith, 45.5, was put in operation Aug. 6, 1906; and the remainder of the line is still uncompleted. The company has also trackage rights over 59.94 miles in Chicago, St. Paul and Minneapolis, under 99-year agreements with the Illinois Central Rd., and the Great Northern Ry., and in Milwaukee, under a five years' agreement with the Chicago, Milwaukee and St. Paul Rd. It has also lake ferry connection from Manitowoc with the Ann Arbor Rd. at Frankford, Mich., and the Pere Marquette Rd. at Ludington, Mich.

Its rolling stock consists of 190 locomotives, 151 passenger cars of all kinds, and 8,661 freight cars of all classes. The Pullman Co. and the National Express Co. operate over the line.

The negotiations by the M., St. P. and S.S. M Ry., for the acquirement of the Wisconsin Central Ry., have been concluded, and at a meeting of directors of the latter company, the following directors resigned: F. T. Gates, W. A. Bradford, G. J. Gould, T. L. Chadbourne jr., G. A. Fernauld and G. W. Webster. The following officers and directors were subsequently elected: President and Chairman of the Board, N. Erb; Assistant Secretary, W. M. Walden; other directors, L. Baldwin, W. J. Wollman, C. D. Simpson, F. H. Prince and E. N. Foss.

The C.P.R., it is reported, is considering the adoption of the "no crop—no payment" plan in the disposal of lands in the irrigated district easterly of Calgary, Alta.

The Orford Mountain Ry. has filed its standard passenger tariff C.R.C., no. 20, with the Board of Railway Commissioners, which has approved of the same. The tariff fixes a maximum passenger fare between all stations on the company's line at 3½c. a mile.

Steam Railway Track Laid in 1908.

In accordance with our annual custom circulars were sent in December to all railway companies in Canada asking particulars of new track laid during 1908. Below is a compilation of figures showing that the total length of new track, exclusive of second track and sidings, laid during the year on steam railways from which reports have been received, was 1,150.70 miles. No returns have been received from the Canadian Northern and National Transcontinental Railways, so we have from data in our possession estimated the track laid on those lines as 167 and 170 miles respectively, making a total of 1,484.70 miles laid in Canada during 1908.

Freight Car Balances and Performances.

The committee on car efficiency of the American Railway Association issued, Jan. 14, its statistical statement of freight car balance and performance for Aug., 1908. During the period covered by the report the number of surplus cars averaged 267,312 daily; this number being 12.44% of the total cars on all lines included in the statement. There were in addition bad order cars equal to 9.99% of the total cars, making 22.43% of the equipment that contributed nothing to the mileage, tonnage or earnings. Including surplus cars the average miles per day was 20.8; the average ton miles per car per day, 292, and the average earnings per car per day, $1.98; while excluding the surplus cars the figures were 25.1, 354, and $2.40 respectively. There is a marked improvement in the per cent. of loaded mileage, the figure for Aug. reaching 68.8%, the highest since Nov., 1907, and only two points below the average for Aug., 1907. This increase is natural in connection with the outward flow of cars indicated in the car balance figures, which show a continued decrease in the number of cars on their home lines. It is probable, however, that the return to the normal use of foreign equipment will not be brought about until the surplus is practically wiped out or at least quite materially reduced.

The figures relating to the Canadian group show four lines reporting, viz., the C.P.R., G.T.R., Intercolonial, and Toronto, Hamilton and Buffalo. Their figures are revenue freight cars owned, 98,343; average number of system cars on line, 81,073; average foreign railway cars on line, 14,015; private cars on line, 4,032; total cars on line, 99,120; per cent. of cars in shops, 9.67; freight engines owned, 2,120; average cars on line per freight engine owned, 47; total freight car mileage, 67,083,842; average miles per car per day, 22.0; per cent. loaded mileage, 73.6; ton miles of freight, including company freight, 829,103,871; average ton miles (including company freight), per car mile, 12.0; per loaded car mile, 16.7; per car per day, 270; gross freight earnings, $5,901,713. Average daily earnings: per car owned, $1.94; per railway car on line, $2.00; all cars on line, $1.92.

The committee on car efficiency of the American Railway Association has issued its statement of car surpluses and shortages for the period ended Jan. 6. The report shows a total of 333,019 surplus cars, an increase of 110,942 in the figures for the previous two weeks. Taken by groups the increase seems to be general. The large increase in the Canadian group is due to the addition of 5,000 cars reported by a line that had not reported for some time. The totals for the Canadian group showed surpluses of 12,468 box cars, 4,144 flat cars, 110 coal, gondola and hopper cars, and 2,115 other cars, making altogether 18,837 cars, against a total of 3,598 cars on Dec. 23.

Levers for Uncoupling Cars.

The Board of Railway Commissioners for Canada passed the following order 6027, dated Nov. 25, 1908: In the matter of the accident on the Canadian Northern Ry., at Portage la Prairie, Man., on Feb. 19, 1908; and in pursuance of the powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf: Upon the report and recommendation of the Inspector of Accidents of the Board, it is ordered that every railway company subject to the legislative authority of the Parliament of Canada, operating a railway by steam power, equip, within the time hereinafter mentioned, each of its non-platform cars, as for example, ordinary box and mail or baggage cars, with the proper operating lever for uncoupling cars, and dispense with the operating wheel where in use on the ends of such cars for that purpose: (a) In cars to be constructed in the future for use on their said railways, before they are so used; (b) In cars under construction or in shops undergoing repairs, within three months from the date of this order; (c) In cars at present in use on their respective railways, within six months from the date of this order.

And it is further ordered that every such railway company be liable to a penalty of a sum not exceeding $50 for every failure to comply with the foregoing regulations within the time for their coming into force and thereafter.

Dominion Railway Subsidies.

The Dominion public accounts for the fiscal year ended Mar. 31, 1908, issued recently, contain a considerable amount of information with reference to the subsidizing of railways by Parliament. Table 1 gives a list of railways subsidized by money grant. Contracts were made with 132 railway companies, on account of which $59,605,026.64 has been paid, $1,238,989.07 has been cancelled or has lapsed, and there are balances of $1,521.82 of subsidies outstanding on these contracts. There are a number of contracts upon which nothing has been paid, the amount of the subsidy for which the Government is liable is not included in these figures. Table 2 gives a list of four railways, not included in the first table, of fixed amounts payable annually or semi-annually for a fixed period of years, or interest in place of or until the capital granted be paid. These contracts were in respect of 587 miles of line, of which 56 miles, the Kingston, Smith's Falls and Ottawa Ry., has not been constructed. The amount paid under these contracts has been $6,121,950. Table 3 shows that three railways were aided by loans of $815,000, of which $66,374.44 is still undrawn. Table 4 shows that eight railways were aided by the grant of used iron rails valued at $242,661.19, of which there has been repaid $152,305.20, and there is standing as an asset in the public accounts $90,355.79. This table also shows that the Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co., the Calgary and Edmonton Ry., the Lake Manitoba Ry. and the Winnipeg Great Northern Ry., are in receipt of annual subsidies amounting in all to $240,000 on certain conditions, the contracts expiring 1909 and 1910 respectively for the first two, and in 1915 in respect of the last two.

Ontario Railway and Municipal Board.

In reference to newspaper attacks on some of the Board's decisions, the chairman, J. Leitch, K.C., made the following report at a recent sitting: "The Legislature has not seen fit to give this board power to protect ourselves as other courts have been protected for about a thousand years. Our hands are tied, our pens are tied and our tongues are tied. We simply have to take what we get and look happy. There is one thing: We will not be stampeded by Toronto journals or by aldermen, or by anybody else. We are here to administer the law, and we are going to administer it as we understand it. When we don't understand it right, the Court of Appeal may, and then if that Court does not, the gentlemen of the Privy Council have the final say. Nothing will provoke us to say one single word in answer to newspaper criticism or any other criticism. We are going to hew to the line."

Orders by the Railway Commissioners.

The following orders have been passed in addition to those on page 85:

5979. Dec. 30.—Dismissing application of C.N.O.R. for authority to replace its tracks across C.P.R. spur to the Barber Asphalt Co.'s property south of Eastern Ave., Toronto.

5980. Dec. 30.—Authorizing C.N.O.R. to divert concession road between concessions 2 and 3, Albert tp., between mileages 13-14 west from Hawkesbury, Ont.

5981. Dec. 30.—Dismissing application of Vancouver, Westminster and Yukon Ry. for authority to construct a branch line in North Vancouver, from its main line near the mouth of Seymour Creek, on the north shore of Burrard Inlet, to or near Deep Cove, on the north arm of Burrard Inlet.

5982. Dec. 29.—Ordering Chatham, Wallaceburg and Lake Erie Ry. to equip its cars with air brakes within three months.

5983. Dec. 31. Jan. 22. — Authorizing C.N.O.R. to erect a wire across Montreal & Ottawa road in Cumberland tp., Ont., and across Cameron St., near the station grounds.

5984. Dec. 31.—Authorizing Bell Telephone Co. to place wires across C.N.Q.R. at Charlebourg road, ½ mile west of Quebec city.

5985. Dec. 31.—Authorizing Bell Telephone Co. to place wires across C.N.O.R. near Brechin station, Ont.

5986. Dec. 31.—Authorizing Bell Telephone Co. to place wires across C.N.Q.R. at St. Valier Road, 4 miles west of Quebec city.

5987. Dec. 31.—Authorizing Adams River Lumber Co. to lay water pipe under C.P.R., 2 miles west of Shuswap station, B.C.

5988. Dec. 31.—Authorizing Byron Telephone Co. to place wires across London & Port Stanley Ry. in Westminster tp., Ont.

5989. Dec. 31.—Ordering G.T.R. to install at crossing of its line with L'Esperance road, Tecumseh tp., Sandwich East, Ont., an automatic electric bell with a cut-off opposite station, subject to terms of order 875, of Dec. 8, 1905.

5990. Jan. 2.—Authorizing the B.C. Telephone Co. to place wires across Esquimalt & Nanaimo Ry. at Duncans, B.C.

5991. Jan. 2.—Authorizing G.T.P.R. to carry freight over its line from Winnipeg to Battle River, Alta., notwithstanding that such portion has not been opened for traffic, according to sec. 261, Railway Act; and rescinding orders 3780, Oct. 11, 1907, and 5917, Dec. 22, 1908.

5992. Jan. 2.—Authorizing G.T.P.R. to carry freight traffic over its line from Fort William to end of track, mileage 0.00 to 188.77

in Ontario, notwithstanding that such portion has not been opened for traffic according to sec. 261, Railway Act; and rescinding order 5918, Dec. 22, 1908.

5993. Jan. 4.—Approving Rutland Rd. Co.'s by-law authorizing F. E. Barbour, G.P.A., and G. Cassidy, G.F.A., to prepare and issue tariffs of tolls to be charged.

5994. Jan. 4.—Authorizing Manitoba Government Telephones to place wires across C.P.R. at Gunton.

5995. Jan. 4.—Authorizing the Merritton Water Commissioners to lay water pipe under G.T.R. at Concession road, Merritton, Ont.

5996. Jan. 4.—Authorizing G. Collinson to place wires across C.P.R. on Broadway St., Killarney, Man.

5997. Jan. 4.—Authorizing Saskatchewan Government Telephones to place wires across C.P.R. between Manor and Carlyle, Sask.

5998. Jan. 8.—Authorizing C.P.R. to construct spur line into W., C. M. and R. Peters' coal yard, Elizabeth and Maria Sts., East Toronto, Ont.

5999. Jan. 4.—Authorizing G.T.R. to construct a branch line to G. Niebergal & Son's premises, Strong tp., Parry Sound district, Ont.; and a through siding, or service track, on C.P.R. property and crossing, John and Main Sts., Sundridge, Ont.

6000. Jan. 5.—Authorizing C.P.R. to operate the Hull trestle, on its Eastern Division, Quebec province.

6001. Jan. 4.—Authorizing city of Winnipeg to lay a pipe under C.P.R. at Polson Ave., Winnipeg.

6002. Jan. 5.—Authorizing Bell Telephone Co. to place wires across G.T.R. at Salisbury St., 200 yds. south of Galt, Ont.

6003. Jan. 7.—Authorizing Erie Telephone Co. to place wires across G.T.R. at overhead bridge, Munsey St., Cayuga, Ont.

6004. Jan. 8.—Approving revision of location of B.C. Southern Ry., Michel branch, from mileage 0.2½ west of Michel, northerly following east bank of Elk River, B.C.

6005. Jan. 8.—Approving location of the C.N.O.R. through Stratton, Barren, Niven, and White tps., Nipissing district, Ont.

6006. Jan. 18.—Approving G.T.P.R. standard passenger tariff, C.R.C. 2, to apply between stations east of and including Edmonton, Alta., on the basis of 3c. a mile.

6007. Jan. 8.—Approving location of M.C. Rd.'s passenger station at Welland, Ont.

6008. Jan. 8. — Approving location of C.N.R. Humboldt-Calgary line, through tps. 29 and 28, ranges 15-21, w. 3rd m., mileage 76.09 to 117.06, southwesterly from Saskatoon, Sask.

6009, 6010. Jan. 8.—Authorizing Bell Telephone Co. to place wires across G.T.R. near Marshville station, Ont.

6011. Jan. 9.—Authorizing Norfolk County Telephone Co. to place wires across G.T.R. at road allowance between cons. 4 and 5, lot 3, Woodhouse tp., Ont.

6012. Jan. 11.—Authorizing B.C. Southern Ry. to construct a crossing to J. Cosovell's premises, Moyie, B.C.

6013. Jan. 9.—Authorizing J. Lortie to lay pipe under Quebec Ry., Light & Power Co.'s tracks at Beauport, Que.

6014. Jan. 9.—Approving C.N.Q.R. by-law authorizing President, General Freight and Passenger Agent, and the chief clerk in office of G.F. & P.A., to prepare and issue tariffs of tolls to be charged.

6015. Dec. 18. — Authorizing Manitoba Government Telephones to place wires across G.T.P.R. and C.N.R., one mile west of Portage la Prairie, Man.

6016. Jan. 9.—Authorizing G.T.R. to open for traffic the portion of its line of an additional track between Hamilton and Port Dover, from the main line between Hamilton and Niagara Falls, at Mary St., to Ferguson Ave., near where the latter crosses Cannon St., Hamilton, Ont.

6017. Jan. 8.—Authorizing New Brunswick Southern Ry. to construct bridge across Lancaster River.

6018. Jan. 9.—Authorizing Wood Bay Telephone Co. to place wires across C.P.R. at Wood Bay, Man.

6019. Jan. 12.—Authorizing G.T.R. to re-construct bridge across Richelieu River, Beloeil, Que.

6020. Jan. 12.—Rescinding order 5493, Oct. 22, 1908, approving Express Classification C.R.C. 1, Tables of Graduated Charges C.R.C. 2, and Money Classification C.R.C. 3; and directing that the express companies notify agents to apply tariffs in existence prior to Jan. 1, until further orders.

6021. Jan. 9.—Authorizing C.P.R. to open for traffic the grade revision of its line between Woodstock and Hartland, N.B., near Newburg Jct., and directing the company to complete fencing along the line not later than May 15.

6022. Dec. 29.—Authorizing C.P.R. to construct public crossing at Gordon Lumber Co.'s private crossing, 231 ft. west of proposed Bay St. crossing, Cache Bay, Ont.; and ordering it to slope the southern side of cut through bluff, 600 ft. west of crossing, from fence to 3 ft. above track, the work to be completed by June 1.

6023. Jan. 4.—Authorizing Toronto and Niagara Power Co. to place wires across Toronto Suburban Ry. at Davenport road, York county, Ont.

6024, 6025. Jan. 8.—Authorizing town of Oshawa, Ont., to construct highways across Oshawa Ry. at Barrie Ave and First Ave..

6026. Jan. 9.—Authorizing city of Hamilton to lay sewer pipe under G.T.R., Port Dover branch, at Sanford Ave., Hamilton, Ont.

6027. Nov. 25.—Directing railway companies to equip their non-platform cars with operating levers for uncoupling cars.

6028. Jan. 13.—Authorizing city of Hamilton, Ont., to lay water main under T.H. & B. Ry. at Wentworth St.

6029. Jan. 12.—Dismissing application of Bay of Quinte Ry. for order settling compensation payable by it to Kingston and Pembroke Ry. in respect of running rights possessed by applicant over K. & P.R., from Harrowsmith to Kingston, Ont.

Aerial Tramway in the Yukon.—A contract is reported to have been closed with a U.S. firm for the construction of an aerial tramway line from tideway at Dyea to the head of Lake Lindeman, Alaska. This latter point connects with the system of lakes which has over 1,000 miles of coast line in the Yukon country, and also connects with the Yukon River as far as Dawson, Yukon. The contract, it is stated, calls for the completion of the line, which will have a length of about 15 miles, by 1909. The promoters state that the actual cost of handling freight over the line will not exceed 25 cents a ton, and that the cost of transportation on the rivers and lakes to any of the camps in the Yukon or Klondike will be nominal. The line will be utilized to carry ore to tidewater. It is claimed that by the operation of this line the cost of living in a large number of the camps can be reduced by from 50 to 75%.

The Chicago, Ill., courts granted an injunction recently on the application of the C.P.R., restraining Nichols Bros. from distributing alleged defamatory circulars concerning the business of the railway company in selling Canadian lands.

ELECTRIC RAILWAYS.

British Columbia Electric Railway Co.

Following are extracts from the 11th annual report for the year ended June 30, 1908, submitted at the last general meeting held in London, Eng.:

The business shows continued and increasing prosperity in all departments. The past year has been one of quiet, steady progress for the cities and districts served by the railway. Large numbers of the best class of settlers have arrived in the country; in a great many instances, men who, having made money in the central provinces of Canada or in the U.S., prefer to live in the more uniform climate of British Columbia. Building has been active in the cities; a number of large and imposing business structures have been erected, and important public improvements have been carried out. During the spring your Managing Director, J. C. M. Buntzen, spent two months in British Columbia carefully investigating conditions and inspecting the company's property, and he entirely confirms the opinion formed by Hon. M. R. Gifford the previous autumn that the increasing business is founded on sound commercial conditions, and may be relied on to continue. For the 12 months to June 30, gross receipts increased $525,218, or 36%, and the net earnings, including income from investments in subsidiaries and after charging renewals, increased $208,749, or 30% over the preceding year. The following charges have been made against revenue account:

Provision for renewals maintenance (from which £11,830-9-11 has been deducted for adjustments and expenditure on renewals during the year)				£	31,161	16 2
Bonus to employes					8,350	14 5
Amount added to capital amortization fund					1,940	9 5
Net profit for year, after making above deductions				£	154,223	13 7
Balance brought forward from last year					3,480	19 6
				£	157,704	13 1
Deduct—						
Interest on debentures and debenture stock to June 30	£33,230	14	2			
Dividends already paid—						
On 5% cumulative perpetual preference stock for the year ended June 30	15,000	0	0			
On preferred ordinary stock for the year ended June 30	19,500	0	0			
On deferred ordinary stock for 6 months to Dec. 31, 1907	16,000	0	0			
					83,730	14 2
Leaving available for further distribution and reserves				£	73,973	18 11

From this the directors have decided to recommend the payment of a dividend on the deferred ordinary stock, including the recent issue of 100,000 deferred ordinary shares of £1 each, at 8% per annum for the 6 months to June 30, 1908, making 8% for the year, £20,000; to transfer to reserve fund (increasing this fund to £140,000), £49,000; total, £69,000; leaving to carry forward to next account, £4,973, 18s. 11d.

The number of lights in use at June 30, 1908, was 287,624, an increase of 70,838 over June 30, 1907. The number of passengers carried during the year was 21,328,180, an increase of 5,046,414. During the year £218,021-6-11 was spent in extensions and improvement of the company's property and equipment.

Your company has been granted valuable rights to conduct a light and power business in perpetuity by the municipalities of South Vancouver, Burnaby, Richmond,

Delta, Surrey, Langley, Matsqui, Sumas and Chilliwack, and the perpetual right——which for 99 years is exclusive—to conduct an electric railway business through the latter five municipalities, under conditions which are in every way satisfactory and equitable to all parties concerned. The acquisition of these important privileges in the districts surrounding and immediately adjacent to Vancouver and New Westminster has been confirmed by the votes of large majorities of the taxpayers. Your directors take especial pleasure in recording their appreciation of the confidence thus reposed in your company and its management, and they will continue their settled policy of doing their utmost to promote the prosperity of the territory served by the company, and of keeping constantly before them the interests of the public. The company has already established a light and power service in South Vancouver, Richmond, Burnaby and Delta, and with the completion of the railway to Chilliwack, will extend this service into the other municipalities. The Westminster and Chilliwack line is the most important railway extension in hand. It will be approximately 63 miles long, and will pass through perhaps the most fertile territory in B.C., namely, the rich lands on the south side of the Fraser River, the proper development of which has up to the present been most seriously retarded by lack of transportation. Already some hundreds of families have settled on the lands adjacent to our new line, and land values have very largely appreciated. A considerable number of industrial works, saw mills, etc., are also being built along the line. Another important and much desired extension is being constructed through the eastern suburbs of Victoria towards Foul Bay. The line will pass the Victoria cemetery and terminate near one of the most beautiful bays of B.C., with a sheltered position, southern aspect and fine sandy beach. It is expected to draw a large amount of summer traffic, as indicated by the number of residences already being built there in anticipation of the railway. The traffic arrangements made with the C.P.R. in 1905 with reference to their line from Vancouver to Steveston, have been extended to their line from New Westminster to Eburne, which line the company having electrified is now commencing to operate. Your company has, in connection with the Chilliwack extension of the railway, acquired through one of its subsidiaries the whole of the shares of the Sumas Development Co., Ltd., which is now actively engaged in protecting by dykes about 35,000 acres of land which have heretofore been subject to periodical overflow by the waters of the Fraser River. The major portion of the cost of these works will be borne by the Dyking Commissioners, and when they are completed they will be maintained by the Commissioners at the cost of the owners of the land benefited. On the completion of the works the company will receive from the Dominion Government a bonus of about 11,000 acres of land, through the centre of which the railway will pass, and which should be very valuable. The carrying out of these works will also provide a better line for the company's railway. Your directors were fortunate enough to foresee the financial troubles which occurred throughout the world last November, and the crisis found the company with large cash reserves with which it was enabled to buy large quantities of supplies in advance, both for ordinary use and for the above extensions, at very low prices.

The Vancouver power installation continues to work satisfactorily, and has delivered all the power required in the Van-

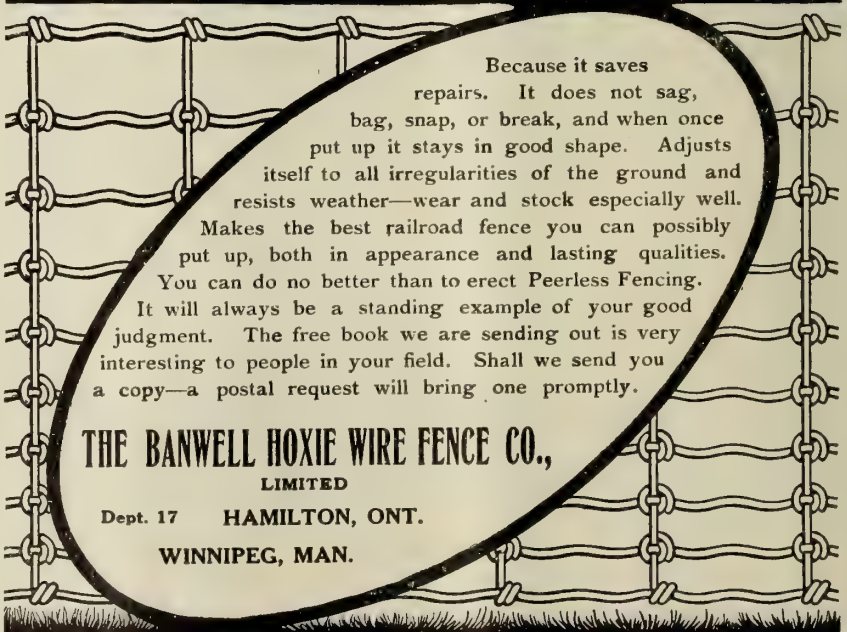
PEERLESS
The Fence that saves Expense



Because it saves repairs. It does not sag, bag, snap, or break, and when once put up it stays in good shape. Adjusts itself to all irregularities of the ground and resists weather—wear and stock especially well. Makes the best railroad fence you can possibly put up, both in appearance and lasting qualities. You can do no better than to erect Peerless Fencing. It will always be a standing example of your good judgment. The free book we are sending out is very interesting to people in your field. Shall we send you a copy—a postal request will bring one promptly.

STRONGER
Than Stock-Weather and Wear

couver and New Westminster districts. A new electrical unit of 10,500 h.p. has been installed, and came into operation during the year under review. The installation of a further unit of 10,500 h.p. has been commenced and will come into operation during 1909. Certain improvements are being undertaken tending to increase the available water power, which will then be sufficient to meet the company's prospective needs for some years to come. Your directors, fully alive to the possible requirements of the future, have from time to time had practically all the known water powers within possible distance examined by eminent engineers, and, acting on their advice that the falls of the Chilliwack River offer the best available power for future extensions of our system, have secured these water rights with the object of developing them as soon as required. A large increase in the amount of power available for Victoria has become a matter of pressing necessity, which is receiving the earnest consideration of your directors, who have had experienced hydro-electric engineers in the field throughout the summer collecting data on which to base construction plans. The large increase in the volume of business has rendered it necessary to extend the freight yards and sheds, and also the offices and terminus in Vancouver. A large block of land in the heart of the wholesale district of Vancouver has been purchased for the first-named purpose, and the new sheds will be in use before the end of the year. Land adjacent to our present offices has also been secured, and during the current year new office buildings and terminal station will be commenced. It has also been found necessary to increase the capacity for building rolling stock, and large additions to our building yards and shops at New Westminster have been completed.

The directors have much pleasure in recording their appreciation of the services of the company's General Manager, the officers and staff in British Columbia, and their satisfaction with the excellent relations which continue to exist between the company and its employes. The share of profits for the past year distributable among the employes amounts to $40,501.

Since the date of the last report £300,000 further capital has been issued to provide funds to meet the rapid development of business in all departments; the directors now propose to increase the authorized capital by £300,000, leaving the balance of unissued capital at the same figure as last year. In accordance with the stockholders' wishes as expressed at the last two annual meetings this further capital was allotted direct to them, and has constituted a very considerable bonus. Your directors will, whenever possible, continue to offer all underwriting and issues of new capital direct to the stockholders, but in consequence of representations made, which seem well founded, that this course inflicts an injustice on a large number of firms of stockbrokers who have supported the company by their influence in the past, the directors feel that in future they must stipulate that allotments and underwriting on new shares must be taken up by the stockholders through a stockbroker, to whom the usual commission will be paid by the company.

The period of J. Buntzen's engagement as Managing Director has expired, and he having decided to reside permanently in Denmark, is unable to continue in his responsible position. His colleagues are glad to inform the stockholders, however, that they have succeeded in persuading him to retain his seat on the board and to maintain his close supervision and guidance of the board's general policy in a consulting or advisory capacity. The board need not remind the stockholders that Mr. Buntzen's advice, based on his long experience as General Manager, to which much of the company's prosperity is due, is invaluable to his colleagues.

Projects, Construction and Betterments.

Brantford Street Ry.—In connection with the new franchise granted by the Brantford Ont., City Council, on Dec. 21, the company's solicitor informed the council that if the bond of $25,000 was not deposited within the specified time the franchise would not be extended. In addition to the reconstruction of the lines in the city within a year, the new agreement provides that the company will, within two years, proceed with the construction of a line from Brantford to Port Dover. The company is reported to have secured $3,000,000 of capital, sufficient to insure the carrying out of the plans of reconstruction and extension. (Jan., pg. 51.)

British Columbia Electric Ry.—The Provincial Government has given the company permission to extend its car lines through Hastings townsite, upon condition of constructing a line across the townsite on Hastings road, and extending the Powell St. line for about a mile. The work is to be gone on with at an early date.

Application is being made by the Vancouver Power Co., a subsidiary of the B.C. E. Ry. Co., to the Provincial Government for certificates in connection with further construction at the outlet of Coquitlam Lake. It is proposed to construct a further dam 650 ft. long, with a crest width of 20 ft., and a thickness at base of 430 ft., at the upper end of the main upper channel, the dam to be of sufficient height to raise the water level of Coquitlam Lake by about 60 ft., and a spillway channel about 150 ft. wide and 12 ft. deep to carry away the surplus water. (Jan., pg. 51.)

Calgary, Alta.—C. Taylor, of Edmonton, Alta., was in Calgary, Jan. 6. in consultation with the Mayor and city council with respect to the construction of an electric railway there. It is said that the street railway will be completed by July 1. A press report states that the pay-as-you-enter type of cars will be used. Mr. Taylor was asked to make certain investigations on behalf of the council in connection with the construction of the line. On Dec. 26, a car for the street railway arrived in the city, and was hauled over the portion of the tracks already laid, viz., from Second Street East to Fourth Street West. (Jan., pg. 51.)

Tenders were invited Jan. 22 for the installation of the street railway in the city, complete, and also for the extension of the civic power plant, in order to supply power to operate the railway.

Cobourg, Peterborough and Kawartha Lakes Electric Ry.—The Ontario Legislature will be asked to pass an act incorporating a company with this title for the purpose of constructing and operating by electricity, or any other motive power except steam, a railway from Cobourg to the C.P.R. near Havelock, Ont., passing through the townships of Hamilton, Haldimand, Percy, Seymour, and Belmont, and the towns and villages of Campbellford, Trent Bridge, Warkworth, Burnley, Centreton and Baltimore; also a line from Cobourg to the Kawartha Lakes, passing through the townships of Hamilton, South Monaghan, Otonabee and Smith, the villages of Cold Springs, Plainville, Bewdley, Bailieboro, Centreville and the city of Peterborough. It is also desired to have authority to construct branch lines not exceeding in any one instance 30 miles, or to go beyond the boundaries of Northumberland, Durham and Peterborough; and to issue bonds to the amount of $25,000 a mile of line constructed. D. Ewing, Cobourg, Ont., is solicitor for applicants.

Cobourg, Port Hope and Havelock Electric Ry.—Application is being made to the Ontario Legislature to incorporate a company to build an electric railway from Port Hope to Cobourg, and to Havelock, via Hope, Hamilton, Haldimand, Percy, Seymour, Belmont and Methuen, also a branch line from Cobourg to Gore's Landing, and with power to build branch lines of 30 miles each, and issue bonds up to $25,000 a mile. H. A. Ward, Port Hope, Ont., is the solicitor.

Dunnville, Wellandport and Beamsville Electric Ry.—The Ontario Legislature will be asked next session for an act authorizing the company to extend its projected line from Beamsville to Jordan Harbor, Ont. J. R. Roaf, Toronto, is solicitor for applicants.

East Ontario Counties Electric Belt Line Ry.—Application will be made to the Ontario Legislature for an act incorporating a company with this title with power to construct a railway from Lancaster tp., Glengarry county, westerly to Cornwall, thence through the townships of Osnabruck, Williamsburg, Matilda, Edwardsburg, and Augusta, to Brockville; thence to the western boundary of Elizabeth tp., and through the tps. of Young and Darling, to the boundary of Lanark, to connect with the Lanark County Electric Ry., which company was incorporated in 1897; also from Morrisburg northerly to Winchester, Kenmore and Ottawa, to connect there with the Lanark County Electric Ry.; and a branch from Kenmore to Russell, connecting with the Ottawa and New York Ry. It is also desired to have power to enter into agreements with the Cornwall Electric Street Ry., or to amalgamate with or purchase the same; and to issue bonds to the extent of $20,000 a mile of railway constructed. F. Iveson, Ottawa, is solicitor for applicants.

A meeting was held at Ottawa Dec. 30, when the project was discussed, and it was decided to proceed with the application to the Legislature for the act, and to go on with the applications for franchises from the municipalities. The line, which would have a total length of about 200 miles, would connect Ottawa with Arnprior, Renfrew, and other towns, on the way to Brockville, along the St. Lawrence River and back to Ottawa.

Hamilton Street Ry.—A press report states that the company has decided to proceed with the work of relaying the track on James St., Hamilton, Ont.

The Hull Electric Co. has under consideration the question of constructing the following extensions: From Bridge St. to Laurier Ave., Hull, Que., three miles; and from Hull station to the toll gate on Chelsea road, 4,000 yards.

Huron and Ontario Ry.—Application will be made to the Dominion Parliament for an act extending the time within which the projected lines may be constructed, and giving the company power to issue bonds to a larger amount than it is now authorized to do.

Moncton Street Ry., Heat and Power Co.—Representatives of this company have held several meetings with the special committee appointed by the city council, to discuss the question of the construction of a street railway within Moncton, N.B. Considerable progress is reported to have been made, and it is expected that a complete understanding will be arrived at, so that when the company's application for an extension of franchise comes before the Legislature, there will be no fighting to be done in committee.

Montreal and Southern Counties Electric Ry.—A public meeting of the inhabitants of St. Lambert, Que., held Dec. 29, passed a resolution asking the town council to pass the by-law granting the company a franchise in the town, and on Dec. 30 the town council approved of the by-law. W. B. Powell, representing the company, said $200,000 had been expended upon the project, and the necessary capital for construction had been secured. A vote of the taxpayers on the by-law was taken Jan. 21.

Morrisburg Electric Ry.—Application will be made to the Ontario Legislature for an act amending the company's act, chap. 130, of the statutes of 8th Edward VII, by authorizing the extension of the main line to Ormond in Winchester tp., Dundas county, and on through the tps. of Winchester, Osgoode and Gloucester to Ottawa, passing through or near Kenmore, Metcalfe and Greeley, then along the Gloucester macadamized road; and also by extending the line from St. Therese in Winchester tp., to connect with the main line in Osgoode tp. I. Hilliard, Morrisburg, Ont., is solicitor for applicants.

Mount McKay and Kakabeka Falls Ry.—A press report states that construction will be resumed on this line in the spring. When work ceased for the winter about three miles of track had been laid. The line is projected to connect Fort William, Ont., and Kakabeka Falls on the Kaministikwia River, a distance of about 20 miles. The portion of the line immediately under construction will connect the city with an amusement park, which the company is laying out about six miles from the city. G. R. Duncan, Fort William, is the company's engineer.

Ontario Inter-Urban Ry.—Application will be made to the Ontario Legislature for an act extending the time within which the company may construct the various lines which it is authorized to construct by its act of incorporation. S. S. Martin, Toronto, is solicitor for the applicants.

Ontario West Shore Electric Ry.—Application will be made next session of the Ontario Legislature for an act changing the name of this company to that of the Ontario West Shore Ry., and declaring valid a contract between the company and the Maitland River Power Co., for the supply of light, heat and power for 30 years from July 1, 1908; and confirming an agreement with the Toronto General Trusts Corporation with respect to an issue of bonds.

People's Ry.—The Ontario Legislature will be asked to pass an act incorporating a company with this title to construct a railway to be operated by electricity or

---

NOTICE.—The Canadian Pacific Railway Company will apply to the Parliament of Canada at its next session for an Act:—

I.—Extending the time within which it may construct (a) the railway which it was authorized by Chapter 52 of the Statutes of 1902 to construct from a point at or near Piles Junction, thence to Shawinigan Falls, and thence to Grand Mere; (b) the railways which it was authorized to construct by Section 3 (a), (b), (c), (d), (f), (g) and (i), of Chapter 74 of the Statutes of 1907.

II.—Authorizing it to construct a line from a point on the revision of the Crow's Nest Pass Branch in Township 9, Range 22 West 4th, in a northerly and northwesterly direction to a point of junction with the Macleod Branch of the Calgary & Edmonton Railway at or near Aldersyde, in the Province of Alberta, a distance of about 85 miles; and for other purposes.

WALTER R. BAKER,
Secretary.

other motive power from Woodstock, via Plattsville, New Hamburg, Baden, Berlin, Guelph, Fergus, and Elora, to Arthur, Ont., with a branch from New Hamburg, via Tavistock, to Stratford. Power will also be asked to construct lines connecting these lines with other electric railways, to issue bonds not exceeding $20,000 a mile of line constructed; to enter into agreements with other companies for the operation of its railways, and to acquire other railway lines or branches in the district served by its lines. J. R. Roaf, Toronto, is solicitor for applicants.

N. R. and W. A. Bugg, of Toronto, who are active in the promotion of the company, were in Stratford, Jan 7, to explain the project to the city council there. The question will likely be considered at a public meeting to be called jointly by the city council and the Board of Trade. (See Woodstock to Guelph, Jan., pg. 55.)

Peterborough Radial Ry.—Application will be made to the Ontario Legislature for an act extending the time for the completion of the lines already authorized, and granting permission to construct an extension of the line from Clear Lake through Douro, Dummer and Smith tps., or either of them, to Stoney Lake.

Port Arthur, Ont.—Provision was made in a by-law voted on at the recent municipal elections at Port Arthur, for the expenditure of $25,000 upon improvements of the street railway system within the city boundaries.

Regina Inter-Urban Tramway Co.—Application will be made to the Saskatchewan Legislature for an act incorporating a company with this title, with power to construct a tramway line without the city of Regina, but connected with the city. Mackenzie, Brown, Thom and Frame, Regina, are solicitors for applicants.

A press despatch from Regina says the project aimed at by the promoters of the company is to construct a railway from Regina to Long Lake, and a line from that point circling Regina. Surveys are reported to be in progress, and it is said that construction will be started in the spring. Among those interested in the formation of the company are: J. L. R. Parsons, W. M. Logan, J. F. Frame, of Regina; R. R. Barber, Georgetown, Ont.; C. J. Harris, Brantford, Ont.; H. H. Houser, Toronto.

St. Albert, Alta.—Application will be made to the Alberta Legislature by the municipal council of St. Albert, for power among other things to grant a franchise, exclusive or non-exclusive, for running within the limits of the town a street railway, to be operated by steam, electricity or other motive power; of granting a bonus for the construction of such a railway, and of borrowing the money required to provide the bonus by means of debentures or otherwise.

Sarnia St. Ry.—During 1908 the company completed 1.25 miles of line from uptown to the Pere Marquette Rd. station. It has been decided to construct a second track for about 2,000 ft. on Front St. during the coming season.

Sydney-East Bay Electric Tram Ry.—Application has been made to the county council of Cape Breton for a franchise for an electric railway from Sydney to the southern end of East Bay, with branches and spurs, the whole to have a length of about 17 miles. The proposal is being supported by the Cape Breton Electric Co., and the surveys made show a route along the main highway for the entire distance. If this route is adopted it will enable the line to follow the shore line of the river from near Gibbons' bridge to the Forks or Barnes Lake. There are extensive gypsum deposits at the end of the projected line, which are being developed by the Dominion Ry. and Plaster Co., which is promoting the construction of the railway. W. Crowe, K.C., explained the proposals of the promoters at a meeting of the county council at Sydney, Jan. 13, and asked that a guarantee of the principal and interest of $500,000 of the company's bonds be given. A committee was appointed to investigate the company's plans and propositions.

Toronto and York Radial Ry.—The Metropolitan Division has been placed in operation for an additional distance of 1.50 miles, viz., from Jackson's Point to Sutton, Ont. The new roadbed was recently inspected by F. H. Wyse, engineer for the Ontario Railway and Municipal Board, and an order was issued by the Board Dec. 31, authorizing its operation for traffic.

Toronto, Niagara and Western Ry.—Application will be made to the Dominion Parliament for an act extending the time for the commencement and completion of the company's railways, viz., Toronto to Niagara Falls, Ont.; Toronto to Windsor, Ont.; St. Catharines to Port Colborne, Ont. It is also desired to have power to increase the amount of bonds to be issued. Royce and Henderson, Toronto, are solicitors for applicants.

Preliminary work has been started at Niagara Falls, N.Y., in connection with the construction of this company's line, which will give a through electric railway connection with Toronto. Surveys have also been started on the New York side of the river for the approaches of the projected bridge which is to connect the railway with the electric railway on the U.S. side, and more particularly with the Buffalo, Lockport and Rochester Electric Ry., which is controlled by allied interests. The President of the International Ry., Buffalo, says the work in progress is in no way connected with that company's operations.

The Toronto Ry. has completed arrangements for the construction of large barns on the west side of Lansdowne Ave., north of Bloor St. The plans show a brick and concrete structure, 100 ft. by 350 ft., with accommodation for over 100 cars. By an arrangement with the city council new tracks will be laid on the Arthur St. line, between Bathurst St. and Ossington Ave., at the same time as the street is being repaved.

The city council has given notice that it will make application next session of the Ontario Legislature for authority to raise $135,000 by means of debentures, or to use that amount from the revenue received from the T. Ry. Co., to provide the bridges, grading, etc., required for the eastern entrance to the Exhibition Grounds without obtaining the assent of the ratepayers. The Legislature threw out a similar application in 1908, as a popular vote had declared against it.

Windsor, Essex and Lake Shore Rapid Ry.—Application is being made to the Dominion Parliament for an act extending the time for the commencement and completion of the construction of the balance of the authorized line.

Electric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Nov., 1908, $202,378; operating expenses, $124,621 (including $30,000 in respect of the estimated cost of the accident of Nov. 7); net operating earnings, $77,757; renewal funds, $14,443; net earnings, $63,314; income from investments, $13,550; net income, $76,864, against $180,851 gross earnings; $84,054 working expenses; $96,797 net operating earnings; $10,750 renewal funds; $86,047 net earnings; $11,036 income from investments; $97,083 net income for Nov., 1907. Gross earnings for 5 months ended Nov. 30, 1908, $937,589; net earnings, $433,074, against $814,290 gross earnings and $407,476 net earnings for same period 1907.

The Vancouver city treasurer recently received $2,720.19, being the percentage due the city on the company's Nov. earnings. This is $860.76 more than was paid for Nov., 1907. The amount paid to Vancouver during the 11 months ended Nov., 1908, was $20,276.66, against $14,232.51 for same period 1907.

Chatham, Wallaceburg and Lake Erie Ry.—The city council of Chatham, Ont., will apply to the Ontario Legislature for an act reviving and confirming a by-law passed in 1904, authorizing the corporation to lend $50,000 to the company, and to authorize the issue of debentures to provide the sum. It is also desired to have a by-law of 1908 confirmed, by which the interest to be paid upon the sum is fixed at 5% instead of 4%, as previously authorized; declaring the debentures issued valid and providing for the levying of rates to meet the instalments of principal and interest, as they become due.

Detroit United Ry.—It is said that the D.U.R. Co. is arranging to issue $2,500,000 of consolidated first mortgage 5% bonds in London, Eng., with the object of retiring $1,000,000 of short term notes which fall due in March, and providing funds for various purposes. The company owns the Sandwich, Windsor and Amherstburg Electric Ry. and the Windsor and Tecumseh Ry. in Canada.

Hull Electric Co.—Application will be made at the current session of the Dominion Parliament for an act authorizing the company to change the date of the annual meeting of shareholders.

London St. Ry.—Gross earnings for Dec., 1908, $20,558.16; expenses, $14,848.66; net earnings, $5,709.50; interest, $2,544.56; surplus, $3,164.94; against $19,494.24 gross earnings; $14,524.54 expenses; $4,969.70 net earnings; $2,329.80 interest; $2,639.90 surplus for Dec., 1907. Gross earnings for 12 months ended Dec. 31, 1908, $235,032.40; expenses, $167,566.72; net earnings, $67,465.68; interest, $28,454.74; surplus, $39,010.94; against $232,376.59 gross earnings; $168,024.88 expenses; $64,351.71 net earnings; $27,228.64 interest; $37,123.07 surplus for same period 1907.

Montreal St. Ry.—Gross earnings for Dec., 1908, $304,884.84; expenses, $205,818.97; net earnings, $99,065.87; city percentage on earnings, $12,275.79; interest on bonds and loans, $15,306.25; rent leased lines, $444.46; surplus, $71,039.37; against $294,640.17 gross earnings; $192,310.26 expenses; $102,329.91 net earnings; $11,275.50 city percentage on earnings; $16,719.31 interest on bonds and loans; $339.93 rent leased lines; $73,995.17 surplus for Dec., 1907. Gross earnings for 3 months ended Dec. 31, 1908, $935,071.10; expenses, $557,295.02; net earnings, $377,776.08; standing charges, $82,463.93; surplus, $295,307.15, against $902,723.02 gross earnings; $539,522.94 expenses; $363,200.08 net earnings; $83,253.80 standing charges; $279,946.28 surplus for same period 1907.

St. Thomas Electric Ry.—At a recent meeting of the City Commissioners managing the local electric railway, the question of leasing the line to the Southwestern Traction Co. was raised. The Chairman of the Commission, W. E. Idsardi, was authorized to communicate with the S.W.T. Co. on the matter, and arrange for a conference.

Toronto Ry.—Car earnings for Dec., 1908, $313,057.15, against $286,944.68 for Dec., 1907. Total earnings for 12 months ended Dec. 31, 1908, $3,531,693.68, against $3,384,788.08 for 1907.

FENCE TALK No. 1

There are two kinds of fence wire in use, the common hard drawn wire of low carbon —about 0.10. The other is the high carbon steel—0.30 carbon. The former, the low carbon, is, of course, the cheaper. It is the kind used by other fence manufacturers for reasons best known to themselves. We use both kinds. For the discerning trade that is willing to pay a cent or two more per rod, so as to save four or five times as much in completed fence, we make "Page" and "Page Empire" fences, out of high carbon wire made especially for ourselves according to our own specifications. For others we make our "Star" fences from hard drawn wire.

But common sense and simple arithmetic can show you the economy of high carbon fence as against our hard drawn or any other fence there is.

Common sense will show you that because high carbon fences are—by actual test —fully one-third stronger than the best of other fences.

Common sense shows you that the stronger fence is the better fence—because it can be stretched tighter, and will stand up to its work longer.

Page Fences, with their high carbon (tougher, harder) steel nine-gauge horizontal wires, are a third stronger than the best of the other kinds. By harsh tests, this high carbon wire stands a strain of 2,400 lbs. The "hard drawn" horizontals in the other kinds break at 1,800 lbs. strain.

Simple arithmetic will show you that the high carbon fences, costing maybe a cent more a rod than the half-as-strong kinds, is actually five cents and more a rod cheaper—because fewer posts will keep them in better shape.

Figure it yourself. Using high carbon fences, say, you can safely set the posts half as far apart again as you'd dare to with ordinary wire fencing That means two posts for high carbon fence to three for the other kind.

What does it cost to dig post holes? What do fence-posts cost? Figure out the saving for yourself—it is easy to do.

These are but part of the reasons why a railroad can't afford to buy other than the Page Fences—no matter what you pay. Let us send you a booklet (free) that shows you how to prove fence value. The Page Wire Fence Co., Limited, Walkerville, Toronto, Montreal, St. John.

"PAGE FENCES WEAR BEST"

NOTICE.—The Kootenay and Arrowhead Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railways which it has been authorized to construct by section 7 of chapter 70 of the Statutes of Canada of 1901; and for other purposes.

H. C. OSWALD,
Secretary.

Dated at Montreal, 13th January, 1909.

NOTICE.—The Manitoba and Northwestern Railway Company of Canada will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railways which it has been authorized to construct by section 9 of chapter 52 of the Statutes of 1893, and by section 2 of chapter 104 of the Statutes of 1907; and for other purposes.

H. C. OSWALD,
Secretary.

Dated at Montreal, 13th January, 1909.

NOTICE.—The British Columbia Southern Railway Company will apply to the Parliament of Canada, at its next session, for an Act—

I. Extending the time within which it may construct:

(a) the extension of its railway to the 49th parallel and the Tobacco Plains, which it was authorized to construct by chapter 55 of the Statutes of 1899;

(b) the western section of its railway and the branches to Nelson and Martin Creek as described in section 1 of chapter 52 of the Statutes of 1900.

II. Authorizing it to construct, acquire and operate a branch line from a point at or near Michel in a northerly direction through Kananaskis Pass to a point of junction with the main line of the C.P.R. at or near Kananaskis, a distance of about 120 miles; and for other purposes.

H. C. OSWALD,
Secretary.

Dated at Montreal, 13th January, 1909.

The Windsor, Essex and Lake Shore Rapid Ry. Co. is applying to the Dominion Parliament for authority to issue further bonds in connection with its railway constructed or to be constructed, so that they may amount in the whole to $25,000 a mile. It is desired that the bonds with coupons for interest may be payable in Toronto, Montreal, New York, or London, Eng., interest being at the rate of 5%, and that it be payable in Canadian currency or sterling exchange.

Winnipeg Electric Ry.—Gross earnings for 1908 $899,632.61, an increase of $37,775.19 over 1907. The city receives 5% of gross earnings, $44,981.63, and $20 for each of the 176 cars operated, making a total payment to the city of $48,501.63, against $46,252.87 for 1907. The gross earnings are made up as follows: Tickets, $697,342.05; cash fares, $198,880.80; sundry earnings, $3,409.76. Since 1902 the gross earnings have increased from $199,738.75.

Several conferences have taken place between representatives of the company and the city council to discuss a proposal to acquire the Street Ry. Co.'s property, franchises, etc. It was stated Jan. 9 that the company had signified its willingness to sell the property. D. D. Mann, representing the company, met the city council Jan. 16, and the reports state that the price asked on behalf of the company was such an amount as would pay 6% on a capitalization of about $16,000,000. At a further gathering Jan. 18, the city council decided to reject the offer, and to proceed with the construction of its own power plant. The company's offer was to sell its railway, lighting plant, gas plant, and all its assets, rights and undertakings as a going concern.

Electric Railway Notes.

The Grand Valley Ry. has received one 50-ft. double-truck car from the Preston Car and Coach Co., Preston, Ont.

The Toronto Ry.'s property in Toronto has been assessed for the purposes of local taxation in 1909 at $2,646,311, against $2,624,833 in 1908.

—. Stengel has been appointed acting Passenger Agent International Ry., Buffalo, N.Y., vice G. Chambers, who is now General Agent with charge of taxes, land, etc.

The Kingston, Portsmouth and Cataraqui Ry.'s car barns were destroyed by a fire which occurred at Kingston, Ont., Jan. 13. All the cars but two were saved. The loss is estimated at $10,000.

The Montreal St. Ry. recently acknowledged the receipt of $1 conscience money. It would be of interest to learn how far the "pay-as-you-enter" system may stimulate a troubled conscience.

E. A. Bredenberg, a London, Eng., mining engineer, who was injured in the accident on the Ottawa Electric Ry. Britannia line, in May, 1908, and had a leg amputated, was awarded $30,000 damages Jan. 12.

R. J. Fleming, General Manager Toronto Ry., has also been appointed General Manager of the Electrical Development Co. of Ontario, Ltd. The affairs of both companies will be administered from the Toronto Ry. Co.'s offices.

The Court of Review, sitting in Montreal, has confirmed the judgment of Recorder Weir, directing the Montreal Street Ry. to pay to the city $39,691.80 for taxes alleged to be in arrears on rolling stock. The company will make a further appeal to a higher court.

The Toronto Ry.'s car shops have been closed except for repairs. The General Manager says there are all the cars on the routes that can be handled on the existing lines, and that until the question of the construction of additional lines is finally settled, it would be useless to build more cars.

The Quebec Courts have reserved judgment on some points raised in the action brought by the Montreal City Council to recover from the Montreal Street Ry. half the cost of the clearing of snow from streets used by the company. Among other things the company alleges that the work was not properly done, and cost more than was necessary.

A New York despatch, Jan 8, says T. A. Edison has invented a storage battery for power propelled cars which will enable them to run 100 miles continuously. The batteries are placed under the seats of the cars, and they can be sufficiently charged at existing power houses to run all day. No new power houses or poles or tracks will be needed.

The Cape Breton Electric Co. is issuing a series of illustrated advertisements in the local press, showing how accidents are likely to happen on street railways, at crossings and other points. The series will doubtless serve a useful purpose in directing public attention to the cases which frequently occur, when a little exercise of thought and care would prevent a catastrophe.

By-laws in favor of the operation of street cars on Sundays were carried at the recent municipal elections at London, St. Thomas and Port Stanley, Ont. The question will probably be raised during next session of the Ontario Legislature, as it is held that a section in the Ontario Railway Act prohibits towns in which street cars were not being operated on Sundays at the time of the passing of the act from securing the privilege.

The Edmonton Radial Ry. has ordered 4 double-truck cars, to be built on the "pay-as-you-enter system," from the Preston Car and Coach Co., Preston, Ont. Following are the chief particulars: Length of body, 28 ft.; width over all, 8½ ft.; "Pay-as-you-enter" platforms at each end, with P.C. and C. Co.'s patent alternate sliding door arrangement on the end bulk-head; interior finish, stained birch; automatic folding door on each side of each vestibule; bottom framing, combination steel and wood; drop platform; single steps; roof with bullnose extending to points of vestibules; P. C. and C. Co.'s positive sand boxes; short wheel base trucks; seating capacity for 44 passengers, with 2 longitudinal seats at each end, and 18 walkover seats of spring cane. The cars will be supplied with double-end equipment and four G.E. 80 motors.

Grain Elevator Notes.

The Alberta Pacific elevator at Red Deer, Alta., recently shipped a carload of wheat to Mexico, via Vancouver, B.C.

A press report states that the Atlas Elevator Co. will erect 25 elevators along the G.T. Pacific route during the year.

Three elevators are under construction at Outlook, Sask., a town which commenced its existence in Aug., 1908, when the C.P.R. branch line from Moose Jaw reached the place.

The Vancouver Milling and Grain Co.'s elevator was destroyed by fire Jan. 4. The loss is estimated to reach $100,000. It is said to be the company's intention to rebuild as soon as possible.

The Western Milling Co.'s elevator and warehouse at Calgary, Alta., together with about 25,000 bush. of wheat and 3 cars of flour, were destroyed by fire Jan. 2. The loss is estimated at $50,000, which is covered by insurance.

A deputation representing various Ontario milling interests waited on members of the Dominion Government Jan. 8, regarding the question of mixing and grading at terminal elevators. The advisability of Government ownership of terminal elevators was also urged.

In the Saskatchewan Legislature, Mr. Langley, M.P.P. for Redberry, Sask., in a speech Jan. 6, advocated the empowering of rural municipalities to erect, own and operate grain elevators for loading, cleaning and storage purposes, but prohibiting them from dealing in grain.

The new agreement which was signed Dec. 15 between the C.P.R. and the city of Fort William, Ont., provides, among other things, that the company shall provide a cleaning elevator at the port within the next three years. At present the cleaning elevator at the head of the lakes is at Port Arthur, and is in private hands.

The proposal to ship Alberta grain westward to Pacific coast ports has been endorsed by the Vancouver Board of Trade. The concensus of opinion is that though the scheme is not likely to be carried out in the immediate future, preparations should be commenced at Pacific coast ports for the construction of elevators and other grain handling facilities.

The Grand Trunk Pacific Elevator Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $1,000,000 and office at Winnipeg, to lease and operate the terminal elevator now under construction at Mission River, Fort William, Ont. The provisional directors are: F. W. Morse, Vice-President and General Manager G.T.P.R., Montreal; J. E. Dalrymple, Assistant Freight Traffic Manager G.T.P.R., Winnipeg; H. H. Palethorpe, W. K. Chandler, T. Gillespie, J. A. Stevenson, and H. Phillips, Winnipeg.

The result of the recent conference of the Premiers of Manitoba, Saskatchewan and Alberta, as to the owning and operation of elevators by the provincial governments, was expected to be announced at the end of Jan. Premier Scott, of Saskatchewan, is reported to have said, at Regina, regarding a dispatch from Winnipeg, Jan. 3, to the effect that the proposals had been vetoed owing to the heavy financial obligations involved, that there was no truth in such a report. Premier Roblin, of Manitoba, estimated recently that about $14,000,000 would be necessary to acquire the elevators by purchase, and stated that such a procedure was unlikely, but that some system of government control was more probable. The full reply of the Premiers to the Grain Growers' Association has been drafted and was signed by Premier Roblin Jan. 16, after which it was sent to Premiers Scott and Rutherford in turn.

The Thunder Bay Elevator Co., has let a contract for the construction of an elevator, with 1,500,000 bush. capacity, at Port Arthur, Ont., to the Barnett-McQueen Co., Fort William. The site on which the elevator will be constructed is on the east boundary of Port Arthur, about midway between the dual ports. The contract price is stated to be $550,000, including the cost of site and trackage, but excluding the cost of a concrete dock which it is proposed to construct as a part of the plant. The plans show three unloading tracks, each with capacity for three cars, and there will be nine pits, each with a capacity of 2,000 bushels. The handling machinery will enable 200 cars to be dealt with each 10 hrs., and the grain to be loaded into vessels at the rate of 50,000 bush. an hour. The plant is to be ready for operation by Sept. 15. The officers of the Thunder Bay Elevator Co. are: President, W. H. McWilliams; Vice-President, G. R. Crowe; Secretary-Treasurer, C. Piper.

MARINE DEPARTMENT.

The All-Red Route.

On the subject of the proposed all-British route to the Antipodes by way of Canada, Lord Strathcona recently said: "Another point upon which I wish to touch is the question of steamship communication, and especially that part of it relating to the opening of the route between Great Britain, Australia and New Zealand by way of Canada. I am quite prepared to admit that a great deal is being done by the existing companies in that direction, but we want something more. Fast communication between the United Kingdom and Canada means a great deal to the relations of the two countries. It must inevitably lead to more emigration, more general passenger travel, and more business. There is a splendid train service between the Atlantic and Pacific through Canada, over the C.P.R.—which is capable of acceleration if required; and before very long the G.T. Pacific and the Canadian Northern Railways will be in operation from one end of the Dominion to the other, opening up new country for settlement and for commercial enterprise. A line of steamers is already plying regularly across the Pacific to China and Japan, largely owing again to the initiative of the very go-ahead C.P.R.; and also a line to Australia and New Zealand. But it cannot be questioned that better and faster steamers on both the Atlantic and Pacific portions of the route would benefit very considerably the different parts of the Empire concerned, while in all probability they would soon pay their way. If the necessary capital cannot easily be obtained by the existing companies, and investors are not ready to face the risks that are believed in some quarters to be involved in the provision of new fast services, the countries to be benefited must step in and take the responsibility. The funds needed might be provided by means of a subsidy, by a direct guarantee of the interest on the capital, or, if thought more advisable, by advancing the necessary funds at a reasonable rate of interest, such as was done in connection with the building of the magnificent Cunard liners, the Lusitania and the Mauretania. Surely, if this was considered desirable in order to promote communication with another nation which is not British, it is worth while to adopt a similar policy in bringing closer together some of the leading countries which are part and parcel of the great Empire to which we belong, and which, I trust, we all desire to perpetuate."

Proposed Grain Clearing House.

At a meeting of the Dominion Marine Association Executive Committee at Montreal, Dec. 31, 1908, the proposals for the installing of a clearing house for grain cargoes were discussed, and unanimously

---

NOTICE is hereby given that application will be made by the Grand Trunk Pacific Railway Company to the Parliament of Canada, at its next session, for an Act to ratify and confirm an agreement, dated the 22nd day of December, 1908, made between the Grand Trunk Pacific Railway Company and His Majesty King Edward the Seventh, represented by the Treasurer of the Province of Ontario, entered into in accordance with the provisions of sections 3, 20, 21 and 22 of an Act passed by the Legislative Assembly of the Province of Ontario, being 4 Edward VII, chapter 18.

D'ARCY TATE,
Assistant Solicitor,
Grand Trunk Pacific Railway Company.

Dated at Montreal, this 7th day of January, A.D. 1909.

THE ONLY HOTEL THAT COMMANDS AN UNRIVALLED VIEW OF BOTH FALLS

HOW TO REACH THE CLIFTON HOTEL

Arriving on Grand Trunk Railway or Wabash Rd., at Niagara Falls, Ont. Hotel bus meets all trains or take trolley to hotel—7 minutes.

Arriving on Michigan Central Rd., Canadian Pacific Railway, at Victoria Park station—Hotel bus meets all trains, only three minutes' walk from station to hotel.

International Railway (trolleys), connecting with Niagara Navigation Co. steamers at Queenston, to or from Toronto, pass the door.

IMPORTANT

Guests coming to the Hotel should see to it that they are taken to The Clifton Hotel, CANADIAN SIDE, and also that their mail is addressed "Care of The Clifton Hotel, Niagara Falls, CANADA." To insure prompt delivery, don't forget to make CANADA plain in the address.

The "DILLON" is a Hinge-Stay fence made of extra quality wire, either all No. 9, or lighter if required.

"MONARCH" fence is made of No. 9 Hard wire throughout, and is of the regular straight-stay style.

ENQUIRY SOLICITED

The Owen Sound Wire Fence Co. LIMITED
OWEN SOUND, ONTARIO

endorsed. It was given as the opinion of several of those present that such a plan would not only save about 4 days in the loading, but would tend to obviate the trouble over shortages.

A. A. Wright, President, and F. King, Secretary-Treasurer, of the Association, were instructed to attend a meeting of all the interests concerned, which was held at Winnipeg Jan. 7. The object of the meeting was to arrange if possible for the establishment of a clearing house, The representatives of the terminal elevators declared themselves as opposed to the proposal, so far as a clearing house for grain was concerned. An arrangement was, however, made for the establishment of a clearing house for documents at Winnipeg, whereby the loading at Fort William and Port Arthur will be greatly facilitated. Under this arrangement shippers will pass their documents through the clearing house, and the loading will be concentrated in as small a number of elevators as possible. A committee was appointed to arrange the details of the scheme.

The Association has decided to take the necessary steps to have removed from the grain bill of lading the clause whereby the carrier assumes liability for shortage in outturns of cargoes. It was resolved to adopt the flax seed clause, which limits the liability to one half-bushel per thousand, and agrees to look for no payment for over-runs. The Lake Carriers' Association was asked to join with the Dominion Marine Association, and the matter was discussed at its annual meeting at Detroit, Mich., Jan. 20.

Atlantic and Pacific Ocean Marine.

A report of a conference in Melbourne, Australia, Jan. 5, states opinions expressed there were strongly in favor of the proposed all-British route via Canada.

The Furness Line's s.s. London City arrived at St. John's, Nfld., Jan. 4, with a fire in her hold, which had been burning for 5 days. The cargo consisted chiefly of phosphorous.

Joint arrangements are reported to have been made whereby the Norddeutscher Lloyd, Holland American, Hamburg and White Star Lines, will run one vessel each, weekly from Antwerp to Montreal.

The Cairn Steamship Line is reported to have placed an order at Wallsend-on-Tyne, Eng., for a steamship for the St. Lawrence route, to take the place of the s.s. Latona, which was run down on her first voyage.

Andrew Weir & Co., owners of the steamships Suveric and Kumeric, will, it is stated, build two steel cargo steamers for the Puget Sound and Victoria trade. They will be operated by the Bank Steamship Line.

Current reports credit the G.T.R. with having made a working agreement with the White Star Line in connection with the inauguration of its St. Lawrence service in conjunction with the Dominion Line, in the spring.

An arrangement is reported to have been made, whereby the C.P.R., Dominion, Allan and other steamship lines operating across the Atlantic, will make a series of international wireless meteorological reports, commencing with Feb.

It was recently announced in Montreal that the General Transatlantic Steamship Co. of France has decided to run a service between Havre, France, and Montreal, with four vessels, named Chicago, La Gascoigne, La Touraine and La Bretagne.

The number of sailings from St. John, N.B., from the commencement of the winter season of navigation to Dec. 31, 1908, was 21, against 18 for the similar period of 1907. The values of outward cargoes were $3,783,246, against $3,754,418 for the periods of 1908 and 1907, respectively.

The Elder-Dempster Co.'s s.s. Dahomey, from Newport News to Vera Cruz, has been beached at Nassau, in a leaking condition. She was built at Middlesbrough, Eng., in 1891; her dimensions are: Length, 312 ft.; breadth, 40 ft.; depth, 24½ ft.; tonnage, 2,850 gross, 1,828 net.

A cablegram from Christiania, Norway, states that a buoy containing a notice that it was set adrift near Cape Bathurst, 284 miles northeast of the Mackenzie River, July 24, 1900, has been driven ashore at Soeroe. The conclusion arrived at is that it has been carried across the Arctic Ocean and between Greenland and Spitzbergen.

P. F. Fraser, captain of the Quebec Steamship Co.'s s.s. Bermudian, has been presented by the U.S. Government with a gold watch; J. F. Walsh, formerly second officer, with a gold watch; and four seamen of the same vessel with gold medals, for rescuing the crew of the schooner Mary L. Newhall, in Feb., 1908, when she was discovered dismasted and in a sinking condition, 260 miles northwest of Bermuda.

The s.s. Stikklestad, which sailed from Glasgow, Scotland, Nov. 23, 1908, for Sydney, N.S., has been given up as lost. She was in charge of Capt. Axelsen, who is well known in Sydney, N.S. The s.s. Falco, which left Glasgow five days later, arrived at Sydney, N.S., recently, without having sighted her. The former vessel was chartered to the Dominion Iron and Steel Co., and the latter to the Nova Scotia Steel and Coal Co.

W. Becket Hill, Managing Director Allan Steamship Line, Liverpool, Eng, whose death was announced in our Jan. issue, joined the Allan Line in 1867 as Freight Manager, and while still at Liverpool, he designed the first twin-screw tug, which was such a success that both it and its two successors were purchased by the Admiralty. The building of big twin-screw ocean-going steamers on the same principle and the use of higher pressures was his next achievement. He was thus the initiator of the immense twin-screw mail boats which opened a new era in speed and safety. Allan Bros. ultimately made him a partner, with the control of the London house. The New York and Canadian business in Leadenhall St. forms a striking monument of his administrative power. He did much to settle the great dock strike of 1889. Though a keen supporter of the strikers' demand for the abolition of the middleman, he was one of the founders of the Shipping Federation. He gave evidence on the subject before the Labor Commission, and was foremost in obtaining from the Board of Agriculture the removal of restrictions onerous to the ocean cattle-carrying traffic, while the shipping interest is indebted to him for concessions from the Board of Trade in the measurement of cattle deck tonnage. He likewise exposed the anomalies of the incidence of the light dues.

Maritime Provinces and Newfoundland.

N. Randell has been appointed Government wharfinger at Sturgeon, P.E.I.

The crew of the Liverpool, N.S., schooner Annie, which was wrecked near Honduras in Nov., 1908, were landed in New York recently, and proceeded to their homes.

Capt. W. R. Lugar is delivering a series of free lectures in Halifax on matters connected with ships and navigation, at the instance of the Dominion Marine Department.

The schooner W. W. McLaughlin, of St. John, N.B., bound for New York, was driven ashore at Cape Cod Jan. 8. She was subsequently floated and towed to Province Town. She was not seriously damaged.

The schooner J. Arthur Lord, of St. John, N.B., struck on the Stone Horse Shoal during squally weather, Jan. 8. She was floated and towed to Vineyard Haven, Mass., where she was beached in a sinking condition.

The s.s. Turret Bell, on which salvage work has been proceeding for some time, has been successfully floated off the rocks near St. Peter's, P.E.I., and was reported early in Jan. as floating in 7½ ft. of water.

W. H. Price, Assistant General Passenger Agent Eastern Steamship Co., Boston, Mass., having resigned, the position has been abolished, and its duties incorporated with those of the General Passenger Agent.

The schooner Argina was launched at Shelburne, N.S., recently by J. McGill, this making the seventh launched during 1908. The dimensions of the latest vessel are: Length, 98 ft.; breadth, 24 ft.; depth, 24 ft.; tonnage, 98 register.

An order-in-council was passed Jan. 15 amending the order of Nov. 28, 1908, which prohibited ships leaving U.S. ports carrying live stock from touching at Canadian ports, by adding after the words "live stock," the words "with the exception of horses."

The crew of the Newfoundland schooner Red Gauntlet, which was wrecked while bound from Portugal to St. John's, Nfld., were landed at Halifax, N.S., Jan. 9, from the Allan Line s.s. Grampian. They were rescued in the open sea by a French steamer.

The Halifax and Inverness Steamship Co., of Halifax, N.S., has under construction at Mahone Bay, a steamer of about 130 ft. long, for service between Halifax and Cape Breton and Prince Edward Island ports. It is understood that a subsidy has been applied for.

Tenders for the construction of an extension to the breakwater at Tennycape, N.S., were received by the Dominion Public Works Department, but we are advised that no action has been taken on the lowest tender, and that it is probable the work will not be immediately proceeded with.

The St. John Forwarding Co.'s annual meeting was held at St. John, N.B., Jan. 12. Following are the officers and directors for the current year: President, H. H. McLean, M.P.; other directors, A. Gibson, A. Gibson, Jr., J. S. MacLaren, G. W. Massey; Secretary-Treasurer and Manager, A. Rowley.

The bark E. A. O'Brien, which put in at Barbados recently in a damaged condition, has been sold for the benefit of the owners. She carried no insurance. She was built at Noel, N.S., in 1891, her dimensions being: Length, 185 ft.; breadth, 37.4 ft.; depth, 21.3 ft.; tonnage, 1,037 register. G. A. Slawenwhite, of Mahone Bay, N.S., was the managing owner.

An action has been taken in the Supreme Court to compel delivery in Sorel, Que., of the cargo of the schooner H. J. Logan, at present berthed at Halifax, N.S. The vessel, bound from Mobile to Sorel towards the end of 1908, met bad weather, and was considerably damaged. She put in at Halifax, where repairs were made, but in the meantime navigation of the St. Lawrence was closed.

The Valley Steamship Co., Annapolis, N.S., is reported to have ordered a steamboat to be constructed by J. McGill, Shelburne, N.S. Her dimensions will be: Length, 107 ft.; breadth, 22 ft.; depth of hold, 9 ft. She will be fitted with electric light, steam steering gear, and have a powerful searchlight. It is intended to operate her on the Annapolis-St. John route, in place of the Granville, which has been sold to Conners Bros., Black River, N.B. The Granville will be run between St. Andrews and St. John when the new vessel is ready for service.

The Sincennes-McNaughton Co., Ltd., has been awarded $1,500 as damages for a

breach of agreement by the owners of the steamboat Dandy, of Sorel, Que. The Sincennes-McNaughton Co. sold a tug on the condition that so long as she remained in the condition in which she was sold, or retained any of her essential parts, she should not be operated below the Lachine locks except for the purpose of coaling at Montreal, under a penalty of $20 for each trip. The machinery of the tug was placed in the Dandy, and she was operated between Sorel and Montreal in competition with the plaintiff's boats.

Canadian Northern Quebec Railway.

NOTICE is hereby given that application will be made to the Parliament of Canada, at the next session thereof, for an Act extending the times for commencement and completion of the following lines of railway, namely, the lines authorized by—

(*a*) Section 2 of chapter 73 of the Statutes of 1907, namely, in brief: Rawdon to Lake Archambault;

(*b*) Section 3 of chapter 70 of the Statutes of 1887, namely: from Quebec, or a point on the Quebec & Lake St. John Railway, to James Bay, with a branch to Chicoutimi, and from thence to the St. Lawrence near Tadousac.

GERARD RUEL,
Chief Solicitor.

Toronto, 31st Dec., 1908.

DIVIDEND NOTICE.

The Northern Navigation Company of Ontario, Limited. Notice is hereby given that a dividend of eight per cent. per annum, for the year ending Dec. 31st, 1908, has been declared upon the paid-up capital stock of the company.

The same will be payable on January 20th, 1909, to shareholders of record January 14th, 1909.

The transfer books will be closed from the 14th to the 26th of January, both days inclusive.

By order of the board.

H. H. GILDERSLEEVE,
Manager.

Toronto, Jan. 7th, 1909.

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10 W., 4th Meridian(generally)	8.00 " "
Map No. 5—South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre.

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160 Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
"	"	9.00	"	"	215.70	"	"	"	73.46	"	"	180.00
"	"	10.00	"	"	239.70	"	"	"	81.62	"	"	200.00
"	"	11.00	"	"	263.60	"	"	"	89.78	"	"	220.00
"	"	12.00	"	"	287.60	"	"	"	97.96	"	"	240.00
"	"	13.00	"	"	311.55	"	"	"	106.10	"	"	260.00
"	"	14.00	"	"	335.60	"	"	"	114.32	"	"	280.00
"	"	15.00	"	"	359.50	"	"	"	122 44	"	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 525,000 acres of selected lands in Manitoba and Saskatchewan which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

HAMILTON, ONT. MONTREAL, QUE.

Province of Quebec Marine.

A. Russell has been appointed Port Warden for Quebec harbor.

A Montreal press report, dated Jan. 18, states that a large shipyard and dry dock is being projected there by Montreal and Toronto people.

The tender of Quinlan, Robertson and Haney, Montreal, for closing the gap in the Carillon dam, has been accepted by the Department of Railways and Canals.

The Dominion Public Works Department has decided not to enter into a contract at present for the construction of a breakwater at Longue Point, for which tenders were recently invited.

We are advised that no action has been taken on the lowest tender recently received by the Dominion Public Works Department, for the construction of a wharf at Three Rivers, and that it is improbable the work will be immediately proceeded with.

The centenary of steam navigation in this country will be celebrated this year. It is claimed that the steamboat Accommodation, built by Hon. J. Molson, was the first steam vessel to be operated outside Great Britain entirely built in this continent. The Accommodation was built at Montreal, and her engines and boilers, etc., made at Three Rivers, Que.

The St. Maurice River Boom and Driving Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $25,000 and office at Three Rivers, Que., with power, among other things, to build, purchase or otherwise acquire and operate steam and other vessels, wharves, docks, etc. The provisional directors are: R. F. Grant, J. M. Dalton, A. Baptist, V. Burrill, Three-Rivers; G. Chahoon, Jr., Grandmere; and J. H. Biermans, Shawinigan Falls, Que.

The Canadian General Development Co., Montreal, has ordered from the Montreal Locomotive Works, a 4-yard dipper dredge, capable of working in depths of from 8 ft. to 30 ft., and dumping the dipper at a maximum radius of 45 ft. from the centre. The hull will be of steel, about 90 ft. long by 31 ft. wide, and 9 ft. deep at the front end in the centre. Accommodation will be provided for living, with the necessary galley, storeroom, etc., and the vessel will be fitted with electric light. Construction of this nature is an entirely new departure for the Montreal Locomotive Works.

Ontario and the Great Lakes.

Capt. A. Hicks, a well-known navigator of the Bay of Quinte, died Jan. 3, at Picton, Ont., aged 59.

Capt. W. Craig, a well-known lake navigator, who retired from the service some time ago, died at Goderich Jan. 18.

W. A. Esson, a former Manager of the Toronto Ferry Co., now of Chicago, Ill., was married in Toronto, Jan. 2, to Miss Boyd.

A report is current that the Government dry dock at Kingston is about to be taken over by private interests, but enquiries have so far failed to confirm this.

W. F. Toner has been appointed Harbor Master at Collingwood, succeeding H. Foreman, who has been appointed Measuring Surveyor of Shipping at that port, vice G. Watson, resigned.

The steam barge Tecumseh was burned to the water's edge at Goderich, Jan. 16. She was insured for $15,000, which is said to be about two-thirds of the loss sustained. The owners are given as Trethewey & Son, of Goderich.

The officers and directors of the Turbine Steamship Co., for the current year, are: President, J. C. Eaton; other directors, J. Moodie, J. Knox, A. Leitch, Hamilton; C. R. Simpson, H. McGee, J. J. Vaughan, Toronto; Manager, J. A. Goodearle, Toronto.

Imperial service medals have been awarded to the following Government employes for long and meritorious service: F. H. Hill, lighthouse keeper, Lancaster, Ont.; F. Lay, lockmaster, Welland Canal; G. Shannon, Grosse Point lighthouse, Valleyfield, Que.

During the navigation season of 1908, a total of 1,885 vessels arrived at and departed from Fort William, the aggregate tonnage being 3,530,450 tons; a decrease of 4 in the number of vessels for 1907, but an increase in the tonnage of about 1,300,000 tons.

L. Henderson, who has been for about 10 years Local Manager, Montreal Transportation Co., at Kingston, having succeeded his father in the position, has been appointed General Manager of the company, with headquarters at Montreal, succeeding the late J. A. Cuttle.

An order-in-council was issued recently, amending subsection b, art. 28, of the Canadian Rules of the Road for the Great Lakes, which provides that a danger signal shall be several short and rapid blasts, not less than four, of the whistle or syren of a steam vessel, to read several short and rapid blasts of the whistle not less than five.

The Muskoka Lakes Navigation Co.'s annual meeting was held at Toronto recently, when a satisfactory report of the past season was made. Following are the officers and directors for the current year: President, J. S. Playfair; Vice-President, F. J. Phillips; other directors, H. C. McLean, J. Playfair, M. S. Wilson, R. A. Lucas; Manager and Treasurer, W. F. Wasley.

The Farrar Transportation Co.'s annual meeting was held at Collingwood Jan. 12. Following are the officers and directors for the current year: President, D. D. Lewis, Sault Ste. Marie, Ont.; Vice-President, T. I. Thompson, Owen Sound; Managing Director and Secretary-Treasurer, G. E. Fair, Collingwood; other directors, E. R. Wayland, W. E. Allen, W. R. Rowland, E. Stubbs, M. Snetsinger, C. A. Farrar, and F. Scott.

Press reports state that plans are practically complete for the purchase of the Detroit and Buffalo Steamship Co. by the Detroit and Cleveland Navigation Co. The price stated as being paid is $1,000,000, of which $900,000 is to be in cash. The capital stock of the new company, it is said, will be increased by $4,000,000. The companies operate on Lakes Erie and Huron, the latter making connections with the Duluth, South Shore and Atlantic Ry.

Forwarders Ltd., a company recently incorporated under the Dominion Companies Act, with a capital of $500,000, and office at Kingston, is reported to be about to take over Moore's elevator there, and to order suitable steam and other barges for the transportation of grain from Kingston to Montreal. W. G. Craig, Kingston, is President of the company; others interested being W. H. Comstock, —. Mallory, Brockville; —. Schmidt, Pembroke, and M. J. Galvin, Detroit, Mich.

The U.S. lake survey reports the levels of the Great Lakes for Dec., 1908, in feet above tidewater, as follows: Superior 602.01; Michigan and Huron, 580.16; Erie, 571.38; Ontario, 245.49. As compared with the average December levels of the past 10 years, Superior is 8½ ins.; Michigan and Huron, ¾ in.; Erie, 10½ ins.; and Ontario 10 ins., lower. The anticipated levels during Jan., 1909, are: Superior, 4 ins.; Michigan and Huron, 1¾ ins., lower; Erie, ¼ in., and Ontario, 1½ ins., higher than those of Dec., 1908.

We are advised that the vessel being built at Detroit, Mich., for the Inland Navigation Co., Hamilton, is a steel bulk freight steamer, 500 ft. long over all, 56 ft. beam. She will be equipped with triple expansion engines and Scotch boilers, and will have patent water-tight steel hatch covers, automatically operated; the hatches will be 12 ft. from centre to centre; construction will be on the modern arch principle, with vertical side tanks, and the general equipment, and passengers' and crew's quarters, will all be modern in every respect. She will be ready for operation early next season.

The transfer of the Hamilton Steamboat Co. to the interests which control the Turbinia Steamship Co., viz., the T. Eaton Co., Ltd., Toronto, was consummated at a special meeting held at Toronto Jan. 15. The two companies will not, as stated in the daily press, be merged, but will be operated independently as hitherto. The Hamilton steamboat owns two vessels, the Macassa, built at Port Glasgow, Scotland, in 1888, and reconstructed at Collingwood, Ont., in 1905, and the Modjeska, built at Yoker, Scotland, in 1889. Following are the new officers and directors: President, J. C. Eaton; Vice-President, R. Y. Eaton; Secretary-Treasurer, J. J. Vaughan; Manager, W. E. Bishop; other directors, H. McGee, C. Booth, and A. McCrea. The former officers and directors were: President, Æmilius Jarvis; Vice-President, H. G. Nicholls; Secretary, C. E. A. Goldman; Manager, W. E. Bishop; other directors, A. Angstrom, A. Bruce, K.C., and H. B. Whitton.

Manitoba, Saskatchewan, Alberta, Etc.

The North West Ranching and Packing Co. is applying to the Alberta Legislature for an act of incorporation with power among other things to own and operate steam tugs and other vessels in connection with its business, with headquarters at Edmonton, Alta.

The Commissioner of the Hudson's Bay Co. reported recently that he had received information that the company's barque Stork, which was reported from London as overdue from James Bay, was wrecked at Lisbon Shoals, Hudson Bay. The crew and passengers were saved and reached Moose Factory safely. The captain and a portion of the crew reached the railway line, and are proceeding to London.

The Northern Fruit Co., Ltd., has been incorporated under the Manitoba Companies Act, with a capital of $50,000 and office in Winnipeg, to carry on a general fruit business, and in connection therewith to own and operate wharves, docks, etc., and to build, purchase or otherwise acquire and operate steam and other vessels, and other means of transportation, except that nothing in its act of incorporation shall be held to authorize it to carry on the business of a railway company. W. K. and F. P. Nash, H. B. Finch, Grand Forks, N.D.; F. H. Decamp, Winnipeg; and F. M. Waldron, Saskatoon, Sask., are provisional directors.

A small steamboat has recently been shipped by the Polson Iron Works, Toronto, to Craven, Alta., where it has been laid up for the winter, and will in the spring be transported to McKillop's Landing, or some other convenient point on the Last Mountain Lake, for use by the Dominion Government in dredging and clearing harbors at various points on the lake where towns and settlements have been located. Navigation on this lake has been going on for about four years, a steamer owned and operated by W. Pearson Co., of Winnipeg, with capacity for 150 passengers, and freight, plying between Port Hyman, Lake View Park, Wilkes Bay, Arlington Beach, Watertown and other points.

B.C. and Pacific Coast Marine.

Navigation on the Skeena River was brought to a standstill during the early part of Jan., owing to a spell of cold weather.

Press reports state that the C.P.R. purposes building barges for use on B.C. inland waters in the conveyance of loaded cars of fruit, etc., to facilitate shipment.

The steam tug Lottie N., owned by J. E. Gilmore and others, of Prince Rupert, was sunk at Port Essington, by floating ice. It is anticipated that she will be refloated without much damage.

T. H. Horne, Victoria, has deposited with the Dominion Public Works Department, plans of wharf, which he proposes to construct there, and has applied to the Governor-General in Council for approval.

The North Vancouver Ferry Co. is moving to restrain the North Vancouver Motor Boat and Transportation Co. from carrying passengers across Burrard Inlet between Vancouver and North Vancouver.

The Steamer H. C. Henry, Ltd., has been incorporated under the B.C. Companies Act, with a capital of $10,000, to build, equip and manage steam and other vessels, and to carry on the business of shipowner in all its branches.

The C.P.R., as owners of the s.s. Princess Royal, and the owners of the Japanese s.s. Fukui Maru, have entered actions against each other for damages sustained in the collision between the two vessels, Nov. 8, 1908. The C.P.R. claims $15,000.

The Vancouver Colonization Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $50,000, to act as a colonization company, and in connection therewith to build, purchase or otherwise acquire steam and other vessels, etc.

The Victoria Board of Trade Council has been assured by Capt. J. W. Troup, Superintendent C.P.R. Pacific Coast Service, that the fortnightly service with the Queen Charlotte Islands will be continued throughout the winter and not reduced to a monthly service as was feared.

The Dominion Marine Department has issued a descriptive list of the beacons in the North Arm, Fraser River, giving their locations, height, color and description, with comments on the positions, etc. Two of the five Dolphin lights, numbered 3 and 4, are quoted as missing.

The C.P.R. s.s. Princess Charlotte, which was described in our Aug., 1908, issue, and illustrated in our last issue, arrived at Victoria, Dec. 30, from Glasgow, Scotland, by way of Cape Horn. Calls for coaling purposes were made at Teneriffe, Montevideo, Coronel, and Callao. She was in charge of Capt. C. Troup.

Various press reports have been current recently, supposed to emanate from London, Eng., regarding the transfer of Esquimalt from Imperial to Dominion control. These are generally misleading. Esquimalt fortress and works have been maintained since 1906, by the Dominion. Regarding the formal transfer of the docks, it has been ascertained that it can only be accomplished by a special act, and it is hoped to introduce a bill embodying the terms of such transfer into the British Parliament during the next session.

It is said that tenders for the repairs considered necessary on the C.P.R. s.s. Glenfarg, as a result of its grounding in the Vancouver Narrows in Dec. last, amount to nearly $30,000. The repairs include the renewal of 12 plates, the removal and fairing of 10 plates, and the setting up of 73 frames and floors. If it is decided to make permanent repairs, the work will be carried out at Esquimalt, but it has been suggested that temporary repairs only may be undertaken to enable the vessel to carry out the terms of the time charter under which she is being operated by the C.P.R.

Capt. J. W. Troup, Superintendent C.P.R. Pacific Coast Service, is reported to have stated recently on his return from a conference with the western lines management at Winnipeg, that all the C.P.R. vessels engaged on the Pacific coast will be equipped with wireless telegraph apparatus; and also that among the recommendations which have been forwarded to Montreal for consideration is the building of two steamships for the Victoria-Prince Rupert service. We were officially advised Jan. 11, that it had not then been decided to build a steel passenger steamer for the B.C. Coast, but that the matter was under consideration.

A London, Eng., press correspondent, who recently visited Prince Rupert, is quoted as saying: "The harbor is the finest in Canada. It is formed by a perfectly protected curved inlet 16 miles long, a mile broad, and 25 fathoms deep on an average. The bottom has good holding for anchors, and there is 30 ft. of water at the lowest tide, by the temporary wharves. The nature of the approach from seaward has been criticized in certain quarters, but all such criticisms have been finally disposed of by Capt. J. F. Parry, R.N., of H.M.S. Egeria, which is making the admiralty survey of the entrance. He says: 'It is no breach of etiquette on my part to state that the result of the survey is entirely satisfactory in so far as the approach to Prince Rupert from seaward is concerned.'"

St. Lawrence and Chicago Steam Navigation Co., Ltd.

The following report was presented at the annual meeting in Toronto Jan. 16: The season of 1908 on the lakes was a very unsatisfactory one, rates of freight ruling very low throughout the entire season. The new steamer E. B. Osler was completed and delivered to the company on May 16, 1908, and went into commission at once. The company's steamships met with more than their share of accidents during the season. The E. B. Osler and G. R. Crowe each had two serious strandings, which materially reduced the profits of the year, although being fully covered by insurance, no direct loss was sustained. The directors from the earnings of the season have paid a dividend of 7% on the capital stock, and have carried forward $415.32 to the credit of profit and loss, leaving a balance at the credit of that amount of $102,383.55.

ASSETS.

Five steamships, Algonquin, Iroquois, W. D. Matthews, G. R. Crowe, E. B. Osler	$950,000.00
Insurance unexpired	11,000.00
Accounts receivable	5,050.12
	$966,050.12

LIABILITIES.

Capital	$855,700.00
Dominion Bank	7,966.57
Balance of profit carried forward	102,383.55
	$966,050.12

PROFIT AND LOSS.

Balance forward, Jan. 2, 1908		$101,968.23
Steamships' earnings	$114,299.85	
Interest	2,249.30	
		116,549.15
		$218,517.38
Insurance		$ 43,494.97
Cost of management: salaries, taxes, office rent, directors' and auditors' fees, etc.		12,759.86
Dividend, 7% payable Jan. 2, 1909		59,899.00
Balance carried forward		102,383.55
		$218,517.38

The officers and directors were re-elected for the current year as follows: President, W. D. Mathews; other directors, E. B. Osler, J. H. G. Hagarty, S. Crangle, C. S. Gzowski, G. F. Hagarty, G. R. Crowe, Jas. Carruthers.

Notices to Mariners.

The Department of Marine has issued the following notices:

No. 126. Dec. 31.—317. British Columbia, colors of lighted beacons. 318. British Columbia, Vancouver Island, Juan de Fuca Strait, Port San Juan, color of lighted and whistling buoy changed. 319. British Columbia, Strait of Georgia, Burrard Inlet, Spanish Bank, bell buoy replaced by spar. 320. British Columbia, Strait of Georgia, Sister Rocks, fog bell discontinued. 321. British Columbia, Queen Charlotte Sound, new channel, Christie Passage, Balaklava Island, Scarlett Point, fog bell established at light station. 322. British Columbia, northern waters, Skeena River, Port Essington, entrance to Ecstall Inlet, buoy withdrawn. 323. British Columbia, Chatham Sound, Brown Passage, islets, shoals, directions. 324. British Columbia, Chatham Sound, Lucy Island light, arc of visibility. 325. British Columbia, Chatham Sound, Cunningham Passage, Hankin Reefs, change in position of buoy.

No. 1. Jan. 8.—1. British Columbia, Fraser River, changes in buoyage.

No. 2. Jan. 9.—2. New Brunswick, Bay of Fundy, south of Grand Manan Island, local magnetic disturbance. 3. New Brunswick, north coast, Chaleur Bay, Caraquet harbor, gas buoys established.

No. 3. Jan. 14.—4. British Columbia, Vancouver Island, west coast, Somass River, buoys discontinued. 5. British Columbia, Vancouver Island, Nanaimo harbor, numbers on buoys. 6. British Columbia, Vancouver Island, east coast, Qualicum River, buoy discontinued. 7. British Columbia, Johnstone Strait, Camp Point, beacon erected

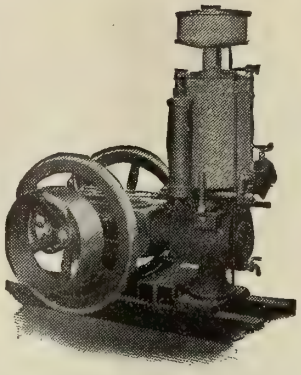
No. 4. Jan. 20.—8. Nova Scotia, south coast, Halifax approach, experimental fog signal buoys. 9. Nova Scotia, Cabot Strait, St. Paul Island, temporary light.

Vessels Removed from the Register.

During Dec., 1908, the following vessels were removed from the Canadian register for the reasons assigned: Steam—Alice, Pictou, N.S., 11 tons, unseaworthy; Donney, Vancouver, B.C., 10 tons, lost; Emma Nott, New Westminster, B.C., 46 tons, broken up; Esperanza, Toronto, 11 tons, burned; Minerva, Hamilton, Ont., 3 tons, out of existence; Nellie, Hamilton, Ont., broken up; Philadelphia, Sault Ste. Marie, Ont., 88 tons, stranded; Quick, Dawson, Y.T., 67 tons, out of existence; Tusket, Yarmouth, N.S., 2 tons, broken up. Sailing—Abeona, Lunenburg, N.S., 499 tons, transferred to Barbados; Annie, Liverpool, N.S., 193 tons, wrecked; Erie, St. John, N.B., 119 tons, abandoned at sea; Esmé, Lunenburg, N.S., 5 tons, registry surrendered; Guior, St. Andrews, N.B., 17 tons, sold to foreigners; Hope, Barrington, N.S., 22 tons, wrecked; Hugh G., Parrsboro, N.S., 430 tons, sunk in collision; Ida May, St. John, N.B., 120 tons, wrecked; Lizzie Burrill, Windsor, N.S., 1,185 tons, lost; Oriole, Halifax, N.S., 43 tons, lost; Prosperare, Yarmouth, N.S., 379 tons, lost; S. G. Marshall, Halifax, N.S., 51 tons, lost; Senator, St. Andrews, N.B., 33 tons, broken up; Stanley, Quebec, 34 tons, out of existence; Stella Maris, Quebec, 70 tons, broken up; Stroller, Charlottetown, P.E.I., 12 tons, broken up; Temperance Bell, St. John, N.B., 77 tons, condemned.

During Nov., 1908, 9 navigation employes were killed and 5 injured, while engaged in Canadian waters. Of the fatalities, 5 were due to falls and 2 each to drowning and to the explosion of a boiler. Of the non-fatal accidents, 2 each were caused by falls and by falling material and one by machinery.

GASOLINE ENGINES



The "STICKNEY" ENGINE is something unique

The most ECONOMICAL ENGINE for RAILWAY PUMPING

The GOVERNOR is so sensitive that it never wastes fuel

Constructed without any useless frills but made to stand hard work.

Sizes from 1 H.P. to 25 H.P.

We state size of Cylinder and are prepared to guarantee power developed.

Navigation of Vancouver Narrows.

While we have no wish to injure the reputation of the port of Vancouver, it would seem that underwriters must eventually take cognizance, to the extent of advancing rates, of the frequent disasters, as shown by the experience of the past two years, dating from the collision of the Princess Victoria with the Chehalis, in connection with the navigation of Vancouver Narrows and the entry to and exit from Vancouver harbor, particularly in a dense fog, conditions now being very different to a decade ago, when traffic was much less. We shall, therefore, await with interest the report of the investigation of the Department of Marine into the collision cases of the Princess Royal and the Fukui Maru, the s.s. Charmer with tug Bermuda and tow, and the stranding of the s.s. Glenfarg, as possibly suggesting amendments to navigation rules or suggesting special rules, insuring greater safety, governing the navigation of Vancouver harbor. It would be unfair to offer these suggestions without commending the caution and skill displayed by the masters and licensed officers of the coasting fleet of the C.P.R. and of the s.s. Iroquois in their frequent entries and exits to and from Vancouver harbor, in a dense fog, the number of accidents being disproportionate to the difficulties thereof, but nonetheless, there is no evading the fact that under such conditions the risks are great, and, although underwriters presume to cover risks, it is doubtful if they really appreciate how great the risk is. The public of Vancouver, as well as its shipping interests, should insist upon a thorough investigation to finally determine whether, as suggested at the time of the Victoria-Chehalis disaster, it is possible to make rules providing for greater safety.—Pacific Marine Review.

Several suggestions have been made as to improvements which ought to be undertaken for the betterment of harbor entrance, among them being the removal of Parthia and Burnaby shoals; dredging in the narrows to allow of a straight course inward and outward bound; and the establishment of 4 occulting lights in the narrows, with fog bells attached; buoys and lights in the harbor; semaphore signals at Brockton and Prospect Points, and telephone connections between the lighthouses there.

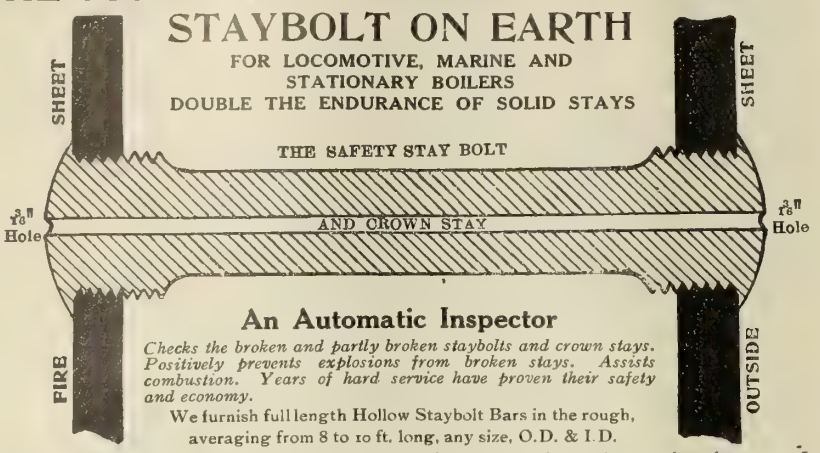
THE MOST ECONOMICAL AND SAFEST STAYBOLT ON EARTH

FOR LOCOMOTIVE, MARINE AND STATIONARY BOILERS
DOUBLE THE ENDURANCE OF SOLID STAYS



An Automatic Inspector

Checks the broken and partly broken staybolts and crown stays. Positively prevents explosions from broken stays. Assists combustion. Years of hard service have proven their safety and economy.

We furnish full length Hollow Staybolt Bars in the rough, averaging from 8 to 10 ft. long, any size, O.D. & I.D.

We also make solid staybolt bars of the best double refined charcoal iron. Average length, 16 to 20 ft.

Northern Navigation Co. of Ontario.

Following are extracts from the report for the year 1908, presented at the annual meeting in Toronto, Jan. 26:

Navigation opened on Lake Superior on April 27, and the Georgian Bay on May 2, for the company's steamers, which was a few days later than in 1907. Our statement shows a falling off of about $100,000 in the gross receipts, and $39,000 in the net receipts, as compared with the previous year. This was occasioned by the general depression in trade, which did not revive and reach its normal conditions until late in the season.

The North Shore route between Collingwood Parry Sound, Byng Inlet and French River has been abandoned, and the steamer Britannic operating on it has been sold because of the volume of traffic having been diverted from Collingwood by the new rail lines. Your directors, feeling that the needs of the Midland, Penetang and Parry Sound route required a fast and up-to-date steamer, disposed of the steamer City of Toronto, and have contracted for a new steamer, which will be put in commission on June 15.

Last year 10 steamers appeared in the balance sheet, valued at $905,696; this year it shows eight steamers valued at $887,955. This difference is accounted for by the sale of the two steamers mentioned above, and by some machinery being installed in the steamer Ionic. The gross earnings of the company were $531,554.18, and the expenditure $428,915.42, which with the balance at credit of profit and loss account Dec. 31, 1907, of $55,996.20, leaves a balance of $158,634.96, less appropriations for directors, $460, and for Secretary-Treasurer, $700. Out of this amount your directors have made the following appropriations: Claims for 1907 paid in 1908, $3,820.74; interest on renewal and insurance funds, $2,701.82; renewal fund, $24,000; repair and maintenance fund, $10,000, and dividend at the rate of 8% per annum amounting to $67,315.31, leaving a balance to be carried forward at the credit of profit and loss account of $49,637.09. The reserve funds now stand as follows: Renewal account, $68,058.73: marine insurance fund, $15,285.20; profit and loss credit, $49,637.09; total, $132,981.02. The percentage of expenses of gross earnings (not including claims paid for previous years) are as follows: 1903, 94.16%, 1904, 89.71%: 1905, 80.73%; 1906, 77.73%; 1907, 77.63%; 1908, 80.73%.

Your directors are pleased to report that the construction of the s.s. Hamonic is progressing favorably, and she will be completed and ready to go into commission between Sarnia, Sault Ste. Marie, Port Arthur, Fort William and Duluth on June 15 next. We have paid on the construction of this steamer so far $282,152.00. When this ship goes into commission she will be the finest, fastest and best equipped vessel of her class on the Upper Lakes.

Your directors hope to be able to resume payment of semi-annual dividends this year.

The continued illness of our President during the past year has been a source of deep regret to your directors.

		$157,474.96

The Vice-President, W. J. Sheppard, who took the chair at the annual meeting, stated that the beloved President, H. C. Hammond, had been unconscious for several days and had only a few hours to live. Mr. Sheppard congratulated the shareholders on the satisfactory season's business, considering the unfavorable trade conditions which prevailed. He referred to the traffic contract made with the G.T. and G.T. Pacific Ry. Cos. for a period of years, in accordance with which the shareholders would be asked to elect a G.T.R. representative as a director. The following were elected directors for the current year: W. J. Sheppard, C. E. Stephens, W. E. Davis, F. A. Lett, C. D. Warren, H. B. Smith, Hon. J. S. Hendrie, H. Y. Telfer, W. D. Matthews. The only change in the Board is the substitution of W. E. Davis, Passenger Traffic Manager G.T.R. and G.T.P.R., for H. C. Hammond.

At a subsequent meeting of directors, W. J. Sheppard, of Waubashene, Ont., heretofore Vice-President, was elected President, to succeed H. C. Hammond; H. Y. Telfer, of Collingwood, was elected Vice-President, and C. E. Stephens, of Collingwood, was re-elected Secretary-Treasurer.

Regulations for Marine Engineers.

The following amendments to the Canada Shipping Act have been made by order of the Governor-General in Council, on the recommendation of the Board of Steamboat Inspection:

1. That the following paragraph be added to section 1, part VI: (i) When satisfactory evidence is produced that the person has (previous to the year 1909) served 36 months as assistant engineer on the watch in the engine room of a steamboat having an engine of over 10 n.h.p., if a single cylinder engine, or 20 n.h.p. if of the compound type, paragraph (g) may be omitted and the practical knowledge as specified by paragraph (h) may be expressed orally and the result can be entered on the examination forms by the examiner.

2. That the following paragraph be added to section 2, part VI: (f) When satisfactory evidence is produced that the person has (previous to the year 1909) served 36 months as chief engineer on a steamboat having an engine of over 10 n.h.p., if a single cylinder engine, or 20 n.h.p. if of the compound type, together with 12 months' service on the lesser sized engines as specified by paragraph (c), paragraph (e) may be omitted and the practical knowledge as specified by paragraph (d) may be expressed orally and the result entered on the examination forms by the examiner.

3. That under the section "Interpretation," part VI, the third paragraph thereof be rescinded, and the following substituted therefor: The term "engineer on the watch" means the person in charge of the propelling engines and boilers, and responsible for the bells or signals while on duty under way. And service as fireman or engineer on steam dredges, or floating elevators, may be accepted as qualifying for fourth class if the engine is of the required nominal horse power as defined by sec. 1 of the regulations, and for third or second class, one-half of such service may be accepted if the engine is of the required nominal horse power as defined by secs. 2 and 3 of the regulations. The other half shall be service as engineer on steamboats.

Niagara Navigation Company, Ltd.

The following report for the year ended Nov. 30, 1908, was presented at the annual meeting in Toronto, Jan. 12: "The net earnings are slightly in excess of those for 1907. No expense has been spared to maintain the steamers at the highest degree of efficiency. Following the policy of past years the directors have written off a further sum of $25,000 from the valuation of steamers, and have placed $10,000 to a renewal and betterment fund. An opportunity having recently arisen to purchase the Lewiston wharf and land adjoining at a cost of $25,000, the directors have considered it wise to secure the property, subject to title being found satisfactory. Payment will be made out of cash on hand. After providing for the dividend, interest on debentures, writing off steamer values, and placing $10,000 to a renewal and betterment fund, the balance to credit of profit and loss account stands at $133,394.48."

ASSETS.

Steamers	$884,725.33	
Less written off	25,000.00	$859,725.33
Real estate, wharves, etc.		50,000.00

Balance carried forward		133,394.48
		$232,202.44

The President, E. B. Osler, in moving the adoption of the report, expressed the hope that a continuance of good business would, in a short time, enable the company to redeem its outstanding debentures. He and the Vice-President, Barlow Cumberland, expressed warm approval of the work done by B. W. Folger, General Manager.

The directors were all re-elected. The officers and directors for the current year are: President, E. B. Osler; Vice-President, Barlow Cumberland; other directors, Hon. J. J. Foy, C. Cockshutt, J. Bruce Macdonald, W. D. Matthews, Hon. J. S. Hendrie; General Manager, B W. Folger; Treasurer, R. H. McBride; Secretary, J. M. Sullivan.

Coasting Regulations for Foreign Vessels.

The following order-in-council was passed Dec. 31, 1908: Whereas applications have been made to permit foreign steamships now under charter in the Canadian coasting trade on the Atlantic to continue in such coasting trade for a short period, pending new traffic arrangements, it is ordered that steamships of foreign countries which had been admitted to, and were under charter to engage in, the coasting trade of the Dominion, on Dec. 21, 1908, shall be permitted to continue in the said coasting trade, in the carrying of goods and passengers coastwise, in the provinces of Nova Scotia, New Brunswick, Prince Edward Island, and Quebec, on the same terms and conditions as are applicable to Canadian vessels, until July 1, 1909, notwithstanding anything in the order-in-Council of Dec. 17, 1908, respecting the coasting trade of Canada.

The order-in-council dated Dec. 17, 1908, was given in full in our Jan. issue.

Canadian Light for Messina Straits.

The International Marine Signal Co., of Ottawa, Ont., has loaned a portable lighthouse beacon to the Italian Government for the Straits of Messina, to temporarily replace the lighthouse destroyed in the recent earthquake. The beacon has been gratefully accepted by the Italian Government, and the signal has been shipped to the scene of the earthquake from Birmingham, Eng., where one is constantly kept on exhibition. "It will take six months for the Italian Government to erect another lighthouse in the Straits of Messina," said John Bain, General Manager of the I.M.S. Co., recently. "We are loaning this light until they have one built. The beacon may be put up on any high elevation. It cannot be broken if it falls, and it only takes three or four hours to fix it in position."

Among the Express Companies.

N. W. Sterie has been appointed agent Canadian Northern Ex. Co., Prince Albert, Sask., vice C. A. Edgley.

The Dominion Ex. Co. recently reported that it carried 924 deer and 57 moose from Ontario, during the season; and the Canadian Ex. Co. reported 2,589 deer.

The Canadian Northern Ex. Co. has closed the following offices: Hilton, Myrtle, Rounthwaite, Man., Jameson and Odessa, Sask., Lake Joseph and Sudbury, Ont., and has opened an office at Mafeking, Man. Warroad, Minn., has been made a common point with the Great Northern Ex. Co.

Cancellation of Express Tariffs.

J. P. Mabee, Chief Railway Commissioner, on the conclusion of the evidence in the enquiry into the tariffs and classifications of express companies, Jan. 11, cancelled the present tariffs, and ordered the companies to revert to the tariff in force prior to Jan. 1, 1909. His judgment is as follows:

"It is not denied that this classification, which came into force on Jan. 1, 1909, will materially increase the receipts of the express companies. It is not on an inconsiderable volume of traffic that the rates have been increased through the charges on returned empties, and the adoption of the weight and measurement rule. It has been shown that the movement under these heads is large and considerable. The increases, it is said, will run up to nearly 100%. When this inquiry began, before I became a member of the Board, an undertaking was given on behalf of the express companies that, pending the inquiry, no increases of tolls should be made by them. I think it is the duty of the Board to require that this undertaking be carried out. When this classification was proven, I understood that such changes as were made were small, and that upon the whole, there was a reduction and not an increase. There was, therefore, some surprise, when it was found that these general increases had been attempted.

"There was no notification of any kind given to the public of these changes, and no opportunity to shippers to adapt their business to such changes as might be reasonable. I would not have signed the order approving of this classification upon an ex parte application of the express companies had I been in possession of the facts now before us, but would have required public notice to be given in order that those who have to pay these tolls should have an opportunity to present their views. Many and important rules have been changed; those that I have carefully considered are mostly changes in favor of the companies. These have not yet had sufficient investigation nor is the full purport of them yet understood by the Board.

"I am free to confess that this matter was not given the consideration it was entitled to when the order of Oct. 18, 1908, was made, my understanding being that it was for the convenience and not for the profit of the express companies, and that tolls were not, upon the whole, being increased. It is said the disallowance now of this new tariff and the classification will be a hardship upon the express companies, requiring reprinting of the old classification and its distribution. I regret that this is so, but the present confusion was brought about by reason of the companies' action in filing and asking approval of a classification that materially increases tolls when it was understood that this should not be done, and if an order had been inadvertently issued that should not have been made it is the plain duty of the Board to recall it, and its so doing in this case only reinstates conditions that shippers are perfectly familiar with, and upon which they have been doing business for many years.

"Complaint is made that this course casts an imputation of bad faith upon the companies. I do not say and have not said that there was any bad faith, or deliberate intention to deceive, or mislead, the Board. The traffic officers of the companies discussed matters very fully with the Chief Traffic Officer of the Board, who was of opinion that upon the whole those changes would reduce instead of raise the receipts of the companies, but so far as the evidence given before us goes, the contrary is the case. It is, I think, unfortunate that this proposed change in the classification and rules had not been brought to the attention of counsel for the Government who have had charge of this whole inquiry from its inception, and had this course been taken, it is fair to assume that after inquiry as to the effect of the proposed changes approval would have been for the present withheld. This omission I regard as as oversight and not design.

It is represented to me that some shippers were defrauding the express companies by shipping full packages by freight and returning the empties by express, taking advantage of the rule allowing empties to return free. To stop this, they proposed to charge 50% of the merchandise rate, and in some instances a specific charge on the returned empties. The facts now show that the effect of this upon the business of only some 18 or 20 shippers would be to cause an increase of between $25,000 and $30,000 in express tolls upon the volume of business in 1908. I did not understand when approving this change that the companies were protecting themselves in this way. Many cases in the U.S. and England, and followed here, held that a long established rate is regarded as reasonable unless shown to be too low. It would not be proper to permit a general increase in rates through the medium of imposing a toll upon returned empties without requiring the companies to show affirmatively that the outward rate was not sufficient to cover the transport of the returned empties free of charge. Of course, we do not at this time deal with the suggestion that the practice involves discrimination.

"The weight and measurement rule is creating a disturbance, but could all have been avoided if public notice had been given so that shippers could have adjusted themselves to it if it were thought a proper rule to introduce, as to which we have nothing to say at present.

"We are of opinion that the order approving this classification of Jan. 1, 1909, must be rescinded and this classification and variation of its old rule disallowed as a final disposition of the matter, which merely leaves everything connected with the express business as it stood prior to Jan. 1. All evidence applicable to the subject given upon the inquiry will be treated as given for the purpose of obtaining allowance of this classification and amended rules, some of which appear at present not to be unreasonable.

"The companies must at once notify all their agencies to alter the tariff and rules to those in existence prior to Jan. 1, and in all respects carry on their business in compliance with rates and rules prior to that date until further disposition of this hearing.

"Cancellation of the tariff filed, and above referred to, shall not necessarily give rise to claims for separation as to any shipments occurring within the next 10 days, but such claims if made shall be dealt with individually, regard being had to the steps taken by the companies to inform agents of the above cancellation."

An order putting the judgment into effect was promulgated Jan. 12.

Telegraph and Cable Matters.

The C.P.R. Telegraph Department owns and operates 65,000 miles of land lines.

W. H. Crandall, local manager Western Union Telegraph Co. at Moncton, N.B., was presented with a writing desk by the local staff recently.

The telegraph commercial night rate between Winnipeg, Man., and Vancouver, B.C., and all points west, has been reduced to 50c. for ten words.

The Dominion Government cable and telegraph system has been stated recently as embracing 380.50 miles of cable, 6,829.25 miles of land lines, and 382 offices.

The Great Northwestern Telegraph Co. owns 49,686 miles of land lines, 406 miles of cable, 1,360 offices, 894 of which are exclusive, and 1,183 of which are in Canada.

The Kingston and Pembroke Ry. telegraph operators have nominated J. G. O'Donoghue to represent them in the enquiry into their complaints. J. L. Whiting, K.C., will represent the company.

Following are the officers and directors of the Marconi Wireless Telegraph Co. of Canada for the current year: President, A. A. Allan; Vice-President, G. Marconi; other directors, J. N. Greenshields, R. Bickerdike, and J. Bottomley.

At a recent meeting of the Prince Rupert, B.C., Board of Trade, a proposal to ask the Dominion Government to construct a telegraph line from Aberdeen to Port Essington; to extend the present line from Prince Rupert to Port Simpson via Georgetown, and to abandon the existing line between Aberdeen and Port Simpson, was adopted. It was suggested that the line be constructed so as to be suitable for both telegraph and telephone.

A press dispatch sent out from Toronto recently states that railway telegraph operators throughout Canada, the U.S. and Mexico, are said to be preparing for a struggle with the companies in an effort to better their working conditions. According to local officials a petition asking the Dominion Government to establish an eight hour day is being largely signed, while individual members of Parliament are being approached on the matter. The operators say they have to work anywhere from 12 to 18 hours out of the 24, and in the case of small stations to perform various other duties as well as looking after the running of the trains. This has been a bone of contention for many years. The men's action, however, is said to be more like a protest against the telephone than anything else.

Montreal Telegraph Company.

The 62nd annual meeting was held Jan. 14. The report shows assets of $2,293,495.68; consisting of telegraph lines in Canada and the U.S., $1,625,890; cables in Canada and the U.S., $33,487.39; offices and equipment, $212,500; real estate, $279,946.46; cash, accounts receivable, etc., $141,671.83. The liabilities are: Shareholders' capital, $2,000,000; excess in value of property operated by G.N.W. Tel. Co. over shareholders' capital, $151,823.85; dividend payable Jan. 15, $40,000; unclaimed dividends, $1,943.40; contingent fund, $99,728.43; total, $2,293,495.68. The company's property is operated and maintained by the G.N.W. Telegraph Co., and the operation and maintenance is guaranteed by the Western Union Telegraph Co., under an agreement for 97 years from July 1, 1881, which guarantees payment of dividends of 8%. During the past year $160,000 was paid in dividends, and a bonus of $5,000.

A Telegraph Company's Suit.

Judgment was delivered in the Ontario Exchequer Court, Jan. 18, in the case of the North American Telegraph Co. vs. the Bay of Quinte Ry. Co., in which the plaintiff claimed free transportation by all passenger trains on the defendant's railway for its men when travelling for any purpose whatsoever, and asked for the return of sums paid for railway fares. The defendant company admitted a limited right to free transportation. The B. of Q. Ry. counterclaims for damages (a) on account of the failure of the Telegraph Co. to keep the telegraph lines in proper working order; (b)

for not erecting and maintaining a telegraph line between Tweed and Bannockburn, and on two other claims which were disallowed.

Chief Justice Mulock in delivering judgment said: "In my opinion, the words, 'construction and maintenance' qualify the words, 'inspectors, linemen and repairers,' and also the words, 'their tools and stores.' If such is not the legal interpretation of the clause, then it would provide two different kinds of free transportation, namely, unlimited transportation for the men, and limited transportation for the tools and stores. It does not, I think, admit of such interpretation. The only object of such free transportation is clearly stated, namely, construction and maintenance. I think the defendants were not bound to furnish unlimited passes, as demanded by the plaintiffs, but only such free transportation as was reasonably necessary in connection with the plaintiff's work of construction and maintenance. There is no evidence to show that the fares paid and here sued for were for trips in respect of which the plaintiffs are entitled to free carriage for their employes. For this reason alone the action must fail. But, even if this were shown, are there any circumstances in this case which would entitle the plaintiffs to succeed in an action for money had and received, which is in substance the nature of this action? For reasons stated, I am of opinion that the plaintiffs are not entitled to recover the moneys in question, and that their action fails. As to the counterclaim: As to item (a), damages because of failure on the part of plaintiffs to keep their telegraph lines in working order, as proved by the evidence, for three years, I award defendants $900. As to item (b), namely, damages because of plaintiffs not erecting and maintaining a telegraph line between Tweed and Bannockburn, I find the defendants are entitled to $7,736.24 damages. On payment of this amount, the line built by defendants will become the property of plaintiffs, subject to the rights of defendants under the agreements; until payment of this sum, the plaintiffs to continue liable to pay to the defendants the cost of maintenance of the line and interest on $4,509.24. Owing to the divided success in respect of the counter-claim, no costs of the counter-claim are awarded either party."

Cheaper Cablegrams.

In a contribution to a British magazine, Lord Strathcona says, on the question of lower cable rates: "While the ideal of a penny a word may be a good thing to work for, especially in trans-Atlantic messages, a reduction of a far less drastic character even there would be welcomed by all classes of the community. But such low rates will hardly be possible, for a long time to come, to other parts of the world where cable lines are longer, where transfers are necessary from one line to another, where the expenses are obviously greater and the telegraph business less voluminous. But, be this as it may, upon the general question of the current cost of telegraphing, there is only one opinion—that it might be reduced with great advantage to the public, and perhaps with a prospect of gain to the cable companies. It has often occurred to one that as a beginning some system might be established similar to that which obtains with the telegraphs and long-distance telephones in Canada and the U.S., and more recently introduced in the telephone systems of the United Kingdom, of a differential rate for day and night messages. A concession of that kind would be regarded most favorably, and as an indication of the desire of the cable companies to meet the wishes of their customers so far as it can be done; subject, of course, to the proper safeguarding of the interests of their shareholders, to the provision of reserve funds for meeting debenture debts, and for providing new cables when required. The cry for lower rates has come to stay, but, on the other hand, we cannot expect too many concessions regardless of vested interests and their rights. If we want lower rates than the companies are willing to give, having regard to a fair return on the capital invested, the countries concerned must be prepared to pay for it, or at least to guarantee the companies against loss, which, in most cases, would be but a contingent liability. This is only fair and reasonable, and it is a consideration which must not be overlooked in connection with the discussions that are taking place."

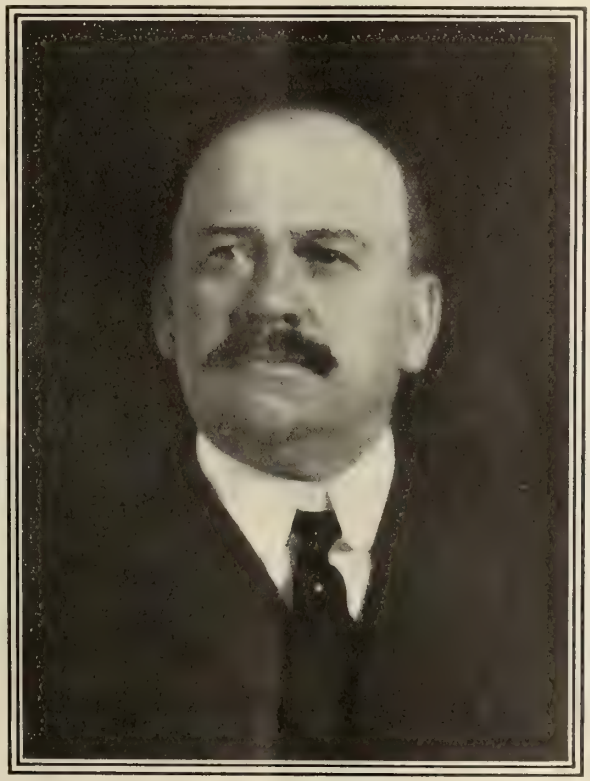
The Hammer Blow from Incorrect Counterbalance.

By H. H. Vaughan, Assistant to the Vice-President, C.P.R.

The generally accepted solution of a consideration of the action on the rail of a wheel containing counterbalance is that of a variable pressure between the rail and the wheel equalling the static weight on the wheel, added to or reduced by the vertical force due to the action of the unbalanced weight. Thus in fig. 1 (pg. 159), if OA represents the time of one revolution, BC the pressure between the rail and the wheel due to the weight on the wheel, OB and ODAE the vertical force due to the action of the overbalance, the result and pressure between the rail and the wheel is shown by the line BFG and equals the ordinate of the shaded area at any time.

Should the overbalance be excessive and the speed so high that the vertical force caused by the overbalance exceeds the weight on the wheel, there may be a negative pressure between the wheel and the rail, or in other words, a force tending to lift the wheel, which condition is shown in fig. 2, where the cross hatched portion below OA represents an upward force which tends to lift the wheel and attains a maximum value TP at the instant when the counterbalance is vertically upwards. For a numerical example suppose the weight on the wheel is 20,000 lbs. and the maximum vertical effect of the overbalance is 25,000 lbs. The pressure on the rail will become 45,000 lbs. at the point S, while at T there will be a force of 5,000 lbs. tending to lift the wheel, and that the wheel does lift under the action of this force is well shown from the experiments on the Purdue and St. Louis testing plants. The greatest pressure on the rail occurs when the counterbalance is vertically downwards, and as this in many cases of improperly balanced engines reaches such figures as 50,000 to 60,000 lbs., the damage that has occasionally been caused to the rail, when such engines have run at specially high speeds, has been ascribed to this great downward force. A consideration of the diagrams shows that however great this force may be at this point, its application is entirely gradual, and it cannot possibly partake of the nature of a blow given by a falling weight, however high the speed, as the pressure between the rail and the wheel gradually increases from nothing or a comparatively small amount until it reaches its maximum, and then decreases, and it has therefore become usual to regard the hammer blow, so often mentioned in connection with counterbalance, as a misnomer, and to ascribe the damage that may occur, to the high pressures which exist, rather than to the effect of an actual fall of the wheel on the rail.

In the early part of 1908 a serious case of damaged rails occurred on the C.P.R., the rails being sharply bent for about a mile, on both sides at intervals about equal to the circumference of a driving wheel. The damaged spots were carefully measured over a considerable distance, averaged, and the diameter of the wheel so found corresponded with that of an engine which had made a very fast run over the damaged track the day previous. The wheels of this engine were taken out and the main drivers found to contain an excessive amount of overbalance, actually amounting to about 1,000 lbs. As the weight on these wheels was 22,000 lbs., the force on the rail at the speed estimated varied from 57,000 lbs. to an upward force of 13,000 lbs. A portion of the rail was experimented with in a testing machine, and it was found impossible to bend it in the same manner as had occurred on the track, with different centres of supports and with loads as high as 200,000 lbs. While the cause of the damage was thus located, the method by which it was effected was still not apparent, and a general disbelief in the calculations of the forces caused by the unbalanced weights on the wheels was the natural result. It then occurred to the writer to investigate the action of the wheel when lifted from the rail by the upward force caused by the overbalance, with results that are interesting and to a large extent explain the action which takes place.



EDSON J. CHAMBERLIN
Vice-President and General Manager Grand Trunk Pacific Railway.

The wheel is taken as a mass of 3,200 lbs. weight, pressed down by the spring with a force equal to the static weight on the rail, less its own weight, running on a rigid track and acted upon by the forces caused by the overbalance. As an example, the speed was assumed to be 300 revolutions per minute, the weight on the rail 20,000 lbs. and the force due to the overbalance 25,000 lbs., so that the force tending to lift the wheel attained a maximum of 5,000 lbs. The mathematical discussion which applies to any set of conditions is given below, and the results are shown in fig. 3 for this particular example.

The horizontal dimensions in this diagram indicate the movement of the wheel in degrees, 0° being the position of the wheel when the counterbalance is vertically upwards, while the vertical dimensions indicate to three different scales, the forces acting on the wheel, the velocity of the wheel upwards and its upward movement. Thus, at about — 37½°, or when the centre line of the counterbalance makes that angle with the vertical, the upward force due to the overbalance equals the weight on the wheel, and beyond that exerts an upward force on the wheel, tending to lift it, which becomes a maximum of 5,000 lbs. at 0° and zero again when the counterbalance has moved 37½° past the centre. The wheel then commences to be acted upon by a downward force due to its weight and the force of the spring which becomes greater than the effect of the counterbalance. Since the latter continues to decrease, and at 90° becomes zero, and later in its turn acts downward, this force increases rapidly. Further consideration indicates that the upward velocity of the wheel, zero at — 37°, gradually increases until the wheel has turned to 37°, when its upward velocity is a maximum, since, while the forces acting on it upward have been decreasing from 0°, they have still been acting to increase its upward velocity. As the downward forces become reversed, they first destroy this upward velocity, which becomes zero at about 75°, after which they impress on it an increasing downward velocity until the wheel reaches the rail. To find the point at which this takes place, it is necessary to plot the space line or that showing the movement of the wheel vertically upwards from the rail. This commences with zero

Galena-Signal Oil Company

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,
PRESIDENT

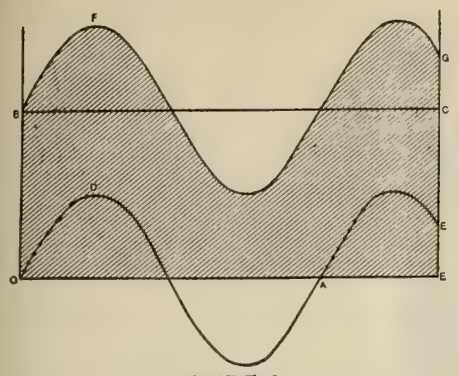


FIGURE 1

at — 37°, gradually increasing to 0.0465 ft. or about .55 inch at 75°, at which point the upward velocity is zero and the upward movement has attained its maximum. The wheel then begins to return to the rail, its movement becoming zero again, or in other words, striking the rail at 115°, and by referring to the velocity curve, it will be seen that at the point the downward velocity is 4.7 ft. per second. This velocity corresponds to that gained in dropping freely through a height of 0.36 ft., or about 4½ ins., and as the weight is 3,200 lbs., there is an actual, but not severe, blow.

It is interesting to note that this diagram explains completely the results obtained on testing plants, and with wire run under the drivers, in which W. F. M. Goss has noted that the wheel appeared to drop more quickly than it went up, and at a considerably greater distance from the centre, and it is evident that this should be so. The movement of the wheel does not coincide with the variation in the force. As long as the force is upward the wheel is acquiring an upward velocity, and this velocity does not become zero until the downward forces have acted on the wheel for a sufficient time to destroy it. In the same way, the upward movement goes on increasing, not only until the upward velocity decreases, but until it is destroyed and the wheel does not return to the track until the downward velocity has attained a very considerable amount.

The diagram in fig. 4 shows similar curves plotted at 320 revolutions for the engine mentioned as having caused the damage to the rail on the C.P.R. This is, of course, an exceptionally bad case, but it will be seen that the wheel did not return to the track for 177°, when it had a downward velocity of 17½ ft. per second, corresponding to a free fall of 4¾ ft., from which height a weight of 3,200 lbs. would certainly deliver a blow of sufficient energy to account for the effects observed.

In an extreme case of this nature, however, the method of analysis employed gives results that are greater than would actually occur, since the force acting down on the wheel is not constant, but would increase as the wheel moved upward and deflected the spring. For instance, if the latter had a deflection of 0.2 ft. under the working load of 18,800 lbs., the downward force with any upward movements of the wheel would equal

$$3200 + 18800\left(\frac{s + 0.2}{0.2}\right)$$

in place of a constant amount of 22,000 lbs., and the acceleration equation would then become

$$\frac{d^2s}{dt^2} = C\cos kt - \left[3200 + 18800\left(\frac{s+0.2}{0.2}\right)\right]$$

This expression involves s and becomes exceedingly complicated to integrate, but the effect of including it would be to diminish the upward movement and slightly reduce the striking velocity. In the first case its influence is inappreciable as the upward movement is small, but in the second it would certainly reduce this, and account for the box not striking the frame. An exact solution would in addition allow for the elasticity of the track, and this in its turn would apparently increase the velocity of the blow, although an equation involving it would probably be too complicated to treat mathematically except by an expert.

While, however, the solution here given in fig. 4 may not be exactly correct, the actual striking velocity being lower than that calculated, there is no doubt that it is of considerable magnitude, and probably from 12 to 15 ft. per second, and an absolute hammer blow is therefore accounted for which is of sufficient intensity to explain the damage that has occurred.

It is interesting to note that in extreme cases the wheel does not return to the track or the blow occur until the wheel has moved to a position where the counterbalance is within 20° or 30° of being vertically downward, and the popular connection of this blow with the downward movement of the counterbalance is thus explained.

The result of these calculations would emphasize the danger of an unbalanced force which could equal the weight on the wheel. On the usual assumption that the maximum speed in miles per hour equals the diameter of drivers in inches, this would restrict the overbalance in any wheel to 2½ per cent. of the weight on the wheel, and to be entirely safe the practice on the C.P.R. is now to limit it to 1¼%, and to make it 1% if possible.

MATHEMATICAL ANALYSIS.

When counterbalance is vertically upward $t = o$

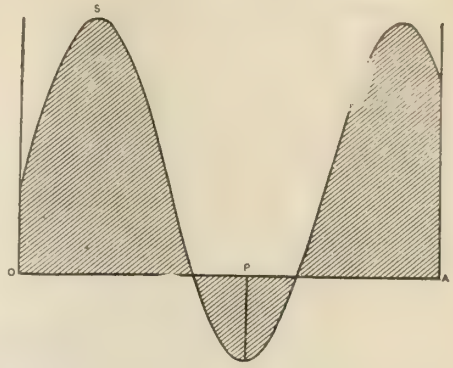

FIGURE 2

Let w = acceleration due to downward force of spring and weight of wheel, acting on mass of wheel

c = acceleration due to maximum value of force caused by overbalance, acting on mass of wheel

s = vertical movement of wheel, from rail, feet

t = time, seconds

kt = angular movement of wheel, radians

Then, $\frac{d^2s}{dt^2} = c\cos kt - w$

$$\frac{ds}{dt} = \frac{c}{k}\sin kt \quad wt + C$$

$= o$ when $t = -t_1$, when $\cos kt_1 = \frac{c}{w}$

Then $C = \frac{c}{k}\sin kt_1 - wt_1$

And $\frac{ds}{dt} = \frac{c}{k}\sin kt + \frac{c}{k}\sin kt_1 - wt - wt_1$,

from which the velocity curves are plotted

$$s = -\frac{c}{k^2}\cos kt + \frac{ct}{k}\sin kt_1 - \frac{wt^2}{2} - wtt_1 + C$$

$= o$ when $t = -t_1$

Then $C = \frac{ct_1}{k}\sin kt_1 + \frac{c}{k^2}\cos kt_1 - \frac{wt_1^2}{2}$

and $s = \frac{c}{k^2}(kt_1\sin kt_1 + \cos kt_1) - \frac{wt_1^2}{2} - \frac{wt^2}{2} +$

$$t\left(\frac{c}{k}\sin kt_1 - wt_1\right) - \frac{c}{k^2}\cos kt_1$$

from which the space curves are plotted.—American Engineer and Railroad Journal

The Life Underwriters' Association of Canada recently applied for the same rates of fares on railways in Eastern Canada as are given to commercial travellers. The application was refused in view of the different conditions of the two organizations.

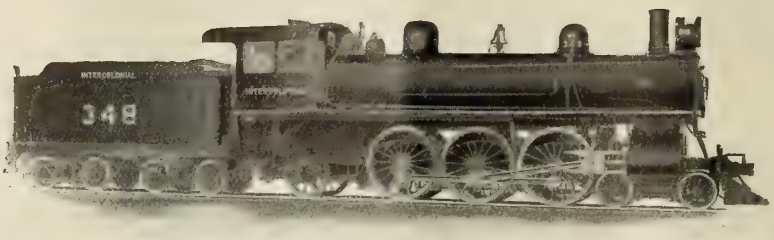
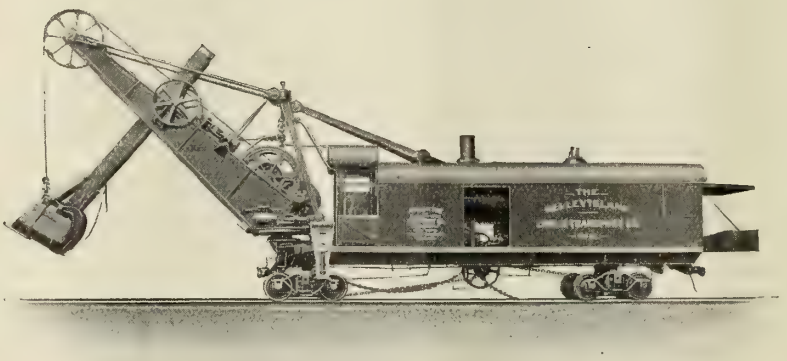
LOCOMOTIVES



Pacific Type Passenger Locomotive built for the Intercolonial Railway. Total weight of engine, 194,500 pounds. Weight on driving wheels, 132,000 pounds; diameter of driving wheels, 72 inches. Boiler pressure, 200 pounds. Maximum tractive power, 29,200 pounds.

STEAM SHOVELS



A high-class and powerful machine, absolutely reliable under all conditions of service.

MONTREAL LOCOMOTIVE WORKS, LTD.

BANK OF OTTAWA BUILDING, MONTREAL, CANADA.

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this.

Complete copies of any of the orders summarized below, or of others previously passed by the Commission, will be furnished for 25 cents, cash to accompany requests for copies in all cases.

6030. Jan. 12.—Dismissing application, with leave to revive if desired, of Front of Escott tp., Ont., for order directing G.T.R. to provide overhead crossing where its line intersects at different level crossings 2½ miles west of Mallorytown station, the main highway from Rockfield to Escott village.

6031. Jan. 12.—Authorizing the National Transcontinental Ry. Commissioners to cross Temiscouata Ry. about 12.2 miles westerly from Edmundston, N.B., or 46.62 miles from a point 2½ miles west of Grand Falls, N.B.

6032. Jan. 13.—Ordering that work required by order 5670, Nov. 11, 1908, in connection with C.N.R. crossing over Mrs. H. A. McLeod's property at Stoney Brae, Ont., be completed by Jan. 21, and that the company be subject to a penalty of $25 for every day subsequent thereto it shall be in default in complying with the order.

6033. Jan. 13.—Ordering that the Windsor, Essex and Lake Shore Rapid Ry. be subject to a penalty of $25 for each night that the semaphore light at its crossing with the M.C. Rd. on Erie Ave., Leamington, Ont., is not lighted on and after Feb. 1.

6034. Jan. 12.—Dismissing application of C. Franche, Wendover, Ont., for order directing C.N.R. to provide farm crossing in the middle of his lot.

6035. Jan. 5.—Authorizing St. Lawrence and Adirondack Ry. to construct its railway across various highways in Quebec province.

6036. Jan. 14.—Authorizing Bell Telephone Co. to place wires across M.C. Rd. 3 miles east of Berry station, Ont.

6037. Jan. 14.—Authorizing Bell Telephone Co. to place wires across G.T.R. at water front, west of John St., Toronto.

6038. Jan. 14.—Authorizing C.P.R. to construct three spur lines to the Larchwood Lumber Co.'s premises, Algoma district, Ont., to be completed within 2 years.

6039. Jan. 12.—Authorizing G.T.R. to provide folding gates at its crossing on Rosa de Lima St., Montreal, on or before Apr. 15, the city to bear one-half the cost of protection, maintenance and operation, and further ordering that the city be not responsible for damages resulting from negligence of man in tower.

6040. Nov. 11.—Authorizing G.T.R. to construct spur lines to the Hamilton and Toronto Sewer Pipe Co. and the Fowler's Canadian Co.'s premises, Hamilton Ont.

6041. Jan. 4. — Authorizing Manitoba Government Telephones to place wires across C.N.R. at public crossing 10 miles north-west of St. Boniface.

6042. Jan. 9.—Authorizing Louise Telephone Co. to place wires across C.P.R. between secs. 30-2-11 and 25-2-12, also 30-2-11 and 31-2-11, and secs. 4-3-11 and 5-3-11, west of 1st mer., Man.

6043. Jan. 14.—Authorizing the town of Megantic, Que., to lay a pipe under C.P.R. in St. Agnes ward, Megantic, Que.

6044. Jan. 14.—Authorizing Guelph Light and Heat Commissioners to place wires across G.T.R. tracks at Crimea St., Guelph, Ont.

6045. Jan. 14. — Authorizing Manitoba Government Telephones to place wires across C.N.R. tracks one mile west of Grays.

6046. Jan. 14.—Authorizing C.P.R. to operate bridges on its Emerson section at mileages 28.2 and 53.6, and rescinding order 5712, Nov. 27, 1908.

6047. Jan. 14.—Authorizing Kinloss and Lucknow Telephone Co. to place wires across G.T.R. one mile west of Lucknow station, Ont.

6048. Jan. 8.—Dismissing application of R. Laidlaw Lumber Co., Toronto, for order directing that order 4988, July 8, 1908, be made retroactive so as to apply to all cars loaded with lumber received at Toronto over G.T.R. from Feb., 1907, until the interswitching arrangements prescribed by the Board became effective Sept. 1, 1908, and switched by the C.P.R. to applicant's siding at Dundas St., Toronto; also that the Railway Co. refund $42 as demurrage on eight carloads received at Toronto, April, 1907.

6049. Jan. 11.—Authorizing city of Hamilton, Ont., to lay sewer pipe under T.H. & B.R. at Sanford Ave.

6050. Jan. 13.—Authorizing city of Hamilton to lay water main under G.T.R. Port Dover branch at Wentworth St.

6051. Jan. 12.—Approving location of C.N.O.R. from Udney, Ont., toward Orillia, and authorizing construction of railway across intervening highways in Mara tp.

6052. Jan. 9.—Authorizing People's Telephone Co. and E. P. Smith, of Johnville, Que., to place wires across C.P.R. near Johnville station, Que., and rescinding order 5636, Nov. 3, 1908.

6053. Jan. 11.—Authorizing C.P.R. to construct a branch line in Winnipeg across portions of blocks 40, 41 and 42, and a lane in rear of Brant St.

6054. Jan. 11.—Authorizing C.P.R. to construct spur lines in Winnipeg to the Anchor Elevator and Warehousing Co.'s premises.

6055. Jan. 15.—Authorizing Alberta Ry. & Irrigation Co. to construct branch line on Blood Indian Reserve, to lot 3, block 32, Cardston, Alta.

6056. Jan. 15.—Authorizing Edmonton & Slave Lake Ry. to construct spur to Morinville Mines, Alta.,

6057. Jan. 15.—Authorizing Bell Telephone Co. to place wires across Lake Erie & Detroit River Ry. at Adelaide St., London, Ont.

6058. Jan. 15.—Authorizing Mission Telephone Line to place wires across C.P.R. at Dewdney station, B.C.

6059. Jan. 15.—Authorizing Bell Telephone Co. to place wires across Lake Erie & Detroit River Ry. at Adelaide St., London, Ont.

6060. Jan. 16.—Authorizing T. Richards to place a wire across G.T.R. at George St., Elmwood, Ont.

6061. Jan. 16.—Approving deviation of C.P.R. line through Saskatchewan, mileage 130.6 to 133.1, being Pasqua and Moose Jaw stations.

6062. Jan. 16.—Approving location of Manitoba & Northwestern Ry. branch, Bredenbury to Kamsac, Sask., from sec. 3, tp. 23, r. 1, w. 2 m., at Bredenbury, to sec. 3, tp. 27, r. 1, w. 2 m.

6063. Jan. 16.—Approving revision of C.P.R. line through Saskatchewan, from mileage 64.8 to 68, being Qu'Appelle and McLean stations.

6064. Jan. 14.—Authorizing M.C. Rd. to construct farm crossing over its railway, on the boundary line between C. & F. Slade's farms, Raleigh tp., Ont., in substitution of existing crossing and rescinding order 5926, Oct. 20, 1908.

6065. Jan. 22.—Authorizing M.C. Rd. to reconstruct a bridge on Chippewa Creek on its Niagara division.

6066. Jan. 18.—Authorizing Bell Telephone Co. to place wires across C.P.R. at western boundary of lot 18, Point Claire parish, Que.

6067. Jan. 18.—Authorizing Vancouver Power Co. to place wires across C.P.R. near Barnet, B.C.

6068. Jan. 18.—Authorizing G.T.P. Telegraph Co. to place wires across C.P.R. Souris branch, between Headingly and Springstein, Man.

6069. Jan. 18.—Approving location of the C.P.R. Lanigan-Prince Albert branch, from near Lanigan to northern boundary of s.e. ¼ sec. 5, tp. 35, r. 22, w 2 m., Sask.

6070. Jan. 18.—Approving Dominion Ex. Co.'s by-law, authorizing W. H. Burr, Traffic Manager, to prepare and issue tariffs of tolls.

6071. Jan. 18.—Approving location of Atlantic, Quebec & Western Ry. station, Port Daniel, Que.

6072. Jan. 18.—Authorizing G.T.R. to construct bridge west of the Trent River, near Trenton, Ont.

6073. Jan. 13.—Dismissing application of Pere Marquette Rd. for permission to refund to Parke, Davis & Co. 8c. per 100 lbs. on shipment of pharmaceutical goods from Walkerville, Ont., to Montreal.

6074. Jan. 18.—Authorizing C.N.O.R. to construct branch line from Sellwood Jct. to Sellwood, through Hutton tp., Nipissing district, Ont., to be completed within 2 years from date.

6075. Jan. 15.—Authorizing C.P.R. to open for traffic the portion of its line on Medicine Hat section known as the Gull Lake diversion, Alta.

6076. Jan. 12.—Authorizing G.T.R. to maintain a crossing at Maxville, Ont., and to construct gates in line with the right-of-way fence; and ordering that the G.T.R. be not required to cut trains standing on the siding track, for the purpose of crossing other trains on the main line at this point.

6077. Jan. 13.—Dismissing application of Ontario Powder Co. for an order authorizing Bay of Quinte Ry. to refund $35, alleged overcharge on shipment of ice from Tweed to Kingston, Ont.

6078. Jan. 19.—Authorizing the Wahnapitae Power Co. to place power lines across C.N.O.R. in Neelon tp., Nipissing district, Ont.

6079. Jan. 19.—Authorizing Wahnapitae Power Co. to place power wires across C.P.R. tracks at milepost 70, between Romford and Wanapitei, Ont.

6080. Jan. 18.—Prescribing rules in connection with proposed additions to and changes in Canadian Classification of freight traffic.

6081. Jan. 12.—Approving revised location of C.N.R. Co.'s Goose Lake branch, through townships 33-29, ranges 9-15, w. 3 m., west from Saskatoon, Sask.

6082. Jan. 19.—Authorizing Andover & Perth Electric Light Commissioners to place wires across C.P.R. in Perth, N.B.

6083. Jan. 20.—Authorizing C.P.R. to open for traffic the portion of its Moose Jaw branch from mileage 63 to 91, Saskatchewan, provided that trains be not operated at speed greater than 15 miles an hour.

6084. Jan. 14.—Directing that C.P.R. stop its trains opposite C.N.R. platform at St. Jerome, Que., and rescinding order 5189.

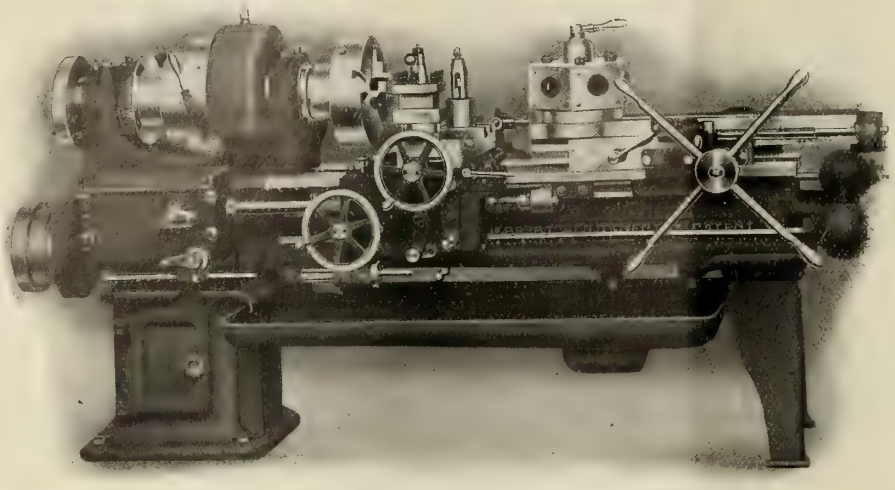
6085. Jan. 20.—Authorizing Toronto Electric Light Co. to lay tile ducts under G.T.R. and C.P.R. for power and electric wires.

6086. Jan. 19. — Authorizing Bell Telephone Co. to place wires across C.P.R. at Beeton station, Ont.

6087. Jan. 18.—Approving G.T. Pacific Ry. standard freight tariffs C.R.C. 2, C.R.C. 3, C.R.C. 4.

6088, 6089. Jan. 19.—Directing Ingersoll Electric Light and Power Co. to place its

MACHINERY FOR
RAILROAD SHOPS



CAPSTAN LATHE MADE BY ALFRED HERBERT LTD.

We furnish all kinds of Machinery for Locomotive Shops, Car Shops, Repair Shops, etc., including:

LATHES
PLANERS
BORING MILLS
DRILLS
WOODWORKING MACHINERY
TWIST DRILLS
TOOL STEEL
ETC., ETC.

Your enquiries will receive prompt attention.

THE MOORE TRACK DRILL

The latest and best on the market. Designed for heavy and severe work along entirely original lines that are meeting everywhere with full appreciation.

wires across C.P.R. Port Burwell and Ingersoll branches, at least 25 ft. above rails, and rescinding orders 3900 and 3904.

6090. Jan. 27.—Dismissing application of Crawshaw Brothers, Scotch Block, Ont., for order directing G.T.R. to construct a siding to their quarry.

6091. Jan. 19.—Directing Ingersoll Electric Light and Power Co. to place its wires across C.P.R. to St. Charles Condensing Co.'s premises, at least 25 ft. above rails, and rescinding order 3903.

6092. Jan. 22.—Ordering that the Express tariff and rules in existence prior to January 1, 1909, referred to in order 6020, be construed by all express companies to be the ratings, tariffs, and rules embodied in Classification and Tables of Graduated Charges 16, revised to Aug. 1, 1905, and "exceptions" thereto for use in Canada, which were in force on Dec. 31, 1908. And ordering that 9 be substituted for 8 in the 9th line of the operative part of order 6020.

6093. Jan. 21.—Ordering that, pending the final determination by the board of the tariffs of tolls which the Bell Telephone Company shall be authorized to charge, and the form of agreement with other companies to be approved by the Board, certain agreements of the company be temporarily approved.

6094. Jan. 22.—Authorizing Q.M. & S. Ry. to construct a spur to the Imperial Oil Co.'s premises, Iberville, Que.

6095. Jan. 18.—Amending order 1428, re Fairville, N.B., crossing, by ordering the municipality and the St. John Ry. Co. to pay to the C.P.R. within one month, one-third of the wages of the day and night watchman, directed to be provided by order of July 7, 1905, from July 1, 1906, to Jan. 18, 1909.

6096. Jan. 12.—Dismissing application of Hyde & Webster, Montreal, for a less rate on brick between Casselman and Montreal.

6097. Jan. 18.—Dismissing complaint of St. John, N.B., Board of Trade against increase by Dominion Atlantic Ry. of passenger fare on steamship line between St. John, N.B., and Digby, N.S., from $1.50 to $1.75 per capita.

6098. Jan. 18.—Dismissing complaint of I. R. Todd, St. Stephen, N.B., against rate charged by C.P.R. on pulpwood from St. Stephen to Milltown, N.B.

6099. Jan. 18.—Dismissing complaint of the St. John, N.B., Board of Trade against C.P.R. charge of 50c. per short ton shunting charges on goods from steamers from West St. John to East St. John.

6100. Jan. 23.—Approving location of the C.N.O. Ry. through Mowat tp. and Henvey Indian reserve, Parry Sound District, Ont., mileage 275.7 to 293.

6101. Jan. 25.—Authorizing G.T.R. and Napierville Junction Ry. Co. to operate trains on the tracks over, upon, or through the connection near Lacolle, Que, authorized by order 5264.

6102. Jan. 25.—Directing that the time for the installation of the interlocker of the G.T.P. Ry. where the same crosses the C.P.R. Pembina branch at Oak Point Junction, near Winnipeg, provided for in order 5417, and required by order 5573, to be installed not later than Jan. 31, 1909, be extended until March 31, 1909.

6103. Jan. 8.—Authorizing Niagara, St. Catharines and Toronto Ry. to construct its railway, at rail level, upon, along and across roads and highways in Thorold tp., Ont.

6104. Jan. 22.—Amending order 5943, of Dec. 16, 1908, by striking out the words "City of St. Johns," where they occur in the recital and operative parts of the order and substituting the words "Town of Iberville."

6105. Jan. 3.—Directing the Town of Orillia, Ont., to remove certain electric power wires placed across the G.T.R. at public road allowance, between cons. 5 and 6, east of Orillia, within 30 days, and that failing to comply with the order the town be liable to a penalty of $25 a day for every day it shall be in default.

6106. Jan. 22.—Approving revised location of C.P.R. Crow's Nest Pass branch from Lethbridge to Macleod, Alta., mileage 0.0 to 31.4.

6107. Jan. 23.—Confirming orders 4733, May 19, 1908; 4773, May 27, 1908, and 3058, May 23, 1907, issued by the Board in connection with the V.W. and Y. Ry. spur from False Creek to Burrard Inlet, Vancouver, B.C., as applied in the name of the V.V. and E. Ry. and N. Co., which has acquired the rights of the V.W. and Y. Ry.

6108. Jan. 23.—Approving the construction and maintenance of Walkerton and Lucknow Ry. bridge over Saugeen River at Walkerton, Ont., subject to agreement between C.P.R. and Town of Walkerton, dated Dec. 30, 1908.

6109. Jan. 25.—Authorizing Kaministikwia Power Co. to place wires across C.P.R. and C.N.R. at Heath St., West Fort William, Ont.

6110. Jan. 12.—Authorizing National Transcontinental Ry. to construct its railway at rail level across public highway running along the St. John River, between Edmundston and Connors; also permanently divert such highway and construct another in lieu thereof.

6111. Jan. 26.—Authorizing the Rat Portage Lumber Co. to place wires across C.P.R. at Harrison's Mills station, B.C., as per agreement dated Jan. 1, 1908.

6112. Jan. 26.—Approving Grand Valley Ry. Co. standard freight tariff C.R.C. 1.

6113. Jan. 26.—Authorizing the St. Lawrence and Adirondack Ry. Co. to reconstruct five bridges.

6114. Jan. 26.—Authorizing G.T.R. and Hamilton St. Ry. to operate trains over crossing of the Hamilton St. Ry. by G.T.R. additional track on Barton St., Hamilton, Ont., at intersection with Ferguson Ave.

6115. Jan. 27.—Approving revised location of C.P.R. as lessee of Manitoba and Northwestern Ry. from Bredenbury to the C.P.R. Pheasant Hills branch at Esterhazy, Sask., mileage 0 to 20.2.

6116. Jan. 27.—Approving location of the C.P.R. Lanigan-Prince Albert branch, from northern boundary of s.e. ¼ sec. 5, tp. 35, range 22, west 2nd meridian, to the Regina, Saskatoon and North Saskatchewan Ry., in n.w. ¼ sec. 26, tp. 42, r. 28, west 2nd meridian, mileage 8.7 to 82.4.

6117. Jan. 26.—Dismissing application of Village of Upton, Que., under sec. 237 for authority to continue Grand Trunk St. across G.T.R.

6118-6126. Jan. 8.—Authorizing C.P.R. to construct spurs to premises of J. R. Arbuthnot Co., Woods & Co., Nichols & Shepherd, Hargrave & Co., H. Leadly, Christie Bros., Kelly Bros., Prairie City Oil Co., and F. C. Bell, Winnipeg.

6127. Jan. 27.—Directing C.N. Quebec Ry. Co. to remodel plant in tower at crossing of C.N.Q.R. and Montreal St. Ry. near intersection of Valois Ave. and Ontario St., Montreal, and to provide for interlocking of derails with home signals, by May 15, 1909, and providing a penalty of $25 a day for default.

6128. Jan. 26.—Directing that C.N. Ry. construct a new plant in tower house, or remodel old plant at the crossing of C.P.R. near Emerson, Man., to enable semaphores to be relocked, work to be completed June 15, 1909, and providing a penalty of $25 a day for default.

6129. Jan. 12.—Ordering C.N.O.R. to pay G.T.R. for user of Union Station and yards at Toronto, amount agreed upon between the companies Nov. 7, 1906, up to and including the date of this order, and directing the C.N.O.R. to make an arrangement, if possible, for user of said station and yards, which will be satisfactory to the C.P.R. and G.T.R., said arrangement to take effect from the date of this order. Also ordering that in the event of failure of companies to make a satisfactory agreement upon terms, the same shall be fixed by Board.

6130. Jan. 8.—Authorizing C.P.R. to construct spur to Western Coal Co.'s premises, Winnipeg.

6131. Jan. 29.—Authorizing C. Vanderburg, Nelles Corners, Ont., to lay a natural gas pipe in culvert under G.T.R.

6132. Jan. 8.—Authorizing C.P.R. to construct a spur to F. J. Wellwood's premises, Winnipeg.

6133. Jan. 8.—Authorizing C.P.R. to construct a spur to Anchor Elevator and Warehousing Co.'s premises, Winnipeg.

6134. Jan. 29.—Approving location of B.C. Southern Ry., Michel branch, from mileage 1.7 to 30, British Columbia.

6135. Jan. 29.—Rescinding order 5760, Dec. 3, 1908, which dismissed application of Ingersoll Telephone Co. for authority to erect telephone cables across Tillsonburg, Lake Erie and Pacific Ry., at Ingersoll, Ont.

6136. Jan. 29.—Authorizing City of Winnipeg to erect transmission wires across C.P.R. at Gomez and Carter Sts., Winnipeg; and amending order 5777, Dec. 3, 1908.

6137. Jan. 8.—Authorizing C.P.R. to construct a spur to Oldfield, Kirby and Gardner's premises, Winnipeg.

6138. Jan. 21.—Temporarily approving of various contracts of the Bell Telephone Co. with other telephone companies.

6139. Jan. 27.—Authorizing C.P.R. to cross certain highways in Vespra, Ont., by its Sudbury-Kleinburg branch.

6140. Jan. 27.—Dismissing application of G. F. Stiles for order directing C.P.R. to construct farm crossing and directing company to provide an under-crossing 12 ft. high and 12 ft. wide, as originally provided and as required by an agreement between Stiles and the company.

6141, 6142. Jan. 27.—Dismissing complaint of F. B. Stevens & Co., and J. B. Stringer, Chatham, Ont., alleging unjustly discriminative rates on shipments of corn from intermediate Canadian points as against those from Detroit, Mich., to Montreal and points east.

6143. Jan. 27.—Dismissing application of C.P.R. for authority to divert present highway where it crosses C.P.R. at Kleinburg, Ont.

6144. Jan. 27.—Directing Toronto, Hamilton and Buffalo Ry. to provide highway bridge over its track at Garth Street, Hamilton, Ont., and ordering that the company submit to the Board copies of any agreements between it and the C.P.R., or any other railway company in respect to the use and maintenance of its track at this point.

6145. Jan. 12.—Approving location of Toronto and Niagara Power Co.'s lines from its transformer house at Niagara Falls, Ont., through Stamford tp.

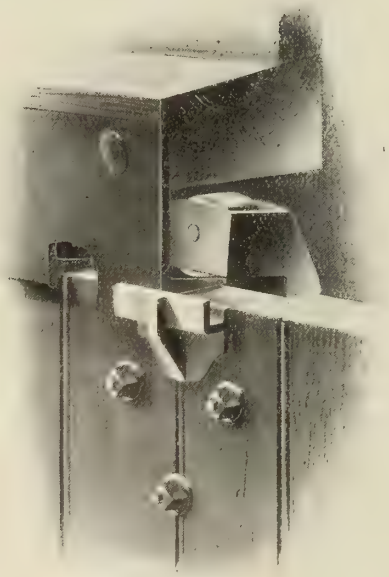
6146. Feb. 1.—Authorizing C.P.R. to construct spur to the Manitoba Linseed Oil Mills, Winnipeg.

6147. Jan. 21.—Disallowing charge of 1c. per 100 lbs. imposed by C.P.R. at Cartier, Ont., on western grain and grain products in carloads, consigned to Cartier for orders, and by G.T.R. at Sarnia Tunnel, on grain and grain products, in carloads, destined to Eastern Canada, and routed via Chicago, Chicago Junction or Milwaukee, to Sarnia Tunnel, for orders, and directing that a stop-over charge of 25 cts. a car per day

THE "DETROIT"

CAR DOOR

This is positively the only door that answers all requirements



The track forms a weather-proof door hood.

Hanger cannot be knocked off by being side scraped.

Tread of track and hangers protected from the weather.

Requires no tin or galvanized iron or other fixtures between top of door and bottom of track to make door weather-proof.

Runway of track inclined slightly downward, producing friction, making door always hang close to car and always in position.

It is stronger than the combined strength of all other doors—therefore, the cheapest at any price.

Let us send you full particulars

F·H·Hopkins & Co SUCCESSORS LATE JAMES COOPER Montreal

for the first 48 hours, and the car service toll therefor, be substituted thereafter. This to become effective not later than Feb.15.

6148. Jan. 21.—Disallowing charge of 1c. per 100 lbs. imposed by G.T.R. at Sarnia Tunnel, Ont., on lumber, shingles, timber and other forest products, in carloads, originating in British Columbia, destined to Eastern Canada, and consigned to Sarnia Tunnel for orders, and directing that a stop-over charge of 25 cts. a car per day for the first 48 hours, and the car service toll therefor, be substituted thereafter. This to become effective not later than Feb. 15, 1909.

6149. Jan. 29.—Dismissing application of Alberta Government for authority to carry telephone wires across Alberta Ry. and Irrigation Co.'s tracks at experimental farm, Lethbridge.

6150. Feb. 2.—Authorizing C.P.R. to use bridge 43.8, Montreal terminals, Eastern Division.

6151. Feb. 2.—Approving plan of concrete wall built in connection with C.P.R. south bank branch, under crossing of G.T.R. at St. Henri, Que.

6152. Feb. 2.—Approving location of C.N.O.R. from Sellwood Jct. toward Port Arthur, Ont., through Hutton and Creelman tps.

6153. Feb. 2.—Authorizing C.P.R. to construct its railway across highway between Keewatin and Kenora, at mileages 1.75 and 3.15.

6154. Jan. 26.—Amending order 5667, Nov. 24, 1908, authorizing Brantford and Hamilton Electric Ry. to open for traffic its railway from Alfred St. to Market St., Brantford, Ont., by striking out the provision by which speed of cars was limited.

6155. Jan. 27.—Approving diamond and interlocking semaphores installed at crossing of C.N.R. and C.P.R. near Homefield station, Man., and authorizing the companies to operate their trains over the crossing without being brought to a stop.

6156. Feb. 3.—Approving deviation of C.P.R. main line near Kincorth station, Sask., from mileage 96 to 97.5.

6157. Feb. 3.—Approving deviation of branch lines or sidings of G.T.R. extending from the main line in Meaford tp., Ont., to the Meaford Manufacturing Co., and the Meaford Wheelbarrow Co.'s premises.

6158-6163. Feb. 3 and 4.—Authorizing the Manitoba Government Telephones to erect their wires across C.P.R. tracks at 6 points.

6164. Feb. 3.—Authorizing C.P.R. to open for traffic the double tracks of its Smith's Falls section between Kemptville Jct. and Mountain, Ont.

6165. Jan. 12.—Dismissing application of City of Peterboro, Ont., for order amending order 5132, Mar. 27, 1908, authorizing G.T.R. to construct two spur lines, crossing Bethune St., Peterboro.

6166. Jan. 13.—Re rates on western grain arriving at Kingston, Ont., by vessel, destined to points in Maritime Provinces. (See pg. 169.)

6167. Feb. 4.—Directing express companies to carry acetylene gas under certain conditions.

6168. Feb. 3.—Directing G.T.R. to reduce coal rate from Suspension Bridge, Black Rock, and Buffalo, N.Y., to Lindsay, Ont. (See pg. 169.)

6169. Feb. 2.—Dismissing complaint of O. Davidson, re alleged excessive whistling of C.P.R. engines in Almonte, Ont.

6170. Feb. 4.—Dismissing application of Toronto, Niagara and Western Ry for approval of location of its line from Burlington to Hamilton, Ont., through Nelson and West Flamboro tps.

6171. Feb. 4.—Permitting Windsor, Essex and Lake Shore Rapid Ry. to operate a mixed train service on its line, using trailers on rear end for passengers, provided each trailer and all freight cars between locomotive and trailer are equipped with automatic air brakes, subject to the condition that they will not handle freight cars in mixed trains in the town of Windsor, nor between the town switch and the Co.'s power house at Kingsville.

6172. Feb. 4.—Authorizing the Niagara, St. Catharines and Toronto Ry. to cross with its track and wires the Hamilton Cataract Power, Light and Traction Co.'s wires at various points.

6173, 6174. Feb. 3.—Authorizing Galetta Elec. Power and Milling Co. to place wires across G.T.R. at two points.

6175. Feb. 6.—Authorizing Manitoba Government Telephones to place wires across C.N.R. near Grays station.

6176. Feb. 6.—Authorizing the Bell Telephone Co. to place wires across G.T.R. near Glen Williams siding, Ont.

6177. Feb. 6.—Authorizing Chatham Gas Co. to lay a main under G.T.R. on Lacroix St., Chatham, Ont.

6178. Feb. 6.—Approving deviation of C.N.R. Co.'s Montreal road, in Cumberland tp., Ont., subject to condition that diverted road, with approaches and ditches, be maintained in as good order and condition as existing road, including approaches and ditches.

6179. Feb. 6.—Authorizing W.E. & L.S.R. Ry. to construct its line along and across highways in Gosfield South and Mersea tps., and along Erie St., Leamington, Ont.

6180. Feb. 2.—Dismissing application of Dominion Concrete Co. for order authorizing C.P.R. to refund $196.52, amount paid the Ry. Co. on account of a siding built to its right-of-way, to connect with private siding to the complainant's industry at Kemptville, Ont.

6181. Feb. 1.—Dismissing resolution of Order of Railway Conductors, the Brotherhood of Locomotive Engineers, etc., relative to reduction of section gangs, the cross snow plow, and re terminal clearance.

6182. Feb. 1.—Dismissing complaint of Swan River Board of Trade, alleging failure of C.N.R. to furnish cars for prompt and efficient movement from that point.

6183. Feb. 1.—Dismissing application of W. R. Ritchie, Winnipeg, for order compelling C.N.R. either to proceed to arbitration or withdraw registration of location plans where same affect applicant's property in St. Boniface, Man.

6184. Feb. 1.—Dismissing application of Mrs. J. E. Collings, re failure of C.N.R. to settle claim for right-of-way.

6185. Feb. 1.—Dismissing complaint of the Hanbury Mfg. Co., Brandon, Man., alleging discrimination in favor of Winnipeg on shipments to C.N.R. Regina branch, from Brandon and Winnipeg. (See pg. 169.)

6186. Feb. 1.—Directing that where shippers in Manitoba, Saskatchewan and Alberta have to furnish car doors to enable cars to be used for traffic, allowance shall be made therefor. (See pg. 169.)

6187. Feb. 2.—Authorizing C.P.R. Co. to construct a spur line to J. L. Turner's premises, Beausejour, Man.

6188. Feb. 2.—Dismissing application of Kemp Mfg. Co. and Winnipeg Ceiling and Roofing Co. for order directing railway companies to equalize freight rates on metallic sidings from eastern points to Manitoba, Saskatchewan and Alberta, as against freight rates charged on manufactured product. (See pg. 169.)

6189. Feb. 1.—Dismissing complaint of Winnipeg Elevator Co. respecting charges made by C.P.R. for drawing plans, etc.

6190. Jan. 25.—Directing every railway company subject to the authority of the Board, operating a railway by steam power, to equip each car with the Pintsch compressed oil-gas system or a certain acetylene system; and rescinding order 5690, Nov. 17, 1908.

6191. Feb. 6.—Directing G.T.R. Co. to keep night watchman at crossing of the Montreal Road, Kingston Jct., with G.T.R., pending construction of subway.

6192. Feb. 4.—Dismissing application of the C.N.O.R. for order to vary order 5869, Dec. 16, 1908, granting C.N.O.R. authority to place its track across Bay View Ave., York tp., Ont.

6193. Feb. 4.—Dismissing application of the Toronto Electric Light Co. for leave to place ducts below the C.P.R. tracks on Christie St., North Toronto, Ont.

6194. Feb. 4.—Authorizing the C.N.Q.R. and C.P.R. to operate trains over the crossing east of Lorette, Que., as authorized by order 4862, June 2, 1908.

6195. Feb. 3.—Dismissing application of C.P.R. for order amending order 3242, authorizing National Transcontinental Ry. to cross C.P.R. near St. Bazile station, Que.

6196. Feb. 8.—Directing that sleeping car and parlor or chair-car tariffs filed with Board be printed on sheets uniform in size, viz., 11 inches by 8 inches, and be specifically numbered by each company beginning with C.R.C. no. S1, and that subsequent tariffs be numbered consecutively with the prefix C.R.C. no. S—; and further directing that said tariffs be filed under filing devices similar to these used for the filing of passenger tariffs.

6197. Feb. 8.—Approving application of C.P.R. for approval of plans showing spans at each end of bridge 0.72, Fraser River, C.P.R. Mission branch, B.C.

6198. Feb. 8.—Authorizing Qu'Appelle, Long Lake and Sask. Rd. and Steamboat Co. to construct spur lines on Smith St. and in the lane between Smith and McIntyre Sts., Regina, Sask.

6199. Feb. 8.—Authorizing C.P.R. to open for traffic the portion of its Mountain section from mileage 99.17 to 100.4, known as the Rogers Pass diversion, B.C.

6200. Feb. 8.—Authorizing C.P.R. Co. to construct a spur line to the Tillsonburg Packing Co.'s premises, Ingersoll, Ont.

6201. Feb. 8.—Authorizing G.T.R. to construct spur lines to the Woods Products Co.'s premises, Donald, Dysart tp., Ont.

6202. Feb. 8.—Directing Toronto, Hamilton and Buffalo Ry. to make certain improvements in crossing of its railway with the Lee Mountain road, Saltfleet tp., Ont.

6203 to 6212. Feb. 9.—Authorizing Okanagan Telephone Co. to cross C.P.R. with wires at 10 points in B.C.

6213. Feb. 9.—Approving plan showing pier of Cornwall Bridge draw span, Ottawa and New York Ry.

6214. Feb. 9.—Authorizing Chatham, Wallaceburg and Lake Erie Ry. to open for traffic the portion of its line from the crossing of the M.C.R. at Charing Cross to Erie Beach Park, Ont.

6215. Feb. 9.—Authorizing Provincial Natural Gas and Fuel Co., of Ontario, to lay a main under the G.T.R. in Stamford tp., Ont.

6216. Feb. 6.—Authorizing C.P.R. to use bridge crossing Lachine Canal at the Canada Sugar Refinery, on its south bank branch.

6217. Feb. 9.—Authorizing Okanagan Telephone Company to cross C.P.R. with wires near mile post 35.

6218. Feb. 9.—Authorizing G.T.R. to construct spur line from its Lachine Canal bank branch to G. A. Grier & Sons' premises, Montreal.

6232. Feb. 12.—Ordering G.T.R. to provide protection by gates at Depot St., Grimsby, Ont.

6233. Feb. 6.—Ordering C.N.R., C.P.R. and G.T.R. to equip their locomotives in Winnipeg with appliances to prevent unnecessary and unreasonable emission of smoke.

6234. Feb. 8.—Refusing application of A. E. Hill, Griswold, Man., for order compelling C.P.R. to issue 1,000 mile tickets good to travel over Western Division and branch lines in Man., Sask. and Alta.

6235. Feb. 8.—Ordering C.N.R. and G.T.P.R. to provide transfer facilities for joint handling of traffic at Petrel, Man.

6236. Feb. 8.—Dismissing complaint of Manitoba Grain Growers' Association of Kelloe, Man., against C.P.R. removing its agent from that point.

6237. Feb. 8.—Ordering C.P.R. to keep station Basswood, Man., open permanently, and provide an agent therefor.

6238. Feb. 8.—Dismissing application of City of Winnipeg, Man., for authority to connect city tramway running from Lac du Bonnet to Point du Bois, with C.P.R. Molson to Lac du Bonnet branch.

6239. Feb. 8.—Dismissing application of City of Winnipeg, for order directing C.N.R. to provide proper protection where it crosses Pembina St.

6240. Feb. 8.—Dismissing complaint of H. H. Shields, of Melton, Man., against rates charged by C.N.R. for warehousing carload of wheat at Port Arthur, Ont.

6241. Feb. 8.—Dismissing complaint of G. Steel, of Glenboro, Man., of failure of C.P.R. to furnish efficient and proper supply of cars for the movement of grain traffic from that point.

6242. Feb. 8.—Fixing form for release of responsibility for freight shipped to flag stations upon lines of all railways.

6243. Feb. 8.—Ordering the G.T.P.R. to construct a suitable and proper crossing for farm purposes at sec. 29, tp. 13, r. 25, Man.

6244. Feb. 8.—Dismissing complaint of J. Caverly, of Bowsman, Man., respecting train service on C.N.R. Melford branch.

6245-6251. Feb. 16.—Dismissing applications of Yorkton-Northwest Electric Co. for leave to cross C.P.R. at various points in Saskatchewan.

6252. Feb. 15.—Dismissing application of the Brandon, Sask. and Hudson's Bay Ry. Co. for approval of location of its railway in Brandon, Man.

6253, 6254. Feb. 15.—Authorizing Atlantic, Quebec and Western Ry. to build across 18 highways.

6255. Feb. 10.—Regulations respecting removal of planking from highway and farm crossings during winter.

6256. Feb. 16.—Authorizing the Sask. Government Telephones to erect line across C.P.R. between secs. 14 and 15, tp. 8, r. 7, w. 2nd mer.

6257. Feb. 16.—Authorizing Dr. Quinlan, of Stratford, Ont., to erect telephone wires across G.T.R. in Ellice tp., Ont.

6258. Feb. 16.—Authorizing Dunwich and Dutton Telephone Co. to erect wires across G.T.R. near Middlemiss, Ont.

6259 and 6260. Feb. 10.—Authorizing Hawthorn Hill Rural Telephone Co. to erect wires across G.T.R. in Minto tp., Ont.

6261. Feb. 11.—Authorizing C.P.R. to construct spur line to Soo Line Milling and Elevator Co.'s premises, Weyburn, Sask.

6262. Feb. 11.—Authorizing G.T.R. to construct spur line to United Factories' premises, Newmarket, Ont.

6263. Feb. 2.—Directing Ingersoll Electric L. & P. Co. to re-erect 12 wires erected across C.P.R. in Ingersoll, Ont.

6264. Feb. 8.—Dismissing complaint of the Wallaceburg Sugar Co. to effect that operation of certain Canadian Car Service Rules are unfair and burdensome to large shippers, and applying for average plan of car service.

6265. Feb. 8.—Authorizing Hawthorn Hill Rural Telephone Co. to erect wires across G.T.R. in Minto tp., Ont.

6266, 6267. Feb. 16.—Authorizing C.P.R. to construct and operate bridge over Lachine Canal, near Ogilvie Flour Milling Co.'s premises, Montreal.

6268. Feb. 16.—Authorizing C.P.R. to take certain lands in connection with its Windsor St. yards and station facilities at Montreal.

6269. Feb. 13.—Dismissing application of W. Hoskin, J. Butler and others for order requiring C.P.R. to provide crossing over yard at Twentieth St., Saskatoon, Sask.

6270. Feb. 17.—Authorizing Farmers' Long Distance Telephone Co., Blenheim, Ont., to erect its wires across P.M. Rd. near Fargo, Ont.

6271. Feb. 4.—Amending order 5672 authorizing G.T.P. Ry. to carry traffic over line from Fort William to end of track, by substituting mileage 0.00 to 188.77 for mileage 0.5 to 188.2, where it appears in said order.

6272 to 6274. Feb. 17.—Authorizing Alberta Government to erect wires across C.P.R. near Lethbridge.

6275. Feb. 17.—Temporarily approving some agreements of Bell Telephone Co. with other telephone companies provided tolls are not any higher than were charged immediately previous to July 13, 1906.

6276. Feb. 17.—Authorizing Alberta Government to erect wires across A.R. & I.C. Ry. at Experimental Farm, Lethbridge.

6277. Feb. 19.—Authorizing City of Brantford, Ont., to lay a storm sewer under G.T.R.

6278. Feb. 18.—Authorizing V.V. & E.R. & N. Co. to open for traffic the portion of its line from Huntingdon to Cloverdale, and from Olivers, on Victoria Terminal Ry. & Ferry Co.'s line, to International boundary near Blaine, and from Olivers to bridge over Fraser River at New Westminster.

6279, 6280. Feb. 19.—Authorizing Bell Telephone Co. to erect wires across C.P.R. near St. Faustin and Farnham.

6281. Feb. 19.—Authorizing location of C.N.O.R. line from Queen St., Toronto, to Rosedale station, with extension to Cherry St. yards.

6282. Feb. 11.—Authorizing T.H. & B.R. to construct a covered concrete culvert across its railway in Saltfleet tp., Ont.

6283 to 6291. Feb. 19.—Authorizing Canadian Machine Telephone Co. to erect wires across or under G.T.R. at various points in Ontario.

Railway Commissioners' Inspectors.

Particulars as to the location of the Board of Railway Commissioners' inspectors were given in our last issue. Formerly their duties were confined to investigations of accidents and to the inspection of rolling stock. The condition of passenger stations has now been added. Their districts and headquarters are as follows: Maritime Provinces and Quebec, E. C. Lalonde, Longueuil; Ontario, J. Ogilvie and J. Clarke, Ottawa; Manitoba and Saskatchewan, W. S. Blyth, Winnipeg; Alberta and British Columbia, M. J. McCaul, Calgary.

The inspectors report direct to individual members of the Board as follows: For the Maritime Provinces and Quebec, to Deputy Chief Commissioner Bernier; for Ontario, to Assistant Chief Commissioner Scott; for Manitoba and Saskatchewan, to Commissioner McLean, and for Alberta and British Columbia, to Commissioner Mills.

C.P.R. Running Rights over I.C.R.—The Minister of Railways laid before the House of Commons, Feb. 8, the correspondence with the C.P.R. relative to its proposal to secure running rights over the Intercolonial Ry. between St. John, N.B., and Halifax, N.S. The last is a memorandum dated Jan. 28, in which it was suggested that the C.P.R. pay interest at say 2% on the value of the property to be used jointly and a train rate per mile covering cost of maintenance; that if the C.P.R. were to do station to station business it should pay to the I.C.R. a percentage of gross receipts from the traffic, say 15% for first five years, 20% for second five years, and 25% thereafter; that the C.P.R. should pay the taxes levied on the I.C.R. by reason of a private company operating it; pay interest at 2% on cost of all subsequent additions and improvements; interest rate to be reduced when G.T. Pacific Ry. or any other company obtained running rights; C.P.R. to take over at same pay and standing any trainmen dropped by the I.C.R. to the C.P.R. replacing I.C.R. trains.

Railway Employes' Complaint.—The Board of Railway Commissioners passed the following order no. 6181 at Winnipeg, Feb. 1: In the matter of the resolution of Order of Railway Conductors, Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen and Engineers, Brotherhood of Railway Trainmen, and Order of Railway Telegraphers, relative to reduction of section gangs, the cross snow plow, and re terminal clearance (as at present used), being embodied in the new rules; upon the hearing of this matter in the presence of counsel for the railway companies affected and H. Irwin, representing the applicants, who alleged that he had no specific instructions with reference to the complaint other than to speak to the question of terminal clearance and cross snow plow; and upon his allegation that these matters had been satisfactorily adjusted, it is ordered that the said complaint be, and it is hereby, dismissed.

Railway Commissioners' Traffic Orders.

6166. Jan. 13.—In the matter of the complaint of J. Richardson & Sons, grain and commission merchants, Kingston, Ont., complaining that railway companies unjustly discriminate against Kingston and in favor of Lake Huron and Georgian Bay ports on shipments of western grain to points in Quebec and the Maritime Provinces, and applying for an order directing the railway companies to file rates from Kingston to points in Quebec and the Maritime Provinces similar to those which the said companies have established from Georgian Bay and Lake Huron ports. Upon the hearing of counsel for the railway companies, H. W. Richardson for the complainants appearing in person, the evidence adduced, and what was alleged—it is ordered that the rates charged from Kingston by the G.T.R., the C.P.R., and the Kingston and Pembroke Ry. Companies on western grain arriving at Kingston by vessel, and destined to points in Quebec and the Maritime Provinces, be made on the basis of 7c. per 100 lbs. from Kingston to Montreal; and that the proportional or arbitrary rates from Montreal to the said points in Quebec and the Maritime Provinces to be added to the said rate of 7c. per 100 lbs. from Kingston to Montreal, do not exceed the proportional or arbitrary rates from Montreal in force concurrently on western grain transferred at Lake Huron ports. And it is further ordered that the above rate become effective not later than Feb. 18.

COAL RATE TO LINDSAY, ONT.

6168. Feb. 3.—In the matter of the complaint of McLennan & Co., of Lindsay, Ont., alleging that the rate charged by the G.T.R. on hard coal from Black Rock and Suspension Bridge, N.Y., to Lindsay, is too high as compared with the company's rates to Cambray, Coboconk, Peterboro, Lakefield, Port Hope, and Belleville, Ont. Upon hearing counsel for complainants, the G.T.R. Co. and the C.P.R. Co., the evidence adduced, and what was alleged; and upon the report and recommendation of the Chief Traffic Officer of the Board, it is ordered that the G.T.R. Co. be directed to reduce its rate on coal in carloads from Suspension Bridge, Black Rock, and Buffalo, to Lindsay, to $1.15 per ton of 2,000 lbs., subject to a compliance with the provisions of subsec. 5 of sec. 315 of the Railway Act.

RATES ON C.N.R. REGINA BRANCH.

6185. Feb. 1.—In the matter of the complaint of the Hanbury Manufacturing Co. of Brandon, Man., alleging discrimination in favor of Winnipeg on shipments to points on the C.N.R. Regina branch, via Regina, from Brandon and Winnipeg. Upon hearing this matter, and upon reading the report of the Chief Traffic Officer, and in the presence of counsel for the railway company, no one appearing for the applicants, although duly notified; and upon said counsel representing that the cause of complaint as advanced by the petitioners had been removed, it is ordered that the complaint be dismissed.

PAYMENT FOR GRAIN CAR DOORS.

6186. Feb. 2.—In the matter of the complaint of the Grain Growers Grain Co., Winnipeg, alleging long delay on the part of railways in repayment to shippers of grain for lumber supplied for car doors; upon hearing this complaint in the presence of counsel for applicants as well as of counsel for the C.P.R., the C.N.R., and the G.T.P.R. Companies, and upon hearing what was alleged by counsel, it is ordered that where shippers, upon all or any railways subject to the jurisdiction of the Parliament of Canada, in Manitoba, Saskatchewan, and Alberta, are compelled to furnish car doors to enable cars to be used for traffic, allowance shall be made upon the following basis: Lower car door $1, upper car door 50c., and adjustment upon the above basis shall be made by the agent at or nearest to the point of shipment, at the time of shipment, payment to the shipper of the account out of funds of the railway company, of which he is agent, in his hands; or the shipper may deduct from the freight charges, if any, payable by him upon the shipment in such car for which the said door or doors were so supplied; the amount of such bill upon the foregoing basis, receipting the same and turning the account into the agent as so much cash.

RATES ON METALLIC SIDINGS.

6188. Feb. 2.—In the matter of the application of the Kemp Manufacturing Co. and Winnipeg Ceiling and Roofing Co., for an order directing railway companies to equalize freight rates on metallic sidings from eastern points to Manitoba, Saskatchewan, and Alberta, as against the freight rates charged on the manufactured product. Upon reading the complaint filed with the Board on May 11, 1907, this case having been set down for hearing in Winnipeg in Sept., 1908, and adjourned at the instance of the applicants; and upon its coming on for hearing at Winnipeg on Feb. 1, and when called no one appearing, and the same having been adjourned until this day, notice of such adjournment having been given to the applicants at Winnipeg, and no one now appearing, and upon reading the letter from the Metallic Roofing Co. of Jan. 28, 1909, and the letter from the Manager of the Canadian Manufacturers' Associations' Transportation Department of Jan. 29, 1909, it is ordered that the application be dismissed.

PLANS AND LEASES FOR ELEVATOR SITES.

6189. Feb. 1.—In the matter of the complaint of the Winnipeg Elevator Co., Ltd., respecting charges made by the C.P.R. for drawing plans, preparation of leases of elevator sites, etc., upon hearing this matter in the presence of counsel for the railway companies and of C. B. Piper for applicants; and it appearing from the statement of Mr. Piper and the matters covered by his complaint that the Board had no jurisdiction in the premises, it is ordered that the complaint be dismissed.

SLEEPING, PARLOR AND CHAIR CAR TARIFFS.

6196. Feb. 8.—Whereas, by Act of the Parliament of Canada, chap. 61, 7-8 Edward 7, sub-sec. 30 of sec. 2 of the Railway Act, was repealed and the following substituted therefor: "30. 'Toll' or 'rate' means and includes any toll, rate, charge, or allowance charged or made either by the company, or upon or in respect of a railway owned or operated by the company, or by any person on behalf or under authority or consent of the company, in connection with the carriage and transportation of passengers, or the carriage, shipment, transportation, care, handling, or delivery of goods, or for any service incidental to the business of a carrier; and includes also any toll, rate, charge, or allowance so charged or made in connection with rolling stock, or the use thereof, or any instrumentality or facility of carriage, shipment, or transportation, irrespective of ownership or of any contract, expressed or implied, with respect to the use thereof; and includes also any toll, rate, charge, or allowance so charged or made for furnishing passengers with beds or berths upon sleeping cars, or for the collection, receipt, loading, unloading, stopping over, elevation, ventilation, refrigerating, icing, heating, switching, ferriage, cartage, storage, care, handling, or delivery of, or in respect of, goods transported or in transit, or to be transported; and includes also any toll, rate, charge, or allowance so charged or made for the warehousing of goods, wharfage, or demurrage or the like, or so charged or made in connection with any one or more of the above-mentioned objects, separately or conjointly."

It is ordered that sleeping car and parlor or chair car tariffs filed with the Board by the railway companies subject to the legislative authority of the Parliament of Canada, or by any person on behalf or under authority or consent of the said railway companies, be printed on sheets uniform in size, namely, 11 x 8 inches, and be specifically numbered by each company, beginning with C.R.C. no. S. 1, and that subsequent tariffs be numbered consecutively with the prefix "C.R.C. no. S...." And it is further ordered that the said tariffs be filed with the Chief Traffic Officer of the Board under filing devices similar to those used for the filing of passenger tariffs.

RELEASE FOR SHIPMENTS TO FLAG STATIONS.

6242. Feb. 8.—In the matter of the complaint of the Winnipeg Board of Trade respecting alleged demand of the C.P.R. that shippers in Winnipeg sign a release form for freight shipped to regular or flag stations; upon hearing counsel for applicants, as well as for C.P.R. Co., and upon hearing what was alleged, it is ordered that hereafter the form of release of responsibility for freight shipped to flag stations, upon the lines of all railways in Canada, subject to the jurisdiction of the Parliament of Canada, be in the following form:

"In consideration of the ..... Railway Company having received the above-described property for transportation from..... station to.....station.....do hereby release said Company from all loss or damage that may occur to any of the above-mentioned property after it has been unloaded from the cars at .....station, the said station being a flag station without agent."

2. That no other form of release shall be required to be signed by any shipper of any property to any flag station upon any line of railway in Canada until further order (if any) regarding facilities and conveniences to be established by railway companies at flag stations.

THOUSAND-MILE TICKETS ON C.P.R.

6234. Feb. 8.—In the matter of the application of A. E. Hill, of Griswold, Man., for an order compelling the C.P.R. to issue 1,000-mile tickets, good to travel over the Western Division and branch lines in Manitoba, Saskatchewan and Alberta: Upon hearing this matter in the presence of counsel for the railway company, and for reasons given at the said hearing, it is ordered that the application be refused.

WAREHOUSING CHARGES AT PORT ARTHUR.

6240. Feb. 8.—In the matter of the complaint of H. H. Shields, of Melton, Man., against excessive rates charged by the Canadian Northern Ry., for warehousing carload of wheat consigned to its warehouse at Port Arthur, Ont.: Upon the hearing of this application in the presence of counsel for the railway company, no one appearing for complainant, and upon a perusal of the papers connected with the said complaint, and the application to and ruling of the Warehouse Commissioner, it is ordered that the complaint be dismissed.

The C.P.R. is looking into the question of the use of creosote for treating ties, etc.

A conference of G.T.P.R. employes, representing locomotive engineers, conductors, firemen and other trainmen, is reported to have taken steps to formulate a schedule and set of working rules, with schedule of wages and hours similar to those in force on the C.P.R., for submission to the management.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alberta and Great Waterways Ry.—The Alberta Legislature is being asked to incorporate a company with this title for the purpose of constructing a railway from Edmonton northeasterly to or near the westerly end of Lac la Biche, thence to Fort McMurray; and from some point on the line near the west end of Lac la Biche to the eastern end of the lake, together with all the usual and necessary powers conferred upon railway companies. W. McDonald, Edmonton, Alta., is solicitor for applicants.

When this bill was under discussion in the Legislature, Feb. 13, the Premier stated that the line would not be a branch of the G.T. Pacific Ry., but would be constructed by an independent company. The bill provides that construction is to commence within a year, and to be pushed forward with all possible speed, the line to be opened for traffic in 50-mile sections. A clause is inserted providing that the Government may at any time purchase the line, such option, however, not to be assignable by the Government.

Alberta Central Ry.—A bill before the Dominion Parliament provides for a further extension of time within which the railways authorized to be constructed by acts of 1901, 1903, 1905 and 1907, may be completed, and repeals sec. 4 of the act of 1901 and sec. 3 of the act of 1907. Authority to construct the following additional branch lines is asked: From the present authorized westerly terminus at Rocky Mountain House to the G.T. Pacific Ry. near the Yellowhead Pass; from the present authorized easterly terminus near the elbow of the Battle River to near Saskatoon or Warman, Sask.; and from the main line east of Red Deer southerly and easterly to near Moose Jaw, Sask. Power is also asked to increase the capital stock to $2,000,000, and to increase the bond issue from $20,000 to $25,000 a mile of line constructed.

A deputation of residents from the Red Deer District waited on the Government of Alberta, at Edmonton, Feb. 6, and asked the Government to guarantee the bonds of the company. The A.C.R. Co. was incorporated by the Dominion Parliament in 1901, with J. T. Moore, G. W. Smith, C. W. G. Green, D. J. Munn, W. A. Moore, J. J. Gaetz, J. C. Moore, and J. Flett, of Red Deer, as provisional directors. The projected line would start from the Calgary and Edmonton Ry. near Red Deer, cross the Red Deer River near Content, proceed northward to Stettler, and make connection with the Lacombe branch of the Calgary and Edmonton Ry., and thence proceed northeasterly to a connection with the G.T. Pacific Ry. at Battle River.

Alberta South-Western Ry.—Application is being made to the Alberta Legislature for an act incorporating a company with this title for the purpose of constructing a railway (with all convenient branches, whether under or over six miles in length) from the G.T. Pacific Ry. branch line between Calgary and Coutts, northeasterly from Macleod, thence to or near Macleod, and westerly from near Macleod to Pincher Creek, thence to the western boundary of the province, a distance of about 100 miles, together with all the usual rights, powers and privileges granted to railway companies. G. B. Henwood, Edmonton, Alta., is solicitor for applicants. See also G.T. Pacific Ry. Branch Lines.

Algoma Central and Hudson Bay Ry.—W. K. Whigham, of London, Eng., representing the new interests in the Lake Superior Corporation, has been inspecting the industrial plants and the railway lines owned by the corporation. Before proceeding to Sault Ste. Marie, Ont., he had an interview with representatives of the Ontario Government in Toronto, when the question of the extension of the A.C. and H.B. Ry. to a junction, at least, with the C.P.R. transcontinental line was discussed. The matter will be raised during the session of the Legislature when the question of subsidies comes up for discussion. (Feb., pg. 101).

The Lieut.-Governor, in his speech at the opening of the Ontario Legislature, Feb. 16, said: "The Canadian Improvement Co., having made sale of its interests in the Lake Superior Corporation to English capitalists, has been enabled to pay off the remaining $1,000,000 of its certificates guaranteed by the Government of Ontario, these have been cancelled, and the province has now been relieved of all further liability under the act respecting aid to the A. C. and H.B. Ry. and associated industries at Sault Ste. Marie. A probable result of this sale will be the introduction of a large amount of additional capital into the province to extend these industries and to complete the building of the A.C. and H.B. Ry., and the Manitoulin and North Shore Ry."

Blind River, Ont.—A by-law has been passed by the municipality of Blind River, Ont., offering a bonus of $17,000 to any transportation company which will construct a railway from Blind River north to Lake Natininda, and Lake Chiblow, 17 miles. G. J. McArthur is Publicity Commissioner, and J. Muncaster is Secretary of the Board of Trade, at Blind River.

Bow River Collieries Ry.—Application is being made to the Alberta Legislature for an act amending sec. 4, chap. 28, of the Statutes of 1908, by authorizing an extension of this railway from the southern terminus in tp. 17, range 17, west of the 4th meridian, to the International boundary, between ranges 1 and 15, west of the 4th meridian, and from south of the Belly River, on the projected extension, westerly to Lethbridge; and from between Bow River and Belly River on the projected extension, northeasterly to Calgary.

Brandon Transfer Ry.—Application is being made to the Dominion Government for an act authorizing an extension of time within which the railway in the city of Brandon, Man., authorized by its act of 1906, may be constructed.

British Columbia, Alberta, Saskatchewan and Manitoba Ry.—The Crawford Bay and St. Mary's Ry. Co. is applying to the Dominion Parliament for an act changing its name as above, such change of name, however, not to in any way impair, alter or affect the company's rights or liabilities. It is also provided that the head office should be at Lethbridge, Alta.; that the company may enter into agreements with the Northern Empire Ry., according to the provisions of secs. 361, 362 and 363 of the Railway Act, and that the period within which the authorized lines may be constructed shall be extended for a further period.

Brockville, Westport and North-Western Ry.—Application is being made to the Dominion Parliament for an act extending the time for the construction and completion of the authorized extension from Westport northerly and westerly.

Canadian Liverpool and Western Ry.—Application is being made to the Dominion Parliament for an act incorporating a company with this title, the provisional directors being: S. G. McClenahan, Montreal; G. S. May, D. G. Stewart, T. B. Rankin, and W. Johnston, Ottawa. The railway which the company is asking authority to construct would extend from the Transcontinental Ry. near the junction of the Ribbon, Manuan and St. Maurice Rivers in Quebec, northeasterly to the south shore of Lake St. John, thence easterly along the Saguenay River to its mouth; thence southwesterly following the River St. Lawrence to Quebec, and thence to Montreal. The company also desires to have power to carry on a general navigation business; to construct wharves, docks, elevators, etc., to be used in connection therewith; to acquire and utilize water powers, etc., for the generation of electricity; to construct telegraph and telephone lines, and to make agreements with the Transcontinental Ry. Commissioners, the G.T. Pacific Ry., the G.T.R., the C.P.R. and the Canadian Northern Quebec Ry. The works to be carried out are declared to be for the general advantage of Canada. The capital stock is fixed at $1,000,000, and it is desired to issue securities to the amount of $50,000 per mile of railway.

Canadian Western Ry.—Application is being made at the current session of the Alberta Legislature for an act incorporating a company with this title to construct a railway to be operated by steam, electricity, or any other motive power from the International boundary between the east side of range 23 and the west side of range 28, west of the 4th principal meridian, to the C.P.R. Crow's Nest Pass line, near Cowley or Pincher Creek, thence northerly to Calgary; also a branch from the above line between tp. 10, range 1, west of 5th principal meridian, northwesterly, following the north fork of the Old Man River, through Livingstone Gap, and along the middle fork of the river to the boundary line between Alberta and British Columbia, west of Gould's Dome. Power is also being asked to construct branch lines, and telephone and telegraph lines, to generate and distribute electrical power, and for all other powers usually conferred on railway companies. Special reference is made to the making of traffic and other arrangements with any lines in Montana, and in British Columbia. Hough, Campbell & Ferguson, Winnipeg, are solicitors for applicants.

The provisional directors named in the bill now before the Dominion Parliament for the incorporation of a company with this title are J. S. Hough, T. L. Metcalfe, A. D. Kildahl, H. J. Box and O. L. Boynton, of Winnipeg. The railway which the company asks power to construct was described in our Nov., 1908, issue, pg. 793. A clause is inserted to the effect that the company shall not construct or operate its line of railway along any highway, street or public place without obtaining the consent, expressed by by-law, of the municipality having jurisdiction over the same. The company is also asking for power to develop electric power, to construct telegraph and telephone lines, and to enter into agreements with the C.P.R., the Great Northern Ry., the Calgary and Edmonton Ry., the G.T. Pacific Ry. or the Canadian Northern Ry. The capital stock of the company is fixed at $2,000,000, and it is authorized to issue securities to the extent of $50,000 a mile of line constructed.

The promoters of this company are owners of a coal mine at Taber, Alta., 75 miles from Dunmore Jct., on the C.P.R. Crow's Nest Pass branch, to which point it is considered probable that in time a line from Weyburn, on the C.P.R. Portal-Moose Jaw line, will be constructed. The company has also secured a mine between the Livingstone and Main ranges of the Rocky Mountains, near Cowley, Alta., about 70 or 80 miles from the International boundary. It is in connection with this property that the present developments of the company's plans are due. The line to be constructed to the International boundary, it is understood, will be financed by the Chicago, Milwaukee and St. Paul Ry. Co., and connected with its new extension to the

Pacific coast at Helena, Montana. The object of the connection which will be effected by the completion of the line is to secure for the C.M. and St. P.R. a coal supply from Alberta.

Collingwood Southern Ry.—The Dominion Parliament is being asked to pass an act extending for a further period of two years the time within which the company may commence the construction of the railway authorized by its act of incorporation passed in 1907.

The Chicago, Milwaukee and St. Paul Co. of Washington, under which title the Chicago, Milwaukee and St. Paul Ry. is constructing its western extension, has changed its corporate name to the Chicago, Milwaukee and Puget Sound Ry., and has taken possession of the property of its predecessor in Idaho, Montana and South Dakota.

Detroit River Tunnel.—Press reports state that good progress continues to be made with the construction of the tunnel under the Detroit River between Detroit, Mich., and Windsor, Ont. The open cut on the tunnel approach on the Canadian side is completed, together with the retaining walls at the lower end, and a considerable portion of the approach work on the Detroit side is also completed. Of the subaqueous section of the tunnel seven sections of the double tube, making a length of 1,813 ft., have been sunk, and the concrete placed round them. Five of the sections have been pumped out, and preparations are being made for putting in the inner ring of concrete. The total length of the tunnel and approaches will be 12,800 ft. It is expected that it will be entirely completed at the beginning of 1910.

Hamilton, Ont.—The Ontario Legislature is being asked to pass an act authorizing the Hamilton City Council to issue debentures for various purposes, including the cost necessary to construct railway spur lines for manufacturing industries, for freight purposes only, with sidings and switches within the city; or to enter into agreements with railway companies for the construction, operation or use of such spur lines. For the purpose aforesaid the city asks for the powers conferred upon railway companies by the Ontario Railway Act, 1906.

Hudson Bay.—The Dominion estimates for the ensuing financial year include an item of $65,000 to provide for the survey and location of a line of railway from the Saskatchewan River to Hudson Bay.

The Minister of the Interior stated in the House of Commons Feb. 3, that it would appear from the sales of land during the last four months of 1908, a sufficient quantity was disposed of in the way of homesteads and pre-emptions to cover almost one-half of the estimated cost of the proposed railway from Saskatchewan to Hudson Bay. A total of 2,879,139 acres has been so disposed of, the sale price being $6,229,699. The cost of the railway is estimated at about $15,000,000. (Feb., pg. 105.)

Replying to a question in the House of Commons, Feb. 15, the Minister of Railways stated that $61,567 had been expended upon surveys for the railway to Hudson Bay. There were 110 persons employed upon the survey, which it was expected would be completed during March. Pending the receipt of the report, no decision had been reached as to the construction of the line.

Hudson's Bay and Pacific Ry.—The original act of incorporation of this company was passed by the Dominion Parliament in 1896 (second session), and amending acts were passed in 1898, 1901, 1903, and 1905. By an act under consideration at the present session, it is sought to have sec. 7 of the 1896 act, chap. 65 of the statutes of 1901, chap. 127 of the statutes of 1903, and sec. 1, chap. 104, statutes of 1905, repealed. A new set of provisional directors is named by sec. 2 of the present bill, the list, which contains a number of those in the original list, is as follows: Admiral A. H. Markham, Colonel J. Harris, J. Weston, J. A. Clarke, J. A. Reid, Lieut.-Colonel T. T. Turnbull, of London, Eng.; A. Racine, E. H. Lemay, of Montreal; E. E. Le Beree, R. Jones. Ottawa. The first clause of the bill grants a further extension of time for the construction of the line.

Hudson Bay Pacific Ry.—The Minister of Justice, reporting to the Governor-General, calls attention to the act passed last session of the British Columbia Legislature incorporating a company with this title. The company is authorized by the act to construct a railway from the western to the eastern boundary of the province, and the Minister says: "It is questionable whether it is competent to the Provincial Legislature to authorize such a work, since the legislative authority of a province does not extend to works connecting two provinces or extending beyond the limits of the province. He does not on that account recommend disallowance, but adds that the statute "may be left to such operation as it may have," and that a copy of the report be sent to the Lieut.-Governor of British Columbia for the information of his government.

Intercolonial Ry.—Replying to a question in the House of Commons Feb. 4, the Minister of Railways said the field work of the survey for double-tracking the I.C.R. from near Amherst to near Truro, via Parrsboro N.S., was started Aug. 24, and was completed Dec. 1, 1908. Plans and profiles had been prepared showing the projected route. The cost of the surveys was $9,914.05.

The estimates submitted to the House of Commons for the ensuing financial year provide for the following:

Double-tracking parts of line	$ 69,000
Original construction	800
Strengthening bridges	70,000
New turntables	13,000
Increasing water supply	74,700
Increasing accommodation generally	133,000

Kootenay and Alberta Ry.—Application is being made to the Dominion Parliament for an act incorporating a company with this title to construct the following lines of railway: From the C.P.R. Crow's Nest branch, between Cowley and Pincher Creek, Alta., southerly through the Beaver Valley to the North Kootenay Pass, thence southerly down the Flathead River Valley, B.C., to the International boundary. From the C.P.R. Crow's Nest branch southerly through Pincher Creek, the Fishburn settlement, the Blood Indian Reserve, and Milk River Valley to the International boundary at Coutts, Alta.; a branch line from, at or near the crossing of the Waterton River, Alta., southerly to the southwest corner of the Blood Indian reserve, passing in the vicinity of Mountain View, thence along Lee's Creek Valley to Cardston. The company also desires to have power to acquire and utilize steam and water power for compressing air and generating electricity for any purposes and commercially dealing in the same; to construct, control and operate telegraph and telephone lines; and to enter into agreements with other railway companies. Smith & Johnston, Ottawa, are solicitors for applicants.

Application is also being made to the Alberta Legislature for an act incorporating a company with this title to construct the following lines of railway: From near Cowley, southwesterly through Beaver Valley to the North Kootenay Pass in the Rocky Mountains. From Cowley southeasterly through Pincher Creek, Fishburn and Cardston, thence easterly to the International boundary at or near Coutts. Emery, Newell & Bolton, Edmonton, are solicitors for applicants. (See also Flathead River to Kootenay Pass, Feb., pg. 101.)

London and North Western Ry.—Application is being made to the Dominion Parliament for an act incorporating a company with this title to construct a railway from London to Sarnia, Ont.; from near London to Lake Huron near Goderich; with power to construct branch lines not exceeding in any one instance 15 miles, such branches not to extend beyond the limits of Middlesex, Lambton or Huron counties. It is also desired to have authority to construct telegraph and telephone lines; to acquire and utilize steam or water power; to generate electricity for motive power, and to dispose of the same for manufacturing purposes. Ivey and Dromgole, London, Ont., are solicitors for applicants.

Maritime Coal, Ry. and Power Co.—Application is being made to the Dominion Parliament for an act of incorporation with all the powers formerly held by the company under its Nova Scotia charter of 1904, as amended by the N.S. Act of 1906, and with all the powers formerly held by the Canada Coals and Ry. Co., under the charter granted in 1892, with the amendments thereto, and to ratify and confirm the same. The company also desires to have power to operate steam and other vessels, wharves, docks, elevators; to acquire and utilize water or other power for the generation of electricity, and to dispose of the same, and for other purposes, and asks for a declaration that the company's railways are works for the general advantage of Canada.

Niagara Peninsula Ry.—Application is being made to the Ontario Legislature for an act authorizing the company to construct a branch line northerly from the present northerly limit of the authorized line, through Humberston, Crowland and Thorold tps., to Allanburg, Ont., and increasing the capital stock of the company to $100,000, and for other purposes. Rowell, Reid, Wilkie, Wood and Gibson, Toronto, are solicitors for applicants.

The railway is being promoted in the interests of the Canadian Portland Cement Co., of which M. J. Haney, Toronto, is President.

North-West Ranching and Packing Co.—The Alberta Legislature is being asked to pass an act incorporating a company with this title to carry on business as ranchers, owners of abattoirs, packing plants, etc., and in connection therewith to construct switches, side tracks, spur lines, and tram ways, to connect railways, telegraph and telephone lines; and to operate tugs and other vessels. The head office is to be at Edmonton. J. B. Powell, Edmonton, is solicitor for applicants.

Owen Sound and Meaford Ry.—The Ontario Government is being asked to recommend the Legislature to authorize the guaranteeing of the bonds of the company so as to enable it to proceed with construction.

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

PYLE-NATIONAL ELECTRIC HEADLIGHT CO.

MONADNOCK, CHICAGO

The Pere Marquette Rd., according to a press report, is negotiating for the purchase of the vacant G.T.R. locomotive shops at Port Huron, Mich.

Prince Edward Island Ry.—The estimates submitted to the House of Commons for the ensuing financial year provide for the following works:

Branch line Harmony to Elmira	$ 50,000
Increase of accommodation at Charlottetown	194,000

(Feb., pg. 103.)

Prince Edward Island Tunnel.—During a session of the P.E.I. Legislature, Feb. 15, the Premier stated that he had had a conversation with the Dominion Minister of Finance, who informed him that before the Government would proceed in this matter, they would have to secure full and satisfactory data. About 20 years ago, when the tunnel project was first suggested, surveys had been made, but these were utterly valueless for the purpose of affording a basis on which engineers could make calculations. The borings for coal, which are now being conducted in the province, have shown that water in unexpectedly large quantities is liable to be met with at different depths. This indicates serious difficulties in the way of tunnel construction under the Straits of Northumberland. The Premier added that prominent engineers had told him that it would be a very hard matter to figure on a definite price even with a survey. He believed that the Dominion Government would shortly take steps to secure data which would determine the feasibility of an undertaking, which, if carried out, would be the greatest of its kind in the world.

Quebec and New Brunswick Ry.—Application is being made to the Dominion Parliament for an Act amending the company's powers by increasing its bonding powers to $35,000 a mile; by fixing and extending the times for the commencement and completion of its lines of railway; and by empowering it to construct a branch from its authorized line near Connor to Centreville, N.B., by the most convenient route in the neighborhood of the International boundary, thence to Woodstock, and from Woodstock by the St. John River Valley to St. John, passing through Madawaska, Victoria, Carleton, York, Sunbury, Queens, Kings and St. John counties. D. R. Murphy, Montreal, is solicitor for the company.

Quebec Bridge and Ry. Co.—Replying to a question in the Commons Jan. 26, the Minister of Railways said the board of engineers appointed by the Government to design a new bridge had gathered together a corps of expert designers, calculators, and draughtsmen, and were busily engaged upon the work. So far they had not advanced to such an extent as would admit of an estimate as to the cost of reconstruction. It is expected that plans and specifications will be completed and tenders invited for the work during the current year.

Quebec Central Ry.—A contract has been let to Powers and Dussault, Quebec, for the construction of 30 miles of line from St. George Beauce to St. Justine, Que.

Quinze and Blanche River Ry.—The Dominion Parliament is being asked for an act extending the time fixed by chap. 123, of 6 and 7 Edward VII, within which this company may construct its railway, and for other amendments of its charter powers. Gormully, Ord and Powell, Ottawa, are solicitors for the company.

Red Deer Ry.—Application is being made to the Alberta Legislature for an act extending the time within which the company may construct the lines authorized in chap. 29, of the Statutes of 1907. Moore & Davie, Red Deer, Alta., are solicitors for applicants.

Rimouski International Ry.—Application is being made to the Dominion Parliament for an act incorporating a company with this title, with P. E. D'Anjou, Bic, Que.; J. A. Talbot, H. Lepage, E. Letendre, L. Tache, A. Cumberland, P. Raymond, J. A. Theberge, N. Bernier, L. N. Asselin, Rimouski, Que.; J. F. Demars, Levis, Que., as provisional directors. The company desires to have authority to construct a railway from Rimouski, or from a point between that town and Pointe-au-Pere wharf, along the course of the Rimouski River to the middle of Duquesne tp., thence westerly following the valley of one of the tributaries of the lakes to the northern portion of Chenier tp., thence to Lac des Aigles in Biencourt tp., thence following the Biencourt River valley to the first Squateck Lake, in Robitaille tp.; and thence to the second Squateck Lake and the Squateck River in Anclair tp., on to the Great Squateck Lake in Rouillard tp., and by the Owens River, the west branch of the Iroquois River, to Edmundston, N.B., with power to operate in connection with its railway, steam and other vessels, with the necessary docks, wharves, warehouses, elevators, etc. It also desires to have power to generate electricity for its various purposes, to own hotels, lay out pleasure parks, etc. It also desires to be authorized to enter into agreements for various purposes with the Temiscouata Ry., the C.P.R. and the Boston and Maine Rd., the Intercolonial and the Transcontinental Rys. The capital is fixed at $3,000,000 and authority is asked to issue bonds to the extent of $30,000 a mile of railway to be constructed.

Salisbury and Harvey Rd.—It is recited in the preamble of a bill now under consideration by the House of Commons that all the rights, franchises, railway and other property of the Salisbury and Harvey Ry. were sold under the powers of decretal orders of the Supreme Court in Equity of New Brunswick, and were purchased by J. D. Newton, of New York City. The bill provides for the incorporation of a new company as the Salisbury and Harvey Rd. Co., with J. D. Newton, D. E. Bergen, of New York City; Hon. J. D. Hazen, D. K. Hazen, and E. P. Raymond, of St. John, N.B., as provisional directors, to acquire and take over the railway, with all its rights, franchises, etc. The railway is declared to be a work for the general advantage of Canada, and the company may within two years after the passing of the act commence the construction of the lines authorized by sec. 1, chap. 80, of the statutes of 1900, and complete the same within five years; it may acquire steam and other railways; construct telegraph and telephone lines, and may make agreements with the Harvey Branch Ry. Co., and the Albert Southern Ry. The securities to be issued by the company shall not exceed $10,000 a mile, and its capital stock is fixed at $500,000.

Saskatchewan Valley and Hudson's Bay Ry.—Application is being made to the Dominion Parliament for an act granting an extension of time for the commencement and completion of the lines which the company is authorized to construct by sec. 7, chap. 132, of the Statutes of 1907. Short, Cross & Biggar, Edmonton, Alta., are solicitors for applicants.

Southern Central Pacific Ry.—By a bill under consideration by the Dominion Parliament the list of provisional directors is proposed to be amended by striking out the name of J. D. McLennan, of Cleveland, Ohio, and substituting therefor T. Sturgis, of New York City. Sec. 4 of the amending act is proposed to be repealed, and a new section substituted extending for a further period of two years the time within which the construction of the authorized line may be commenced.

Application is being made to the Dominion Parliament for an act authorizing this company to sell or lease to, or purchase or lease from, or to amalgamate with any other railway company or companies, and generally to enter into agreements of a like nature. A. T. Thompson, Ottawa, is solicitor for the company. (Feb., pg. 105.)

South-West Alberta Ry.—The Alberta Legislature is being asked to pass an act incorporating a company with this title to construct a railway from the International boundary between ranges 22 and 29, west of the 4th meridian, north and westerly to or near the Pincher Creek Coal Mining Co.'s mines in tp. 6, range 30, west of the 4th meridian, and tp. 6, range 1, west of the 5th meridian, and thence northerly and westerly to the C.P.R. Crow's Nest Pass, at or near Pincher station in tp. 6, range 30, or tp. 6, range 29, west of the 4th meridian, with all the powers usually conferred on railway companies. The provisional directors are: O. W. Laboree, R. D. Miller, Spokane, Wash.; Jas. Finlay, A. C. Kemmis, Pincher Creek, Alta. The length of the projected line is 54 miles.

Strathcona and Brazeau Ry.—The Alberta Legislature is being asked to pass an act incorporating a company with this title for the purpose of constructing a railway from near Strathcona, on the Calgary and Edmonton Ry., westerly to the Brazeau coal fields on the Brazeau River, and thence to the Yellowhead Pass. Power is also asked to make agreements with other railways for amalgamation, leasing or otherwise, and with all other necessary and usual powers, rights and privileges. R. H. Bowes, Toronto, is solicitor for applicants.

Temiskaming and Northern Ontario Ry.—A statement has been made by the Premier of Ontario that the question of extending this line from Charlton to Elk Lake, Ont., about 28 miles, is under consideration. The projected extension will be a continuation of the five mile branch now being operated from Englehart to Charlton. A deputation from Earlton waited on the Government Feb. 9, to ask that in the construction of the branch the requirements of that district be met. Residents in the Parry Sound district are advocating an extension of the line southerly to Parry Sound, thus providing the railway with a deep water port on the Great Lakes for ore traffic. (Feb., pg. 105.)

Vancouver and Northern Ry.—Application is being made to the British Columbia Legislature for an act incorporating a company with this title, the provisional directors being: C. T. Dunbar, F. C. Wade, E. J. McFeely, H. M. Burwell, C.E. The railway which the company desires power to construct would start at Vancouver, and would follow the valley of the Seymour Creek to the watershed north of Loch Lomond, thence via the valley of the easterly branch of Seymour Creek and along the valley of the Indian River to the north arm of Burrard Inlet; thence northerly via the Mamquan and Cheakamis valleys to the Pemberton Meadows; with a branch line via the valley of Furry Creek or Stammus Creek, or both, to Howe Sound. The offices of the company are to be at Vancouver, and its capital $500,000.

The Vancouver, Fraser Valley and Southern Ry. Co. is asking the Dominion Parliament for an act extending for a further period of two years the time within which the company may commence the construction of the railway which it was authorized by its act of incorporation of 1906 to construct.

The Vancouver, Westminster and Yukon Ry. Co. is asking the Dominion Parliament to pass an act extending for three years the period within which the company may commence the construction of the branch lines authorized to be constructed by its act of

1906. It also desires to be given power to enter into agreements, subject to secs. 361, 362 and 363 of the Railway Act, with the Burrard, Westminster Boundary Ry. and Navigation Co.

Victoria and Barclay Sound Ry.—Application is being made to the Dominion Parliament for an act incorporating a company with this title to construct a railway from Victoria, by way of Otter Point and San Juan to Barclay Sound, near Sarita River, with branch lines not exceeding, in any one case, 12 miles in length. Power is also being asked to maintain a steam ferry between Beecher Bay, or some other point on Vancouver Island on the Straits of Juan de Fuca, to some point on the straits in the United States. It is also desired to have power to own and operate steam and other vessels, wharves, docks, warehouses, elevators, etc.; to generate electricity for various purposes; to construct telephone and telegraph lines, and to erect bridges for the use of which tolls may be charged. The capital stock is fixed at $5,000,000, and securities may be issued to the amount of $50,000 a mile of railway. The provisional directors named are: W. K. Houston, H. H. Jones, W. E. Laird, C. L. Betterton, Victoria, B.C.; J. M. Hawthorne, Seattle, Wash.

The York and Carleton Ry. Co. has under consideration plans for the construction of an extension of nine miles from Ryan Brook, the present terminus of its line, to Nappaddogan, N.B., a divisional point on the National Transcontinental Ry.

Winnipeg and North-Western Ry.—By an act under consideration by the Dominion Parliament this company asks an extension of time within which the line authorized by its act of incorporation (chap. 141, 1907), may be constructed. Power is also asked to construct the following branch lines: (a) From near the Narrows of Lake Manitoba westerly to tp. 25, range 30, west of the first principal meridian, thence northwesterly to its authorized line of railway at Nut Lake; (b) from the last mentioned line near Good Spirit Lake southeasterly to the G.T. Pacific Ry., near the second principal meridian, or between such meridian and the boundary of Manitoba. It is also desired to have power to guarantee in whole or in part the principal or interest, or both, of securities of any railway company, transportation, elevator, warehouse, or other company authorized to carry on any business incidental to the working of a railway upon a two-thirds majority of the company's shareholders.

St. Boniface Union Stockyards.—The city council of St. Boniface, Man., has had an agreement drawn for execution between the C.P.R., the G.T. Pacific Ry., and the Canadian Northern Ry., on the one hand, and the city on the other, with respect to the establishment of a union stockyard within the city limits. According to the agreement the company to be formed must expend $395,000 within two years; must include St. Boniface in its name; must maintain a public market for a term of years; agree not to ask for exemption from taxation; and a site has to be provided which the corporation may either lease or purchase for the erection of a municipal abattoir. The council will, on the signing of the agreement, proceed with the construction of a sewer on Dawson road at a cost of $180,000.

At a meeting of the Engineers' Club of Toronto, Feb. 12, F. L. Somerville, formerly Division Engineer G.T.R., Toronto, read a paper on "The Railway Crossing; Its Development and Proposed Elimination." The members of the Ontario Railway and Municipal Board and G. A. Mountain, Chief Engineer of the Board of Railway Commissioners, took part in the discussion.

March Birthdays.

Many happy returns of the day to:

W. G. Annable, General Passenger Agent C.P.R. Atlantic Steamship Lines, Montreal, born at Ottawa, Mar. 3, 1875.

P. S. Archibald, C.E., General Manager Elgin and Havelock Ry., and Commissioner New Brunswick Coal and Ry. Co., Moncton, N.B., born at Truro, N.S., Mar. 21, 1848.

C. N. Armstrong, ex-General Manager Atlantic and Lake Superior Ry., Montreal, born at Maskinonge, Que., Mar. 19, 1850.

A. H. Baird, C.P.R. Ticket Agent, Paris, Ont., born at Montreal, March 1, 1834.

D. E. Brown, ex-General Snperintendent C.P.R. Trans-Pacific Steamship Service, Vancouver, B.C., born at Owen Sound, Ont., Mar. 20, 1855.

G. J. Bury, General Manager C.P.R. Western Lines, Winnipeg, born at Montreal, Mar. 6, 1866.

Allan Cameron, General Traffic Agent C.P.R., New York, born near Owen Sound, Ont., Mar. 14, 1864.

H. S. Carmichael, General Passenger Agent C.P.R., Liverpool, Eng., born in Scotland, Mar. 7, 1874.

W. P. Chapman, Resident Engineer Mackenzie, Mann & Co., Ltd., Toronto, born at Abbotsley, Hunts, Eng., Mar. 9, 1857.

F. G. J. Comeau, General Freight Agent Dominion Atlantic Ry., Halifax, N.S., born at Meteghan River, N.S., Mar. 10, 1859.

A. E. Cox, Storekeeper Canadian Northern Ry., Winnipeg, born at Huddersfield, Eng., Mar. 12, 1863.

Hon. L. J. Forget, President Montreal Street Ry. Co., born at Terrebonne, Que., Mar. 11, 1853.

C. O. Foss, District Engineer National Transcontinental Ry., St. John, N.B., born at Wentworth, N.H., Mar. 20, 1852.

W. S. Fry, Treasurer Quebec Central Ry., Sherbrooke, Que., born at Lee, Kent, Eng., Mar. 18, 1874.

H. W. Gays, General Manager Ottawa and New York Ry., Ottawa, Ont., born at Brant, Erie Co., N.Y., Mar. 21, 1848.

F. Grundy, Vice-President Quebec Central Ry., Sherbrooke, Que., and President Temiscouata Ry., born at Bury, Lanc., Eng., Mar. 28, 1836.

J. Halstead, General Freight Agent C.P.R., Calgary, Alta., born at Bracebridge, Ont., Mar. 2, 1877.

R. M. Hannaford, Engineer Permanent Way, Buildings and Bridges, Montreal Street Ry., Montreal, born there, Mar. 22, 1865.

W. Harty, M.P., President Canadian Locomotive Co., Kingston, Ont., born in Biddulph tp., Middlesex, Ont., Mar. 8, 1847.

C. A. Hayes, General Freight Agent G.T.R., Montreal, born at West Springfield, Mass., Mar. 10, 1865.

J. Hobson, Consulting Engineer G.T.R., Hamilton, Ont., born at Guelph, Ont., Mar., 1834.

F. Lee, Division Engineer C.P.R., Winnipeg, born at Chicago, Ill., Mar. 7, 1873.

R. W. Long, Division Freight Agent G.T.R., Hamilton, Ont., born at Appin, Ont., Mar. 20, 1873.

D. D. Mann, Vice-President Mackenzie, Mann & Co., Ltd., and 1st Vice-President Canadian Northern Ry. Co., Toronto, born at Acton, Ont., Mar. 23, 1853.

J. M. McKay, Trainmaster C.P.R., Portage la Prairie, Man., born at Tiverton, Ont., Mar. 13, 1868.

Owen McKay, ex-Chief Engineer Lake Erie and Detroit River Ry., Windsor, Ont., born in Ross tp., Renfrew Co., Ont., Mar. 13, 1848.

D. J. Murphy, Jr., Assistant Traffic Superintendent and Trainmaster Dominion Atlantic Ry., Kentville, N.S., born at Caledonia, Ont., Mar. 3, 1874.

F. W. Peters, Assistant to 2nd Vice-President C.P.R., Winnipeg, born Mar. 25, 1860.

R. Patterson, Master Mechanic G.T.R., Stratford, Ont., born at Brantford, Ont., Mar. 13, 1860.

W. D. Reid, President Reid Newfoundland Co., born in Australia, Mar. 20, 1867.

D'Arcy Scott, Assistant Chief Railway Commissioner for Canada, born Mar. 8, 1872.

E. H. Sewell, City Passenger Agent, C.P.R., Sherbrooke, Que., born at Quebec, Mar. 17, 1875.

J. F. Slocum, Secretary-Treasurer International Ry. Co., Buffalo, N.Y., born at Geneva, N.Y., Mar. 25, 1876.

C. J. Smith, General Manager Richelieu and Ontario Navigation Co., Montreal, born at Hamilton, Ont., Mar. 10, 1862.

G. Sommerville, Agent Merchants Line Steamers, Toronto, born at Kingston, Ont., Mar. 21, 1855.

W. Y. Soper, director Ottawa Electric Ry. Co., Ottawa, Ont., born at Oldtown, Me., Mar. 9, 1854.

J. N. Sutherland, ex-General Freight Agent C.P.R., Atlantic Division, Oakville, Ont., born at Sydney, N.S., Mar. 17, 1843.

E. J. Travers, Manager British Columbia Car Service Bureau, Vancouver, B.C., born at Hamilton, Ont., Mar. 31, 1872.

W. F. Tye, ex-Chief Engineer C.P.R., Montreal, born at Haysville, Ont., Mar. 5, 1861.

G. W. Vaux, Assistant General Passenger and Ticket Agent G.T.R., Chicago, Ill., born at Montreal, Mar. 21, 1866.

D. O. Wood, General Freight Agent for Ontario, Allan Line Steamships, Toronto, born at Kleinburg, Ont., Mar. 16, 1864.

Eastern Canadian Passenger Association.

At a meeting at Toronto Feb. 2, reduced fares were considered for numerous events, among these being the following:

Easter Holiday Fares, 1909.

Ottawa, Ont., May 4-6, Woman's Foreign Missionary Society of Presbyterian Church in Canada.

Montreal, May 12-15, Montreal Horse Show.

Bicentenary of beginning of British rule and of Church of England in Canada, Halifax, Windsor, Annapolis, N.S.; Fredericton, N.B., Aug., 1910.

Winnipeg, Aug., Canadian Medical Association.

Buffalo, N.Y., June 9-16, National Conference of Charities and Correction.

Plattsburg, N.Y., or Burlington, Vt., July 4-14, Tercentenary celebration of discovery of Lake Champlain.

Colonist one-way second-class fares to California common points, to North Pacific coast points, and to Mexico, season 1909.

Denver, Colo., July 5-9, National Education Association.

Winnipeg, Aug. 25-Sept. 1, British Association for Advancement of Science.

Syracuse, N.Y., Sept. 13-18, New York State Fair.

Louisville, Ky., June 8-10, Imperial Council, Ancient Arabic Order Nobles of Mystic Shrine.

The Western Canada Railway Club has been organized recently, with headquarters at Winnipeg. Meetings are held at the Royal Alexandra Hotel there on the second Monday of each month, excepting June, July and August. Following are the officials of the club for the current year: Hon. President, Wm. Whyte; Hon. Vice-Presidents, M. H. McLeod, G. J. Bury, G. W. Caye, and W. Phillips; President, Grant Hall; Vice-President, A. E. Cox; 2nd Vice-President, L. B. Mirriam; Secretary, W. H. Rosevear; Treasurer, E. Humphrys; Executive Committee, E. W. DuVal, S. J. Hungerford, W. R. Smith, R. R. Neild, C. W. Cooper, Jos. McKenzie, L. O. Moody; Audit Committee, L. O. Genest, A. H. Mulcahey, A. Shields.

Railway Finance, Meetings, etc.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales, for Dec., 1908, $40,340, against $38,724 for Dec., 1907. Total net profits for 6 months ended Dec. 31, 1908, $219,778. Approximate railway receipts for Jan., $16,333, against $14,143 for Jan., 1908.

Canadian Pacific Ry.—Orders-in-council authorizing the C.P.R. to increase its capital stock passed June 30, 1904; Nov. 12, 1904; Feb. 19, 1906, and Aug. 17, 1908, were laid upon the table of the House of Commons Feb. 18. The last of the orders gave the company power to increase its capital stock to $200,000,000, and contains the clause inserted in the order of 1906, to the effect that the stock issued under it shall not be deemed "capital expended in the construction of the railway under sec. 20 of the company's act of incorporation."

A London, Eng., cable, Feb. 17, stated that it had been publicly announced that the C.P.R. had sold 39,840 shares on the London market, thus completing the issue of common stock up to $150,000,000 as authorized by the order-in-council of 1906. The stock represented the odd amounts that could not be evenly allotted to shareholders.

Canadian Pacific Ry.—The directors have declared the following dividends for the half-year ended Dec. 31, 1908, payable April 1: 2% on the preference stock, and 2% on the common stock. It was also decided to declare a dividend of ½ of 1% on the common stock out of the interest on the proceeds of land sales. After paying the working expenses, fixed charges and the dividends for the half-year, the company will carry forward a surplus of $4,818,232.

Chicago and Great Western Ry.—Press despatches from Chicago, Ill., state that interests associated with the G.T.R. are nogotiating for the purchase of a controlling interest in the C. and G.W.R. This line is known as the Maple Leaf Route, and, starting from Chicago, has its terminus at Kansas City, Mo.; Omaha, Neb., and Minneapolis, Minn. Its affairs are in process of reorganization.

Cumberland Ry. and Coal Co.—Following are the officers and directors for the current year: President, R. H. Drummond; Vice-President, E. McDougall; Managing Director, J. B. Cowans; Secretary-Treasurer, E. Laflamme; other directors: D. Morrice, W. J. Morrice, G. L. Cains, W. J. Crossen, P. P. Cowans, J. D. Hayden.

Dominion Atlantic Ry.—Gross earnings for Dec., 1908, $91,000, against $89,186 for Dec., 1907. Total for 12 months ended Dec. 31, 1908, $1,259,300, against $1,294,741 for same period 1907.

Duluth, Rainy Lake and Winnipeg Ry.—Following on the recent taking over of this railway by the C.N.R., officers and directors for the current year have been elected as follows: President, W. H. Cook, Duluth, Minn.; Vice-President, D. B. Hanna; Secretary and General Auditor, J. D. Morton; Treasurer, L. W. Mitchell, Toronto; other director, W. D. Bailey, Duluth, Minn.

Grand Trunk Ry.—An act under consideration by the Dominion Parliament authorizes the company, in addition to the several amounts of G.T. consolidated debenture stock mentioned in the company's act of 1897, and the acts mentioned in sec. 5 of the same, to issue a perpetual consolidated debenture stock to be called G.T. Consolidated Debenture Stock, at not exceeding 4% interest, in such sums as the shareholders shall determine, provided that the aggregate amount of the annual interest on such stock shall not exceed £100,000. The stock so created to rank equally and be consolidated with debenture stock issued or to be issued as G.T. Consolidated Debenture Stock under any act now in force. The company may also issue additional amounts of G.T. 4% guaranteed stock, provided that the total sum issued, including that issued or to be issued under existing acts, shall not in the aggregate exceed at any one time $12,500,000. When the bill came before the Railway Committee of the House of Commons Feb. 16, W. Wainwright, Fourth Vice-President, stated that the money to be realized by the sale of the stock would be used in making general improvements. It was decided to insert a clause providing that the money to be raised shall be used for improving the roadbed, double-tracking, reduction of gradients, sidings and terminal facilities, or increasing elevator capacities. The act is to be brought into effect by an order-in-council.

Guelph Junction Ry.—The percentage payable to the city of Guelph by the C.P.R., which operates the G.J.R., for the three months ended Dec. 31, 1908, was $6,450.90. This is one of the largest payments ever received by the city from the operation of the railway.

Intercolonial Ry.—Replying to a question in the House of Commons Jan. 26, the Minister of Railways said the earnings and expenses of the I.C.R. from April to Nov., 1908, compared with 1907 were as follows:

	Earnings.		Expenditure.	
	1908.	1907.	1908.	1907.
April..	$ 740,576.43	$ 817,952.34	$ 740,851.01	$ 669,380.90
May..	689,736.62	799,095.95	781,086.18	715,888.88
June..	703,251.85	754,141.27	841,442.32	751,472.47
July..	803,143.53	836,452.37	819,139.12	811,019.17
Aug..	789,765.10	866,808.56	787,003.43	868,569.20
Sept...	793,541.67	807,566.14	796,301.04	762,319.92
Oct..	759,521.09	803,017.13	801,582.62	751,754.78
Nov..	696,897.56	754,140.62	746,326.74	730,602.38
	$5,976,433.85	$6,439,174.38	$6,313,732.46	$6,061,007.70

The figures for Dec., 1908, are not available.

Lake Superior Corporation.—D. McNicoll, Vice-President C.P.R., is reported to have stated that press reports to the effect that the C.P.R. was in any way connected with the reorganization of the Lake Superior Corporation, and the various industries centred there, were without foundation, and that he knew nothing about any such proposed connection.

New York Central and Hudson River Rd.—E. H. Harriman has been elected a director, succeeding C. C. Clarke; and Wm. C. Brown, the recently appointed President, has been elected a director, succeeding S. F. Barger, resigned.

Prince Edward Island Ry.—The Minister of Railways, replying to a question in the House of Commons Jan. 26, said the earnings and expenditures of the P.E.I. Ry. for the current financial year to Dec. 31, as compared with the same period of 1907, were as follows:

	Earnings.		Expenditures.	
	1908.	1907.	1908.	1907.
Apr...	$ 20,220.38	$ 23,229.44	$ 30,193.09	$ 30,108.28
May..	26,045.12	25,715.49	30,376.93	32,977.82
June..	26,365.84	23,956.86	33,097.68	30,743.10
July..	33,328.19	33,630.31	33,676.99	38,824.54
Aug..	32,350.59	30,993.81	34,806.53	35,369.52
Sept..	30,777.40	26,401.31	37,251.96	37,893.58
Oct...	30,566.50	27,659.60	39,555.24	36,511.38
Nov..	29,655.98	30,641.62	34,120.25	33,236.36
Dec...	24,519.75	22,876.49	35,509.99	30,546.03
	$ 253,829.75	$ 245,104.93	$ 308,588.66	$ 306,210.61

Quebec Central Ry.—Gross earnings for Dec., 1908, $73,599.93; expenses, $56,779.17; net earnings, $16,820.76; against $72,074.98 gross earnings; $61,190.59 expenses; $10,884.39 net earnings, for Dec., 1907. Gross earnings for 6 months ended Dec. 31, 1908, $553,676.51; expenses, $377,924.69; net earnings, $175,751.82; against $569,366.52 gross earnings; $385,892.03 expenses; $183,474.49 net earnings, for same period 1907.

Quebec and Lake St. John Ry.—Gross earnings for Jan., $46,249.05, against $36,275.49 for Jan., 1908. Mileage operated, 285.4, against 240 in Jan., 1908.

Temiskaming and Northern Ontario Ry.—Gross earnings for Oct., $97,850.90; expenses, $55,417.60; net earnings, $42,433.30; ore royalties, $21,080.00; gross earnings for Nov., $98,304.03; expenses, $63,595.00; net earnings, $34,709.03; ore royalties, $20,175.70; estimated gross earnings for Dec., 1908, $117,000; expenses, $65,000; net earnings, $52,000.

Temiscouata Ry.—Total traffic receipts for Jan., $14,550.41, against $16,643.91 for Jan., 1908.

New Westminster Bridge.—Replying to a question in the British Columbia Legislature Jan. 26, the Commissioner of Works stated that the amount collected by way of tolls for the use of the railway bridge over the Fraser River at New Westminster for the year ended Dec. 31, 1908, was $25,702.60, which included $15,000 rental from the Vancouver, Victoria and Eastern Ry. The amount paid to collectors of tolls was $3,162.50. The Government was prepared to make reductions in the tolls charged from time to time as the traffic increased. An agreement had been made between the Government and the B.C. Electric Ry. for the use of the bridge.

Wisconsin Central Ry.—W. J. Wollman, C. G. Simpson, F. H. Prince, E. N. Foss, L. Baldwin, have been elected directors, succeeding W. A. Bradford, Jr., G. A. Fernald, T. L. Chadbourne, H. B. Starr, G. J. Gould, and T. F. Gales, who have resigned. Newman Erb, President, has been elected chairman of the Executive Committee, succeeding W. A. Bradford, Jr., and W. J. Wollman, C. G. Simpson, and F. H. Prince, have been elected members of the Executive Committee, to fill vacancies caused by resignations, owing to the change of control.

Railway Lands Patented.—Letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta and British Columbia were issued to railways during Oct., 1908 as follows:

	ACRES
Canadian Northern Ry.	9.02
Canadian Pacific Ry. grants	66.75
Grand Trunk Pacific Ry.	647.87
	723.64

The Guelph and Goderich Ry. Co. is being sued by M. A. Piggott, Hamilton, Ont.; H. E. Larkin and A. Sangster, St. Catharines, Ont., to recover $500,000 alleged to be due on account of the construction of the railway from Guelph to Goderich, Ont. The company offers about $100,000, and alleges that the plaintiffs have not completed their work.

Press despatches from Winnipeg, Feb. 6, stated that it was announced by the railway companies that it had been definitely determined to abolish the half-fare rate for clergymen, students and missionaries, who have enjoyed this privilege in the middle and western provinces since the settlement of the west.

A deputation from the Engineers' Club of Toronto recently waited on the Dominion Government to urge the appointment of a Canadian-born engineer to the Quebec Bridge Commission, the membership of which at present consists of one French born and educated engineer, but resident in Canada; one British and one United States engineer.

Salary-Raising Training For Railroad Men

There is no profession in which promotion depends in any higher degree upon a man's real ability and technical knowledge than in railroading. Quick promotion then for the railroader is the result of quick and also thorough acquirement of that technical training which will qualify him to hold a higher position. In no way can the ambitious railroad employe secure this technical knowledge so quickly and yet so simply as through the I. C. S. Courses of home training. These Courses have been written by the best railroad experts on this Continent and are taught after a manner that 15 years' experience in training hundreds of thousands of ambitious men for promotion and better earnings has proved to be the most practical and efficient. These Courses include instruction in LOCOMOTIVE MANAGEMENT, LOCOMOTIVE BOILERS, STEAM CYLINDERS, and VALVE GEARS, BREAKDOWNS, COMPOUND LOCOMOTIVES, TRAIN RULES, WESTINGHOUSE and NEW YORK AIR BRAKES, CAR LIGHTING and HEATING, and ELECTRIC HEADLIGHTS.

If **YOU** wish to secure the training in your own home, in your spare time, and at an insignificant cost, that will qualify you for promotion to the highest positions in your profession, simply mark and mail this coupon and we will tell you how you can do so. The fact that we have enabled hundreds of other railroad men to secure promotion in itself warrants your careful investigation of our plan if you really wish to better yourself. Don't let a postage stamp stand between you and a better position. **Mark and mail this coupon NOW.**

C. P. R. Betterments, Construction, Etc.

St. John, N.B., Improvements.—An agreement has been reached between the St. John harbor committee and the C.P.R., by which the transfer of water lots at Sand Point to the company will be made. The agreement is subject to ratification by the city council. As soon as the agreement is completed the company will carry out some improvements in connection with the deep water wharfage facilities at the harbor.

Piles Junction to Grand Mere, Que.—The Dominion Parliament is being asked to pass an act extending the time within which the company may construct the projected line from Piles Jct. to Shawinigan Falls, and Grand Mere, Que.

St. Lawrence Hall, Montreal.—A press report from Montreal states that the C.P.R. contemplates the erection of a 10-storey office building to cover the whole site of the St. Lawrence Hall, in which its city ticket office is now located. The building would provide accommodation for the C.P.R. city offices, the Dominion Express Co., and other interests allied with the C.P.R.

Windsor St. Station, Montreal.—Application is being made by the company in connection with its plans for extensions at this station, for permission to close certain streets on property which it has acquired. The plans placed before the civic roads committee of the city council show that, with one or two exceptions, the Ontario and Quebec Ry. Co., of which the C.P.R. is lessee, has acquired all the properties south of the present station building as far as St. Antoine St., and west as far as Aqueduct St. It is desired to obtain leave to close Donegani and Bission Streets. The committee decided to view the properties and the streets proposed to be closed before giving consideration to the plans.

Place Viger Station Improvements.—D. McNicoll, Vice-President C.P.R., recently gave some information to the civic roads committee of the Montreal City Council with regard to the proposals for improving Place Viger station and yards. The company is applying for authority to close Lacroix and the southern ends of several other streets on property which has been acquired. The property purchased practically isolates the premises of the Montreal Brewing Co., for which the C.P.R. states an exorbitant price is being asked. The committee promised to consider the plans submitted.

Montreal-Toronto Second Track.—A press report states that the company's programme of work for the current year includes the construction of 40 miles of additional second track on the line between Montreal and Toronto. This 40 miles would be in the vicinity of Smith's Falls, Ont.

Extension to Gowganda.—L. O. Armstrong, Colonization and Tourist Agent, who has been investigating the Gowganda district for the C.P.R., stated recently that as soon as the permanence of the camp was fully assured, there was every possibility of the company constructing a line into the district.

Ottawa, Northern and Western Ry.—Application is being made to the Dominion Parliament for an extension of time for the construction of the company's projected railway from Maniwaki, Que., the present terminus of the old Pontiac Pacific Junction Ry., to James Bay, for a further period of five years.

Georgian Bay and Seaboard Ry.—A Montreal despatch Feb. 15 stated that the C.P.R. programme of construction for eastern lines for the current year includes a line from Peterboro to Coldwater Jct., Ont., where connection will be made with the portion of the G.B. and S. Ry. already constructed from Coldwater Jct. to Victoria Harbor.

Tillsonburg, Lake Erie and Pacific Ry.—Application is being made to the Dominion Parliament for an act extending for a further period of five years the time within which the T., L.E. & P.R. Co. may complete the railway it was authorized to construct by sec. 2, chap. 105, of the statutes of 1902. An extension of time for construction was obtained in 1904.

Weisenburg to Elora.—A press report states that surveys have been made for the construction of a line from Weisenburg, on the Guelph and Goderich Ry., to Elora, Ont., where a junction would be effected with the C.P.R. Elora branch. The line would be about seven miles long, and the surveys are said to show that a good gradient can be secured, and that there would be few difficulties in the way of construction.

London, Ont., Yards.—Sir Thos. G. Shaughnessy, President, and D. McNicoll, Vice-President, are expected to visit London, Ont., early in March, for the purpose of inspecting the company's yards there, before finally passing on the plans and estimates prepared for their extension.

Guelph and Goderich Ry.—The company is applying to the Dominion Parliament for an act extending the time within which it may construct the branch line of railway from its line in Wellesley tp. to St. Mary's and Clinton, via Stratford, for a further period of five years.

Western Lines Construction.—The C.P.R. Co. is asking the Dominion Parliament for an act extending the time within which it may construct the following railways: (1) From tp. 32 to 34, range 21 to 23, west 2nd meridian, northerly to Prince Albert, Sask. (2) From the Pheasant Hills branch in tp. 39 or 40, range 19 or 20, west 3rd meridian, towards Battle River, thence westerly through tps. 43, 44 or 45 to range five or six, west 4th meridian, thence southerly and westerly to tps. 36, 37 or 38, range 11, 12 or 13, west 4th meridian. (3) From tps. 27, 28, 29, 30 or 31, range 4, 5, 6 or 7, west of 3rd meridian, westerly and northerly to a junction with the Calgary and Edmonton Ry. Lacombe branch. (4) From tps. 39, 40 or 41, range 3, 4 or 5, west 4th meridian, to tps. 30, 31 or 32, range 17, 18 or 19, west 3rd meridian. (5) From Weyburn westerly through tps. 6, 7, 8 or 9, to range 30, west 2nd meridian. (6) From near Estevan to tp. 4, range 22, west 2nd meridian. (7) From tps. 6, 7, 8 or 9, range 30, west 2nd meridian, westerly to connect with the Crow's Nest Pass branch, between range 16, west 4th meridian, and Lethbridge, Alta. It is also desired to have authority to construct a line from the revision of the Crow's Nest Pass branch in tp. 9, range 22, west 4th meridian, northerly and northwesterly to a junction with the Calgary and Edmonton Ry. Macleod branch near Aldersyde, Alta., a distance of about 85 miles.

South-Western Alberta Extensions.—The C.P.R. right-of-way agent has been spending some time in Cowley, Alta., recently, and has purchased a number of properties there. As a result, it is said that the town will be moved to a site two miles south of its present location, it being understood that the C.P.R. has promised to pay the expense of moving the buildings.

In connection with the company's application to Parliament for extension of time for the construction of certain lines in the vicinity of the Crow's Nest Pass branch, and the Calgary and Edmonton Ry., it is interesting to note that the Great Falls, Mont., Board of Commerce, at a meeting held Feb. 2, appointed a deputation to wait on the Government of Alberta and C.P.R. officers "concerning the proposed extension of the C.P.R. to Grand Falls."

Lethbridge, Alta.—A press despatch states that the company proposes to erect shops for the western division at this point, which will provide employment for about 600 men.

Grade Reduction at Hosmer.—Plans for the reduction of gradients on the Crow's Nest Pass branch, from Hosmer, B.C., to the summit of the Rocky Mountains, are reported to be under consideration by J. E. Schwitzer, Chief Engineer for the western lines. When the line was constructed the general expectation was that the heavy traffic hauls would be practically all westbound, and for that reason everything was done to give the westbound traffic the benefit of the gradients. The development of the traffic, however, has been such that there is every prospect that the balance of the heavy hauls will be in favor of the eastbound trains. The opening of the coal mines at Hosmer, which began shipping coal in Jan., will be a big factor in providing eastbound traffic, as the demand for the coal will be in Alberta, Saskatchewan and Manitoba. We are advised that no decision as to grade reduction between the points named has as yet been arrived at.

Kootenay Central Ry.—The act incorporating a company with this title passed by the Dominion Parliament in 1901, was amended in 1904, and an application is now before Parliament to obtain a further extension of time for the construction of the authorized line of railway.

A survey party has been engaged for some time past correcting previous surveys between Golden and Galoway, on the C.P.R. Crow's Nest Pass line. The route of the projected line from Galoway follows along the east side of the Kootenay River, crosses that stream at Canal Flats, and proceeds down the valley of the Columbia River to Golden on the C.P.R. main line. It would have a length of about 200 miles. J. N. Logan, right-of-way agent, in an interview at Fernie recently, said the heaviest gradient on the projected line would be at the summit near Crow's Nest Lake. Nowhere on the route was there any difficulty to be met with that would necessitate a heavier gradient than 1 %.

Kootenay and Arrowhead Ry.—The Dominion Parliament is being asked to pass an act extending the time within which the K. & A.R. Co. may construct the lines authorized by sec. 7, chap. 70, of the statutes of 1901.

Esquimalt and Nanaimo Ry.—The laying of track on the extension of the line from Wellington to Alberni, B.C., has been commenced, but at present only about 2.50 miles is being laid, in order to facilitate construction work. At the point where this track terminates is a very heavy rock cut. Beyond the cut, construction is under way as far as French Creek. It was expected that the surveys between French Creek and Alberni would be completed by Feb. 27, so that further contracts could be let without delay.

A press despatch says the new western terminus of the C.P.R. will be at Hardy Bay, on the north shore of Vancouver Island. The despatch further says: "Even to-day very few people are aware of the fact that a survey line has been run from Nanaimo clear through to Hardy Bay, and that the rails are laid beyond Campbell River, considerably over half way."

Lines in United States.—A New York report states that there are under consideration some plans by which the C.P.R. lines would secure a route to Newport News, Va. The suggestion is that the route will be via the Chicago, Cincinnati and Louisville Rd., and the Chesapeake and Ohio Rd. The report also states that the C.P.R. has purchased an extensive coal area in West Virginia. (Feb., pg. 109.)

Canadian Northern Ry. Construction, Etc.

Maritime Provinces.—The Premier of Nova Scotia was in Toronto Feb. 1, and following days, in consultation with W. Mackenzie, President, and other C.N.R. officers. It is said that the conference had to do with railway matters in the province, and an agreement is reported to have been reached which will mean the construction of several hundred miles of steam and electric railways, and some alteration in the conditions affecting the Halifax and South-Western Ry. On Feb. 5, Mr. Murray, Mr. Mackenzie and a number of C.N.R. officers, went to Montreal and Ottawa to consult with the Dominion Government. The Nova Scotia Legislature will, it is said, be asked, at its forthcoming session, to ratify the arrangement reached.

Since the foregoing has been put in type, we have been officially advised that no agreement has been entered into for the construction of additional railways.

The Mayor of St. John, N.B., was in Ottawa early in Feb., in connection with railway matters, and met some of the C.N.R. officers. A press report from St. John states that an engineer of the city has been informed by C.N.R. officials that, failing the obtaining of rights over the Intercolonial Ry., the company will proceed with the construction of its own lines to the Atlantic coast.

Canadian Northern Quebec Ry.—The Dominion Parliament is being asked to extend the time within which the following lines may be constructed: An extension of the St. Jacques-Rawdon branch beyond Rawdon to near Lake Archambault, Montcalm County, Que.; a double or single line of railway from the Quebec and Lake St. John Ry., or from deep water in the harbor, and thence through the city of Quebec to the shore of James Bay, and a branch line from the main line at or near Lake St. John, through Chicoutimi and St. Alphonse or Ha Ha Bay, to the St. Lawrence River at or near Tadousac.

Quebec and Lake St. John Ry.—Application is being made to the Quebec Legislature for an act extending the time within which the lines authorized by sec. 10, chap. 71, 4 Edward VII, may be constructed and for other purposes.

The company is locating a route for an extension from Roberval, on Lake St. John, Que., westerly for about 30 miles; and for a line from Chicoutimi easterly for about 20 miles.

Canadian Northern Ontario Ry.—The question of the entrance of the C.N.O.R. into Ottawa is not yet finally settled. Until this is disposed of, it is impossible to fully complete the line from Hawkesbury, the work on which is in a forward condition.

The sleigh road which has been constructed from Sellwood, on the company's line near Sudbury, Ont., into the Gowganda country, was opened for traffic Feb. 2. Stopping places are provided at Burwash, Welcome Lake and Phœnix, and a good service is said to be given by the Gowganda Transport Co. The question of constructing a railway into the district was brought before the Ontario Government, Jan. 29, by the President and other C.N.R. officers. Mr. Mackenzie subsequently said the future must decide whether the present stage road would be followed by a railway; the company had not then asked for a subsidy for such a line.

At the same interview plans were laid before the Government showing the route of the proposed line to connect the present line at Sudbury with the western lines now terminating at Port Arthur, Ont. It is said that the C.N.R. will submit a formal proposition to the Government as to the aid which the company desires to secure. The plan filed at Ottawa for this line shows a route starting near Sudbury, and running northwesterly up the valley of the Vermillion River towards its head waters, until the southern limits of the great clay belt is reached near the Missinabi River, thence to Long Lake, and on to near the C.P.R. at Nipigon River, and thence north of but close to the C.P.R. into Port Arthur. This route, it is reported, will provide easy gradients, and will be much easier to construct than was the C.P.R. between the same points.

The company has located about 80 miles of its line from Sellwood towards Port Arthur, Ont. Of this 27 miles is under contract and construction is being proceeded with. Angus Sinclair, Toronto, is the contractor.

A deputation of farmers and other residents in the district west of Lake Manitoba, waited on the Manitoba Government, Feb. 16, to press for the construction of a C.N.R. branch through that district. The Premier stated that the Government had promised a guarantee of bonds for the construction of such a line, the bonds were ready for issue at any time, and the Government would present the case to the C.N.R. President. The Premier had an interview with M. H. McLeod, General Manager and Chief Engineer, who stated that an engineer would be sent to make a survey for the line, but he could not say anything at all in regard to construction.

Construction work was done during 1908 upon the following lines, and track will be laid on them during the current year: Oak Point northerly, 12 miles; Rossburn branch, a further distance of 20 miles; Hallboro branch, 50 miles; Prince Albert to Battleford, five miles; a spur of 0.6 mile at mileage 73 Ontario Division. The company also completed during 1908 a revision of the track between Lumsden and Disley, Sask., on the Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co.'s line, 8.46 miles.

Canadian Northern Ry.—Considerable improvements are to be made at the company's shops at Winnipeg during the coming season. These include the erection of a new carpenters' shop to cost $25,000, and some smaller additions to existing buildings.

A contract is reported let to S. Brown, Winnipeg, for the erection of new freight sheds at Saskatoon, Sask., at a cost of about $20,000. Some improvements and additions are, it is said, also to be made to the local shops.

In connection with the construction of a line into the Brazeau coal district, a Strathcona, Alta., report says it will be built during the summer.

Edmonton and Slave Lake Ry.—Application is being made to the Dominion Parliament for an Act extending the time within which the company may construct its authorized line from Edmonton, via Athabasca Landing and Lesser Slave Lake, to Peace River, about 400 miles. (Feb., pg. 113.)

VICE-PRESIDENT MANN IN BRITISH COLUMBIA.

D. D. Mann, Vice-President Canadian Northern Ry., who was the principal guest at a Canadian Club luncheon at Victoria recently, said, in the course of a speech: "The great wealth of these extensive western provinces unquestionably is to be found in the products of the soil, of the mine, of the forest, and of the orchard; and it is and will be through the free and unfettered interchange of traffic in all these immensely rich and valuable products between the different sections of this great western country that we can in the best possible manner contribute to the complete development of Canada, as a whole, and to the full and permanent accomplishment of its brilliant future. This can only be brought about through the building of great lines of railway, which shall penetrate into every available portion of this country, running from the east to the west. It is our own particular ambition to construct our own railway from the shores of the Atlantic to the Pacific coast, and with this important end in view, I have paid this visit to your city and called upon the Premier of this province with the view of seeking such assistance from the Provincial Government as will enable us and at no distant date to build our transcontinental road right down through your province, until it reaches tide-water. While nothing of a definite character has as yet in this relation been arranged, I am glad to be able to state that we have already received some encouragement; while I am in a position to assure you that if the necessary aid is granted we will positively construct our line to the coast.

"The C.N.R. has at present 3,450 miles of its road completed and in full operation between the Great Lakes and the foothills of the Rockies, while we intend to complete 2,000 additional miles in the near future. We have secured assistance towards the execution of our undertakings, both from the Dominion and Provincial Governments, which has not only ensured speedy construction, but has also enabled us to secure the required capital at the lowest possible rates. Of all the bond guarantees which we have received during the last 12 or 15 years, no contributing government has ever yet been called upon to pay a single dollar. These railways, which we are building over the prairies in the northwestern provinces, will, moreover, not only reach every competitive point, as well as every city and town within the limits of those provinces, but will also minister to the needs and to the convenience of at least 75% of the entire population of those prairie provinces, while during this coming year, when our lines are farther advanced towards completion, a great field and a vast home market will be opened for the splendid and varied products of your forests, of your mines, of your fisheries and of your orchards.

"In 1886, when the C.P.R. was finished, there were only 157,000 people, all told, settled in that fertile and wonderful stretch of country which lies between the shores of the Great Lakes and the Rocky Mountains; while now over 1,000,000 souls occupy that same territory. During the last 7 years 142,000 settlers have annually come into those rich and inviting tracts; and taking up homesteads upon these plains have become permanent and useful settlers, a great movement of population which has been largely and directly connected with the opening up of the Saskatchewan Valley and the steady construction of the C.N.R. And when we turn our attention to, and extend our proposed transcontinental line down through your beautiful province to the coast, which I hope will be done at a very early date, it is also our intention to build branch lines to your many fertile valleys, where white men with their families will settle and become permanent citizens of this great commonwealth. This province gives every reasonable promise of becoming, at a very early date, one of the greatest, if not the very greatest, among all the provinces of the Dominion, an opinion and a forecast which are amply justified by the many and most important natural resources that you possess in your minerals, in your fruits, in your vast forests and in your fisheries, conjoined with the important markets which are open to your occupancy, the rapidly expanding market upon the plains of the northwestern provinces, as well as your easily accessible foreign markets. In view of all these facts we may with much confidence regard the future of the province of British Columbia as assured and beyond all question."

The I.C.R. employes at the Moncton, N.B., shops, are said to have demanded the continuance of the present short time day, viz., 8 hours, but with pay for the full day of 10 hours. It is said that the ex-Minister of Railways, Hon. H. R. Emmerson, has promised to support this demand.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

F. H. Hopkins & Co., and Mussens Limited, Montreal, have issued large wall calendars for the current year.

The Rail Joint Co. of Canada, Montreal, has issued its catalogue 3, giving illustrated particulars of its rail joints for standard, girder and special rail sections, also step or compromise and insulating rail joints.

The New South Wales Government is reported by a Canadian Associated Press cable to have expressed particular satisfaction with the quality of steel rails imported recently from the Dominion Iron and Steel Co., Sydney, N.S.

Thos. Reid, who has been sales manager for the John Bertram & Sons Co., Ltd., for a number of years, has moved his headquarters from Dundas, Ont., to Montreal, where he will be associated with the Canadian Fairbanks Co., Ltd., the Bertram Co.'s general sales agents.

The Farlow Draft Gear Co., Baltimore, Md., advise that during the past month Farlow draft gear has been specified on the following rolling stock: 1,500 Virginian Ry. 1,350 Western Md. Ry. 750 Seaboard Air Line Ry. 200 Nashville, Chattanooga and St. Louis Ry. 200 Swift Refrigerator Transit Co.

The Canadian Westinghouse Co., Ltd., has issued instruction book no. 5026, containing instructions for repairing and rewinding Westinghouse railway type armatures; also circular 1148 relating to mercury rectifier battery charging outfits; 1158, relating to electric motor friction brakes, and an illustrated catalogue of fans and fanmotors.

The Ontario Wind Engine and Pump Co., manufacturers of gravity molding machines, have sold one large power machine to the G.T.R. Montreal shops, also one to Reid & Brown, foundrymen, Toronto. The C.P.R. is also installing one at Winnipeg. The Ontario Wind Engine & Pump Co. has also sold two Parks molding machines to Canadian foundrymen.

Robert W. Hunt & Co., consulting and inspecting engineers, have engaged the services of John Cargill, who will make his headquarters at the firm's New York office, 90 West St., and will largely devote his attention to examinations and reports upon railway and other corporate properties, for which his experience gained while connected with the Pennsylvania Lines, British Westinghouse, Metropolitan Railway Co., of London, Eng., and other organizations, has prepared him.

The Canadian Fairbanks Co. has issued a novel map-calendar for 1909 and 1910, which is of great value to anyone in any way interested in railways. Its size is 48 by 36 inches. The upper half is devoted to a map showing all the steam railways in the Dominion, in distinctive colors, separate colors being used for the larger systems, and a uniform one for the smaller lines. This map is undoubtedly the best one of Canadian railways which has been issued as far as showing the lines distinctively is concerned. The lower half is occupied by the calendar, six months to a sheet, while underneath is an alphabetical index to railway stations with a ready reference to the sections of the map on which they are to be found.

The B. Greening Wire Co., Ltd., Hamilton, Ont., has made a number of additions to its buildings and plant in the last 18 months. The new weaving mill, which is probably one of the best structures of its kind in Canada, is 260 by 130 ft. At the end is a temporary enclosure, which will be removed, and further extensions made, as soon as trade warrants it. The building is devoted entirely to wire weaving machinery, and contains a number of ponderous looms, some of them over 15 tons in weight, for making heavy smokestack netting, mining screens, etc., as wide as 72 inches. Fast running smaller looms make meshes as fine as no. 70 of brass wire for sleeping car ventilators. Among the other buildings are the wire mill, cleaning house, with a capacity of 50 tons a day, and the carpenter shop, which is isolated from the other buildings, the increased yard room being used for the different kinds of lumber. Among the other features of this industry are wire rope spinning, wire drawing and galvanizing, poultry netting twisting machines, presses for perforating all kinds of metals, for all purposes; automatic wire chain machines for making Greening's chains, etc. These processes are carried on in the older buildings.

Train Dispatching by Telephone.

We are advised by a G.T.R. official that in common with other railways, the management is giving consideration to developments in the use of the telephone in dispatching trains, but has not yet reached any conclusion.

Assistant Superintendent Nixon, G.T.R., London, is reported to have said in a recent interview: "A year's trial of the telephone as a means of dispatching trains has proved its practicability; railway telegraph men recognize that the day of the ticker is past so far as they are concerned, they are prepared to hasten the change all over the continent. The system will be adopted by the G.T.R. as soon as practicable. The adoption of the system will not in any way reduce the number of operators required, but will give the railway a much quicker and fully as efficient a system of operating."

W. J. Camp, Electrical Engineer C.P.R. Telegraphs, said recently: "In Dec., 1907, the first installation of the telephone was made on the New York Central Rd. over a small stretch between New York and Fonda; to-day the new system extends over 4,900 miles; and by the end of another year it will cover 15,000 miles of track in the U.S. and Canada. In Canada the C.P.R. took the initiative in the matter and, in the latter part of June, put in the first installation in the country between Montreal and Farnham. Last summer, I predicted that another ten years would see the telephone used exclusively for train dispatching. Now some railway telegraph superintendents shorten this term to five years. I think that period too short, however, as the cost of installation and operation of the telephone over the telegraph is so much greater that the smaller side lines will be slower in adopting it. However, our experience is that the greater speed which may be secured in transmitting messages fully warrants the additional expense.

The Great Northern Ry., U.S., has the system in operation on 203 miles; is installing it on a further distance of 238.8 miles, and is considering its extension on the remaining 944.2 miles of its line.

The Minister of Railways stated in the House of Commons, Feb. 9, that all railway charters granted this session are to be made subject to the policy to be adopted in regard to level crossings.

National Transcontinental Railway.

The estimates submitted to the House of Commons provide for $20,000,000 for account of surveys and construction on the National Transcontinental Ry. during the ensuing financial year.

In connection with the question of classification of work it was stated in the Commons, Jan. 27, that C. Schreiber, Consulting Engineer of the Railway Department, had been agreed upon by the Chief Engineer of the National Transcontinental Ry., and the Chief Engineer of the G.T. Pacific Ry., as arbitrator.

Reports as to construction in New Brunswick show that with the exception of a mile or two, the right-of-way for the 255 miles through the province is all cleared. A good deal of grading has been done, and several sections of track have been laid. It is intended to lay out a division yard at Lake Napaddogan, 118 miles from Moncton, and 137 miles from the Quebec boundary.

An arrangement has been made between the G.T. Pacific Ry. and Foley, Welch and Stewart, by which the latter has taken over and will complete the contract for a section of 150 miles in the vicinity of the Abitibi River, which the G.T. Pacific Ry. sublet to the J. H. Reynolds Construction Co.

Tenders will be received to Mar. 19, for the construction and erection complete, of shops a short distance east of Winnipeg.

GRAND TRUNK PACIFIC RY.

The Dominion Parliament is being asked to approve an agreement made Dec. 1, 1908, between the C.P.R. and the G.T. Pacific Ry. for terminals, etc., at Fort William, Ont The agreement provides for the use by the G.T.P.R. of certain sections of the C.P.R., within Fort William, to connect the lines of the two companies, for 999 years; and for the use by the C.P.R. of certain sections of the G.T.P.R. within Fort William. The agreement fixes the terms which each company is to pay for the use of the sections, which are denominated joint sections, such terms being calculated upon a percentage of the cost. The schedule attached to the agreement sets out in detail the boundaries of the area within which the joint sections are situated.

Another bill before the Dominion Parliament affects the subsidy payable by the Ontario Government in respect of the construction of the Lake Superior branch. The agreement provides that the company shall not grant any secret special rates or rebates; that road material for the municipalities or the Provincial Government shall be carried at actual cost of handling; that no agreement for the lease or transfer of the line to any other company shall be made without the consent of the Provincial Government, and that if the Dominion Government shall at any time take over the line, the company shall pay over the amount of the cash subsidy, and the amount or value of the land grant given by the province. The bill is being held back at the instance of the Minister of Railways.

Press reports from Winnipeg stated recently that the company was making preparations to erect a 12-story office building there. We are officially advised that there is no truth in the report. Accommodation for the company's offices is to be provided in the Fort Garry station now under construction.

A third bill before Parliament is for the purpose of ratifying an agreement signed June 6, 1908, between the G.T.P.R. and the Midland Ry. of Manitoba, for the purpose of constructing a union station and other joint facilities in Portage la Prairie, Man. The station and freight shed are being erected by the G.T.P.R., and the use of the facilities will be granted to the Midland Ry. upon terms set out in the act.

Pintsch Light Steam Heat

Car lighting by the Pintsch System with improved mantle lamps and by Vapor lighting system for branch lines. Gas broilers, and ranges. Buoys.

The Safety Car Heating and Lighting Co.
2 RECTOR ST., NEW YORK.

Car heating by controllable direct steam and water circulating systems steam tight couplers, traps, train pipe valves and other appliances.

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.
The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.
THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

AMERICAN BRAKE SHOE AND FOUNDRY COMPANY

NEW YORK MAHWAH, N.J. CHICAGO, ILL.

N. J. HOLDEN & CO., Agents, 302 St. James St., MONTREAL

PROVINCIAL STEEL CO., LTD.

COBOURG, ONT.

Negotiations are reported to be in progress with the Dominion Government for the purchase of a tract of land at the foot of Eighth Ave., Calgary, Alta., to be used jointly with the Canadian Northern Ry. for a union station.

In connection with the construction of lines in British Columbia, it is said that a proposition has been submitted to the B.C. Government by D'Arcy Tate, Assistant Solicitor, on behalf of the G.T.P. Ry., for the construction of a line from Fort George to Vancouver. The suggestion is that the Government guarantee the bonds of the company in respect of the construction of this line.

It is reported that the company has ready for sending on to Prince Rupert six locomotives, some passenger cars, and 150 freight cars. These, it is expected, will be placed in operation early in the summer upon the completed portion of the first 100 miles of line easterly from Prince Rupert. The company's agent at Prince Rupert stated Feb. 8 that a warehouse 300 ft. long would be constructed immediately on the wharf there to meet immediate requirements.

Grand Trunk Pacific Branch Lines.—The Dominion Parliament is being asked for an act authorizing the company to construct the following additional lines: (1) From the G.T.P.R. main line west of Pembina Crossing, Alta., southwesterly to the Embarras River, and thence southerly to the headquarters of the Little Pembina River; about 100 miles. (2) From the G.T.P.R. along the Embarras River southeasterly towards the McLeod River, 25 miles. (3) From the authorized line between Calgary and Coutts southwesterly to Macleod, thence through or in the vicinity of Pincher Creek to the western boundary of Alberta, about 100 miles. Power is also being asked to issue securities to the amount of $30,000 a mile.

Application is being made to the Dominion Parliament for an act authorizing the company to enter into an agreement with the Alberta South Western Ry. for any of the purposes mentioned in sec. 361 of the Railway Act, and authorizing the G.T.P.R. Co. to guarantee the bonds, debentures or other securities of the G.T.P. Branch Lines Co., issued in respect of the Alberta South Western Ry., and to declare the A.S.W.R. to be a work for the general advantage of Canada.

Alberta South Western Ry.—Application is being made to the Alberta Legislature for an act incorporating a company with this title for the purpose of constructing a railway from the G.T.P.R. branch line between Calgary and Lethbridge, such point being northeasterly from Macleod, to or near Macleod, and westerly from, at, or near, Macleod, to or in the vicinity of Pincher Creek, thence westward to the western boundary of the province, about 100 miles. M. Mackenzie, representing Macleod in the Legislature, stated that the application was on behalf of the G.T.P. Ry. (Feb., pg. 123.)

The Toronto Board of Control received tenders to Feb. 23 for the construction of a transportation building on the Industrial Exhibition grounds.

Referring to the nuisance caused by locomotive smoke within the city of Toronto, Property Commissioner Harris said, Feb. 16: "The railway companies are showing a commendable desire to prevent the smoke nuisance along the Esplanade. Conditions have changed recently, and more care is taken in firing up. They have also issued an order that a blower must be used to make a good draft to get the fire burning quickly. The railway companies are in earnest in the matter, and have suspended some of the firemen for violating the rules they have issued to prevent the smoke nuisance."

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1907-08, from July 1, 1908:

	Earnings.	Expenses.	Net Earnings.	Net Increase or Decrease.

Approximate earnings for Jan. $4,711,000, and for 2 weeks ended Feb. 14, $2,292,000, against $4,458,000 and $1,742,000 for same periods 1908.

Mileage operated 9,844 miles.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross earnings for Dec., 1908, $223,245.92; expenses, $163,336.86; net earnings, $59,909.06, against $217,947.08 gross earnings; $173,542.67 expenses; $44,404.41 net earnings for Dec., 1907. Gross earnings for 6 months ended Dec. 31, 1908, $1,451,345.27; expenses, $987,261.74; net earnings, $464,083.53, against $1,781,249.47 gross earnings; $1,277,834.00 expenses; $503,415.47 net earnings for same period 1907. Approximate earnings for Jan., $196,058, and for 2 weeks ended Feb. 14, $96,842, against $200,111 and $85,840 for same periods 1908.

MINERAL RANGE RD.—Gross earnings for Dec., 1908, $65,367.30; expenses, $54,928.14; net earnings, $9,439.16, against $61,499.69 gross earnings; $53,176.72 expenses; $8,322.97 net earnings for Dec., 1908. Gross earnings for 6 months ended Dec. 31, 1908, $429,380.11; expenses, $339,906.91; net earnings, $89,473.20, against $423,663.12 gross earnings; $335,752.05 expenses; $87,911.07 net earnings for same period 1907. Approximate earnings for Jan., $61,660, and for 2 weeks ended Feb. 14, $31,162, against $58,794 and $25,626 for similar periods 1908.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for Dec., 1908, $930,472.10; expenses, $565,896.73; net earnings, $364,575.37, against $1,081,117.73 gross earnings; $569,248.33 expenses; $511,869.40 net earnings for Dec., 1907. Gross earnings for 6 months ended Dec. 31, 1908, $7,038,8co.16; expenses, $3,653,605.09; net earnings, $3,385,195.07, against $6,773,878.65 gross earnings; $3,945,622.89 expenses; $2,828,255.76 net earnings for same period 1907. Approximate earnings for Jan., $762,360, and for 2 weeks ended Feb. 14, $371,753, against $697,283 and $282,004 for same periods 1908.

Grand Trunk Ry. Earnings, Expenses, etc.

Subject to audit, the accounts for the half-year ended Dec. 31, 1908, show the following results:

Gross receipts		£3,382,800
Working expenses		2,422,400
Net receipts		£ 960,400
Net revenue charges for the half-year, less credits		478,700
Balance		£ 481,700
Deduct Canada Atlantic Ry. deficiency for the half-year	£43,400	
Less, Detroit, Grand Haven and Milwaukee surplus for the half-year	3,100	40,300
Surplus		£441,400

This surplus of £441,400 added to the balance of £1,600 from June, 1908, makes a total amount of £443,000 available for dividend, which will admit of the payment of the dividend for the half-year on the 4% guaranteed stock, the full dividend of 5% for the year on the first preference stock, and a dividend of 2½% for the year on the second preference stock, leaving a balance of about £12,000 to be carried forward.

The accounts of the G.T. Western Ry. for the half-year show a surplus of £24,300, which amount is carried forward to the current half-year.

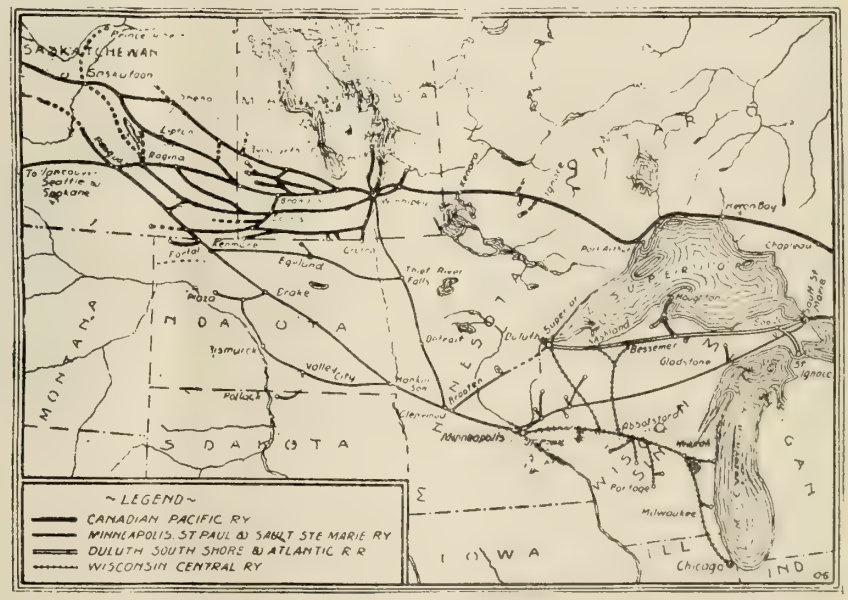
Approximate earnings for Jan., $2,640,416, and for 2 weeks ended Feb. 14, $1,235,220, against $2,768,444 and $1,005,226 for same periods 1908.

Mileage operated, 2,874.

TRAFFIC RECEIPTS OF THE SYSTEM.

Aggregate from Jan. 1:

	1909.	1908.	Increase.	Decrease.
Grand Trunk	£408,948	£428,289	....	£19,341
Canada Atlantic	23,220	25,126	...	1,906
G. T. Western	85,556	86,113	....	557
D., G. H. & M.	24,827	29,331	....	4,504
Total.....	£542,551	£568,859		£26,308



The Wisconsin Central Railway and Its Connections.

The above map, which is reproduced from the Railway and Engineering Review, shows the Wisconsin Central Ry. and its connection with the Minneapolis, St. Paul and Sault Ste. Marie Ry., by which it has been practically acquired, also the Duluth, South Shore and Atlantic Ry., another C.P.R. subsidiary, and the C.P.R. lines in Northwest Ontario, Manitoba and Saskatchewan.

The President of the W. C. R. has announced that plans to shorten the main line between Chicago, Minneapolis and St. Paul are under consideration. The plans are said to involve a cut off from Mukwonago, Wis., to Grand Rapids, 135 miles, and from Spencer, Wis., to Owen, 15 miles. These, it is stated, would reduce the distance between Chicago and St. Paul by 45 miles.

Economics of Railway Operation

By M. L. BYERS

C.E., Ch. Eng. M. of W., Miss. Pac. Ry.

Buckram, 6 x 9 ins.; 672 pages, many figures, diagrams and forms illustrating the best modern practice - $5.00 net

The only publication explaining in detail the operative systems of American railways. Sir William Van Horne says of it: "I regard it as a most useful and valuable book."

Track and Track Work

(Third Edition, Revised and Enlarged)

By E. E. R. TRATMAN

Assoc. M. Am. Soc. C.E.

Cloth, 6 x 9 ins., 520 pages, 232 illustrations, 44 tables and an appendix of statistics of standard track construction on American railways - - $3.50 net

The standard treatise on this subject.

Design of Typical Steel Railway Bridges

By W. CHASE THOMSON

M. Can. Soc. C.E. Assist. Eng. Dominion Bridge Co.

Cloth, 6 x 9 ins., 178 pages, 21 figures, 5 folding plates - - - - $2.00 net

This book has been developed from lectures given by the author, and treats of the commonest types of railway bridges, which were chosen because they seemed best suited to illustrate the problems which occur most frequently to the bridge designer. These include a 60-ft. deck plate girder, a 100-ft. deck Warren girder, a 150-ft. through Pratt truss, a 200-ft. through Pratt truss with curved top chord, a 170-ft. swing bridge and a railway viaduct.

Any of these books will be sent, postpaid, on receipt of price, or further details with full list of contents will be given if desired. We can supply promptly, and at lowest price, any book published

MAINLY ABOUT PEOPLE.

C. R. Hosmer, director C.P.R., has been elected a director of the Dominion Textile Co.

Sir Wm. Van Horne sailed from New York, Feb. 1, on a visit to Cuba, and returned Feb. 22.

Lord Strathcona has given $5,000 to the University College Hospital, Gower St., London, Eng.

C. Strong, for some years Michigan Central Rd. Agent at Perry, Ont., died there Jan. 29, aged 33.

Sir Thos. G. Shaughnessy is reported to have bought three stores on St. James St., Montreal, for $15,000.

Hon. L. J. Forget, President Montreal St. Ry., with his family, sailed from New York, Feb. 3, for the Mediterranean.

Miss Maud Angus, daughter of R. B. Angus, C.P.R. director, was married to Dr. W. W. Chipman, at Montreal, Feb. 15.

A. M. Nanton, Managing Director Alberta Ry. and Irrigation Co., has been elected first President of Winnipeg Stock Exchange.

A. S. McAllister, Secretary of the Point St. Charles Railway Y.M.C.A., has been transferred to a similar position at Kenora, Ont.

J. W. Leonard, General Manager C.P.R. Eastern Lines, remained at Preston Springs, Ont., during February, on account of ill-health.

W. Stitt; General Passenger Agent C.P.R. Eastern Lines, who has been seriously ill with pneumonia, was reported, Feb. 25, to be progressing favorably.

T. J. Drummond, Montreal, Vice-President Lake Superior Corporation, has been elected a director of the Royal Bank of Canada.

E. F. Osler, eldest son of E. B. Osler, M.P., a C.P.R. director, was married in Toronto, Feb. 16, to Miss N. J. H. Kerr, daughter of Hon. J. K. Kerr.

Sir H. Montagu Allan is suing the city of Montreal for $4,603, damage sustained to walls surrounding his house, caused by leakage from the high level reservoir.

I. McMichael, Vice-President and General Manager Great North Western Telegraph Co., Toronto, is spending a holiday in Florida, where he owns an orange grove.

Arthur Fletcher, a C.P.R. ex-employe, is reported by a Winnipeg press despatch to have inherited £500,000 through the death of an uncle in New South Wales.

Senator W. Gibson, Beamsville, Ont., railway and general contractor, has been appointed chairman of the Senate committee on banking for the current session.

Probate of the will of the late W. Becket Hill, Managing Director Allan Steamship Co., was recently granted in Liverpool, Eng. The estate was valued at about £24,254.

S. B. Mitchell, Agent C.P.R. at Taber, Alta., was presented with a gold watch, fob and charm, Feb. 10, by the townspeople, on his removal to a similar position at Lethbridge, Alta.

W. Gell, Master Mechanic, G.T.P.R., at Rivers, Sask., was operated on at St. Joseph's Hospital, London, Ont., early in Jan., and was reported, Feb. 22, to be progressing favorably.

R. Campbell, who was for some time Manager of the Inverness Ry. and Coal Co. in Nova Scotia, has been appointed General Manager of the Northern Crown Bank, Winnipeg.

J. E. Quick, General Baggage Agent G.T.R., Toronto, has been re-elected Secretary-Treasurer of the American Association of General Baggage Agents for the 25th consecutive year.

Owen McKay, Chief Engineer Essex Terminal Ry., Windsor, Ont., was a member of the board of examiners for certificates of land surveyors for Ontario, sitting at Toronto in Feb.

Major R. W. Leonard, C.E., St. Catharines, Ont., who was engineer in charge of construction of the Cape Breton Ry., is now President and General Manager of the Coniagas Mines, Cobalt.

James Brown, at one time locomotive foreman G.T.R., at Hamilton, Ont., died there recently, aged 83. He was in the employ of the G.W.R. and G.T.R. for over 30 years, and retired about 20 years ago.

H. G. Elliott, Assistant General Passenger and Ticket Agent G.T.R., Montreal, has been elected President of the Province of Quebec Fish and Game Protective Association for the current year.

M. K. Cowan, K.C., Assistant Solicitor G.T.R., has recovered from the illness which prevented his appearing at the recent sittings of the Board of Railway Commissioners at Toronto, at the end of Jan.

R. J. Smith, chief ticket clerk C.P.R. Passenger Department, Montreal, has been appointed as the Eastern Canadian Passenger Agents' Association's representative on the Inter-territorial Ticket Committee.

G. W. Stephens, Chairman of the Montreal Harbor Commission, was, it is announced, married in London, Eng., Feb. 24, to Signorita Bisacchi di Belmente, of Naples, Italy, whom he met while abroad during 1908.

T. H. White, C.E., formerly Chief Engineer of Construction Mackenzie, Mann & Co.'s eastern lines, and Mrs. White, who have spent over a year in travelling in Europe and Africa, have returned to Toronto.

Three men were arrested on Queen St., Toronto, Jan. 27, for having stolen an automobile from the residence of D. D. Mann, Vice-President Canadian Northern Ry. The arrest was made within an hour after the machine was missed.

Senator Beique, who acted for the Delaware and Hudson Co. in the purchase of the lines forming the Quebec, Montreal and Southern Ry., has been appointed chairman of the Senate committee on railways for the current session.

T. F. Scott, who was engaged as a construction engineer on the Temiskaming and Northern Ontario Ry. at Cochrane, Ont., has been recommended for appointment as assistant to the City Engineer of Toronto at a salary of $3,250 a year.

John Starr, of John Starr, Son & Co., electrical contractors, etc., Halifax, N.S., who died there Feb. 15, aged 80, was father of D. A. Starr, General Manager Clyde Valley Electric Power Co., Glasgow, Scotland, and formerly Manager of the Cornwall, Ont., Electric Ry.

R. Whitehead, who died at Smith's Falls, Ont., recently, aged 80, is said to have been the first locomotive engineer on G.T.R. construction in 1854, and remained in the company's service until 1876, when he joined the C.P.R. service, from which he retired on pension a few years ago.

Wm. and Mrs. Mackenzie, Miss Ethel Mackenzie, A. M. and Mrs. Grantham, and Z. A. Lash, K.C., returned to Toronto, Feb. 24, after about three weeks' absence, during which they visited Monterey, Mexico, and Mexico City. The party travelled in Mr. Mackenzie's private car Atikokan.

J. Duguid, who has been appointed General Foreman G.T.R. shops, Toronto, was presented with a gold watch, Feb. 20, by the employes of the machine and erecting shops, Stratford, Ont., on his leaving there to assume his new duties. At the same time Mrs. Duguid was presented with a silver tea service.

T. Henry, W. Stitt and G. T. Bell have been appointed to represent the Eastern Canadian Passenger Association to confer with other passenger associations respecting arrangements for the sale of variable route summer tourist tickets from southeastern territory to resorts north of the Ohio and Potomac Rivers.

The late H. C. Hammond's will, which has been filed in Toronto for probate, disposes of an estate valued at $1,205,944.91. Amongst the public bequests are: The Toronto Free Hospital for Comsumptives, $20,000; Sick Children's Hospital, $5,000; Home for Incurables, Toronto, $5,000; Children's Aid Society of Toronto, $3,000.

Lord Mount-Whyte, who has been living on the big estate in Scotland which he bought from Andrew Carnegie, is now spoken of as the next Governor-General of Canada. The choice old ex-Canadian says he will only accept the exalted position on one condition, and that is that his official duties must not be allowed to interfere with his annual shooting holiday in the west every autumn.—"Ten Years Hence," Winnipeg Tribune.

E. N. Todd, whose appointment as Export Freight Agent, C.P.R., Montreal, was announced in our Jan. issue, was born at Huntington, Que., Oct. 17, 1879; and entered C.P.R. service May, 1896, as junior clerk, Foreign Freight Department, Montreal, since when he has been: June, 1899, to May, 1900, chief import clerk, same department; May, 1900, to Aug., 1901, in service with the Franco-Canadian Steamship Line; Aug., 1901, to 1904, chief correspondence clerk, Foreign Freight Department, C.P.R., Montreal; 1904 to Jan., 1909, Export and Import Freight Agent, C.P.R., Toronto.

T. Lowry, President of the Minneapolis, St. Paul and Sault Ste. Marie Ry., died at Minneapolis, Minn., Feb. 4, after several months' illness. He was born in southern Illinois, Feb. 27, 1843, and entered railway service in 1886, as a director of the Minneapolis, Sault Ste. Marie and Atlantic Ry. He was elected President of the M., St. P. and S.S.M. Ry. in 1889, and again in July, 1891. In referring to Mr. Lowry's death, Sir Thos. G. Shaughnessy, President C.P.R., said, recently: "He was recognized as one of the foremost men in the northwestern States. He was an energetic and enterprising business man, and was of the type that the world finds it difficult to spare.

A unique dinner took place at the Windsor Hotel, Montreal, Feb. 12, those present being: Seven Presidents of international associations residing in Montreal, viz., G. T. Bell, G.P. & T.A., Grand Trunk and G.T. Pacific Rys., and President American Association General Passenger and Ticket Agents; J. H. Callaghan, General Storekeeper C.P.R., and President Railway Storekeepers' Association; W. J. Camp, Electrical Engineer C.P.R., and President Association of Railway Telegraph Superintendents; C. H. Gould, Librarian McGill University and President American Library Association; W. McNab, Principal Assistant Engineer G.T.R., and President American Railway Engineering and Maintenance of Way Association; J. Powell, chief draughtsman G.T.R. Motive Power Department, and President Society of Railway Club Secretaries; and H. H. Vaughan, Assistant to Vice-President C.P.R., and President American Railway Master Mechanics' Association.

Press reports state that a scheme is under consideration to inaugurate a company to operate a line of airships between Ottawa and Montreal. M. D. Baldwin, Montreal, is said to be interested in the project, which, if it may be considered at all seriously, may be said to be "in the air." In the meantime no serious fluctuations of railway stock quotations have been noted.

DRUMMOND, McCALL & CO.
GENERAL SALES AGENTS

Railway Rolling Stock Notes.

The Minneapolis, St. Paul and Sault Ste. Marie Ry. has ordered 4 locomotives for early delivery.

Rhodes, Curry & Co., Ltd., Amherst, N.S., between Jan. 15 and Feb. 15, delivered 30 box cars, 60,000 lbs. capacity, to the G.T. Pacific Ry.

The Temiskaming and Northern Ontario Ry. has ordered 2 switching locomotives from the Canadian Locomotive Co., Kingston, Ont., for delivery before July 31.

The House of Commons is being asked to vote $170,550 for additional rolling stock, and $95,800 for providing new machinery for locomotive and car shops, for the Intercolonial Ry.

The G.T. Pacific Ry., between Jan. 15 and Feb. 15, received the following additions to rolling stock: 200 box cars, nos. 308150 to 308349, and 6 first-class cars, nos. 2010 to 2015.

The G.T.R. is utilizing the steam locomotives which were in use in the St. Clair tunnel prior to its electrification, one of which was illustrated in our Feb. issue, for switching purposes.

The C.N.R., between Jan. 15 and Feb. 15, ordered the following rolling stock: 4 first-class cars, 2 second-class cars and 2 combination passenger and baggage cars, from the Silliker Car Co., Halifax, N.S.

J. J. Gartshore, Toronto, has sold two standard gauge saddle tank locomotives recently, one to the Tomiko Lumber Co., Tomiko, Ont., and one to the Standard Chemical Co. for its new works at Fassett, Que.

The I.C.R. between Jan. 14 and Feb. 16 has ordered the following rolling stock: 2 baggage cars from the Preston Car and Coach Co., Ltd., Preston, Ont., and 3 baggage cars from the Crossen Car Co., Cobourg, Ont.

The Crossen Car Mfg. Co., Cobourg, Ont., delivered between Jan. 13 and Feb. 13, 3 second-class sleeping cars to the Intercolonial Ry., 8 cabooses and one private car, named Athabasca, to the Canadian Northern Ry.

The C.N.R., between Jan. 15 and Feb. 15, received the following additions to rolling stock: 8 cabooses from the Crossen Car Mfg. Co., Cobourg, Ont., and 6 consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont.

The C.P.R. between Jan. 12 and Feb. 13 received the following additions to rolling stock: 318 box cars, 2 snow plows, 2 Pacific type locomotives from its Angus, Montreal, shops; 8 vans from its Farnham, Que., shops, and 80 steel frame box cars from the Dominion Car and Foundry Co., Montreal.

The C.P.R. between Jan. 12 and Feb. 13 placed the following orders for rolling stock: 131 box cars, 1 box baggage car, 1 stock car, 1 steel coal car, 1 Hart-Otis ballast car, at its Angus, Montreal, shops; 7 vans at its Farnham, Que., shops; and 30 Pacific type locomotives at the Montreal Locomotive Works, particulars of which were given in our Feb. issue.

The G.T. Pacific Ry., between Jan. 15 and Feb. 15, placed orders as follows: 10 colonist cars, nos: 3005 to 3014; 5 parlor cafe cars, nos. 3900 to 3904; 16 first-class cars, nos. 2018 to 2033; 8 second class cars, nos. 1010 to 1017; 3 dining cars, nos. 4000 to 4002; 8 sleeping cars, to be named, with the Canada Car Co., Montreal, and 25 eight-wheeled locomotives (details of which were given in our Feb. issue) with the Montreal Locomotive Works.

Following are chief particulars of the Pacific type locomotive, class G2d, which the C.P.R. is building at its Angus, Montreal, shops, as mentioned in our Jan. issue:

Weight on drivers	136,000 lbs.
Total weight	215,000 lbs.
Cylinders	21" by 28"
Drivers, diar.	69"
Boiler, type	wagon top, radial stayed
" pressure	200 lbs.
Heating surface	2,952 sq. ft.
Tubes, no. and diar.	193-2¼", 22-5"
" length	19' 6"
Firebox	94⅛" by 70"
" material	Otis steel
Grate area	45' 6"
Capacity, water	5,000 Imp. gals.
" coal	10 tons
Axles	Krupp steel
Brake beams	Simplex trussed
" shoes	C.P.R. standard
Couplers	Tower
Headlight	Pyle National Electric
Journal bearings	Canadian bronze
Sight feed lubricators	Detroit
Steam heat equipment	Gold
Tires	Krupp crucible
Wheel centres	cast steel
Superheater	Vaughan-Horsey

Highway and Farm Crossings Regulations.

The general regulations affecting highway crossings have been amended by the Board of Railway Commissioners as follows:

1. That unless otherwise ordered by the Board, the width of approaches to rural railway crossings over highways be 20 ft. road surface on concession and main roads, and sixteen feet on side and bush roads.

2. That a strong, substantial fence or railing, 4½ ft., with a good post-cap 4 x 4 inches, a middle piece of timber (1½ by 6 inches), and a 10-inch board firmly nailed to the bottom of the posts to prevent snow from blowing off the elevated roadway, be constructed on each side of every approach to a rural railway crossing, where the height is 6 ft. or more above the level of the adjacent ground, leaving always a clear road surface 20 ft. wide.

3. That the width of approaches to rural railway crossings made in cuttings be not less than 20 ft. clear from bank to bank.

4. That, unless otherwise ordered by the Board, the planking or paving blocks or broken stone, topped with crushed rock screenings, on rural railway crossings over highways (between the rails and for a width of at least 8 ins. on the outer sides thereof), be 20 ft. long on concession and main roads, and 16 ft. on side and bush roads.

REMOVAL OF PLANKING FROM CROSSINGS.

The Board of Railway Commissioners passed the following order 6255, Feb. 10: In the matter of the practice of certain railway companies of removing the planking at highway and farm crossings during the winter months; and in the matter of secs. 30, 235 and 253 of the Railway Act; upon the report and recommendation of the Chief Engineer of the Board, it is ordered:

1. That every railway company subject to the Board's jurisdiction be forbidden to remove the planking from any highway crossing on its line of railway during the winter months.

2. That in the operation of those portions of its main or branch lines where the snowfall is such as to require the running of snowplows or flangers, the company may, on Dec. 1 in each and every year, remove the planks from the inside of the rails at any farm crossing, for a space not exceeding 12 ins. in width, provided that the planks so removed be replaced by the company in the spring, as soon as the snow is off the ground.

3. That, in the case of farm crossings not used during the winter months, the company may, on Dec. 1 in each and every year, remove all the planking at such crossings, subject to the condition that the same be replaced as soon as the snow is off the ground in the spring.

Sanitary Precautions for Railways.

The Board of Railway Commissioners has sent out the following draft of an order which it proposes to issue and which will be considered at a Board meeting in Ottawa in March:

In the matter of the application of the Montreal Board of Trade, under secs. 269 and 284 of the Railway Act, for the adoption by the Board of regulations prohibiting the practice of spitting in railway cars and in railway stations and waiting-rooms, except in proper receptacles provided for the purpose; and requiring the railway companies to properly clean and disinfect railway cars, stations and waiting-rooms, in order to prevent the dissemination of tuberculosis or other infectious diseases: In pursuance of the powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf, it is ordered that every railway company subject to the legislative authority of the Parliament of Canada, be required within three months from the date of this order:

1. To properly clean and disinfect, and thereafter to keep clean and disinfected, its passenger cars, stations and waiting-rooms, in order to prevent dissemination of tuberculosis or other infectious or contagious diseases.

2. To cause printed notices to be placed and maintained in each of its passenger coaches, one at each end of the car, and in some conspicuous place in each of its stations and waiting-rooms, prohibiting the practice of spitting in the said cars, stations and waiting-rooms, except in proper receptacles provided for the purpose, and prescribing a penalty for violations thereof. In the Province of Quebec such notices to be printed in French as well as English.

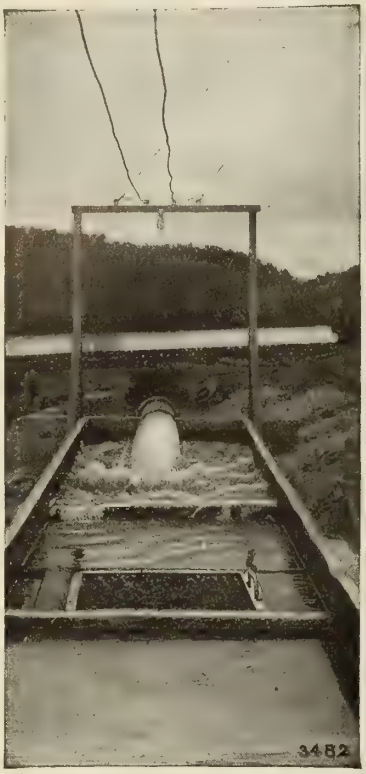
3. That every such railway company be liable to a penalty not exceeding $50 for every failure to comply with the foregoing regulations within the time for their coming into force and thereafter.

Grain Receipts at the Dual Ports.

Frank E. Gibbs, Grain Inspector, Fort William, Ont., has furnished the following statement showing cars of grain received over the C.P.R. and C.N.R. from Sept. 1, 1908, to Jan. 31, 1909, at Fort William and Port Arthur:

	C.P.R.	C.N.R.
One Hard	54	66
One Northern	4,981	3,257½
Two Northern	7,326	3,047
Three Northern	6,460	3,370½
No. Four	2,584	1,406
No. Five	1,327	603½
No. Six	614	319½
Feed	315	176
Condemned	3	6½
Goose	1	
One Red Winter	355½	
Two Red Winter	527½	
Three Red Winter	552	
Four Red Winter	202½	
Five Red Winter	132	
One White Winter	5½	
Two White Winter	6½	
Three White Winter	12	
Four White Winter	5	
Five White Winter	3½	
One Mixed Winter	22	
Two Mixed Winter	9½	
Three Mixed Winter	1	
Four Winter	4	
Rej. for Seeds	422	419½
Rej. for Smut	2,011½	918½
Rej. Winter, Smut	242	
No Grade	760½	307½
Wheat	28,939½	13,898
Rye	8	....
Oats	3,334	1,607½
Barley	796½	944½
Flax	1,238	105
	34,316	16,555
Total		50,871 cars.
Corresponding period, Jan. 31, 1908:		
C.P.R.		23,425 cars.
C.N.R.		10,297 "
Total		33,722 "

PUMP YOUR WATER
BY
COMPRESSED AIR



For pumping mines, sand, mine tailings, condensing and factory water, from rivers or lakes having a great rise or fall, the RAND "RETURN AIR" is unquestionably the most economical system known.

Its essential principle, distinguishing it from other pneumatic displacement pumps, is the use of the same charge of air over and over, thus utilizing its expansive power.

No system is so simple to manage or maintains such a high original efficiency indefinitely.

New Trails to the
Canadian Game Lands

Before the six railways of the Canadian Northern System followed the old fur trails into the Canadian game lands, only a hardy few dared to go in. But now, the back places of the woods—wealthy in moose, caribou, deer and bear—may be quickly and easily reached. The Canadian Northern system serves a wide range of undisturbed territories. Here are a few suggestions:

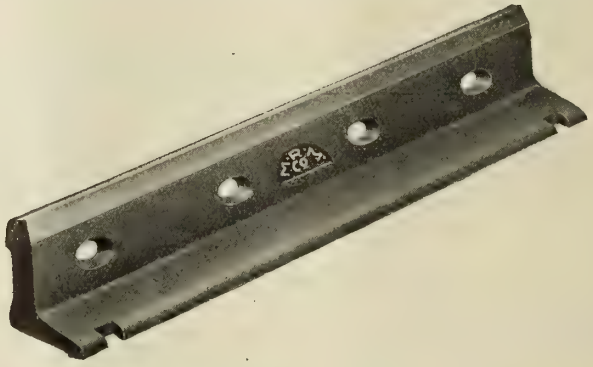
The country between Parry Sound and Sudbury, traversed by the CANADIAN NORTHERN ONTARIO RAILWAY, is a land of lonely muskeg and brulé, the native country of the white-tailed deer. From Sudbury north to Sellwood this same line goes in through a moose hunting territory unequalled in Ontario.

The CANADIAN NORTHERN QUEBEC and QUEBEC AND LAKE ST. JOHN RAILWAYS span the native country of the ouananiche, northern brook trout, and the spruce-shored lakes of the Roberval country, where moose and caribou abound.

The eastern shore of Nova Scotia, from Yarmouth to Halifax, is served by the HALIFAX AND SOUTH WESTERN RAILWAY. On the barrens, slightly inland from the railway, are some of the best places for big moose in the east.

THE CANADIAN NORTHERN RAILWAY from Port Arthur to Edmonton, with many branches, griddles almost undisturbed haunts of moose, caribou, deer, wolves, bear, and all species of four-footed and feathered game.

For Information, General and Special, Address the Information Bureau, Canadian Northern Railway, Toronto



ANGLE BARS

We roll these for 80 lbs. A.S.C.E. Steel Rails, punched as required and cut to any length.

They are rolled from the very best material, and will stand the closest inspection.

TRANSPORTATION APPOINTMENTS.

The information under this head, which is almost entirely gathered from official sources, is compiled with the greatest care, so as to ensure absolute accuracy. Anyone who may notice any error in our announcements will confer a favor by advising us.

Board of Railway Commissioners.—It was recently announced in an Ottawa paper that E. A. Primeau had been assigned to the Secretary's work of the Board, in so far as it relates to telegraph, telephone, power and pipe crossings, and also the accident and equipment departments. We are officially advised that Mr. Primeau was appointed Assistant Secretary last spring and that the assigning of any duties to him is a mere matter of internal arrangement of the Board's work. There has been no change in his title. E. W. McNeill has been placed in charge of the Board's record department.

Canadian Pacific Ry.—E. W. Champion has been appointed District Master Mechanic, district 1, Eastern Division, vice B. Pendleton, transferred. Office, Farnham, Que.

R. Preston, formerly Master Mechanic, Ontario Division, who has been on leave of absence, has been appointed acting Shop Superintendent, West Toronto.

A Maynes, heretofore Rule Examiner, West Toronto, has been appointed District Master Mechanic, district 1, Ontario Division, vice J. R. Spragge, transferred, a position he held prior to his appointment as Rule Examiner. Headquarters, West Toronto,

J. K. Spragge, heretofore District Master Mechanic, district 1, Ontario Division, has been transferred to district 3, vice A. E. Stewart, which position he held prior to his transfer to district 1. Headquarters, West Toronto, Ont.

A. E. Stewart, heretofore acting District Master Mechanic, district 1, Ontario Division, West Toronto, has been given a position as locomotive engineer.

B. Pendleton, heretofore District Master Mechanic, district 1, Eastern Division, Farnham, Que., has been appointed Locomotive Foreman, London, Ont.

Duluth, Rainy Lake and Winnipeg Ry.—J. D. Morton, Chief Accountant Canadian Northern Ry. and General Auditor Canadian Northern Ontario Ry. and allied eastern lines, has also been appointed Secretary and General Auditor, D., R.L. and W.R. Office, Toronto.

L. W. Mitchell, acting Treasurer C.N.R., Toronto, has also been appointed Treasurer D., R.L. and W.R. Office, Toronto.

M. A. Murphy, heretofore General Manager, has been given the title of Superintendent, reporting to the head office, Toronto. Office, Duluth, Minn.

G. R. Hall will continue to act as Traffic Manager. Office, Duluth, Minn.

Grand Trunk Pacific Ry.—P. Desmond, heretofore in charge of the yards at Wainwright, Alta., is reported to have been appointed Roadmaster at Watrous, Sask.

Grand Trunk Ry.—Jas Duguid, heretofore foreman of the machine shop, Stratford, has been appointed General Foreman, Toronto, vice J. C. Garden, promoted.

C. Geldart has been appointed foreman machine shop, Stratford, vice J. Duguid, promoted.

The following agents have been appointed: C. H. Ranson, Prescott, Ont.; R. J. Parker, Dublin, Ont.; F. N. Chambers, Burt, Mich. Outside Agencies, A. R. Dingman, Kingsville, Ont.

In our last issue it was stated that R. Bushby, Eastern Passenger Agent, Cortland, N.Y., had, at his own request, been transferred to other duties. We are advised that he retains a connection with the company, but holds no official position.

Intercolonial Ry.—W. U. Appleton, chief clerk to the Superintendent of Motive Power, has also been appointed Assistant to the Superintendent of Motive Power, and will in addition to his duties as chief clerk act as general assistant in matters relating to the Mechanical Department. Office, Moncton, N.B.

The position of Master Mechanic in charge of Moncton shops, which became vacant by the death of A. B. McHaffie, has been abolished, and their supervision has been rearranged as follows: H. D. Mackenzie, heretofore Mechanical Foreman at Stellarton, N.S., has been appointed General Foreman of Locomotive Shops, and A. B. MacDonald, heretofore car foreman, has been appointed General Foreman of Car Shops, with jurisdiction and responsibility over all employes and work in their respective departments.

Jas. Blair was appointed acting Mechanical Foreman at Stellarton, N.S., Feb. 2, vice H. D. Mackenzie, promoted, and on Feb. 10 he was appointed Mechanical Foreman.

Mackenzie, Mann & Co.'s Eastern Lines.—A. F. Stewart, heretofore Assistant Chief Engineer of Construction, has been appointed Chief Engineer of Construction, lines in Ontario and Quebec, vice T. H. White, who has been on leave of absence for the past year and who has now been assigned to other duties.

New York Central and Hudson River Rd.—R. G. Cullivan, heretofore General Foreman Locomotive Department, has been appointed Division Superintendent of Motive Power of the Hudson and Middle Divisions, vice E. A. Watson, resigned. Headquarters, West Albany, N.Y.

Northern Navigation Co.—C. A. Macdonald, heretofore Auditor Freight and Passenger Accounts, has been appointed Comptroller—his former title being discontinued. Office, Collingwood, Ont.

Richelieu and Ontario Navigation Co.—The title of J. W. Canvin, Travelling Passenger Agent Alexandria Ry., N.Y., has been changed to District Passenger Agent.

Temiskaming and Northern Ontario Ry.—G. A. McCarthy, Chief Engineer, has resigned to enter private practice in Toronto. The resignation will take effect Apr. 1.

A. J. Parr has been appointed Assistant Freight and Passenger Agent, in charge of rates, traffics, and claims.

G.T.R. Stratford Shops.

The formal opening of the recently erected shops at Stratford, Ont., was signalized, Feb. 18, by a dinner given by the Stratford municipality to C. M. Hays, Second Vice-President and General Manager, and other G.T.R. officials. Mr. Hays, in responding to the toast of the G.T.R., paid a high tribute to the Motive Power Department, especially mentioning the services rendered by W. D. Robb, Superintendent of Motive Power, and R. Patterson, Master Mechanic, Stratford. He considered the shops a model, and said they would be a training school for many men, both on the G.T.R. and the G.T.P.R., and would put the company to the fore in all departments. The G.T.R. had, during his term, doubled its earnings, and largely increased its passenger traffic and mileage. Referring to the agitation for the elimination of level crossings, the G.T.R. had 3,000, and to fix these, it was estimated, would require an expenditure of $50,000,000, which would take years to provide for. On the question of a new station at Stratford, Mr. Hays said, that in due course it would be built, but moderation in immediate demands was necessary.

U. E. Gillen, Superintendent Middle Division, gave the following statistics: Canada has one mile of railway to every 289 people, or to every 161 sq. miles, in all 30,000 miles, of which 8,000 are in Ontario. These carry 33,000,000 passengers annually, and 64,000,000 tons of freight. Their net revenue is $46,000,000, with 3.66 % profit on the investment.

A full description of the shops, with details of lay out, was given in our Dec., 1907, issue.

Report on I.C.R. Connecting Lines.

The Minister of Railways laid on the table of the House of Commons, Feb. 11, a report as to the advisability of securing for the I.C.R. a number of connecting lines to act as feeders. During last year the question was discussed in Parliament, and it was contended that, were the I.C.R. not a Government railway, several of these connecting lines would have been absorbed. The Minister of Railways promised that an investigation would be made, and as a consequence, in Sept., 1908, E. Tiffin, General Traffic Manager; D. A. Storey, General Freight Agent, I.C.R.; and W. A. Bowden, Engineer of the Department of Railways, were appointed to enquire and report into the condition of the various connecting lines, and the possibilities of their proving remunerative, should it be deemed advisable to absorb them into the I.C.R. system.

The conclusions arrived at, as contained in the report, are mainly as follows: "We would express the unanimous feeling as gleaned from interviews with the people living along these lines that great good to the country would follow the suggested absorption. There is not a dissenting voice amongst all the people we interviewed as to the good the country and its people would derive, and there can be no question as to the impetus such action would have on business that is now lagging and falling away because of want of facilities for the proper conduct of the present traffic. It is a well-established fact that in nearly every case where branch lines have been absorbed by trunk lines such a policy has proved to be of great value to the branch lines as well as furnishing additional revenue to the main line and then becoming valuable feeders to them as they increase the traffic and earning powers of the trunk lines. Hampered by lack of capital and inefficient equipment, it cannot be expected that the branch lines can provide the services or facilities needed for the development of the country which they profess to serve, and, further, we are constrained to say the branch lines are to-day not in a position to give a satisfactory service, and, in fact, we believe they have now about reached that stage of becoming more of a hindrance than a help to the proper development of the country. We are satisfied that the careful nursing of present industries and the development of new ones which would necessarily follow the absorption of these branch lines would make their absorption of vital interest and one worthy of the best consideration. Furthermore, the people of the Maritime Provinces, who, as a rule, are but poorly served by the branch lines, are asserting that in view of the large amount of money or other assistance accorded to the Canadian northwest for the purpose of developing the country, they are entitled to at least a measure of generous treatment for similar purposes."

The report does not deal with all the connecting railways, as there are a number of lines, with which any such deal would be out of the question, but only with such lines as it is considered would be likely to be willing to be absorbed, and which it is surmised could with advantage be taken over and operated as feeders. An additional report, prepared by the N.B. Government, deals with connecting lines in New Brunswick.

In our Oct., 1908, issue we dealt fully with the various lines connecting with the I.C.R. in Quebec, New Brunswick and Nova Scotia, quoting mileage, capital employed, subsidies granted, both Dominion and Provincial, and rolling stock in service.

A petition is reported to have been extensively signed in Alberta, asking the Dominion Parliament to make it illegal to employ a man upon railway work for longer than eight hours a day.

REDUCE YOUR LABOR THREE-FOURTHS

If you could reduce your force 75 per cent. without curtailing the efficiency of your system, wouldn't you do it?

You CAN lessen, that much or more, the labor involved in handling your oils by installing

The Bowser System of Oil Storage

Storage Tanks filled direct from car—
Self-measuring pumps, drawing and measuring EXACTLY the amount desired at one operation—
Automatic Power Pumps that measure accurately from one to one thousand gallons—
That's the Bowser System; more about it in Bulletin 18.

Steam Railway Track Laid in 1908.

In our last issue we gave a preliminary statement of steam railway track laid in Canada in 1908. Revised and completed returns since received show that 1,505.95 miles was laid by the different companies, against 1,469.65 in 1907. This mileage was distributed by provinces as follows:

	Miles.
Saskatchewan	657.70
Ontario	238.04
Quebec	229.14
Manitoba	166.30
Alberta	74.90
New Brunswick	67.00
British Columbia	56.87
Nova Scotia	9.00
Yukon	7.00
Total	1,505.95

The mileage was laid by the different companies as follows:

	Miles.	Miles.
ATLANTIC, QUEBEC AND WESTERN RY.		
Port Daniel to Anse à la Barbe	5.00	
Grand Pabos to Anse aux Canards	2.00	
		7.00
CANADIAN NORTHERN QUEBEC RY.		
Garneau to Quebec		60.90
CANADIAN NORTHERN ONTARIO RY.		
Connecting track at French River	7.90	
Orillia branch	3.60	
		11.50
CANADIAN NORTHERN RY.		
Rossburn branch north of Rossland	22.30	
Saskatoon southwesterly	75.00	
Pas Mission branch	20.00	
Carlton branch, Dalmeny northerly	28.00	
Thunder Hill branch, Benito westerly	21.00	
Connection at Fort Frances, Ont	1.50	
		167.80
CANADIAN PACIFIC RY.		
Northern Colonization Ry.—From 2 miles north of Nomining, Que., towards L'Orignal	30.74	
Georgian Bay and Seaboard Ry.—Coldwater Junction to Victoria Harbor	11.50	
Walkerton and Lucknow Ry.—Mileage 26.2 to Walkerton, Ont.	11.50	
Tillsonburg, Lake Erie and Pacific Ry.—Code Junction to Embro, Ont	5.69	
St. Mary's and Western Ontario Ry. From Embro to St. Mary's, Ont	15.90	
Toronto-Sudbury branch—From Naiscontyong to Pickerel	25.25	
From Teulon northerly, Man	2.00	
Mowbray extension, Man	4.00	
Stoughton-Weyburn Line, Sask	25.00	
Wolseley-Reston line, Sask	24.00	
Sheho-Lanigan line, Sask	46.10	
Pheasant Hills branch, Sask	74.60	
Moose Jaw northwesterly, Sask	101.60	
Lethbridge-Macleod line, Alta	12.00	
		389.88
CENTRAL ONTARIO RY.		
From Maynooth to Lake St. Peter		8.00
DELAWARE AND HUDSON CO.		
Quebec, Montreal and Southern Ry.—From Pierreville to St. Philomene		48.50
EASTERN BRITISH COLUMBIA RY.		
From McGilvray to Corbin Mines, B.C.		14.00
GRAND TRUNK PACIFIC RY.		
Lake Superior Branch—Mileage 99.6 to mileage 188.8, Ontario	89.20	
Winnipeg to Portage la Prairie, Manitoba	45.00	
Mileage 312 to mileage 414.9, Saskatchewan	102.90	
Mileage 466.64 to mileage 627.1, Saskatchewan	160.50	
Mileage 627.1 to mileage 685, Alberta	57.90	
Mileage 786.6 to mileage 791.6, Alberta	5.00	
		460.50
GREAT NORTHERN RY. (U.S.)		
Between International boundary and Olivers, B.C., 11.33 miles, less 0.86 in 1907	10.47	
Between Olivers and Brownsville, B.C., 9.72 miles less 5.22 laid in 1907	4.50	
Between Cloverdale and Sumas, B.C., 29.28 miles, less 1.38 laid in 1907	27.90	
These mileages were laid on the line known as the Vancouver, Victoria and Eastern Ry.		
		42.87
INTERNATIONAL RY. OF NEW BRUNSWICK.		
From end of mileage 35 to 62		27.00
SYDNEY AND LOUISBURG RY.		
From Grand Lake Jct. to Colliery 12	7.00	
From No. 14 Jct. to Colliery 14	2.00	
		9.00
TEMISKAMING AND NORTHERN ONTARIO RY.		
From Wateybeag to Cochrane, Ont.	44.00	
From Englehart to Charlton, Ont	8.00	
From Cobalt to Kerr Lake, Ont	4.00	
From milepost 110 to Moore's Cove on Lake Temiskaming, Ont	2.00	
		58.00
TRANSCONTINENTAL RY.		
Moncton, N.B., westerly	37.00	
Chipman, N.B.	3.00	
Bellaire, Que., 7 miles e. to 11 miles w.	18.00	
St. Thickle, Que., 16 miles w. to 17 miles e.	33.00	
La Tuque, Que., 16 miles e. to 15 miles w.	31.00	
Winnipeg towards Superior Jct	48.00	
		170.00
WHITE PASS AND YUKON RY.		
Macrae to Copper Mines		7.00
WINNIPEG CITY POWER PLANT LINE.		
Lac du Bonnet to Point du Bois, Man.		24.00
Total		1,505.95

Of this mileage 1,260.58 miles were laid in connection with three systems, as follows:

	Miles.	Miles.
Transcontinental Ry.	170.00	
G.T. Pacific Ry.	460.50	
		630.50
Canadian Pacific Ry.	389.88	
		389.88
Canadian Northern Que. Ry.	60.90	
C.N. Ontario Ry.	11.50	
C.N. Ry.	167.80	
		240.20
		1,260.58

The remaining mileage was laid by nine different companies, the most important piece of construction being the completion of tracklaying on the Temiskaming and Northern Ontario Ry., to the junction with the Transcontinental Ry. at Cochrane, Ont.

Penny Fares on the G.T.R.

The Judicial Committee of the Privy Council delivered judgment in London, Eng., Feb. 17, in the case of Robertson vs. G.T.R., on the appeal of the G.T.R. from the judgment of the Supreme Court of Canada, compelling the G.T.R. to issue third-class tickets at the rate of one penny per mile for each mile travelled, and to provide at least one train having in it third-class carriages, which shall run every day between Montreal and Toronto.

The case against the G.T.R. dates back to Nov. 1, 1906, when proceedings were commenced in the Toronto Police Court against C. M. Hays, Second Vice-President and General Manager, for a violation of the provisions of sec. 138 of the criminal code. A technical conviction was registered, and the matter sent to the Appeal Court, where the conviction was quashed Mar. 4, 1907. Application was then made to the Board of Railway Commissioners, and the late A. C. Killam, then Chief Railway Commissioner, delivered judgment, and an order was issued July 3, 1907, directing the G.T.R. to run every day, throughout the length of its line between Montreal and Toronto, at least one passenger train having in it third-class carriages for passenger traffic; and that the fare for each third-class passenger, by any train on the said portion of its railway, do not exceed 2 cents for each mile travelled. The order also granted the company leave to appeal to the Supreme Court of Canada. This judgment was published in full in our Sept., 1907, issue. The appeal came before the Supreme Court Oct. 28, 1907, and judgment was delivered Dec. 13, 1907, sustaining the Board of Railway Commissioners' order and granting the company leave to apply to the Privy Council for leave to appeal the case to the Judicial Committee. Leave was granted Mar. 19, 1908, and the case was heard Feb. 16, 1909, when the decisions of the Board of Railway Commissioners and the Supreme Court of Canada were sustained.

The Lord Chancellor, in delivering judgment, said that the section of the G.T.R. Act of Incorporation, which required that the fare for each third-class passenger by any train on the company's railway should not exceed one penny currency for each mile travelled, and that at least one train having in it third-class carriages should run every day throughout the length of the company's line between Montreal and Toronto, was still in force. The whole question was whether the section was inconsistent with the Railway Act of 1906. He held that it was not, and also that the Privy Council could not decide whether or not the section referred to was left on the statute book by desire or because it was overlooked. The appeal was dismissed with costs.

Great Northern Railway Lines in Canada.

Manitoba Great Northern Ry.—Application is being made to the Manitoba Legislature by L. W. Hill, President of the Great Northern Ry., and others, for an act incorporating a company with this title, for the purpose of constructing railways in the province.

Midland Ry. of Manitoba.—The Manitoba Legislature is being asked to pass an act authorizing the company to construct certain lines in addition to those which it was originally authorized to construct, viz.: From Winnipeg to Brandon, Elkhorn, and the western boundary of the province, and from Morden, northwesterly to Rathwell, thence to the first-mentioned line.

A Winnipeg press despatch states that it is the intention of both the Great Northern Ry. and the Northern Pacific Ry. to operate in Manitoba, under the charter of the Midland Ry. of Manitoba.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—H. A. K. Drury, of the Board of Railway Commissioners' engineering staff, has completed an official inspection of the company's recently completed lines from Cloverdale to Sumas, and from Olivers, B.C., to the International boundary.

L. P. Gilman, Assistant to the President G.N.R., and President Elliot, Northern Pacific Ry., and a number of officers of both companies, arrived in Vancouver Feb. 4, concerning the location of terminals on False Creek, in the east end of the city. They waited on the city council and asked for the co-operation of the city in securing the remaining properties required to carry out the plan of providing union terminals on a large scale, and making the creek available for deep sea shipping. The companies, it was stated, had expended $600,000 in acquiring properties at the head of the creek, but further purchases were blocked by the abnormal prices asked, hence the desire to secure the aid of the city. The proposals for the improvement of the Vancouver harbor was presented to the authorities Feb. 5. They involve the construction of a breakwater two miles long, from Spanish bank across the mouth of English bay, creating an enclosed harbor of 3,600 acres at the mouth of False Creek, at an estimated cost of $1,000,000. Other parts of the scheme contemplate the construction of locks in False Creek, making the waterway available for shipping at all stages of tide, and cutting the canal to the coal harbor at the head of Burrard Inlet, connecting the city's two harbors. The council decided to send a deputation to Ottawa to consult with the Dominion Government in regard to the matter. The city will apply to the Provincial Government for authority to expropriate an extensive tract of land at False Creek. (Feb., pg. 107.)

A. O. Norton, manufacturer of jacks, Boston, Mass., and Coaticook, Que., was a passenger, as also were Mrs. and Miss Norton, H. A. and Mrs. H. A. Norton, on the White Star s.s. Cretic from Boston, Feb. 27, for the Azores and the Mediterranean.

J. N. Bastedo, Passenger Agent Atchison, Topeka and Santa Fe Ry., Detroit, Mich., died there Feb. 27, aged 51. Prior to going to Detroit, he was engaged in Toronto, where he was well known. The funeral was arranged to take place from his brother's residence in Toronto Mar. 1.

G.T.R. Betterments, Construction, Etc.

Ottawa Union Station and Hotel.—A deputation waited on the Government Feb. 15 with reference to the hotel part of the new union station project. It is said that a formal report will be drawn up for presentation to the city council. The view generally entertained is that the Government will insist upon the station building being gone on with anyway. W. Wainwright, Fourth Vice-President G.T.R., in an interview, said the architects had stated that the working plans were prepared, tenders had not been called for, but there was sufficient time to do so before the spring. "We purpose," he added, "going ahead with the original idea."

London, Ont., Improvements.—The Board of Railway Commissioners sat in London, Ont., Feb. 25, for the purpose of considering the questions of the Adelaide St. crossing, the G.T.R. crossings in East London, and the West Lorne crossings. It is understood that the question of the track elevation will be affected by the decision in the matter upon the London city crossings. The Mayor had a conference with E. H. Fitzhugh, Third Vice-President G.T.R., prior to the Commission's meeting.

It was stated in London Feb. 12 that the Chief Engineer had completed the company's plans for track elevations, etc., in London, Ont., and that they would be submitted shortly for the consideration of the General Manager. The plans, it is said, provide for the elevation of the tracks for five or six blocks, and the erection of a new station.

Corrections for the Erring.

"Mr. T. Hattie, G.T.R. master mechanic at Montreal, has been appointed superintendent of motive power at St. Alban's."—Canadian Engineer, Jan. 29.

T. McHattie, not Hattie, who was formerly Master Mechanic, Eastern Division G.T.R., Montreal, has, as announced in our last issue, been appointed Superintendent of Motive Power and Car Department, Central Vermont Ry., with office at St. Albans, Vt.

"W. P. Hinton, General Passenger Agent of the Grand Trunk, has been appointed Assistant Passenger Traffic Manager of the Grand Trunk Pacific, with office at Winnipeg, Man."—Railroad Age Gazette, Feb. 12.

W. P. Hinton is not General Passenger Agent G.T.R. He is Assistant General Passenger Agent, G. T. Bell being General Passenger and Ticket Agent. Up to Feb. 24, Mr. Hinton had not been appointed to any position on the G.T.P.R. The daily press has published a lot of rumors about such an appointment, and our contemporary has probably been misled by some of these.

"The quarterly meeting of the executive committee of the Canadian Street Railway Association was held last Saturday. Mr. J. F. Hutcheson, superintendent of the Ottawa Electric Railway Company, presided. Others who took part were: Acton Burrows, secretary of the Association; Duncan Macdonald and P. Dube, of the Montreal Electric Railway; E. A. Evans, of Quebec; William Hopper, of St. John, N.B.; C. B. King, London; W. McCrea, Toronto, and James Anderson, Windsor. Details of several matters dealt with by the Association in Ottawa a few months ago were disposed of, and some arrangements made for the annual meeting, which takes place in Winnipeg in midsummer."—Canadian Engineer, Feb. 19.

The meeting referred to was not a "quarterly meeting," as the executive committee does not meet quarterly. It was not held on a "Saturday," but on Friday, Feb. 12. J. E., not "J. F.," Hutcheson is Superintendent of the Ottawa Electric Ry. The Montreal St. Ry. officials on the committee are Duncan McDonald and P. Dubee, not "Duncan Macdonald and P. Dube." There is no "William Hopper" on the committee. H. M. Hopper, of St. John, is a member of it. "W. McCrea, Toronto," was not at the meeting. W. McRae, Toronto, is, however, a member of the committee. The annual meeting will not take place in Winnipeg "in midsummer."

A Great Purchasing Railway

The following portions of the remarks made by Sir Thos. G. Shaughnessy, President of the Canadian Pacific Ry., in moving the adoption of the directors' report at the recent annual meeting are of especial interest as showing the enormous purchases made by that great railway corporation and as pointing out that its policy of keeping abreast of the requirements of traffic will be pursued in the future with even greater vigor than in the past. Sir Thomas said:

"You will be asked at the special general meeting, to be held immediately after this meeting, to sanction an increase in the ordinary capital stock from $150,000,000 to $200,000,000, and to empower your directors to utilize the additional stock in such amounts from time to time as may be desirable in connection with the company's capital requirements. It is not easy to designate in advance, with any degree of particularity, the purposes for which money will be required, excepting in the matter of rolling stock. In the six years, 1902 to 1908, there was an increase in your equipment of 659 locomotives, 842 sleeping cars and day coaches, and 25,190 freight cars, at an approximate cost of $37,000,000. This is equivalent to one locomotive every three working days, one passenger car every two days, and 14 freight cars each day during the entire period of six years, and yet the prospects are that within the next six weeks the demand will be in excess of the supply of freight cars. While it is a healthy sign to have a shortage rather than an excess of equipment, it is due to the public, and in the best interests of the company, that neither money nor effort should be spared to meet the reasonable requirements of shippers along your line, and, therefore, we must continue to build or purchase locomotives and cars as quickly as the development of traffic may warrant. In the ordinary course of events the volume of traffic on your lines should increase with a fair degree of rapidity, and an expansion of traffic necessarily involves not only additional cars and locomotives, but enlarged accommodation and greater facilities to care for it at very many new places over your 9,500 miles of railway, and in providing these, large sums of money are quickly absorbed."

In connection with the above we may be permitted to point out that THE RAILWAY AND MARINE WORLD is taken by every C.P.R. official who has in any way anything to do with the placing of orders for rolling stock, etc., as well as by the other officials of the company. And the same may be said of the officials of the Grand Trunk, Canadian Northern, Intercolonial, and other Canadian lines, our circulation covering all the companies throughout Canada and Newfoundland. The lesson to be deduced from this by locomotive and car builders, manufacturers of railway specialties, etc., is obvious, and that is why so many of them use the columns of Canada's only railway periodical for advertising purposes.

W. S. Stout, President and General Manager Dominion Express Co., left Toronto early in Feb., accompanied by F. H. Chrysler, K.C., of Ottawa, and is attending the Board of Railway Commissioners' sittings at various points west of Lake Superior, where matters pertaining to the operation of express companies are being brought forward.

Joseph Hobson's Life Work.

Referring to the life work of Joseph Hobson, whose portrait was published in a recent issue in connection with the electrification of the St. Clair tunnel, the Hamilton Times recently said: "There is one really great Canadian whose title to recognition of merit, disputed by none, has been too long overlooked, and that the neglect is hardly creditable to our people—especially to our great institutions of learning, which are sometimes very free in awarding their honors. We refer to Jos. Hobson, M. Inst., C.E., the veteran railway engineer. Of Mr. Hobson's many great works, the construction of the St. Clair tunnel, recently electrified, is one that renders his fame secure and has made his name familiar to the engineering world. It is an honor to Canada that such a work should have been projected and carried to completion by one of her own people. It will be his memorial, testifying to his ability to accomplish great things in his chosen profession. But why should our universities—Toronto, McGill, Kingston, and the rest—not be forward in placing the seal of their approval upon Mr. Hobson's genius and achievements? They have not always been tardy in recognizing Canadian worth. Has it been an oversight? Whatever the explanation, they should see to it that they honor themselves by honoring Mr. Hobson. Canada has many knights infinitely less worthy of the Sovereign's decoration than is the modest gentleman who has, with such beneficent results, left his impress upon the G.T.R., to the immense benefit of his country. Shall Canadians be unappreciative or ungrateful?"

"Silent Partners" in Railway Building.

A correspondent, in reporting a conversation with a G.T.P.R. official regarding the "Silent Partner" in railway construction, says: "There is M. H. McLeod, who was Chief Engineer, now General Manager, of the Canadian Northern Ry. He has lived years in the open, slept out in the snow, sleet and rain to find a trail for Mackenzie & Mann. There is Jack Callahan, Superintendent of Construction of the C.P.R. west of the lakes. He is another one of these 'Silent Partners,' and there is Bob Jones, who figures in Cy. Warman's last two books as 'Smith the Silent.' This man had his habitation in the wilderness west of Edmonton for three years. He and others above and below him are responsible for the level line that leads away from the Prairie Provinces to the Pacific Coast, and when people travel, as they will within the next few years, through this western wonderland, through the very heart of the Rockies at the rate of a mile a minute, they should not forget that it would be impossible to do so but for the patient toil of these 'Silent Partners.' Here is a quotation from a letter written by a well-known engineer to a friend of his in Montreal:.

"'I have known hardships, hunger, poverty and loneliness. I have toiled in the desert, in tropical swamps and in Canadian winters for my profession, my art—for many years. I have possessed little but I have been free always. I come when I will, I go when I please. I acknowledge that by the usual standard I am a failure, but the pleasure of planning and waiting has been mine, and the moments I have lived when I have been able to do with my brain what others would do by men, muscle and money, have been worth much to me. I have never sacrificed my profession to my interests or ambition, and still retain the ideals I started with. If I have accumulated nothing material, I have at least kept my professional honor.'"—Montreal Gazette.

The Passenger Traffic of a Transcontinental Railway.

By H. W. Brodie, Assistant General Passenger Agent, Central and Western Divisions, C.P.R.

The following paper was read at the annual divisional time meetings of the central, western and Pacific divisions, C.P.R., recently:

In this address to you, the superintendents of the operating department, it is my desire to present only a general outline of what is required to organize, develop and successfully handle passenger traffic on a transcontinental railway, embracing, as it does, a large local business, and participating in what we might almost term around-the-world passenger traffic. In addition, to endeavor to make plain the relationship existing between the operating and passenger departments of a great system, and the responsibilities that rest upon you if the business is to be successfully conducted; also to outline in general the requisite qualifications of a successful head of the passenger branch of the service, and what must be done to develop the business.

RESPONSIBILITY OF THE OPERATING DEPARTMENT.

When the construction department of a railway company completes its work and turns over a new highway to be used for the transportation of persons and property from one portion of a country to another, it becomes at once a necessity for the owners to select special men for the carrying out of the various works to be performed. As these few remarks relate specifically to two departments, we shall not consider the construction of others. One man must be selected whose duty it will be to arrange for the movement of traffic in a safe and satisfactory manner at a minimum amount of cost, and another to organize and develop the passenger business.

It is almost universally recognized that the standing of a railway in the eyes of the public is measured by the standard of its passenger service; the reason being that but a small percentage of the population of a country is made up of shippers, compared with the number who find it necessary to be transported from one place to another, either for pleasure or the pursuit of business. The leading American railways to-day gained their reputations by furnishing the very best possible service, eliminating the time handicap for the commercial interests, better enabling them to develop great industries and business institutions, of great value to the line, through the development of a large freight traffic. The public, generally, are keenly interested in the operation of railway trains, and the importance of the successful transportation of passengers should be fully realized by every person connected with their movement.

Let us study a few of the features which present themselves to the passenger man. We shall first devote our attention to the relationship that exists between the operating department and the passenger organization of a railway. The work and constant effort put forth to secure traffic, hereafter outlined, will soon fail and its effect be lost if you, as the heads of the operating department, do not carry well the burden of the responsibility resting upon you—the responsibility of fulfilling in every detail your obligation to carry out what we have represented you are capable of doing. First and foremost, you must fully realize that you deliver the commodity we sell. We advertise the line, the trains you operate, the country they pass through. If you fulfil your part, the people who pass in one direction over the rails will return in the opposite direction later on. If you fail they will not return. It is a recognized principle in handling passenger traffic, that it is even more difficult to hold traffic than it is to secure new traffic. The man who purchases transportation expects value for his expenditure, just the same as the man who buys a coat. If he finds its qualities have been misrepresented and that it does not fit, he changes his tailor; and, in like manner, the passenger changes his route. Every passenger who goes through your hands in one direction should, under normal conditions, sooner or later return.

We do not have, at present, fixed rules of operation, governing the size of passenger trains in respect of the number of cars to be carried, or standards of tonnage, making allowance, under certain conditions, for wind resistance and other drawbacks—in this respect being behind the freight movement, where tonnage is closely figured, and it is known almost to a certainty what the engine performance will be. Is this as it should be? It is recognized as important that freight shipments should not be delayed in transit. How much more important that passengers should not be? It means the breaking of important business engagements, loss of valuable time, and sometimes it is a question of life and death. A shipper will express annoyance if his freight is delayed, but if, when he travels on the same line, he is delayed and loses valuable time, his annoyance becomes intensified tenfold, and he is unsparing in his denunciation, and not infrequently carries it to a point of concluding that the line is not a satisfactory highway for the transportation of either his person or property. Watch closely your passenger trains. See that all connections are made. Run them on time.

Close observation seems to prove that the constant handling of the public by railway men has a tendency to cause them to become indifferent, and to forget that their responsibility never ceases. Therefore, the necessity of eternal vigilance and constant supervision on your part. Every person interested must do his best at all times to maintain an enviable reputation for the road. When your engines are turned out for service on a passenger train, they should be neat and cleanly in appearance, and capable of doing their work, which is to carry the train over the division in precisely the allotted time. Engineers should understand that they are responsible for the reputation of the road as a whole, and every time a train is delivered on time that reputation is not only maintained, but the engineer proves himself. Train dispatchers share in this responsibility, and should at all times assist engineers and conductors responsible for the movement of passenger trains. Not only should they operate their trains on time, but should handle them smoothly, avoiding sudden jars, which are sometimes noticeable when pulling into stations or stopping at water tanks. Such jars create a bad impression in the minds of passengers, and make them feel that we are not careful of their comfort. The equipment of trains should be uniform, clean outside and in. Dirty car windows, aisles and seats are inexcusable in the eyes of passengers. All heating arrangements should be in proper condition, also ventilating appliances, so that the temperature of the cars may be properly regulated Capable train crews only should be in charge, who thoroughly understand these details of service and attend to them.

The train conductor is an important man. He stands in the same relation to his passengers as the captain of a ship. He should be neat in appearance, careful and considerate in dealing with his passengers. It should be his duty to keep a close watch and a firm hand on his brakemen, for if he fails to train a brakeman in the way he should go, it means, in all probability, that he will become an inefficient conductor later on. As he is, so to speak, on parade when in charge of his train, he should be alert and active, for the impression he creates in the minds of his passengers reflects on the discipline and organization maintained by his company. Even the mind of an immigrant is impressionable, and it takes a long time to change his view, if, upon his arrival, he is harshly treated on the dock, bundled into inferior coaches, and transported to his new place of abode at a slow rate of speed, in the care of an indifferent train crew, and possibly finds when he reaches his destination that his baggage has not arrived, and when it does that it has been roughly handled; and if, in addition, when he complains to the company's representative—the station agent—he receives a curt reply, and sometimes no reply at all. There is but one result. When the time comes for him to return on a visit he seeks a new highway. The same applies to the Asiatic steerage passenger, and, although possibly in a lesser degree, to the first-class tourist.

It is of great importance that people located on branch lines should receive the same careful consideration at all times as those who journey over the main line. They should have engendered in them a feeling that should not be permitted to leave them, viz., that the branch line service is so good they need have no doubt about the main line. Otherwise, what do we find? A constant scanning of the papers for advertisements of what appear to be more attractive outlets, and when they pay we get the short haul, for they will even inconvenience themselves to reach the lines of a competitor. Therefore, because your branch line passenger travels but a limited distance the greater portion of the year he must not be lightly considered, for he has a large amount to spend at other times. If we fail to procure that revenue, the object for which the branch was built or acquired, viz., to feed its trunk line, is defeated.

All stations should be kept neat and clean, and you should endeavor at all times to do away with unsightly objects on or about the premises. Local agents should be selected with care and properly schooled. They are the representatives of the company who come in direct, daily contact with the people, and should, in addition to a knowledge of rules and regulations, have a full appreciation of their responsibilities as the company's sales agents. They should cultivate a desire to serve the people with the same degree of cheerfulness as they would if running a business for their own profit. A great many agents think, because it is necessary for people to come to them, that they are the custodians of the locality and what it contains, rather than representatives of a company dependent upon the people for its livelihood. You are in close touch with the agents at all times and should endeavor to instruct them so that they may have the proper viewpoint in relation to their employment.

All plans for taking care of passengers at important terminal and junction points should be carefully considered, and everything possible done to simplify the arrangements. Proper notices, giving explicit directions, should be displayed in conspicuous places to assist the traveller. Baggage and express staffs should be taught to respect the travelling public, and not be permitted to roughly push their trucks and express wagons through numbers of people, something which not infrequently happens at terminal and junction points. Car cleaners, inspectors, and those whose business it is to refill water tanks require constant supervision. A passenger objects to being bumped with a bucket of ice, or sprinkled by a carelessly adjusted hose on the roof of a car.

It requires long years of constant effort

Simplicity in a track device is a prime requirement. As parts are added troubles multiply. Two pieces are all that go to make up a complete Hayes Derail of the pipe-operated models. The guide box is readily made a fixed part of the track ; the derail block moves back and forth with little effort and with the usual switch stroke. When on the rail it is firmly locked in position by the seats in the front end of the guide box.

The derail block clears its path of snow when moving in either direction. This feature makes the Hayes Derail preëminent for economy in winter.

We make prompt shipments from our works at Hamilton, Ontario.

Address: Hayes Track Appliance Co., Geneva, N.Y.

and careful endeavor to satisfactorily transport the public. We must, in our treatment of them, adopt golden rule principles. By the exercise of constant supervision and vigilance you will assist materially in the work and bear your proper responsibilities in your relationship to the passenger branch of the business of a transcontinental railway, which you are especially designated to attend to. In concluding this part of the address, let me be understood, in making these remarks, that we are not unmindful or unappreciative of what you have already done. Our present standing in comparison with others speaks plainly.

RESPONSIBILITIES OF THE PASSENGER DEPARTMENT.

A discussion of the passenger business of a transcontinental railway would not be complete if it did not contain proper reference to those who look after the management of the department responsible for the securing and building up of the traffic, and deal with their responsibilities. It is not my intention to discuss in detail what must be done, but rather to give you a more complete idea of the other side of the question we have been dealing with, outlining the responsibilities that rest upon such men, the special qualifications they should possess, and the work expected of them. Therefore, so that you may fully appreciate the standard of requirement, let me particularize to the extent of describing the successful head and his work. Please do not misinterpret these remarks as a desire to impress upon you what we are, for that is not the intent or purpose, but rather, as indicating our own shortcomings. No one person realizes or more fully appreciates his own inefficiency than does a conscientious head of the passenger branch of the service.

The man who is to successfully supervise the passenger business of a large system must have in his constitutional make-up a good imagination—for he must anticipate developments and requirements; a clear, far-sighted vision—for he requires to scan continually, not only his own line at home, but, in addition, large areas abroad; patience—a most essential virtue for one whose work brings him constantly in contact with the travelling public; tact, and at the same time shrewdness—for many negotiations must be carried on with competitors where harmonious working is essential to satisfactory results; (antagonistic methods invariably develop conditions that ultimately mean sacrifice of legitimate revenue). At all times he must be ever ready and quick, not only to see but to grasp, and take advantage of an opportunity; resourceful—for he must know how to meet and overcome, what I may characterize as a flanking movement, quickly executed at a critical time, by an adversary.

He does not work on fixed rules, nor is he limited in his field of operations to prescribed districts. The scope is world-wide, and it is a necessity that he should be able to study and comprehend industrial conditions everywhere, as such conditions invariably have a direct effect upon the traffic of his road. The advancement of the settlement of the territory through which the line runs, and tributary thereto, is of paramount importance and he must advance such settlement at opportune times. In order to do so successfully, he must study individuals and their conditions elsewhere. It is always problematical whether a prospective settler will locate in one place or another. His final decision must be the result of influence brought to bear upon him.

The development of competing lines requires close attention, and must be carefully analyzed and criticized with respect to the service furnished, so that at all times the management may be advised of what is taking place, and thereby enabled to meet like business conditions by furnishing equal or better facilities. It is his duty at all times to observe carefully and watch closely over the passengers transported, being ever mindful of them, anticipating their requirements, smoothing out difficulties that may arise, and keeping them comfortable and happy.

Finally, he must be a good salesman, standing, in his relation to the company he represents, as the manager-in-chief of their sales department, establishing numerous agencies over a large area, in all kinds and conditions of fields of operation, gathering revenue in exchange for the commodity offered, viz., transportation, advertising his commodity effectively at the most reasonable cost, obtaining returns for every dollar of expenditure.

The passenger man to-day is not the free agent he was a few years ago. He is now subject to all kinds and conditions of governmental control and regulation. It requires watchfulness to see that, in the construction of his fares to be charged, in all districts, under all conditions, he complies with the laws of the country as a whole, or of a particular province or state. The tariffs must be carefully constructed, for they require to be filed with expert commissions, who dissect them in detail. There is no sliding scale and he cannot shave a price, or give something for nothing as a consideration for a wholesale movement. The hundreds of representatives must be taught to understand and respect the law, and not, in their anxiety to secure traffic, overstep the bounds of regulation, and, as an inevitable consequence, inflict severe penalties on his company.

There is a great responsibility in the development of the traffic of the line. At the commencement of operation there is to be found ready for movement a considerable volume of business known as local passenger traffic, or, to more clearly define, traffic originating on the line or in the immediate vicinity. It is of great importance that such local traffic be supplemented by business to be gathered from outlying districts, and brought to the company's rails at its own junction points with connecting systems, operating not only in our own country but in foreign countries lying adjacent thereto; also from foreign countries across the seas to be delivered at our ocean terminals.

If a transcontinental railway depended entirely upon its local traffic for revenue, the business would be unremunerative. Therefore, it is imperative that such business as above-mentioned be directed over the line. It is necessary to reach to China for the homeward-bound Englishman, diverting him from his old accustomed route by way of the Red Sea; also for the Oriental, moving outward and homeward in large numbers; the traveller from Australia or New Zealand, carrying them to the Pacific Coast termini; and, on the other hand, the European must be considered, not only the high-class tourist who travels for pleasure, but the peasant class, especially the latter, who are, so to speak, transplanted, and in due course of time become citizens and steady contributors to the revenue of the line.

From the North, and particularly from the South, people must be gathered, including business men, tourists, land-seekers and settlers. In order to successfully accomplish this work at all such places must be located what I may call, for better illustration, sales agents, who present our commodity in its best light and effect sales of transportation. They work continuously, at all times their efforts supplemented by effective advertising, judiciously placed, and so it is that the trunk line trains become filled with revenue-bearing business. A passenger, journeying in one of the through trains for the first time, little appreciates the efforts that have been put forth to induce him to make the trip. It is the result of the continous working of one great machine. And so it comes about if this machine runs smoothly and does its work properly, one extensive branch of the railway business fulfils what is expected of it. With a full knowledge of our joint responsibilities, with the hearty co-operation of all, a necessity in the carrying out of any undertaking, we may, with confidence, take up our burden, and with cheerfulness proceed to make a reputation worthy of men entrusted with so great a responsibility.

Accidents at Level Crossings.

In connection with the investigation now in progress under the Board of Railway Commissioners with regard to the most feasible means to adopt for the protection of level railway crossings in Canada, an Ottawa dispatch says statistics have been prepared showing the number and character of fatal accidents at crossings during the past five years. Since the Board was created in 1903 records have keen kept as to all railway fatalities in the Dominion, and in nearly every case there is on file a report from one of the Board's officials giving particulars as to the accidents. During that period there have been altogether 270 fatalities at level crossings. But the striking fact in connection with an analysis of the various fatalities is that nearly 95% of them have been due to the carelessness or recklessness of the victims themselves, rather than to the fact that the crossings were unprotected. In Prince Edward Island there has not been a single level crossing fatality in five years, and on the Intercolonial Ry. there have been only 13 in that period.

G. F. Webb, Hamilton, Ont., has issued a writ against the St. Mary's and Western Ontario Ry. for damages for having wrongfully deprived J. E. Webb of certain railway contractors' plant. J. E. Webb was a contractor upon the St. M. & W.O.R. construction between Embro and St. Mary's, Ont., and made an assignment to G. F. Webb. The railway company took over the contract and completed the work.

Allan Cameron, General Traffic Agent, C.P.R., who has recently been transferred from London, Eng., to New York, wrote, Feb. 10: "While in England I was receiving THE RAILWAY AND MARINE WORLD, and would be very pleased to have your mailing department send it to New York to me. I do not wish to miss the valuable transportation information concerning Canadian companies which your paper contains."

On the recommendation of the American Association of General Passenger and Ticket Agents, a uniform prepared order for handling interline prepaid ticket business will be adopted in Eastern Canadian Passenger Association's territory on May 1, the prepaid order to be issued at the time deposit is accepted, a uniform fee of 50c. to be paid for the order, whether for local or interline tickets, same not to be subject to refund.

During Dec., 1908, 22 employes were killed and 21 injured in the course of their work on Canadian railways. Of the fatalities, 6 were due to being run over, 4 to collisions, 3 each to being caught between cars, and to being struck by locomotives, 2 to a cave-in, and one each to a fall; to blood poisoning from a steel splinter, to being frozen, and to a dynamite explosion; while of the other accidents, 5 were due to derailments, 4 to being struck by locomotives, 3 each to machinery and to collisions, 2 to an explosion of steam, and one each to tools, to flying material, to being caught between cars, and to a fall.

RENEWABLE SEAT GLOBE VALVES, OPEN AND MUFFLED SAFETY VALVES

STOCK CARRIED IN WINNIPEG **518-520 SOMERSET BLOCK**

The Wheel Base of Ry. Rolling Stock.

By Roger Atkinson, formerly Mechanical Superintendent C.P.R.

The annual cost for maintenance of track, both as to roadbed as well as ties and rails, depends largely upon the arrangement of engine wheel base and trucks, as well as upon trucks under cars. This is not so obvious to the majority of mechanical department officials, as they do not usually have the opportunity to observe and study the signs of gradual destruction and consequent expense so involved, for, as a rule, they only see the

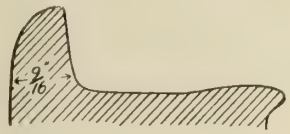

FIG. 1.

results of an extreme case, such as when a derailment occurs, and then they rarely have a chance to examine the track as well as the rolling stock, on account of the road gang having to get the former into working condition again in the shortest possible time, and the blame for derailment is usually put upon the rolling stock without any competent "devil's advocate" for the accused being present, so as to get at the remote and probable true cause. Under these conditions the charge is commonly formulated by an official, who, while perfectly able in his own department, cannot be expected to know the mechanics of the machine, or the effect of certain forms of construction in detail.

We are all perfectly familiar with the difficulty of pulling out, or pushing in, a drawer in a piece of furniture when the drawer is very wide and short, the least angularity in the

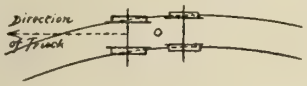

FIG. 2.

moving force, or friction, causing it to bind and lock in a diagonal position. This tendency is absent with a narrow, deep drawer, on account of the length of the guiding slide, but in one that is square, or nearly so, the locking tendency depends upon the lateral play in the guides, to a great extent in a direct ratio, and also to the point of application of the pull, and the direction of pull. When a drawer is once locked diagonally, enough force to wreck the drawer, or burst out the guides laterally, may be applied without getting it to slide.

From the illustration we may derive a comprehension of the effect of a truck under a freight car or tender, having a wheel base of 4 ft. 10 in., on a track of standard 4 ft. 8½ in. gauge, when the truck is out of square, causing one of the leading pair of wheels to bind on the flange against the rail, and by its own friction increases the locking effect, pushes the truck still further out of square, and tends to spread the track, while the leading edge of the flange on the binding wheel tries to mount

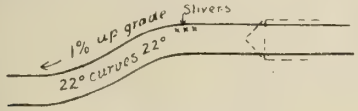

FIG. 3.

the rail, and failing to do so, acts like a pair of scissors or shear blades, destroying both its own flange and the rail head. This flange pressure increases greatly with increase of gauge, as is usual on curves, and when a sharp flange is formed it will actually shear strips off the rail. The flange of a steel-tired wheel will cut away and form a sharp flange quicker than a cast iron wheel under these conditions, and the writer has had cases where the flange was only 9/16 in. thick at the root, as in fig. 1. It will be obvious that this action is increased on such curves as are opposite in curvature to the direction which the wheels tend to take (fig. 2), as well as by the widening of the gauge, which is therefore undesirable, but is rendered necessary to some extent as a compromise for the impossibility of making an engine with a straight centre line conform theoretically to a curved track, and the less it is adopted or required, the more easily can the cars be hauled, thus saving power, and with less damage both to themselves and the track. The reluctance or resistance of the trucks to curving is also greatly increased when the load is carried on the side bearings, and the locking effect may be thus produced with trucks which are perfectly square. To illustrate this point, an instance may be quoted where trouble was experienced on a wharf track, having a 22 deg. reverse curve on a 1% grade. Two locomotives, eight-wheel type, one having 16 x 24 in. cylinders, with 8 ft. fixed wheel base, and rigid centre truck, and the other 17 x 24 in. cylinders, with 8½ ft. fixed wheel base and swing truck, could only haul 30 empty freight cars of 40,000 to 60,000 lbs. capacity, at about 2

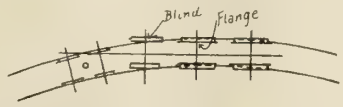

FIG. 4.

miles an hour. On inspection, after the train passed, slivers of rail up to about 5 in. long, wedge shaped in section, and hot, were found inside the outer rail on the curve (see fig. 3), and the gauge of track was found to be 4 x 9¾ in., having to be so made to allow the locomotive with the rigid truck to work without derailment. An 18 x 24 in. six-wheel switcher, with 10 ft. 0 in. fixed wheel base, and blind tires on centre pair, was put on the service, and easily hauled such trains with the curve closed to nearly standard gauge. As the driving wheels of the engines taken off did not show any indications of striking the outer rail, and their flanges were not cut sharp, the cutting could only be done by the freight cars, as it did not occur after the gauge was closed.

As widening on curves, then, is a modification required on account of the engine wheel base, it is advisable to look into and analyze as far as possible the design and results of various arrangements. Something like 20

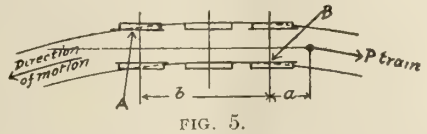

FIG. 5.

years ago some 10-wheel passenger engines were built which had swing trucks and blind tires on the front pair of drivers. These engines, when they struck a curve, had too little guidance from the truck till they got well on the curve, and consequently headed for the ditch until they reached the limit of play of the truck (see fig. 4), with the main driver flange binding on the outer rail, and remained in this posture through the curve when they righted with a wriggle. The opposite curve produced the complementary effect, and the result was two treads on the blind front tires about 2½ in. centre to centre, and cut flanges on the main drivers, and eventually broken main axles, due to heavy flange pressure. In the meantime, however, some of these engines were equipped with a rigid centre truck, and the result was that they went round curves with a saw-tooth motion, like a fish in an aquarium tank, bobbing its nose against the glass as it goes. The wheel base was too rigid and the main drivers cut their flanges against the inside rail, while the truck wheels rapidly acquired side play, sometimes as much as 2½ in., and the repairs to truck boxes on account of side wear, up to ¾ in. and even ⅞ in. deep, could not be kept up within the shops. During this period a couple of engines were equipped with blind tires on centre drivers instead of on the front, and swing trucks with lateral spring control, and were operated on a very crooked division with perfect satisfaction, so that it became standard practice, and not too soon, as the crop of cracked main axles which were removed soon after indicated.

If we pause for a little time to consider the action and direction of the forces called into play, it is plain that if a six-wheel switcher

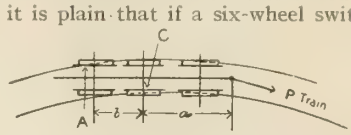

FIG. 6.

with main wheels having blind tires is placed upon a curved track, the centre line of the engine will form a chord to the curve, extending from the centre of the front axle to the centre of the back axle, at right angles to a radius of the curve which bisects the fixed wheel base, and there will be no lateral strain upon the flanges and rails (other than any wedging action, which may be caused by tight flanges), and also no bending of the engine frame.

If this engine pulls a train on the curve, then the angular pull of train, P (see fig. 5), will cause the back wheels to bind on the inner rail at B, and the front wheels to bind on the outer rail at A; the resistance of the point B will form a fulcrum, and the force at A will depend on the ratio of the leverages *a* and *b*, that is, if *a* is small and *b* great, the turning effect on the engine will be small, and also the flange pressure at A, and vice versa, so that a long overhang from B to the drawbar pin

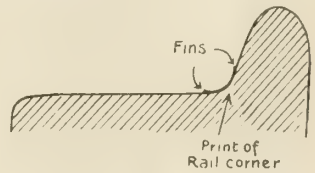

FIG. 7.

will tend to cut the front flange, also to bend the frame and spread the track. Now suppose the engine to have a front truck, either two or four-wheel, as a mogul or 10-wheeler, then, in order to get the truck on the track, it must be jacked over to the correct position with a force depending upon the method of truck suspension and degree of curvature, and when in place it exerts the same force to tend to swivel the engine round until the lateral force is divided between the truck and the back wheel against the outer rail and resisted by the front driver against the inner rail. This is how the guiding force of the truck is provided, and it tends to pull the outer front wheel away from the outer rail, against which it would naturally run, on account of the centre line of the engine being a chord on the curve; it also tends to bend the engine frame to suit the curve. There is another force also tending to cause the outer leading wheel to hug the outer rail, and that is the angular pull of the train on the curve pulling the back end of the engine against the inner rail. If, therefore, the outer front driver flange is to be prevented from cutting, the lateral force of the truck inward must be sufficient to overbalance both of these outward tendencies, and should increase with the degree of curvature. If the guiding power of the truck is too small, the inertia of the engine tending to make it travel in a straight line, also causes it to be projected against the outer rail on entering a curve and tends to overturn the rail, or disturb the track sideways.

Let us now go back to the six-wheel switcher and consider the forces when the centre tires have flanges, as well as the front and back

MORISON Suspension Furnaces

The universally satisfactory record of "THE MORISON" proclaims it the best furnace made.

A. B. Jardine & Co. - - Hespeler, Ont.

tires. It is evident that the middle flange on the inside, when on a curve, binds on the inner rail, tending to bend the frame to the curve, and to open the gauge; when the engine hauls a train the angular pull of the train acts on the inner main flange as a fulcrum, see fig. 6, at C, with the distance *a* as a lever, and forces the front outer flange at A against the rail on the short lever *b*. There is, therefore, a great force tending to spread the track, and this turning movement is limited when the back inside driver comes against the inner rail at B. Otherwise it would derail the engine if the curve was great. This action is not relieved to any extent by setting the front and back tires in, because the inset back tire lets the engine turn just as much as the front tire is set in; but the engine is then at a greater angle to the direction of motion, and the outer flanges are at a worse cutting

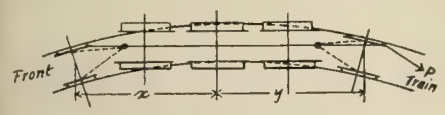

FIG 8.

angle. The same reasoning holds good for a mogul, or 10-wheel, engine wheel base, as the turning fulcrum point is shifted by the main flange from the back wheels to the main wheels, so that the truck loses in guiding power by acting on a shorter distance, while the angular train pull has a longer lever to act upon and force the front of the engine outwards.

In addition to the wear and tear produced in the above manner, the inset of front and back tires permits the engine, when on straight track, to run with a nosing or twisting motion, especially if the counterbalance is not very perfect. This soon develops side wear on the truck boxes, and looseness in the truck, thereby losing guiding power, which reacts on both track and engine. The insetting of front and back tires also induces more wear on frogs and guard rails by contact with the inner wheel flange; the steady or constantly active destructive action thus produced is not visible, but exists, and is important. It is easy to persuade ourselves that these flange strains are not important because they are far below any immediate breaking strain, but it is the perpetual repetition which causes failure and the consequent expense. I have seen a case where a mogul

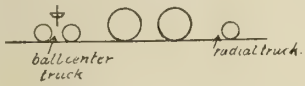

FIG. 9.

engine with all flanged tires newly turned to gauge, and to the M. M. Association form of tread, that in less than 400 miles' running caused the corner of the rail to wear the root of the flange so heavily that the flow of metal formed fins, as shown in sketch (fig. 7), and of course there was equivalent wear of rail over the 400 miles.

It should also be borne in mind that the whole lateral force of the truck which is useful to bring the engine into line with the track when running forward is detrimental to it when running backward, causing the outer back flange to bind on the outer rail, and this is increased when the engine is equipped with flange tires on the main drivers, and still more so by the resistance of the train if it is backing up by the angularity of the pushing force tending to make the back end buck out sideways.

It will therefore now be evident that if we find it is necessary to equip an engine with a rear truck, either to protect the back wheels for backward running, or to carry the back overhang of the engine, that the lateral force required to put this truck on the track on a curve will neutralize the guiding force of the front truck when running forward, because it assists the angular force or pull of the train to keep the engine in line with itself, causing the engine to swing round its centre as a pivot, and bring the outer front driving flange hard against the outer rail. This action is more powerful when main drivers are flanged than when blind, as shown previously by the difference in leverage; and that truck which has the greater distance from the main drivers, *x* or *y*, (fig. 8), will (if the weight on each be the same) bring the engine nearer its own centre line; so that a heavily loaded distant back truck will (both by leverage and weight) exercise control over a lightly loaded, closely set front truck, and vice versa. The swing hangers or other lateral provision for side resistance may be carefully designed to avoid pulling the back end of the engine into line with the train, which in turn renders it useless as a leading truck.

I know of a case in which an eight-wheel engine, with front truck having a ball centre, was converted into a double-ender tank engine (fig. 9), with a radial truck at the back to carry the coal bunker and part of the water tank. When operated, this engine constantly gave trouble when running backwards by the back truck jumping the track, until its guiding power was practically dispensed with by giving it very free lateral motion. Engines which have a long overhang at the back end, from the fixed wheel base to the pin in front end of the tender drawbar (see fig. 10), are therefore most easily deflected from the desired direction by the pull of the tender, and in turn exercise a strong lateral force, F, tending to throw the tender off the track towards the outside of the

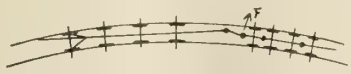

FIG. 10.

track on a curve, especially at a frog, which may explain some of the derailments which have been under discussion of late. To illustrate this, on one occasion a coach about 70 ft. long in the body was being turned by an ordinary 10-wheel engine on a Y, which had a rather short curve, connecting two main lines. The engine and coach were backing, and when the back truck of the tender reached the frog at the entrance to the curve, it promptly derailed on the outside of the curve. It was pulled on again, and pushed slowly, but mounted the frog again. The coach was then disconnected, and the tender pushed against it without coupling, as the couplings were quite a distance apart, and no derailment occurred.

As the average tires and rails may be taken to be of about equal hardness, and as a revolving or moving body working upon a standing body is usually less detruded or affected than the standing body, for example, in the blind saw used for cutting rails, etc., which has usually less material removed than the work operated upon, we may take for granted that more material is removed from the rails than from the wheels, and also that the rails, frogs, etc., suffer more damage by displacement than the engine shows, so consequently the cost of maintenance is increased if such wheel base and other arrangements are not adopted as conform with the least strain to the nearest theoretical conditions to reduce curve resistance.

So far as the locomotive is concerned, one of the clearest indications of excessive flange pressure on curves is found in the breaking of main axles, either under the wheel seat or between the wheel and the centre of the journal. This type of failure does not often occur with a back driving axle, and even more rarely with a front axle, and is usually construed as being caused by the cylinder pressure acting on the long main crank pin as a lever. There are two important reasons why this is not entirely the case, first, that sometimes the front or back axles fail, which cannot be caused by cylinder pressure, and, second, if the cylinder pressure were the only cause, the cracks in the axle would be developed on both sides at right angles to the crank pin (see fig. 11), which has never been the case in my experience in many years. The cracks are always found to be at an angle such as indicated in Fig. 12. This seems to show that the maximum bending stress is a combination of the cylinder pressure and a regular recurring flange pressure, due to the lateral twist of the engine, probably due to defective counterbalancing, and which would be naturally increased by such an arrangement as insetting the front and back tires, as it permits a pressure to become a blow by providing distance in which to operate. The breaking of a main axle in the location and manner shown where the driving wheels have blind tires is practically unknown; whereas

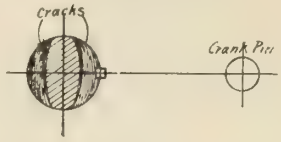

FIG. 11.

both driving wheels, having flanges, have been known to break off one axle in the same accident.

I had, on one occasion, an opportunity to examine a very heavy passenger engine which was under repair, the principal trouble being that sharp flanges had developed on all driving wheels to such an extent that the tires had to be turned down about ¼ in. in order to get a good flange again. All drivers had flanges, and the front and back tires had been set in, as is common practice on some roads. The engine was new and had only been in service for a period of about four months, but not continuously. It would appear that there must have been great wear upon the track, and expense, with risk of derailment, and it is reasonable to think that such a result shows defective engineering.

In mediæval times, when knights wore plate armor, the best point of attack and most liable to produce effective results, was to strike at the joints; and the point where departments overlap, or should do so, is the joint where the general manager can penetrate and get in his lance called "Please explain," and while he may have too many irons

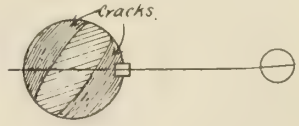

FIG. 12.

in the fire to spare more than one or two of his "argus eyes" for the purpose, he could well be represented by a qualified champion who was both knight and armorer, and expert at both making and breaking joints.—Railway and Locomotive Engineering.

Following are the officers and directors of the Canadian Transfer Co. for the current year: President, W. C. McIntyre; directors, H. Paton, C. Cassils, G. R. Starke and Sir H. Montagu Allan; Manager and Secretary, F. M. McRobie.

The Dominion Ex. Co. recently moved its Winnipeg offices to a new building on Bannatyne Ave., where all the up-town business of the company will be conducted on and after Mar. 1. The new premises give much greater facilities for the handling of business.

The Minister of Railways has issued an order, Feb. 24, that the mechanical staff of the I.C.R. was to be employed at full time of 10 hrs. a day from Mar. 1. The order affects about 2,000 employes. The staff has been working only 8 hrs. a day for some time, with a proportionate reduction in pay.

Railways Outside Dominion Jurisdiction.

In our issue of Oct., 1908, we published a list of railway companies under this heading, the same being copied from a return presented to the Senate, in response to a resolution adopted by that body. We were subsequently informed by the Secretary of the Board of Railway Commissioners that the list as submitted to the Senate was incorrect, and he has since supplied us with the following list of railway companies which are not within the jurisdiction of the Board:

Beersville Coal and Ry. Co.
Bracebridge and Trading Lake Ry.
Brandon Transfer Ry.
Brantford and Erie Ry.
Bruce Mines and Algoma Ry.
Boston and Maine Rd.
Burk's Falls and French River Ry.
Campbellford, Lake Ontario and Western Ry.
Canada Coal and Ry. Co.
Cape Breton Ry.
Caraquet Ry.
Carillon and Grenville Ry.
Central Marmora Ry. and Mining Co.
Central Ry. of Canada.
Crow's Nest Southern Ry.
Gulf Shore Ry.
Halifax and Southwestern Ry
Halifax and Yarmouth Ry
Hamilton, Grimsby and Beamsville Electric Ry.
Harvey Branch Ry.
Hereford Ry.
Hillcrest Ry. and Coal Co.
Huron and Ontario Ry.
Irondale, Bancroft and Ottawa Ry.
Indian River Ry.
Intercolonial Ry.
International Coal and Mining Co.
International Ry. of N.B.
Inverness Ry. and Coal Co.
Kaslo and Slocan Ry.
Kent Northern Ry.
Kootenay Ry. and Navigation Co.
Kootenay Valley Ry.
Lenora, Mount Sicker Ry.
Liverpool and Milton Ry.
Lotbiniere and Megantic Ry.
Maganetawan Ry.
Massawippi Valley Ry.
Midland Ry. (Manitoba).
Morrissey, Fernie and Michel Ry.
New Westminster Southern Ry.
Nosbonsing and Nipissing Ry.
Nova Scotia Steel and Coal Co.
Pacific Northern and Omineca Ry.
Phillipsburg Ry. and Quarry Co.
Prince Edward Island Ry.
Quebec Central Ry.
Quebec and Lake St. John Ry.
Sydney and Louisburg Ry.
Temiskaming and Northern Ontario Ry.
Vancouver Copper Co.'s Ry.
Victoria and Sidney Ry.
Victoria Terminal Ry. and Ferry Co.
Wellington Colliery Ry.
York and Carleton Ry.

Telephone Dispatching on the C.P.R.

B. S. Jenkins, General Superintendent C.P.R. Telegraphs, speaking recently on the installation of telephones to replace the telegraph for dispatching on the C.P.R. system, is reported to have said: "During the last few years great improvements have been made in telephone apparatus, with the result that uses can be made of it which were not possible in earlier years. During the last three years the C.P.R., with other roads, has been making experiments in the use of the telephone for train dispatching. Early last season telephone equipment was supplied to the line from Montreal to Farnham, a very busy section, and the success of the test was so marked that the equipment was continued to Newport. Early in the year, Mr. Whyte, Second Vice-President, who keeps in the closest touch with all new developments, asked me for estimates for certain sections of western lines. As a result, appropriations were secured for the immediate installation of telephone equipment on two important sections, namely, from Winnipeg to Brandon, 133 miles, and from Swift Current to Medicine Hat, 150 miles. Heavy copper metallic circuits will be provided, two heavy copper wires being strung on each section. These circuits will be entirely self-contained, the signalling and talking all being done on the same pair of wires."

It was recently reported that the C.P.R. proposed to extend the present area of telephone dispatching on the Eastern Division, by installing it between Montreal and Ottawa, but we are officially advised that there is no such intention and that such a proposition has not received any consideration as yet.

Canadian Pacific Railway Forestry.

The C.P.R. Forestry Department was started in 1906, with the object of experimenting upon small sections through the prairie to ascertain if timber suitable for ties could be grown thereon. Tamarac and jack pine have been planted, but a considerable time must necessarily elapse before any definite conclusions can be drawn as to the possible results. In the spring, European larch and other varieties will be planted. In connection with this work a nursery has been established at Wolseley, Sask., for the supply of seedlings, and another one will be ready at Springfield, Man., early next spring. In addition to this work, small parks have been planted on land adjoining several small towns in the western provinces, the majority of which are co-operating with the company in making a success of the work, which is in the charge of a man formerly employed by the City of Berlin in a similar capacity. Another feature of the department is the planting of trees along the line, to replace snow fencing, and to act as wind-breaks around section houses, etc. A large number has already been planted around section houses, and, with two exceptions, the growth has been extremely satisfactory. Among the varieties to be used are Scotch pine, spruce, laurel, golden and red willows, etc., much depending on the character of the soil, location, climate and rainfall. The trees already planted are as yet not sufficiently grown to make a show from the roadway, but in a few years' time their appearance will considerably enhance the view from all points.

J. R. Binns, the wireless telegraph operator on the s.s. Republic, when she was run down by the s.s. Florida off the Nantucket Shoal recently, was presented with a suitably engraved gold watch, by G. Marconi, on behalf of the Marconi Wireless Telegraph Co, London, Eng., Feb. 9, "in recognition of the efficient discharge of his duties on that occasion."

The appeal of the C.P.R. against the assessment by the British Columbia Government of lands in the Nelson, Slocan, Golden and Fort Steele districts, forming part of the British Columbia Southern Ry. land grant, which the C.P.R. earned by the construction of the Crow's Nest Pass and other lines, came before the Court of Revision at Nelson, B.C., recently. The amount involved is estimated at between $125,000 and $150,000.

ELECTRIC RAILWAYS

Dominion Power and Transmission Company.

The annual meeting of this company, which controls and operates, among other utilities, the Hamilton Street Ry., the Hamilton and Dundas Ry., the Hamilton, Grimsby and Beamsville Ry., and the Brantford and Hamilton Ry., was held in Hamilton Feb. 16. The financial report does not give the earnings and expenses of the various constituent companies. The net earnings for the year 1908 were $249,193.35; bond interest, $125,000; carried to profit and loss, $124,193.35; the balance at the credit of which, on Jan. 1, 1908, was $9,371.41. There was paid in dividend on preference stock $87,451.27, and on limited preference $23,494.50, leaving $22,619.05 at balance of profit and loss Dec. 31, 1908. The combined earnings of properties owned or administered by the company were $1,600,312.25; operating expenses, $974,641.44; bond interest, $323,047.32; balance to profit and loss, $302.623.49.

The directors' action in passing the dividend in order to provide for improvements on the Hamilton St. Ry. was approved. It was announced that, provided satisfactory arrangements could be made with the city council, new tracks would be laid on Herkimer, James and Barton Streets this year, and later on, the York, King St. West and Locke Street lines would be reconstructed. The company wants permission to widen the devil strip from 4 ft. to 5 ft. all over the city

The retiring directors were re-elected. The officers and directors for the current year are: President, J. R. Moodie; Vice-President, Jas. Dixon; Treasurer, J. Knox; Secretary, W. C. Hawkins; other directors: J. W. Sutherland, S. O. Greening, L. Harris, W. Southam, A. Cooke.

It is said that an expert traction manager is to be appointed.

London Street Ry. Co's. Report.

Following are extracts from the report for the year 1908:

EARNINGS.

	1907	1908
Passengers	$226,509.77	$230,866.09
Miscellaneous	5,866.82	4,166.31
Gross Earnings	$232,376.59	$235,032.40

EXPENSES.

MAINTENANCE		
Way and structures	$ 17,294.91	$ 13,573.55
Equipment	$ 24,279.36	28,128.03
TRANSPORTATION:		
Power plant	32,882.44	30,125.32
Car service	65,864.88	68,845.27
GENERAL	27,703.29	26,894.55
Total operating expense	$168,024.88	$167,566.72
NET EARNINGS	$ 64,351.71	$ 67,465.68

DEDUCTIONS.

Interest on bonds	$ 25,000.00	$ 25,005.82
Interest on overdraft	2,228.64	3,448.92
Total deductions	$ 27,228.64	$ 28,454.74
NET INCOME	$ 37,123.07	$ 39,010.94

"The policy of your directors to keep the properties in the very best condition has been maintained during the year, and in addition the following improvements have been made:

"Track and roadway, Ottaway Avenue derail, $211.12; electric line, lightning arresters, $345.96; power plant equipment, Gould storage battery balance, additional circuit breakers, oiling system, consulting engineer, $7,966.97; cars, fenders, trucks, $1,260.32; electric equipment of cars, five complete, $5,988.01; interest and discount, discount on bonds, $1,000.00; miscellaneous, printing mortgage, issue and delivery of bonds, $66.27; paving, Dundas St., Wellington to Adelaide, 3,900 ft., $13,971.99; total, $30,810.64.

"The tracks have been generally repaired during the year and are in good shape. When the city required Dundas St. repaved between Wellington and Adelaide Sts., it was found desirable to rebuild the double-track in this section and a most substantial construction was adopted, new 70-lb. high T rail in 60-ft. lengths being laid on A no. 1 cedar ties embedded thoroughly in a concrete foundation to a depth of 6 ins., making a very durable job and demonstrating the superiority of T over groove girder rail. While the cost is an abnormal charge on the maintenance at present, we feel confident however that results will show the wisdom of this policy. The rolling stock has been well maintained during the year, the older cars being entirely overhauled and in some cases practically rebuilt with such alterations

The Canadian Pacific Railway Company.

Dividends for the half-year ended 31st December, 1908, have been declared as follows:

On the Preference Stock, Two per cent.

On the Common Stock, Three per cent.

A further sum equal to one-half of one per cent. on the Common Stock will be paid thereon at the same time out of interest on the proceeds of land sales.

Warrants for the Common Stock Dividend will be mailed on 31st March next, to Shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock Dividend will be paid on Thursday, April 1st next, to Shareholders of record at the closing of the books at the Company's London Office, No. 62 Charing Cross, London, S.W.

The Common Stock Transfer Books will close in Montreal, New York, and London at 3 p.m. on Monday, March 1st. The Preference Stock Books will also close at 3 p.m. on Monday, March 1st.

All books will be re-opened on Friday, April 2nd next.

By order of the Board,

W. R. BAKER,
Secretary.

Montreal, 8th February, 1909.

NOTICE.—The Canadian Pacific Railway will apply to the Parliament of Canada, at its present session, for an Act,—

I.—Extending the time within which it may construct: (a) the railway which it was authorized by chapter 52 of the Statutes of 1902 to construct from a point at or near Piles Junction, thence to Shawinigan Falls, and thence to Grand Mere.

(b) The railways which it was authorized to construct by section 3 (a), (b), (c), (d), (f), (g) and (i) of chapter 74 of the Statutes of 1907, as follows:

(1) From a point in townships 32 to 34, range 21 to 23. west 2nd, northerly to Prince Albert.

(2) From a point on its Pheasant Hills Branch, in township 39 or 40, range 19 or 20, west 3rd, towards Battle River, thence westerly through township 43, 44 or 45 to a point in range 5 or 6, west 4th, thence southerly and westerly to township 36, 37 or 38, range 11, 12 or 13, west 4th.

(3) From a point in township 27, 28, 29, 30 or 31, range 4, 5, 6 or 7, west 3rd, in a westerly and northerly direction to a junction with the terminus of the Lacombe Branch of the Calgary and Edmonton Railway.

(4) From a point in township 39, 40, or 41 range 3, 4 or 5, west 4th, to a point in township 30, 31 or 32, range 17, 18 or 19, west 3rd.

(5) From Weyburn westerly through township 6, 7, 8 or 9 to a point in range 30, west 2nd.

(6) From a point at or near Estevan to a point in township 4, range 22 west 2nd.

(7) From a point in township 6, 7, 8 or 9, range 30, west 2nd, westerly to connect with the Crow's Nest Pass Branch between range 16, west 4th, and Lethbridge.

II.—Authorizing it to construct a line from a point on the revision of the Crow's Nest Pass Branch in township 9, range 22, west 4th, in a northerly and northwesterly direction to a point of junction with the Macleod Branch of the Calgary and Edmonton Railway at or near Aldersyde, in the Province of Alberta, a distance of about 85 miles.

And for other purposes.

WALTER R. BAKER,
Secretary.

Dated at Montreal, 20th January, 1909.

WRITE FOR CATALOGUES AND ESTIMATES

as have been found advantageous, so that all our cars are now in a first-class condition. The complete installation of the 320 ampere storage battery has equalized the extreme demands for power and has made a noticeable decrease in the coal consumption as well as effectively increasing the capacity of the plant. Negotiations with the city relative to the extension of the company's line in the north end of the city are still under consideration. Your directors met the committee of the city council relative to the proposed purchase of the railway by the city in accordance with their request on February 6, 1908, but since then there has been no further development. All agreements with the city have been fulfilled, the two-way service demanded on the Ottaway line having proved satisfactory has been maintained with a fair return. Your directors have great pleasure and satisfaction in being able to state that the sentiment in the community generally is favorable to the company, and it is the constant aim of the management to so improve the service as to merit the goodwill of the patrons. A committee of citizens desirous of obtaining Sunday cars secured the consent of the council to authorize a vote on the matter at the municipal election in January, which resulted with a substantial majority in favor of same. Your directors disposed of $50,000 of bonds during the latter part of the year at a very fair price, considering the financial depression, and prices of like securities. In view of the general decline in business throughout the country we draw your attention with pleasure to the increase in the gross earnings and surplus for the past year. We confidently expect that the coming year will prove quite as satisfactory. There were 63 shareholders of record Dec. 31, 1908.

Statistical information: Gross earnings, $235,032.40; operating expenses, $167,566.72; expenses per cent. of earnings, 71.3; net earnings, $67,465.68: net income per cent. of capital, 7.10; passengers carried, 6,442,998; car earnings per revenue passenger, 3.64c.; transfers, 1,062,306; total passengers, 7,505,304; car earnings per passenger, 3.07c.; car mileage, 1,427,353; gross earnings per car mile, 16.47c.; operating expenses per car mile, 11.74c.; net earnings per car mile, 4.73c.; miles of track, 33.25; gross earnings per mile of track, $7,068.64.

At the annual meeting Feb. 3, an increase of $50,000 in the capital stock was authorized for extensions, etc., contemplated for the current year. The officers and directors were re-elected for the current year as follows: President, H. A. Everett, Cleveland, O.; Vice-President, T. H. Smallman, London; other directors, P. W. B. Broderick, W. M. Spencer, London; H. S. Holt, Montreal; E. W. Moore, C. W. Wason, Cleveland, O.; Manager, C. B. King; Sec.-Treas., G. H. Bentson.

Winnipeg Electric Railway Report.

W. Whyte, Vice-President, occupied the chair at the annual meeting in Winnipeg Feb. 10. Following are extracts from the report for the year 1908 signed by W. Mackenzie, President:

"The gross profits were $1,117,222.38, as compared with $946,675.67 in 1907. After providing for percentages on earnings accrued to the city and interest on bonds, your directors declared four quarterly dividends, amounting to $595,789.46, leaving a surplus of $149,613.78, which has been transferred to the credit of profit and loss account, making a total credit to this account to Dec. 31, 1908, of $598,024.41. The percentages of earnings show an increase of 28.08% compared with 1907, while the operating expenses show an increase of 40.36%, as compared for the same period. The net earnings show an increase of 18.01% over those of 1907.

"The roadbed, rolling stock, buildings and other properties have been efficiently maintained. The hydraulic works at Pinnawa Channel, Winnipeg River, have also been very satisfactorily and efficiently maintained, and your directors believe will compare favorably with any power plant of equal capacity. The car service, both as to efficiency of operation and equipment, compares favorably with that of any street car company in America. The following improvements and additions to the company's equipment and system have been made: 17 large double-truck closed cars, equipped with air brakes, heaters in the motorman's vestibule, and other modern appliances, were constructed in the company's Winnipeg shops and put into service. 12.963 miles of track were constructed; 3.381 miles of this being surface track with ballast, 1.935 miles track in wood block pavement, .887 miles track in macadam pavement, and 6.758 miles track with concrete foundation. 1,344 new poles were erected in the extension of power and electric lighting lines, with 302,049½ lbs. of wire. 26,806 ft. of gas main were laid in extending and renewing the system of gas mains. 31,840 ft. gas pipe were laid, installing 558 new gas services and renewing old ones.

The passengers carried in 1908 were 22,019,507, against 20,846,317 in 1907. The number of transfers issued was 7,777,315, against 5,954,067. The railway earnings per capita were 9.80, against 9.84.

The directors and officers for the current year, who were re-elected, are: President, W. Mackenzie; Vice-President, W. Whyte; Secretary-Treasurer, F. Morton Morse; other directors: D. D. Mann, Sir Wm. C. Van Horne, A. M. Nanton, Hugh Sutherland, D. B. Hanna, R. J. Mackenzie; Manager, Wilford Phillips.

Toronto Ry. Co.'s Report.

Following are extracts from the report for the year 1908:

"While it was naturally to be expected that the gross income should be somewhat adversely affected by the recession in general business conditions prevailing throughout the year, which resulted in the closing down in whole or in part of many manufacturing establishments, and the general curtailment of trade, it is very gratifying to be able to present so favorable a report, showing as it does an increase in the net earnings of $103,264.91. A summary of the reports and statements attached shows the following results for the year:

Gross passenger earnings	$3,566,493.72
Maintenance and operating expenses	1,889,046.62
Net earnings	$1,677,447.10
Sundry incomes	43,779.26
Total net earnings	$1,721,226.36

DEDUCTIONS.

Payments to City		
Percentages	$ 447,397.67	
Cost of pavements	81,158.00	
Taxes	50,438.89	
Total payments to city	$ 578,994.56	
Bond interest, etc.	195,033.33	
		774,027.89
Surplus		$ 947,198.47
Deduct four quarterly dividends of 1½% each		479,513.80
Net surplus after payment of all fixed charges and dividends		$ 467,684.67
Percentage of maintenance and operating expenses to passenger earnings		52.9%

"The increase in gross passenger earnings amounted to $147,005.64, which, considering the general depression mentioned above, is very satisfactory. Another favorable feature is the fact that all maintenance and operating departments show decreases. The chief reduction occurs in the cost of power and the shareholders are to be congratulated upon the advantageous outcome of the negotiations whereby this company has secured control of the splendid property of the Electrical Development Co. and its practically unlimited supply of power. In this connection, it is a source of gratification that since the company commenced using power from Niagara Falls, over two years ago, the interruptions to the service have not aggregated three hours.

"During the year $431,870.94 has been expended for extensions, additions and betterments. Over 40 of the latest type

---

NOTICE is hereby given that the Annual Meeting of the Shareholders of the **VICTORIA ROLLING STOCK COMPANY OF ONTARIO, LIMITED,** will be held at the offices of Messrs. Osler & Hammond, 21 Jordan Street, Toronto, on **Wednesday, March 3rd, 1909,** at twelve o'clock noon, for the reception of the Annual Report and election of Directors for the ensuing year.

By order,

R. A. SMITH,
Secretary.

Toronto, February 12th, 1909.

NOTICE is hereby given that application will be made by the Grand Trunk Pacific Branch Lines Company, to the Parliament of Canada, at the present session thereof, for an Act amending its Act of incorporation, 6 Edward VII, chapter 99, by empowering the said company to lay out, construct and operate a line of railway from a point on the company's authorized line at or near Regina, Province of Saskatchewan, thence westerly to Moosejaw, a distance of about 45 miles, and to issue bonds, debentures or other securities in respect thereof to the extent of thirty thousand dollars per mile.

W. H. Biggar,
Solicitor for Applicants.

Montreal, 15th February, 1909.

NOTICE is hereby given that application will be made by the Grand Trunk Pacific Branch Lines Company to the Parliament of Canada, at the present session thereof, for an Act amending its Act of incorporation, 6 Edward VII, chapter 99, by empowering the said company to lay out, construct, and operate the following lines of railway:—(1) From a point on the main line of the Grand Trunk Pacific Railway west of Pembina Crossing, in the Province of Alberta, thence running southwesterly to a point at or near the Embarras River, and thence in a southerly direction towards the headwaters of the Little Pembina River, a distance of about 100 miles; (2) From a point on the main line of the Grand Trunk Pacific Railway, thence along the Embarras River running southwesterly towards the McLeod River, a distance of about 25 miles; (3) From a point on the company's authorized line between Calgary and Coutts and running southwesterly to McLeod, thence through or in the vicinity of Pincher Creek to the western boundary of the Province of Alberta, a distance of about 100 miles, and to issue bonds, debentures or other securities in respect thereof to the extent of thirty thousand dollars per mile.

W. H. BIGGAR,
Solicitor for Applicants.

WALKERVILLE, ONTARIO
LIMITED

of double-truck convertible cars were constructed in the company's shops, and placed in service, thereby affording the company additional facilities for handling the ever increasing traffic.

"The loop lines constructed two years ago have proved of such great advantage to the public that, during the past year, the Richmond St. loop was extended easterly from Victoria to Church St.

"Careful attention has again been devoted to maintaining the different properties of the company and substantial improvements and betterments have been made.

"While our relations with the city council have continued friendly, it is to be regretted that notwithstanding the reports of the city engineer, and of the special expert engaged by the city endorsing the streets selected by the company for new tracks, the city has not seen the wisdom of assisting the company to relieve the congestion which so severely inconveniences the public. The company paid the city in 1908, $578,994.56, an increase of 210% in the last decade. Since the inception of the company in 1891, it has paid into the city treasury $4,554,-446.00.

"The earnings of the Toronto and York Radial Ry. Co., during the year, have been very satisfactory. The gross earnings total $314,564.00, as compared with $282,144.00 in 1907. The Lake Simcoe extension to Jackson's Point, 24½ miles, was operated in 1907 for only six months. This line was recently extended to Sutton, 1½ miles, and the extension was opened for traffic in Dec. The revenues of the T. and Y.R.R. Co. are derived as follows: Passenger earnings, $268,808.80; freight, express, mail, $45,755.31; total, $314,564.11. The freight and express earnings continue to improve and show a gain of 23% over the previous year. The company's property has been maintained in excellent condition, and, after all operating expenses have been accounted for, there remains net earnings of $110,202.57, as against $105,740.35 for the previous year."

The number of passengers carried in 1908 was 89,139,571, against 85,574,788 in 1907. The transfers issued were 32,700,576, against 31,370,825 in 1907.

The percentage of operating expenses to earnings, 52.9, compares with previous years as follows: 1907, 53.9; 1906, 52.9; 1905, 56.8; 1904, 58.2; 1903, 55.3; 1902, 55.3; 1901, 51.6; 1900, 51; 1899, 48.8; 1898, 47.4.

Wm. Mackenzie, President, who occupied the chair at the annual meeting Feb. 3, said that the earnings for Jan., 1909, were $18,600 over those for Jan., 1908. In answer to a question he announced that the dividend would be advanced from 6% per year to 7% with the next quarterly distribution. The directors were re-elected. The officers and directors for the current year are: President, Wm. Mackenzie; Vice-President, F. Nicholls; Hon. G. A. Cox, W. D. Matthews, Sir H. M. Pellatt, R. Forget, J. Gunn.

Toronto and York Radial Ry.

The Ontario Railway and Municipal Board gave the following judgment, Feb. 1, in the case of the Town of North Toronto vs. the Toronto and York Radial Ry. Co.: When this application came before the Board Nov. 23, 1908, counsel for the parties consented to an inspection and report by J. F. H. Wyse, C.E., the Board's engineer. Mr. Wyse, in the course of his inspection, conferred with the company's engineer and the applicants, and has made his report. The Board heard arguments Jan. 26 upon the report, and the only question now is, as to whether or not the Board has power, under the contract or under the Railway Act, to make an order carrying out the engineer's recommendations.

The chief objection made by the company is in reference to the drains across the tracks, and the macadamizing between the rails and 18 ins. on the outside. The Board has examined the locus in quo on more than one occasion, and knows that the tracks are in a portion of the travelled road. The contract between the parties is found in schedule A to 60, Vic. 1897, cap. 92. Section 10 of the contract is clear that the road within and alongside of the switches and turnouts must be macadamized as the applicants' engineer shall direct. Sec. 13 of the contract provides that the whole space occupied by the track allowance shall be kept in good order and repair to the satisfaction of the applicants' engineer. The Board is of opinion that the only way to keep the tracks in good order and repair is to put in drains and to macadamize as recommended by the Board's engineer. The Board therefore orders that its engineer's recommendations as to drains across the tracks and macadamizing switches, turnouts, and tracks shall be carried out by the company. This work shall be done within 4 months from the date of the formal order. The split switches now in use are faulty in construction for an electric railway, and must be replaced by tongue switches.

"With reference to the Glen Grove cars, the Board is of opinion that they are dangerous to the public from want of renewal and repair, and proper brakes, etc., and by reason of the bad and ragged condition of the fenders. The Board therefore orders that its engineer's recommendations be carried out by the company. The Board thinks that 4 new cars will be sufficient for this service, and that they should be put in commission with all reasonable despatch, and not later than May 1.

"The engineer not having made any recommendation as to the removal of snow, the Board reserves that question for further order and direction.

"In reference to the discrimination between local and through traffic, the Board thinks that if the company's rule as to the right-of-way on the Glen Grove division is observed by the conductors and motormen, it will secure as good a local service as can be given under existing conditions. The Board, however, desires to point out its engineer's recommendation that the company's line through North Toronto should be double-tracked, in the centre of the street. One does not require to be an engineer to know that it is very difficult to make a service satisfactory where cars have to be side-tracked for other cars to pass. This causes delay and irregularity in the service which will always be unsatisfactory to the public. The portion of Yonge St. maintained by the applicants is in very bad condition, hollow in the centre instead of being crowned; in wet weather muddy, and in dry weather full of ruts. The company is prepared to double-track. The town should not only permit the company to do so, but it should crown up the street and macadamize it from side to side. There is no reason why the people of North Toronto should not have, not only a good street railway service, but also a decent street for their vehicular traffic. The Board strongly recommends the town authorities and the company to get together with a view to improving the unsatisfactory conditions that now exist, and are sure to continue so long as the cars are operated on a single track.

"The company will have to pay $20 for stamps on the formal order, but otherwise the Board makes no order as to costs."

Ottawa Electric Railway Company.

Following are extracts from the report for the year 1908: The gross earnings for the year were $616,229.37, against $574,-278.46 in 1907. The net earnings for the year were $199,439.81. Dividends amounting to 12% were paid. 13,711,382 passengers were carried compared with 12,623,440 in 1907. While the gross receipts showed a satisfactory increase considering the prevailing business depression, they were more than counterbalanced by exceptional increases in working expenses. This was due to various causes, among them the item of snow clearing, $30,000, being twice as much as the average year; the expense caused by the extreme lowness of the Ottawa River last fall, necessitating the use of steam power, and the heavy damages resulting from a collision between two cars on the Britannia line on May 24.

During the year the water power users, including this company, have constructed a concrete dam above the Chaudiere Falls, which, in connection with a series of storage dams to be built by the Dominion Government on the upper reaches of the Ottawa River, will overcome the water shortage, and will add to the value of the company's water powers.

The net earnings have been disposed of as follows: Interest paid on bonds and loans, $26,736.11; four quarterly dividends of 2½% and a bonus of 2%, $146,818.70; mileage payments, $12,302.13; placed to credit of contingent account to be applied to reduction of track renewal, car equipment and other accounts, $13,582.87; total, $199,439.81. The balance remaining at credit of profit and loss account is $34,-988.88, and of rest account $200,000.

Last summer a contract was entered into with the Minister of Agriculture for the extension of the tracks from Holland Ave. through the Experimental Farm. This work was completed in the fall. At the same time the Holland Ave. tracks were relaid with heavy rails, and the gradient much improved. Eighty-pound rails were also put down on Somerset St. from Bay St. to Bronson Ave., where a new asphalt pavement was laid, and on Princess Ave. from Government House gate to the Rockcliffe car barns. A new car barn has been erected on the west side of Cobourg St. on lots purchased last summer, which will give storeroom for 48 single-truck cars. Two single-truck pay-as-you-enter cars were put into service last fall, and have proved so satisfactory that it has been decided to increase the number, and 12 more are under construction. In compliance with an order made by the Board of Railway Commissioners the Somerset St. bridge was widened 14 ft. One-fourth the cost of this

work will be paid by the city. Your directors look forward to a successful business during the coming year.

The passengers carried during the year were 13,711,382, against 12,623,440 in 1907. The percentage of operating expenses to receipts was 66 4/10%, against 59 8/10% in 1907.

At the annual meeting Feb. 1 the directors were re-elected. Following are the officers and directors for the current year: President, T. Ahearn; Vice-President, P. Whelen; other directors: G. P. Brophy, Hon. G. A. Cox; W. Y. Soper, T. Workman; Secretary-Treasurer, J. D. Fraser.

Projects, Construction and Betterments.

Calgary, Alta.—Tenders were received to Feb. 18, for the supply of three water tube boilers, equivalent to 1,000 h.p., with piping and induced draft system for 2,500 h.p.; one 500 k.w. generator connected to a 750 h.p. high speed engine for railway system, with condensers, switchboard, etc; 397 tons of 80-lb. steel rails, 746 tons of 60-lb. steel rails, with special work, angle irons, etc.; 12 standard street railway cars; 1 street railway sprinkler and 1 street railway sweeper; and also for the overhead work necessary on the street railway system under construction. (Feb., pg. 135.)

Cobourg, Port Hope and Havelock Ry.—At a meeting of Hamilton township council, Feb. 5, a resolution was passed recommending the legislature to pass the act of incorporation, "as being the one route and company in our opinion in the best interests of the township and this community." (Feb., pg. 135.)

Dominion Ry. and Plaster Co.—The Cape Breton, N.S., county council has decided to grant a bonus of $2,000 a mile and exemption from taxation to this company, which is promoting the construction of an electric tramway from Sydney, N.S., to the plaster quarries at East Bay. (See Sydney-East Bay Electric Tram Ry., Feb., pg. 137.)

Fort Erie and Buffalo Bridge Co.—Application is being made to the Dominion Parliament for an act incorporating a company with this title, to construct a highway and general traffic bridge across the Niagara River within the corporate limits of Fort Erie, Ont., and extending to Ferry St., Buffalo, and with power to operate an electric railway over the bridge. Power is also asked to co-operate with a company incorporated in the State of New York, with similar objects. German and Norwood are solicitors for applicants.

PEERLESS
The Fence that saves Expense

It is the best fence you can buy because it is the cheapest, when measured by the years of good service it will give. PEERLESS FENCING is made of all No. 9 hard, springy wire, which is not easily affected by weather, wear or unruly stock. Just the fence suited to railroads. Neat in appearance—conforms to topography of ground and at same time upright wires are perpendicular. It will pay you to get the free book we are sending to all who write us. A postal will do.

F. L. YOUNG - - General Manager

In the New York State Legislature a bill is under consideration to incorporate a company with the title of the Lower Bridge Co., to construct a bridge across the Niagara River a short distance below the existing G.T.R. bridge. The names mentioned in connection with the incorporation of the company are: W. German, M.P.; Jas. and John Bampfield, C. S. Warner, for the Canadian, and H. G. Nichols, J. L. Nice, M. J. Maloney and L. Hinkey, for the U.S. interests.

Hamilton Street Ry.—In the bill which the Hamilton, Ont., city council is asking the Ontario Legislature to pass, it is sought to have power to raise $125,000 by debentures, the sum necessary to pay the city's share of the cost of construction and repair of the pavements upon certain streets in the city, rendered necessary by the reconstruction of Hamilton St. Ry. tracks. (Feb., pg. 135.)

Hamilton, Waterloo and Guelph Electric Ry.—Surveys are being made upon the route of this projected railway. It is reported that the right-of-way from Rockton to Galt, Ont., has been secured, and that it is expected to obtain the remainder of the land required within a couple of months.

The Huron and Ontario Ry. Co. is applying to the Dominion Parliament for an act extending the time within which the railways authorized by its several acts may be constructed. It is also desired to have power to issue securities to the amount of $40,000 a mile of single-track and to $50,000 a mile of double-track railway constructed.

Montreal and Southern Counties Electric Ry.—The by-law voted upon by the St. Lambert taxpayers, Jan. 21, was carried by 246 against 26. (Feb., pg. 136.)

Montreal Terminal Ry.—The Dominion Parliament is being asked to pass an act authorizing the company to construct within five years an elevated railway from the western limits of Montreal to the eastern limits of Maisonneuve, Que. The route of the railway is to be approved by the municipalities through which it passes, and in the event of disagreement between the company and the councils it is provided that the route shall be determined by the Board of Railway Commissioners. The bill provides that the railway shall be erected at a height of not less than 20 ft. from the surface of the streets, and that the mode of construction and the manner of operation shall be approved by the municipalities, or in the event of disputes, by the Board of Railway Commissioners.

The Niagara-Welland Power Co., which has power, among other things, to construct an electric railway from Niagara Falls to a number of points north of Lake Erie, is asking the Dominion Parliament to grant it an extension of time within which it may carry out the several works.

North Midland Ry.—It was stated, Feb. 6, that a proposition had been prepared for presentation to the London city council, with regard to the construction of this projected railway. The officers of the company say that they have a guarantee that British financial men are prepared to put up $800,000 upon condition that $200,000 is raised in Canada. The suggestion is that the city of London should exchange bonds with the company so as to aid in raising the amount.

People's Ry.—A statement has been issued by the promoters of this project showing that within a three-mile radius of the various points through which the line would pass there is a population of 74,224, or 1,216 per mile of the 61 miles. The company's idea is to make this a municipal line, the municipal councils taking $300,000 of preferred stock; to issue $600,000 of common stock to the public, and to allot $100,000 of common stock to the promoters. (Feb., pg. 136.)

The Port Arthur and Fort William St. Ry. is being operated by a joint commission representing the city councils of Port Arthur and Fort William. On the Fort William portion of the line the city proposes to carry out improvements upon the track within the city limits. In the fall of 1908, the council removed half a mile of 40-lb. rails—single track—and replaced it with a double track. The work already done has been performed by day labor, and it is proposed to do further work in the same way. S. L. Farquharson is Construction Superintendent for Fort William.

The South Western Traction Co. has under consideration a proposal to extend its line to Aylmer and Delaware, Ont., during the current year. The St. Thomas city council has suggested that it would be prepared to guarantee the company's bonds in respect of such construction if the S.W.T. Co. will take over the municipal line in the city.

Tillsonburg and Southern Counties Radial Electric Ry.—The Ontario Legislature is being asked to pass an act incorporating a company with this title, to construct a system of electric railways from Tillsonburg, and to operate in the townships of Bayham, South Dorchester, Middleton, Houghton and North Walsingham, with power to extend the lines to be constructed to London, Woodstock and Ingersoll, with all powers conferred by the Ontario Railway Act of 1906, and such sections of the Light, Heat and Power Act as may be necessary for the successful operation of the said railway.

The Toronto, Niagara and Western Ry. is asking the Dominion Parliament to pass an act extending the time within which it may construct the railways authorized by its various acts. The lines authorized include lines from Toronto to Niagara Falls, Ont., and from Niagara Falls through the counties north of Lake Erie.

Toronto Ry.—The city of Toronto is making application to the Ontario Legislature for authority, among other things, to raise $135,000 without first obtaining the consent of the ratepayers, for the cost of bridges, grading, repaving, purchase of lands, etc., necessary to afford access for a street railway to the Exhibition grounds through the Garrison commons, or to use a portion of the revenue derived from the Toronto Ry. for such purposes. Also to authorize the issue of street railway debentures for $422,396.37 to pay for construction, repaving and renewing pavements on portions of streets occupied by right-of-way of the Toronto Ry.

The Toronto Suburban Ry. Co. is applying to the Ontario Legislature for an act extending the time within which it may construct the various lines authorized.

Electric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Dec., 1908, $206,050; operating expenses, $105,991; net operating earnings, $100,059; renewal funds, $11,544; net earnings, $88,515; income from investments, $13,550; net income, $102,065; against $182,510 gross earnings; $87,952 operating expenses; $94,558 net operating earnings; $10,750 renewal funds; $83,808 net earnings; $11,036 income from investments; $94,844 net income for Dec., 1907. Gross earnings for 6 months ended Dec. 31, 1908, $1,143,639; net earnings, including income from investments, $535,139; against $996,800 gross earnings and $502,320 net earnings for same period 1907.

Cape Breton Electric Co.—Gross earnings for 12 months ended Dec. 31, 1908, $247,545.69; operating expenses, $142,509.21; net earnings, $105,036.48; interest and taxes, $48,511.93; improvement fund, $10,950; dividends, preferred stock, 6%, $14,040; balance, $31,534.55. The company does the entire electric lighting and electric railway business in Sydney, N.S., and the entire electric lighting business in North Sydney; and operates the ferry between Sydney and North Sydney, and an interurban electric line between North Sydney and Sydney Mines. It owns $220,000 of the $427,000 outstanding first mortgage bonds, and $250,000 of the $500,000 capital stock of the Sydney and Glace Bay Ry., which has a line of 19 miles between Sydney and Glace Bay. The company has authorized first mortgage, 30 year 5% gold bonds, due Jan. 1, 1932, of $1,500,000, of which $860,000 is outstanding; authorized capital stock, $2,000,000; authorized preferred 6% non-cumulative stock, $250,000. Of the preferred stock, $234,000 is issued, and of the common stock $1,000,000 is issued. The earnings and expenses above quoted include one-half of those of the S. and G.B. Ry. The managers of the company are Stone and Webster, Boston, Mass.

Edmonton, Alta.—In the application for additional powers which the Edmonton city council is making to the Alberta Legislature, a clearer definition of the city's right to operate its tramway lines within the city limits is asked for, with a view of setting right some indefiniteness in the acts previously passed. It is also desired to secure an amendment of schedule A of the Edmonton charter, making the borrowing powers thereby conferred in relation to the municipal public works, and those conferred by chap. 45 of the statutes of 1906, on the Strathcona Radial Tramway Co., with such modifications as may be deemed advisable applicable to all public works or utilities, now or hereafter operated by the city.

Halifax Electric Tramway.—Total receipts for 12 months ended Dec. 31, 1908, $190,134.00, against $174,859.06 for 1907. Receipts for Jan., $13,785.59; and for 2 weeks ended Feb. 14, $6,199.52, against $12,920.09; and $5,767.08 for same periods 1908.

Montreal St. Ry.—Gross earnings for Jan., $295,453.37; expenses, $202,344.45; net earnings, $93,108.92; city percentage on earnings, $15,230.09; interest on bonds and loans, $15,107.19; rent leased lines, $498.67; surplus, $62,272.97; against $285,515.36 gross earnings; $202,503.94 expenses; $83,011.42 net earnings; $14,756.41 city percentage on earnings; $16,732.41 interest on bonds and loans; $444.43 rent leased lines; $51,078.17 surplus for Jan., 1908. Gross earnings for 4 months ended Jan. 31, $1,230,524.47; expenses, $759,639.47; net earnings, $470,885.00; standing charges, $113,304.88; surplus, $357,530.13; against $1,188,238.38 gross earnings; $742,026.88 expenses; $446,211.50 net earnings; $115,187.05 standing charges; $331,024.45 surplus for same period 1907-08.

St. Thomas Street Ry.—An offer is under consideration by the city council of St. Thomas, Ont., for the leasing of the electric railway in the city. The South Western Traction Co., which has a line from London to Port Stanley, has offered to take over the St. Thomas city line upon certain conditions. The Street Railway Commissioners have suggested that the S.W.T. Co. take over and operate the line without remuneration in consideration of the city guaranteeing the company's bonds for the extension of its suburban line to Aylmer. The matter is still being discussed.

South Western Traction Co.—Application is being made to the Ontario Legislature for an act increasing the company's borrowing powers from $25,000 to $33,000 per mile of railway, and authorizing the company to secure the increased indebtedness by giving such securities and creating such liens and charges as may be necessary or expedient.

Toronto Suburban Ry.—Application is being made to the Ontario Legislature for an act to repeal section 6 of chap. 94, Vict.

FENCE TALK No. 2

All wire is not the same. We explained in our talk No. 1 that we supply two grades, the 0.30 carbon, known as "High Carbon," and another grade, the 0.10 carbon, generally known as "Hard Drawn" wire. This latter is for those buyers who think they save a cent or two first cost.

Before buying railroad fencing,

Find out for yourself the strength difference between "High Carbon" wire and other kinds. Needn't buy blindfold any more. Test for yourself—this way:

Take a foot-long piece of the horizontal wire from the other kind of fence—and a piece from a Page "High Carbon" Fence.

Heat both pieces cherry-red. Drop them in cold water. And then—

Try to bend them—both of them.

The "High Carbon" wire will be found to have taken such a temper that it will cut glass. The other wire will bend like sheet-tin and easier.

That test proves Page wire to be a real "High Carbon" Wire that will take a temper—which simply means it is high class—steel—hence far greater strength, toughness, power to stand strain and stand up.

And that test also proves "Hard Drawn" a wire that softens if you try to temper it. Such wire is more likely to stretch too much in service—make saggy fences.

Make the test; you'll see then why the cent or two more Page "High Carbon" Wire Fence costs per rod is a great investment—because it gets you a fence that will outlast other kinds two-to-one—because Page Fence is fully a third stronger than the others.

And you will see, too, that this great strength makes it possible to stretch Page "High Carbon" Fence tighter—and to use fewer posts to hold it tight. The saving in posts figures 5 to 8 cents a rod—and yet the Page Fence will be a stauncher fence.

Let us send you a booklet that proves why Page Fences wear best and tells how you can prove fence-quality before you buy it. The Page Wire Fence Co., Ltd., Walkerville, Toronto, Montreal, St. John, Vancouver, Victoria.

H. G. THORLEY,
PASSENGER AGENT FOR ONTARIO,
41 KING ST. EAST, TORONTO.

The Imperial Bank has opened a branch at Cochrane, Ont., the new town located at the junction of the N.T. and T. and N.O. Rys.

57, and confirming in lieu thereof a mortgage deed securing a new issue of bonds.

The Winnipeg Electric Ry. Co.'s stocks were listed at the opening of the Winnipeg Stock Exchange, Feb. 1.

Electric Railway Notes.

The St. John, N.B., Ry. intends putting on a pay-as-you-enter car as an experiment.

Frank Ross is the largest holder of the Quebec Ry., Light and Power Co.'s common stock, with 6,887 shares. Rodolphe Forget, M.P., is the next largest holder, with 4,594 shares.

When the Toronto Ry. constructed the new loop at Sunnyside, it laid tracks, with the approval of the Toronto city council, on a lane which was believed to be public property. Mrs. M. Brett claimed a property right on a portion of it, and Chancellor Boyd has upheld her claim, giving her $250 damages.

E. P. Coleman, of Taunton, Mass., enters the Dominion Power and Transmission Co.'s service at Hamilton, Ont., Mar. 1. We are advised that he will devote his time to the Company's railway matters more from the business and administrative end than from the operating. His title has not been decided on as yet.

The Toronto and York Radial Ry. Co. has passed the following by-law, which has been temporarily approved by the Ontario Railway and Municipal Board: "No person, except officials of the company, will be allowed to stand in the front vestibule or on the front platform of any cars. On open cars only the seating capacity of the front seat will be allowed. Children under 12 years of age, except when accompanied by their parents, must not be allowed to sit on the front seat."

The Niagara Falls, Ont., Board of Trade has made application to the Ontario Railway and Municipal Board, alleging that the International Ry., through its subsidiary, the Niagara Falls Park and River Ry., has exclusive control for electric railway purposes of the Niagara River bank between Bridge St., Niagara Falls, and Chippewa, thus having a monopoly of the scenic route along the river road in Niagara Falls, through the Queen Victoria Niagara Falls Park, passing the Falls, skirting the upper rapids, and on through to Chippewa; and that all persons desiring to travel along the river road to the park or rapids are compelled to use this railway; and that the minimum cash fare on the company's cars is 10c., no matter how short the ride, and it prays for relief, and that the company be compelled to adopt a 5c. fare for distances not exceeding 3 miles.

The Comptroller of Railway Statistics issued a circular to electric railway companies recently, informing them that the Department had decided on a new form of classification to be adopted in the keeping of their accounts, and that the same must be applied retroactively as from July 1, 1908. The circular admitted that great inconvenience would be caused to companies' accounting officials by this change, but claimed that the advantage of having a uniform system of accounting in Canada and the United States would be a counterbalancing advantage. The new classification is practically identically the same as that adopted by the U.S. Interstate Commerce Commission, which, however, gave six months' notice before its introduction. The Canadian Street Railway Association's executive committee has protested vigorously against the system being made retroactive. The schedules or forms of returns to be made by companies are not yet obtainable, the blame for the delay being attributed to the Government printing bureau at Ottawa. It is said they are very elaborate, and ask for information on a variety of questions that are not in any way necessary for statistical purposes.

Canadian Street Railway Association.

A special meeting of the executive committee was held in Ottawa, Feb. 12, those present being: The President, J. E. Hutcheson, Superintendent Ottawa Electric Ry., in the chair; J. Anderson, Manager Sandwich, Windsor and Amherstburg Ry.; P. Dubee, Secretary Montreal St. Ry.; H. M. Hopper, Secretary-Treasurer St. John Ry.; and Acton Burrows, Secretary-Treasurer. Considerable routine business was disposed of. The Hull Electric Co. was elected as a member. It was decided to hold the annual meeting at Winnipeg in May, and the Secretary-Treasurer was authorized to make the necessary arrangements.

Following the meeting of the executive committee the Association's special committee on transfers met and decided on certain recommendations which will be considered at the Association's next meeting.

Electric Railway Track Laid in 1908.

The total length of new track laid, reported by electric railway companies in Canada as laid during 1908, was 32.94 miles, against 72.27 miles in 1907. With the exception of the Brantford and Hamilton Ry., which completed and placed in operation its line, and the Mount McKay and Kakabeka Falls Ry., a new line at Fort William, Ont., the new track laid consisted entirely of extensions of existing lines. Of the new track laid, 23.66 miles were in Ontario, 6.00 miles in Manitoba, and 3.28 in Quebec. The mileage, as distributed among the various companies, is as follows:

	Miles.	Miles.
BRANTFORD AND HAMILTON RY.		
Ancaster to Brantford, Ont.		16.00
MONTREAL ST. RY.

Grain Elevator Notes.

A rumor on the Winnipeg Grain Exchange recently credited the T. Eaton Co. with having arranged with the Grain Growers' Grain Co. to join in the grain and elevator business. This was, however, denied by President J. C. Eaton.

E. H. Heaps, President Vancouver Board of Trade, in an interview recently, is reported to have said: "If grain elevators are not built in Vancouver by private enterprise, the C.P.R. will take the task in hand, just as it did in Fort William. The C.P.R., however, does not desire to build elevators, but will do so if private enterprise does not come to the rescue."

The Western Terminal Elevator Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $500,000, and office at Winnipeg, to carry on an elevator, warehousing, wharfinger, shipping and navigation business. The provisional directors are: R. Siderfin, A. H. Campbell, F. D. Dilts, W. M. Graham, G. D. Munro, Winnipeg.

The various trades and labor councils throughout the Prairie Provinces passed resolutions, Feb. 3, in support of the Grain Growers' Association's attitude on the question of Government ownership of interior elevators, on the ground that such action is in accord with one of the clauses of the trades congress charter, supporting Government ownership of public utilities.

The Goderich Elevator and Transit Co., Ltd., Goderich, Ont., is reported to be about to increase its machinery and accommodation. Heavier driving motors and a new marine leg to elevate 18,000 bush. an hour, new turn shovel engines, and larger distributing conveyers, are among the improvements contemplated. The company recently completed a successful year, and paid a 10% dividend.

The National Elevator Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $500,000 and office at Winnipeg, to construct or otherwise acquire and operate grain elevators, including company elevators, terminal elevators, and the requisite docks, wharves, sheds, etc., and to carry on a general elevator and grain business, and in connection therewith to own and operate steam and other vessels, and other means of transportation by land and water. The provisional directors are: H. H. Palethorpe, R. J. McClelland, H. W. Whitla and H. Phillips, Winnipeg.

R. Dawson Harling, in a paper before the Engineers' Club of Toronto recently, on the Manchester Ship Canal, gave the following particulars of the company's grain elevator, which was the first one to be built in Great Britain on the Canadian plan. It has a capacity of 1,500,000 bush., divided into 268 bins, and can receive grain from vessels at the rate of 350 tons an hour, move the grain within the elevator for changing bins or delivery, and weighing in bulk at 500 tons an hour; sack, weigh and load into 40 railway cars and 18 delivery wagons simultaneously, and load barges or coasting vessels at the rate of 150 tons an hour in bulk, or at the rate of 250 sacks an hour when bagged.

Government Ownership of Elevators.

The reply of the Premiers of Manitoba, Saskatchewan and Alberta, to the proposals put forward by the Grain Growers' Association regarding the question of Government ownership of elevators, was made public Jan. 30. In the course of their reply, they say: "We understand that you take the position that nothing further can be hoped for by amendments to existing legislation, in so far as internal elevators are concerned, and to obtain what your executive desire. Several matters presented involve in their institution, carrying out and performance, considerations of unusually grave and complicated questions, constitutional, financial and legislative.

"The three Provinces are asked to wholly provide, operate and maintain on the public credit the requisite quota of elevators for the storage of grain, and to regulate generally the manner in which the shipment and transportation of grain is conducted. This will necessarily involve, as you will understand, a new constitutional principle not hitherto exercised and means the incurrence of heavy financial responsibility and the putting into practical form by constructive, regulative and restrictive legislation the right of absolute Provincial Government control of the matters involved."

Arguing from this standpoint, the Premiers contend that to fulfil these obligations would necessitate amendments to the B.N.A. Act, or otherwise the action might prove futile and possibly disastrous. It would be a distinct invasion of the powers and prerogatives of the Federal Parliament, as defined in the clause which says none of the subjects which the Federal Parliament is given control of shall be deemed to come within the class of matters of local or private nature. Elevators are a public utility, monopolistic establishments, and the operation thereof

cannot be claimed to be purely local or private in character, and, therefore, one in which the Parliament of Canada has exclusive jurisdiction. The B.N.A. Act also specifically provides that the exclusive legislative authority of Parliament shall extend to certain classes of subjects, among which are regulation of trade and commerce, weights and measures, and national railways, such as the C.P.R., C.N.R. and G.T.P.R. They contend that they cannot find that any Province has ever attempted to deal with any of these questions, and from this they take the ground that the requests of the grain growers can be complied with only in one of two ways, either by legislative action of the Parliament of Canada, which now possesses ample powers of dealing therewith, or by securing amendments to the British North America Act, conferring full and absolute control and authority on the Provinces in the premises as follows: To wholly and absolutely control, regulate and govern storage and handling of grain. To prescribe and regulate weights and grades of grain, subject to no other authority. To fully control transportation companies, railways, etc., in the matter of expropriation of elevators and sites, distribution of cars, and in other regulations and restrictions, which shall be essential to convenient handling of grain. Also generally all such powers and authority as to trade and commerce and weighing and grading of grain necessary to give the Provinces complete inherent and ex-territorial jurisdiction in every respect, that is to say, full authority within the Provinces and also outside, where the grain may be handled at terminal points.

Dealing with the financial side of the question, the reply continues: "C. C. Castle, Warehouse Commissioner, has furnished official statements to us, showing, among other things hereinafter set forth, the following information, namely, that the number of elevators under operation last season was 1,334, with a storage capacity of 39,724,000 bush. To put into effect any practical scheme of public ownership of elevator facilities and complete Government control over the handling and shipment of grain would involve the Provinces in a very large financial undertaking. It would be necessary to provide, in the first place, the requisite number of elevators to handle the business; not any part, but the whole of it, for the monopoly should be absolute in all respects, and in the next place, for the cost of maintenance and management. Mr. Castle states that the cost of constructing an ordinary standard 25,000-bush. elevator is between $5,000 and $5,400. The initial outlay, therefore, to be provided for by the Provinces to establish and equip an adequate elevator system or to acquire that already in existence would be between $7,000,000 and $10,000,000. Then would arise the question of providing the necessary funds. This could only be accomplished by issue of bonds by the Provinces. We are of the view that without the Provinces possessing the fullest power to legislate in the premises, the proffered securities would not be deemed desirable in the money markets of the world. It is, therefore, apparent that a solution of the problem is not only complicated in detail financially, but presents, as before stated, grave and constitutional difficulties.

"Mr. Castle further officially states to us that for the 12 months ended Aug. 31, 1908, the total amount of wheat inspected at Winnipeg was 54,404,150 bush., of which approximately 42,000,000 bush. were shipped through the elevators, and 12,500,000 bush. from loading platforms; thus about 22 per cent. of the total wheat crop was loaded from the loading platforms.

"For the 3 months ended Nov. 30, 1908, he states there were 44,672,500 bush. of wheat inspected at Winnipeg, of which 30,094,078 bush. were shipped through the elevators, and 14,578,422 bush. were shipped over

THE CLIFTON HOTEL

NIAGARA FALLS, CANADA.

Rates $4 per day up, American Plan. For weekly rates and further information, address: GEORGE R. MAJOR, Manager.

OPEN THE YEAR ROUND

THE ONLY HOTEL THAT COMMANDS AN UNRIVALLED VIEW OF BOTH FALLS

HOW TO REACH THE CLIFTON HOTEL

Arriving on Grand Trunk Railway or Wabash Rd., at Niagara Falls, Ont. Hotel bus meets all trains or take trolley to hotel—7 minutes.

Arriving on Michigan Central Rd , Canadian Pacific Railway, at Victoria Park station—Hotel bus meets all trains, only three minutes' walk from station to hotel.

International Railway (trolleys), connecting with Niagara Navigation Co. steamers at Queenston, to or from Toronto, pass the door.

IMPORTANT

Guests coming to the Hotel should see to it that they are taken to The Clifton Hotel, CANADIAN SIDE, and also that their mail is addressed "Care of The Clifton Hotel, Niagara Falls, CANADA." To insure prompt delivery, don't forget to make CANADA plain in the address.

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10 W., 4th Meridian(generally)	8.00 " "
Map No. 5—South-Western Alberta	8.00 to 15.00 per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00 to 25.00 per acre.

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
"	"	9.00	"	"	215.70	"	"	"	73.46	"	"	180.00

the loading platforms, or about 33% of the total shipment. And that if the next crop is reasonably clean he would not be surprised if 40% of the total shipment was from the loading platforms.

"We fully appreciate the magnitude and importance of the whole question, and are fully alive to our responsibilities in the matter, and in conclusion beg to assure your association of our willingness at all times to consider any grievances of the agriculturists of our respective Provinces, our sympathy with them, and our readiness to co-operate with them in any measure or measures that will place them in a more advantageous position to carry on their labors. That upon the procurement of the necessary amendments to the B.N.A. Act, giving to the Provinces the powers hereinbefore indicated, to completely establish and control a public monopoly, in the storage, handling and inspection of grain, that we are quite willing to endeavor, subject to the approval of our respective assemblies, to frame a scheme financially safeguarded for the giving of effect to the desire of your executive."

MARINE DEPARTMENT.

Notices to Mariners.

The Dominion Department of Marine has issued the following notices:

No. 5. Jan. 22.—10. Quebec, River St. Lawrence, Hare Island, Middle Bank, change in character of buoy.

No. 6. Jan. 25.—12. Ontario, Lake Huron, entrance to Georgian Bay, Cove Island, change in sounding of fog alarm. 13. Ontario, Georgian Bay, west side, Flowerpot Island, fog alarm established. 14. Ontario Georgian Bay, west side, Cabot Head, new fog alarm building.

No. 7. Jan. 27.—15. Ontario, River St. Mary, St. Joseph Island, Sailors' Encampment range, light masts replaced by towers.

No. 8. Jan. 28.—16. Quebec, River St. Lawrence, ship channel between Quebec and Montreal, Cap Levrard, changes in buoyage.

No. 9. Feb. 4.—17. Ontario, Georgian Bay, Owen Sound, range lighthouses rebuilt.

No. 10. Feb. 4.—18. Nova Scotia, west coast, Pubnico whistling buoy replaced by gas and whistling buoy. 19. Nova Scotia, south coast, off entrance to Shelburne Harbor, whistling buoy replaced by gas and whistling buoy. 20. Nova Scotia, south coast, off Liverpool Bay, whistling Buoy replaced by gas and whistling buoy. 21. Nova Scotia, south coast, off north-east shoal, whistling buoy replaced by gas and whistling buoy. 22. Nova Scotia, south coast, Halifax harbor approach, Thrumcap shoal, gas and bell buoy. 23. Prince Edward Island, south coast, Indian Rocks, whistling buoy replaced by gas and whistling buoy. 24. Prince Edward Island, south coast, Hillsborough Bay, Prim reefs, bell buoy replaced by gas and whistling buoy.

No. 11. Feb. 11.—25. Ontario, Lake Huron, Goderich, temporary range of lights established.

No. 12. Feb. 16.—26. Ontario, River St. Clair, east of St. Clair middle ground, gas buoy established.

No. 13. Feb. 18.—27. General, Canadian Government wireless telegraph stations, information respecting aids to navigation furnished to vessels.

A London, Eng., press dispatch states that negotiations have been opened with a view to arbitration in connection with the Allan Steamship Line's protest against the White Star Line's Canadian service.

Atlantic and Pacific Ocean Marine.

The White Star s.s. Laurentic was thoroughly tested on her trial trip at Belfast, Ireland, Jan. 31, with satisfactory results.

By the completion of the work of clearing obstructions from its approach, no. 6 berth, at St. John harbor, was made ready for use Feb. 13, and will be occupied by the Allan Steamship Line's vessels.

The British Colonial Secretary has requested the Governor-General to intimate that the Imperial Government has appointed Oct. 1 as the date on which the provisions of the Merchant Shipping Act, 1904, relating to the load line and life saving appliances, will be applied to foreign ships in the ports of the United Kingdom.

The Cunard Line s.s. Mauretania, in arriving off the Ambrose Channel lightship Feb. 18, created a new series of records over the long route. The passage was completed in 4 days 17 hrs. 50 mins., being 1 hr. 46 mins. better than the previous record. The highest 24 hr. run on the trip was 671 miles.

The White Star Line has filed a claim in the U.S. District Court against the Lloyd Italiano Societa de Navigazione, owners of the s.s. Florida, for $1,000,000 damages for the vessel, and $500,000 for her cargo, as a result of the recent collision between that vessel and the company's s.s. Republic off Nantucket Shoal. The statement of claim asserts that the collision was wholly the fault of the Florida, which did not maintain an efficient lookout, did not give proper whistles, paid no heed to the Republic's whistles, failed to indicate changes of helm, proceeded at an immoderate speed, and neither stopped nor reversed her engines. It is further asserted that the Republic, when the Florida's whistles were heard in the fog, put her engines full speed astern and helm hard aport. The statement asks the court to lay the blame for the accident on the Florida, and to order the payment of $2,000,000 to the owners of the Republic. The owners of the Florida have also filed an action in the same court, claiming that the collision was caused solely by neglect on the part of the Republic, and also asks the court to fix the company's liability to a sum not exceeding $224,000, claimed to be the damage value of the Florida. The Florida has been seized under a writ of attachment.

The claim of the Ulster Steamship Co., owners of the s.s. Malin Head, against the Allan Steamship Line, owners of the s.s. Corinthian, and counter-claim by the latter against the former, were before the Admiralty Division of the High Court of Justice in London, Eng., recently, as a result of the collision between the two vessels near Grosse Isle in the River St. Lawrence, Sept. 13, 1908. The matter was investigated by Commander O. G. V. Spain, R.N., Dominion Wreck Commissioner, and judgment given, fixing the blame on the Corinthian's master and pilot, fining the latter $100, and exonerating the Malin Head's master, pilot and officers. The full text of the judgment was given in our Jan. issue. An additional investigation was held before the British Admiralty Court, and it is said that the judgment delivered is in full accord with that of Commander Spain. The case was argued before the court Feb. 4, the chief points for the defence being that the scrap log of the Malin Head could not be relied on, owing to omission to enter up details of the collision, and that she should have been beached immediately after the collision instead of attempting to take her to Quebec. Justice Bargrave Deane, in reserving judgment, said he did not think he could find those on the Malin Head were wrong in the course they took in that respect.

Maritime Provinces and Newfoundland.

B. Atkinson has been appointed Harbor Master at Apple River, N.S.

A. Wyman has been appointed Government wharfinger at Short Beach, N.S.

The name of the dredge No. 1 has been changed by order-in-council to Wingfield.

B. Richards has been appointed Government wharfinger at Murray Harbor North, P.E.I.

The name of the schooner Effort, no. 107,299, registered at Annapolis Royal, N.S., has been changed to Ready Now, by order-in-council.

The name of the schooner Quick Step, no. 88,504 on the Canadian register, with Sydney, N.S., as its port of registry, has been changed to Leonice by order in-council.

An order-in-council has been issued changing the name of the steamer Rona to Valdes. The Rona was registered at Vancouver, B.C., in Dec., 1908, as Valdes, with no. 126,324 as given in the list of steam vessels registered, published in our Feb. issue.

The harbor facilities committee of the St. John, N.B., city council has recommended that the C.P.R.'s offer to transfer a 1,600 ft. strip of land to the city in exchange for shore rights behind Sand Point, be accepted, subject to some minor provisions to be decided on by a sub-committee.

The Minister of Marine, in reply to a question in the House of Commons Feb. 8, said that the ice-breaking steamship now under construction by Vickers, Son and Maxim, in England, will be ready on contract time, May 11. The cost of the vessel would be £103,000, of which $125,316 has been paid.

The work of dredging the St. John, N.B., harbor to the south of Sand Point, was commenced Feb. 18 by the dredge Iroquois. It is understood that this dredging is a part of a contract made by the Public Works Department for the removal of 800,000 cubic yards of material, under a Government scheme for the construction of additional wharves and terminal facilities.

During Jan. 60 steamships, with an aggregate tonnage of about 248,000, arrived at Halifax, N.S., against 48 with a tonnage of about 199,000 in Jan., 1908. The number of coasting steamers was less than previously, being 57, as against 80 for the same months. This difference is explained by the number of small steamers utilized in bringing the cargo ashore from the wrecked s.s. Mount Temple last year.

In connection with the recent visit of inspection to life-saving stations on the Nova Scotia coast, by Admiral Kingsmill, it is reported that a number of improvements to be made during the current year are in contemplation. Amongst them are; a cable connection between the mainland and Sambro Island, and the establishment of central stations at St. John, N.B., and Cape Sable and Halifax, N.S., where large motor boats will be maintained. It is also said that the station at Grand Manan will be moved to a more advantageous point.

The Maritime Steamboat Co. is making application to the N.B. Lt.-Governor in Council for a charter of incorporation by letters patent, with power to operate one or more steamboats for towing and for carrying passengers, freight, mails, etc., on the Bay of Fundy, and plying between any points in the counties of Charlotte and St. John, and to build, purchase or otherwise acquire steam and other vessels. The proposed capital of the company is $20,000, and the head office at Black's Harbor, N.B. The provisional directors are: L. Connors, P. W. Connors, W. J. Campbell, B. Connors, R. Thompson, Black's Harbor, N.B.; J. A. Thompson, G. F. Paul, Beaver Harbor, N.B.

Province of Quebec Marine.

E. de Chantal has been appointed Government wharfinger at Coteau Landing, Que.

The Prime Minister informed the House of Commons Jan. 26 that the cost of the icebreaking steamship Montcalm to Dec. 31, 1908, had been $762,538.01, viz., construction, $301,233.25; repairs, $144,669.42; maintenance, $316,635.34. The repairs necessitated by the collision of May 21, 1908, cost $21,857.65.

A request has been made by merchants and manufacturers at places along the north shore, that navigation between Quebec, Rivière Ouelle, Malbaie and St. Cimon be kept open through the winter. They claim that with a powerful steamboat like the Montcalm this could easily be done, as generally the river along the north shore at places like Murray Bay, St. Cimon and Tadousac is free from ice.

The Minister of Railways and Canals, in the House of Commons Feb. 9, on the question of a vote for construction of wharf and basins on the Lachiné Canal, said work was started in Dec., 1908, but it was not expected to complete it this year. To complete the wharf and basins $150,000 is being asked; $30,000 was asked last year, and $40,000 has been spent for cement. A further $29,000 is asked for to stop leaks in the north bank at Cote St. Paul.

The Rhine Shipping Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $32,000 and office at Montreal, to build, own and charter steam and other vessels, and to carry on the business of shipowners and common carriers within and without the Dominion. The provisional directors are: G. I. Dewar, Ottawa; W. A. Taft, Arlington, Mass.; W. H. Chandler, Newton, Mass.; J. B. Fallon, Boston, Mass.; W. McKissock, Brookline, Mass.

The Timandra Shipping Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $32,000 and office at Montreal, to build, own and charter steam and other vessels, and to carry on the business of shipowners and common carriers within and without the Dominion. The provisional directors are: G. I. Dewar, Ottawa; W. A. Taft, Arlington, Mass.; W. H. Chandler, Newton, Mass.; J. B. Fallon, Boston, Mass.; W. McKissock, Brookline, Mass.

Tenders were recently invited for a ferry service between Quebec and Levis under new regulations adopted by the joint committee of the Quebec and Levis councils, but up to Feb. 2, the last day for receiving them, none had come to hand. The Quebec and Levis Ferry Co., the present holders of the franchise, did not, as it was anticipated, tender, and it has been stated that it has received an offer to transfer its boats to a point in Ontario for the operation of a ferry service there.

Ontario and the Great Lakes.

C. A. Macdonald, heretofore Auditor of Freight and Passengers' Accounts, Northern Navigation Co. of Ontario, has been appointed Comptroller, and the former title has been discontinued.

Application is being made to the Ontario Legislature, by the town of Sault Ste. Marie, for an act to validate and confirm a by-law granting aid to J. O'Boyle for the construction of a dry dock there.

Howard S. Folger, General Manager Thousand Islands Steamboat Co. and St. Lawrence River Steamboat Co., has been also elected President of both companies, to succeed his late father, Henry Folger.

The Ottawa Forwarding Co. is building at Ottawa a steam tug for service on the Ottawa River, 70 ft. long over all, 16 ft. beam, 7½ ft. deep, with 16 in. square cut-off engine, with Fitzgibbon boiler, 130 lbs. working pressure. It is intended to have her ready for service by May 1.

The Lake Vessel Owners' Association is the name of the organization formed Feb. 15, on the lines indicated in the Dominion Marine Association report printed on another page. The association represents a capital of about $100,000,000, and takes over 5% of its insurance on its own account.

The large dredge which is being built for the Great Lakes Dredging Co. by Horrigan and Beagle, Port Arthur, for dredging

the mouth of the Rainy River, is under way at Keewatin, Ont. Work is being pushed so that the dredge may be at work as soon after the opening of navigation as possible.

The directors of the Northern Navigation Co. of Ontario have appointed an executive committee, consisting of W. J. Sheppard, President; H. Y. Telfer, Vice-President; C. E. Stephens, Secretary-Treasurer, and F. A. Lett, to deal with any questions arising which may require to be handled promptly and before a directors' meeting can be called.

The Northern Dredging Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $199,000 and office at Durham, to conduct a general dredging business, to contract for and to construct wharves, piers, etc. R. H. McWilliams, Durham, Ont.; V. Ratz, Parkhill, Ont.; and S. G. McKay, Woodstock, Ont., are the provisional directors.

Forwarders, Ltd., the incorporation of which was announced in our Feb. issue, advises us that it intends particularly to transfer grain from Mooer's elevator, owned by Cereals, Ltd., Kingston, Ont., to Montreal. Some barges will be purchased and some leased for the forthcoming season, and the company intends to build a number of steam barges later on.

The Haileybury Navigation Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $40,000, and office at Haileybury, Ont., to carry on the business of a navigation, warehousing, carrying and trading company, etc. The provisional directors are: J. M. Wood, A. Gibson, G. McIntosh, W. D. Leslie, J. C. A. Crawford, Haileybury, Ont.

The Admiralty Exchequer Court has delivered judgment in favor of the Richelieu and Ontario Navigation Co., as owners of the s.s. Quebec, against the owners of the s.s. Imperial, maintaining the Admiralty Court's jurisdiction and reversing Justice Dunlop's decision thereon. The two vessels were involved in a collision some time since, the Wreck Commissioner's judgment being in favor of the R. and O.N. Co.

The following officers are announced to have been appointed to the Northern Navigation Co.'s s.s. Hamonic, when she is put into service in June: Captain, R. D. Foote, formerly of the s.s. Huronic; Chief Engineer, S. Brisbane; Steward, J. Gardhouse; Purser, J. Ronan. To fill vacancies, transfers as follows will take place: Capt. A. L. Campbell, from the Saronic to the Huronic; Capt. A. Wright, from the Majestic to the Saronic.

Judgment was given at Welland, Feb. 5, awarding the Welland Steamboat Co. $2,200 and costs in its action against the Ontario and Quebec Navigation Co., for damages for failure to supply a certificate according to agreement; for it to use the steamboat Niagara for passenger and excursion business between Welland, Port Colborne, Dunnville, Crystal Beach and Buffalo. The action was tried some time ago at St. Catharines, the delay being taken to fix the damages.

The Temagami Steamboat and Hotel Co. is adding two steamboats to its fleet. They are being built by the company at Temagami, and will be completed and ready for service by the opening of the season. One of them is 70 ft. long by 12.6 ft. beam, and will have a speed of about 15 miles an hour. The other is 65 ft. long, and will be used more for private excursion parties. The company is also rebuilding the hulls and renewing the machinery of its steamboats Spry and Chance.

The Dominion Government's twin-screw steamboat Simcoe, which is under construction on the Tyne, Eng., was launched there recently. The vessel will be equipped with appliances for lifting heavy weights, and it is designed for safe navigation through ice. She will have triple-expansion engines, two water tube Babcock and Wilcox boilers, and a wireless telegraph installation. It is intended to use her as a lighthouse tender, and for buoy service in Georgian Bay. Her dimensions are: Length, 180 ft.; beam, 35 ft.

The Hamilton and Fort William Navigation Co. is seeking to obtain an order declaring it entitled to certain material, lying partly at the Canadian Shipbuilding Co.'s, Bathurst St. yards, Toronto, and partly at Bridgeburg, Ont., or for the repayment to them by E. R. C. Clarkson, liquidator of the latter company, of $30,000, the amount of advances made in 1907 for the purchase of material for the construction for plaintiffs of a 460-ft. freighter, to cost $297,000. The Canadian Shipbuilding Co. went into liquidation in Jan., 1908.

J. T. Mathews, who recently returned to Toronto from Great Britain, announces that he has placed a contract in Sunderland, Eng., for the construction of a steel bulk freighter for the Merchants Steamship Co., Toronto. He says that the vessel will contain a number of novel principles in construction, and that in this respect she will be unique. She will, it is anticipated, arrive on the lakes early in July, when she will at once be placed on the Fort William-Montreal route. A press report states that the name Mapleton has been selected for her, but we are advised that no name has yet been decided on.

An order-in-council of Jan. 15 makes regulations regarding the operation of a ferry across the Rainy River, between Rainy River, Ont., and Baudette and Spooner, Minn., providing for the maintenance of a suitable landing wharf on the Canadian side; that the boat to be used shall be not less than 30 ft. long by 6 ft. wide, and shall be properly equipped; that it shall ply between the points named from 6 a.m. to 6 p.m. daily, except Sundays, from May 1 to Oct. 1, each year; that the fares be for adults 25c., children 15c., including return if made the same day; and for the giving of sureties for the full compliance with the terms of the license.

The Minister of Public Works, replying to questions in the House of Commons Jan. 25, said the dredge Industry was purchased Sept. 3, 1908, for $157,378.78, and a 500-yard scow was purchased at the same time for $10,000, out of the appropriation for new dredging plant Maritime Provinces. The dredge was bought at Massena, N.Y., and was delivered to the Government at Cornwall, Ont.; from thence she was towed to Toronto for a new boiler to be put in at the Polson Iron Works. Repairs were also being made at Toronto on the scow. The dredge was built at Superior, Wis., and was designed for work on the Great Lakes. She was last employed on dredging the waterway for the St. Lawrence River Power Co. She should be ready for work May 1, and will cost about $175,000, including plant, but not duty of $39,351.85.

Manitoba, Saskatchewan, Alberta, Etc.

The Dominion Department of Public Works report for the year ended Mar. 31, 1908, refers to the lock and dam under construction at St. Andrews Rapids, near Winnipeg, and adds: "It is expected that the close of another year will see the structure well on towards completion. This improvement will provide continuous navigation from the city of Winnipeg to the large lake of the same name, a distance of 48 miles, and it is hoped will do much towards solving the fuel problem of the Prairie City, where coal is scarce and consequently dear, as well as providing easy means of shipment for the products of the quarry and the mine.

B.C. and Pacific Coast Marine.

Capt. D. A. McInnis has been appointed harbormaster at Vancouver, and Port Warden for Vancouver and Burrard Inlet.

Reports state that preparations are being made for the installation of a wireless telegraph apparatus on the C.P.R. steamship Princess May.

Sloan and Liddle, ship brokers and shipping agents, Vancouver, have dissolved partnership. The business is being continued in the same name by F. W. Liddle.

Vancouver city council is applying to the Legislature to pass an amendment to the Vancouver Incorporation Act, empowering the council to pass by-laws prohibiting and regulating the erection of wharves, etc.

The Northern Coal Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $100,000, with power among other things to build or otherwise acquire and operate steam and other vessels.

The Kootenay Motor Boat Co., Ltd., has been incorporated under the B.C. Companies Act for 50 years, with a capital of $10,000, with power among other things to own, operate, and dispose of steam and other vessels.

The Yellow Cedar Lumber Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $500,000, and power among other things to own and operate steam and other vessels, and to carry passengers and goods.

The Edinboro Timber Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $200,000, and power among other things to own and operate steam and other vessels, and to carry on the general business of a transportation company.

The Hunter-Macmicking Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $35,000, to carry on a general wholesale fruit and produce business, and in connection therewith to own and operate steam and other vessels necessary for its purposes.

It is reported that the rate war which for the past year has been raging between the C.P.R. and the Inland Navigation Co., on the Vancouver-Victoria-Seattle route, is at an end. Details are not given, but it is announced that the C.P.R. has resumed the normal rate between the ports named.

The Twin City Transportation Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $100,000, to purchase or otherwise acquire steam and other vessels, to carry on the businesses of ship owners, ship brokers, managers of shipping property, freight contractors, stevedores, and general carriers by land and sea.

The C.P.R., we are officially advised, has decided to add another vessel to its B.C. Coast Service, and plans and specifications are now in course of preparation. The company has also under consideration the question of the construction of a steel passenger steamer to replace the s.s. Charmer, but no decision has been reached on the matter.

Flewin and Sons, Ltd., has been incorporated under the B.C. Companies Act, with a capital of $50,000, to carry on a general logging business, and to conduct a general towing and carrier business within the province, and for that purpose to own and operate steamboats, tugs and vessels of every description, and to erect and maintain wharves, dry docks, etc.

The G.T.P. Ry. is reported to be calling for tenders for the construction of two steamboats for the Skeena River service in connection with construction work in the province. It is stated that the vessels

will be similar to the Distributor at present in service, which was built by A. Watson, Victoria, the machinery being supplied by the Polson Iron Works, Toronto. The estimated cost is mentioned at $35,000 each.

The Minister of Public Works, replying to questions in the House of Commons Jan. 25, said the department was arranging for the purchase of a dredge manufactured in Germany peculiarly adapted for the dredging of silt. The purchase is not to be made and no money is to be paid until the dredge is delivered in British Columbia, set up ready to work, and after it has been tested for such time as shall be satisfactory to the engineers of the department.

The steamboat Skeena was placed on the ways at Prince Rupert recently to undergo considerable alterations. She is owned by Foley, Welch and Stewart, G.T.P.R. contractors, and utilized as a supply vessel for their camps along the Skeena River. A change is being made in her machinery, so that she will have 260 n.h.p. instead of 200 as heretofore. The work is expected to be completed in time for the opening of navigation on the river in March.

The Boscowitz Steamship Co. has chartered the British s.s. St. Dennis for use on the northern B.C. coast run, to replace the s.s. Venture destroyed by fire. The St. Dennis is a steel, screw-driven vessel, built at Liverpool, Eng., in 1895. Her dimensions are: Length, 161 ft.; breadth, 25.6 ft.; depth, 12.7 ft. Her accommodation is for 24 first-class and 20 second-class passengers, and about 600 tons of cargo. She is owned, and until recently was operated by the Southern California Development Co.

The Boscowitz Steamship Co.'s s.s. Venture was destroyed by fire towards the end of Jan., about 12 miles from Prince Rupert. The vessel, which was tied up to the wharf on the Nass, was cut adrift to minimize the danger, and became a complete loss. She was valued at $75,000, of which about $50,000 was covered by insurance. She was built at Victoria in 1902; her dimensions were: Length, 153.4 ft.; breadth, 36.2 ft.; depth, 9.5 ft.; tonnage, 812 gross, 489 register; and she was a screw-driven vessel with engine of 65 n.h.p.

Lake Shipyard Methods of Steel Ship Construction.—A volume of much use to those interested in the construction of steel freight carriers on the Great Lakes has been issued by the Penton Publishing Co., Cleveland, Ohio. The writer is R. Curr, who apparently has had experience of construction work in the Clyde shipyards, and is able to contrast the methods adopted there with the mold system, introduced on the Great Lakes by W. I. Babcock. The book is written for practical shipbuilders, and is therefore purely a technical one, and full of illustrations showing in detail the different stages of construction. Copies of the book may be obtained from THE RAILWAY AND MARINE WORLD'S Book Department, the price being $2.

The Dominion Department of Marine and Fisheries announces that all Canadian sealing vessels desiring to take seals in the territorial waters of the Falkland Islands are required to procure a license for such purpose.

Replying to questions in the House of Commons Jan. 25, the Postmaster-General said the cost of the steamer Lady Evelyn (formerly Deerhound) was £12,500 at the place of purchase (Penzance, Eng.), and the cost of bringing her to Canada was £760. The cost of alterations, etc., to fit her for the post office service was $27,086.58. The cost of operating her since she was put in commission Sept. 1, 1907, to Dec. 31, 1908, was $26,584.12.

Dominion Marine Association.

The annual meeting in Ottawa, Feb. 11, was largely attended. The President, A. A. Wright, of the St. Lawrence and Chicago Steam Navigation Co., Toronto, occupied the chair, the others present being: F. Plummer, Canadian Lake and Ocean Navigation Co.; W. W. Hall, F. E. Hall & Co.; Jas. H., E. A. Hall and R. T. Holcombe, Ottawa Forwarding Co.; J. Donelly, Donelly Salvage and Wrecking Co.; L. L. Henderson, R. Fraser, Montreal Transportation Co.; J. Playfair, W. H. Featherstonhaugh, Midland Navigation Co., Empress Transportation Co.; J. W. Norcross, Mutual Steamship Co.; C. A. Jaques, Montreal and Lake Erie S.S. Co., Montreal and Great Lakes S.S. Co.; C. H. Plummer, Canadian Lake Transportation Co.; R. W. Sheppard, Ottawa River Navigation Co.; D. and G. P. Murphy, Ottawa Transportation Co.; H. H. Gildersleeve and C. H. Nicholson, Northern Navigation Co.; E. E. Horsey, Lake Ontario and Bay of Quinte Steamboat Co.; G. Johnston and J. V. O'Donahoe, Richelieu and Ontario Navigation Co.; H. Richardson, Kingston Shipping Co.; H. A. and S. C. Calvin, The Calvin Co. There were also present: W. H. Smith, Canada Atlantic Transit Co., and G. A. Tomlinson, Duluth, Minn., representing the Lake Carriers' Association, and Acton Burrows, Managing Director RAILWAY AND MARINE WORLD.

Following is a summary of the report presented by the Executive Committee:

The Association has been active in legislation affecting marine interests. The recommendations which were ineffectual at the time of the passing of amendments to the Canada Shipping Act during 1908, will be again presented to the Minister of Marine with a view to the remodelling of the clauses relating to the sick mariners' tax, pilotage, certificated engineers, reporting changes of certificated officers and the carrying of passengers, and, if necessary, a special bill will be provided to achieve the Association's object. The bill relating to the water carriage of goods introduced in the Senate, and on the whole acceptable to the Association, did not reach the lower House until the last day of the session, and was held over. Information recently received gives ground for the belief that the bill may not be pressed in the House by its original promoters, and it is thought advisable that steps be taken to procure the enactment of the measure. While this last measure was under consideration, the Association's draft bill of lading for grain cargoes, in which, among other exemptions, those set out in the Harter Act of the U.S. were included, was withheld, and reliance was placed on the proposed legislation for the protection originally sought. In the meantime an agreement was made that all members should stamp their bills of lading with a clause prepared by the Secretary, incorporating the Harter Act exemptions. During the past season the discrepancies in the out-turns of cargoes have become so pronounced and intolerable, that it has been resolved to take the action proposed by the Department of Trade and Commerce on the several occasions when application has been made to it for assistance, that is, to remove from the bill of lading the clause assuming responsibility for the shortage, and to insert, if necessary, what is known as the Flax Seed Clause, whereby the vessel limits its liability to ½-bush. per 1,000, and renounces any right to an overrun, collecting freight merely on the out-turn. This has been adopted by the Association, and also the Lake Carriers' Association, and such bill of lading, as adopted by the Association, will be used for grain from Port Arthur and Fort William from the opening of navigation this year.

The matter of the proposed grain clearing house, which has also been vigorously prosecuted, was not favorably received by a joint meeting of the Association and the representatives of shippers and terminal elevators, though the establishment of a clearing house for documents was approved, and a committee appointed to work out the details of the scheme.

The Executive Committee met the Minister and Deputy Minister of Railways and Canals, and discussed the proposed regulations governing the navigation of the Dominion canals, and though suspension of the rules was refused, the difficulties were explained and objections met, and favorable attention was promised to several suggestions made on behalf of the Association.

Legislation was passed during 1908 imposing a customs duty on repairs made to Canadian vessels in foreign ports, except when there is no dock in Canada of sufficient capacity to hold the vessel. It is recommended that an effort be made to have this legislation amended so that it may, at least, provide for an exemption in cases where no dock is available in Canada.

A majority of U.S. vessel owners on the Great Lakes have entered into an arrangement regarding marine insurance, which will probably be joined by the whole U.S. tonnage on the lakes, and Canadian vessel owners are invited to participate in the plan. It is proposed that the owner shall assume 5% of the insurable risk on his vessels, leaving 95% to be insured according to conventional methods, and in any company he may choose. For this 5% the owner is to pay a proportionate premium into a common treasury to a special attorney, who will be under the direction of an advisory board of vessel owners, and the fund thus formed will be administered in the same way as an ordinary insurance fund, being drawn upon for its proportionate part of all loss, while its surplus at the end of the year will be subject to distribution among owners. J. Playfair, Midland, Ont., has been appointed to represent vessels of the Association on the advisory board.

The Minister of Customs was asked to amend the statute relating to the coasting trade, so as to bring it into conformity with the corresponding U.S. statute, so as to prevent the carriage of merchandise from one Canadian port to another in U.S. bottoms, even for part of the voyage. The Committee is urging further action in the matter.

The steps taken by the Association regarding alleged breaches of the Customs regulations, relating to towing by foreign vessels in Canadian waters, have been recognized, and steps have been taken to secure the strict enforcement of the regulations.

At the request of the Marine Department, the Committee, in giving an opinion regarding the subsidizing of wrecking plants on inland waters, resolved that it was not advisable to raise a question which might lead to the abrogation of the reciprocal wrecking privileges existing between Canada and the U.S., and that it was inadvisable to recommend payment of subsidies until proof was given that the industry was in need of assistance.

The Committee has also recommended that official investigation into all wrecks be obligatory, and that it should be the duty of the master of each vessel to report any accident to the Marine Department, with a penalty for default.

On the proposal regarding the project for the development of power at the Long Sault Rapids, the Association has consistently opposed the matter in the interests of navigation. The proposals have been before the International Waterways Commission, and it was resolved that a definite outline of the scheme, with plans, must be prepared and presented. Copies of these have been promised to the Association, when the matter will be further considered.

At its last annual meeting the Association passed a resolution expressing disapproval of the proposal of the Minister of Justice to

abolish the Federal Admiralty Court and to transfer its jurisdiction to the Superior Court of each province. The proposed legislation was opposed and the matter has for the present, at any rate, been dropped.

Members were notified at the opening of last season, that the Great Lakes Register would expect to collect certain fees, based on tonnage, for the inspection of each vessel to be rated. It was resolved that inasmuch as the rating was largely for the benefit of the shippers and others, it would be unjust to levy the expense on the ships inspected, and that payment be refused. The Register was accordingly notified, with the result that inspection of the previous year was, in many cases, accepted, and inspection and rating ultimately carried out without charge.

The question of issuing certificates to second mates was submitted to the Association by the Marine Department, and it was decided to agree to the proposal providing that the holding of such certificates was not made compulsory. The Association also advised that no test of great severity be applied in the examinations, as an expert knowledge of the theories of navigation would be superfluous.

Further recommendations are considered advisable on the subject of a survey of the Welland Canal route, with a view to its betterment, before the Government is committed to any particular waterway.

The members of the Association engaged in the carriage of package freight resolved, Dec. 31, to ask the Government to place all vessels engaged in the carriage of package freight from one Canadian port to another, or of package freight ultimately destined for a Canadian port, under the jurisdiction of the Board of Railway Commissioners, the powers of the Board to be extended for the purpose. Due consideration of the matter was promised. The immediate occasion for this resolution was a discussion regarding the relations between these lines and their water route of canal, lake and river, on the one hand, and the railways on the other. This discussion was prompted by a reported proposal by a railway company to the trans-Atlantic Conference lines for the abolition of the through bill of lading from Great Britain to inland Canadian points by the all-water route, an action which would discriminate in favor of railways in the matter of rates. Correspondence with the various trans-Atlantic lines is now being conducted, with a view to the removal of any misunderstanding and to obviating the threatened difficulty.

The Grain Section of the Association has given special attention to matters connected with the grain carrying trade. Attention should be called to the fact that the agreement in force from time to time among the members regarding a minimum rate for the carriage of grain, was rescinded in June last. A number of press articles and public correspondence charged the Association with responsibility for the deviation of export grain to the Buffalo-New York route. The Association sent a letter to the Ministers of Marine, and Customs, setting out all the facts, absolving the Association as a body from any connection with the agreement named in the press, calling attention to the rescission of the Association's agreement, and indicating the circumstances which were, in fact, responsible for the export shipments by the route named.

The Committee on Aids to Navigation during the year met and considered various proposals regarding aid and improvements said to be required at the head of the lakes and Montreal, and compiled a list of improvements which it considered necessary and desirable in the interests of safe navigation:

MICHIPICOTEN ISLAND.—A light, and if possible a fog horn, were asked for on northeast end of Michipicoten Island, at such point as might render the light of most service to vessels bound up as well as bound down the lake north of the island. It was submitted that a light on the west end of the island would only serve as a beacon in approaching down the lake, could not assist in passing the eastern end of the island, and would be of no service to vessels up-bound in the north channel. Unfortunately the Canadian Association of Masters and Mates simultaneously recommended that the light and fog horn be placed on the west end of the island. The conflicting suggestions were sufficiently embarrassing to justify the Light House Board in deferring action, and the question is held over until the hydrographic re-survey of Lake Superior reaches and covers this point, as it is expected to do this year. The Lake Carriers' Association, by an independent recommendation to the Government, has happened on a solution for the question by recommending a light at each end of the island.

BAD NEIGHBOR SHOAL.—A whistling gas buoy was asked for, well outside of Bad Neighbor shoal. A location suggested was on the 13 fathom patch about 2 miles west of Cove Island, approximately on the intersection of a line drawn from Cove Island light to a point about 6 miles south of Duck Island light, with a line from Gat Point to East Sister Shoal. The Light House Board referred this to the Chief Engineer, who reported against the proposal on the ground that Cove Island fog horn and light are sufficient

NORTH SHORE.—A range was asked for on Kokanongwi Island to clear Centre Island bank passing south of Badgely Island. This has been held over for consideration, and no action is yet taken by the Board. A spar buoy was also asked for on Robertson's Rock (a little north of Clapperton Island Light), but the Board reported that a spar was already located at this point.

LONELY ISLAND.—A request was made for the installation here of one of the gasolene motor fog horns then under test by the Department. No action is yet taken. The Board is, however, advised by its chief engineer against the installation of any fog horn on account of the size of the island, the claim being made that a horn is only effective protection on a point or on a small island which can be given a wide berth in any direction.

COLLINGWOOD.—A similar installation was asked for, but this is still under consideration.

STAG ISLAND.—The double channel has been established at this point and rules have been put in force for navigating the same.

FIGHTING ISLAND.—The cutting of the second channel here, for which petitions are being collected, and which with the new Livingstone channel would afford a double route from Detroit to Lake Erie, was endorsed by this Association in 1908. The Lake Carriers' Association, at its recent meeting, has also supported the request for the work. The next Committee might give the proposal further assistance.

LAKE ERIE.—The lightship Keewaunee, maintained at Southeast Shoal by the Lake Carriers' Association, has not yet been taken over by the Government, although negotiations to that end have been pending for some years, this shoal being well within Canadian waters. This Association has already endorsed the Lake Carriers' request for the maintenance of a Canadian light here, and the matter is commended to the attention of the next Committee.

PORT COLBORNE RANGE LIGHTS.—The occulting red light placed as a back range light has been complained of as being too dim to be serviceable, and this Association has been asked to suggest a remedy. The question should have the attention of the next Committee at its first meeting.

NIAGARA SHOAL.—The renewed request for a gas and bell buoy at this shoal in place of the present bell buoy has been refused by the Board on the ground that there is not enough night traffic in and out of Niagara River, and that there being open water north of the shoal, vessels up and down the lake from Port Dalhousie can and should give this point a wide berth.

HAMILTON ENTRANCE—BURLINGTON PIERS.—The repair work here was the subject of much special correspondence, and through the efforts of this Association received special consideration, temporary lights being placed and notices issued, and the main work being undertaken with all the promptitude possible.

BAY OF QUINTE.—The Telegraph Shoal is still an obstruction to navigation. A contract is reported to have been let for its removal. The light at Salt Point at Brighton entrance is not yet replaced; the fog horn here is in operation but the distant shore ranges do not assist in making an entrance in thick weather.

KINGSTON HARBOR.—Range lights were asked for on the north shore at the entrance of this harbor to take the place of the long distance range of Pigeon Island and Nine Mile lights, and to lead past the Middle Ground and Seven Acre Shoals; with a second range perhaps on Point Henry, to lead into the inner harbor and past the Penitentiary shoal, to intersect the present Barriefield range. The Board has not yet refused this request, but has apparently been advised that the improvement is not really a necessary one, one accident which occurred having taken place late in the year after the gas buoy on the Middle Ground had been removed. The removal of the Barriefield bridge across the Kingston inner harbor is suggested, or at least the renewal of the bridge with a large central span of modern construction. The next Committee is asked to give this question special consideration.

ST. LAWRENCE RIVER.—Various improvements have been the subject of correspondence throughout the year, notably the Farran's Point entrance, still under consideration by the Department of Railways and Canals; the removal of an obstruction consisting of faulty construction work at the head of the Morrisburg Canal; and the strengthening of the banks of the Cornwall, Soulanges and Lachine Canals.

OTTAWA RIVER—GREEN SHOALS.—The Public Works Department has not yet undertaken the removal of these shoals. The lack of drilling apparatus was stated to be the only reason the work was not undertaken last year. The Department now reports that during 1908, at the suggestion of this Association, it advertised for tenders for the work but received none. The matter is under consideration and should receive further attention at the hands of the next Committee.

RIDEAU CANAL.—Dredging has been continued; and successful lighting has been done in dangerous portions of the route by numerous removable oil lanterns placed on stakes and superintended in each section by a contractor who daily removes and replaces the lamps with the aid of a gasolene launch.

TOPS OF BUOYS.—The recommendation of this Association for distinguishing shapes in the tops of red and black spar buoys has not yet been acted upon. Officers of the Department are impressed with the idea that the top required would be of such a character as to be liable to be damaged by scraping or collision. The committee considers that sufficient distinction can be given without running any such risk, and the next committee should press for the improvement.

GAS BUOYS. It is worth noting that the Lake Carriers' Association has just agreed by unanimous resolution, resulting from some investigation, to ask the U.S. authorities to adopt acetylene gas buoys in use in Canada in place of those now used, the Canadian system having proved vastly more efficient.

Throughout the year general correspondence regarding pending improvements has taken place, and from time to time the Secre-

tary has been called upon to disseminate information as to temporary or permanent changes in lights, buoys or channels in the waters in which the Association is interested.

The Secretary-Treasurer's report showed a balance of $1,710.25 on hand.

The reports having been adopted the following resolutions were also adopted:

That the Dominion Government be asked to hasten the work of removing the Telegraph shoal obstruction and to replace the light at Salt Point at Brighton entrance.

That the Dominion Government be asked to dredge Port Arthur harbor to a uniform depth of 22 ft.

That the Dominion Government be asked to allow captains from the Upper Lakes, plying to Montreal, to pass an examination as

pilots for Montreal harbor, so as to do away with the present pilotage charges there.

That the Dominion Government be asked to amend the Canada Shipping Act so that all boats of any description, carrying passengers for hire, shall be required to register and to comply with all requirements of the Canada Shipping Act.

That the committee on aids to navigation prepare uniform instructions to be issued by member companies to captains, respecting navigation in the canals and warning them to avoid accidents under pain of penalties.

That the Dominion Government be asked to remove the customs duty on repairs to vessels in U.S. ports, except when an accident occurs nearer to a Canadian dry dock, with proper repair facilities, than to a U.S. one, and that such Canadian dry dock is available at the time.

That the Association protest against the admission of any foreign vessel to the coasting trade on the inland waters.

The following were appointed a committee on power development on the St. Lawrence, to obtain expert evidence and to protest against any interference with navigation: D. Murphy, C. J. Smith, H. A. Calvin, C. A. Jaques, L. L. Henderson, F. Plummer, A. A. Wright, A. B. Mackay, F. E. Hall, J. P. Kavanagh, B. R. Hepburn.

That the Dominion Government be asked to open all the St. Lawrence Canals as early as possible, and that repair work should not be allowed to interfere with this.

It was decided to change the title of the Secretary-Treasurer F. King, to Counsel.

The by-laws having been amended so as to provide that the executive committee be elected so that four members shall hold office for one year, four for two years, and four for three years, and that each year four shall be elected to fill the vacancies occurring, the following were elected: For three years, A. B. Mackay, S. C. Calvin, R. W. Sheppard, J. W. Norcross; for two years, H. H. Gildersleeve, J. S. Playfair, F. Plummer, L. L. Henderson; for one year, C. J. Smith, A. A. Wright, C. A. Jaques, H. W. Richardson. A. A. Wright was re-elected chairman of the grain section.

The Counsel was instructed to express to the Dominion Government the Association's appreciation of the steps which had been taken respecting the proposed enlargement of the Welland Canal and to urge that the work be pushed as rapidly as possible.

G. A. Tomlinson, of Duluth, on behalf of the Lake Carriers' Association, conveyed an expression of good-will to the Dominion Marine Association, and said the Lake Carriers' Association was greatly interested in the efforts to produce a bill of lading which would be something more than a mere bankers' document. They had made a similar attempt in the U.S., but had accomplished little more than improving the English of the bill of lading. He paid a tribute to the Canadian banking system, and gave his experiences in regard to shortages on grain cargoes shipped from Duluth. He also explained the insurance scheme adopted by the Lake Carriers' Association, and in which Canadian vessel owners were asked to join.

The Executive Committee met and elected the following officers for the current year: President, C. J. Smith, General Manager Richelieu and Ontario Navigation Co., Montreal; 1st Vice-President, H. H. Gildersleeve, Manager Northern Navigation Co., Collingwood, Ont.; 2nd Vice-President, F. Plummer, General Manager, Canadian Lake and Ocean Navigation Co., Toronto.

During Dec., 1908, 3 deaths and 2 cases of injuries were reported in connection with Canadian navigation. One of the fatalities was due to machinery, and the other two, with the cases of injuries, were due to falls.

Amur-Vadso Collision.

The following judgment has been delivered as the result of a formal investigation into the causes which led to a collision between the steamships Amur and Vadso, Sept. 19, 1908, in McKay Reach, near Trivet Point, B.C., held at Victoria, B.C., by Commander O. G. V. Spain, Wreck Commissioner, and Capts. P. C. Musgrave and J. T. Walbran, Assessors. Both the Amur and Vadso were well found in all the requirements of the Board of Trade, in regard to boats, life saving apparatus, etc., and the officers of both vessels held the proper certificates. It appears from the evidence that the navigation of the inland channels of British Columbia is carried out by the local steamers in running certain courses from a fixed position off one well-known point to a fixed position off another well-known point, and these courses with their time are run voyage after voyage, so that should a fog come on, the position of the vessel would not be lost, and this is done apparently notwithstanding anything that may supervene to make an alteration necessary for a short time; carrying out this idea, the Court considers one of the causes of the above casualty. The C.P.R. steamer Amur, bound from Victoria to Port Simpson and Queen Charlotte Islands, met at about 2.30 a.m. on the abovementioned date, and at the above-mentioned place, the steamer Vadso, bound from British Columbia northern ports to Vancouver city. The officer in charge of the Amur having run his course and distance from Kingcome Point to Trivet Point, (the Court considers that the collision occurred westward of Trivet Point), and right in the fairway of an approaching vessel, which he had seen and noted, most injudiciously altered his course for Cummings Point, in accordance, apparently, with the above named practice, and towards the Vadso, though that vessel had very properly directed her course to starboard to pass the Amur; the Amur's course was steadied when her port light was supposed, by her officer in charge, to be sufficiently open to the Vadso, that they would pass clear, red to red, but the two vessels being nearly parallel to each other and drawing close, the Court considers that the Amur in swinging a little more than necessary showed her green light to the Vadso for a moment, though no doubt shutting it out again almost immediately; unfortunately the officer in charge of the Vadso, instead of keeping his port helm, made the grave mistake on seeing this light of altering his course to port, thus throwing his vessel across the advancing Amur, which would be again swinging to starboard, the collision was the result, and the Court considers that when the collision was imminent, the officer in charge of the Amur did the only thing possible to avoid a fatal disaster by going full speed astern, and the officer in charge of the Vadso should have done the same; the Vadso's engines, however, were not stopped until the vessels collided, or were on the point of colliding, and the way and momentum of her hull on the Amur's motionless bow was the cause of the damage; had the Vadso gone full speed astern when the collision was imminent, the Court considers that the accident would not have occurred. For bringing the Amur up nearly in a line with the approaching Vadso, which vessel had altered her course to clear him, thereby tending to confuse the officers on the Vadso as to what the Amur was going to do, the Court considers the officer in charge of the Amur should be reprimanded, though his conduct is considered correct after this action. For not keeping his port helm, having once made way in the proper order for the approaching vessel, and also when the vessels were close, for not placing his engines at full speed astern, the Court considers the officer in charge of the Vadso should be severely reprimanded. The masters of the two vessels are exonerated from blame. It is regrettable that the sound signals were not distinctly heard by either ship. The Court wishes to draw attention to the custom in many passenger vessels on the B.C. coast, of the master standing watch and watch with the mate, and then being held responsible, as master of the vessel, for both watches; this appears to the Court to be unfair to the master, and also conducive to accidents, the above collision being a case in point; there should be two competent watch officers, the master, of course, having general supervision; the master having to keep watch and watch, it becomes impossible for him to have the necessary supervision at all times, and the Court considers it would be to the advantage of B.C. vessels if the practice could be stopped.

The Ocean Carrier.

In a volume bearing this title published by G. P. Putnam's Sons, and the Railroad Age Gazette, New York, J. Russell Smith, Assistant Professor of Industry of the University of Pennsylvania School of Finance and Commerce, has written an interesting and instructive book. It is a companion work to a previously issued volume on "The Organization of Ocean Commerce," and is a history and analysis of the ocean-carrying trade, and a discussion of the rates of ocean transportation. The book is the outgrowth of the study of three questions—the development of line traffic, the combinations among carriers to control rates, and the combination of steamship lines and railways.

While it is written entirely from the U.S. point of view, it is an economic study, and does not show more than a natural bias in favor of U.S. routes, and U.S. methods, which is to be expected from those who have been familiar with them from their youth. To one who has been brought into intimate contact with the British mercantile marine, and has given some study to the development of the ocean carrier and to ocean freight rates, from the British point of view, the volume appears to present the view that in the main the growth of the entire trade has been fostered by U.S. initiative and enterprise. While there is some foundation for taking this viewpoint, Professor Smith overlooks the fact that in the days when the U.S. mercantile marine was an appreciable factor in the world's ocean carrying trade the nations of continental Europe were recovering from the disorganization of their trade wrought by the Napoleonic wars, the continuation of which enabled the U.S. as an independent trading nation to build up a mercantile marine and a carrying trade altogether out of proportion to its position as a financial or a producing centre. When the period of the industrial expansion of the U.S. arrived, the importance of the U.S. ocean mercantile marine began to wane, and it is doubtful if it can ever be regained. The question which will have to be determined, as appears to be suggested by a consideration of freight rates as set forth in the volume, is whether the exporting or the importing nations shall determine the route and the rate. Taken as a whole the volume is an interesting one for the general reader, and to those specially interested in transportation problems, it presents clearly and concisely the ocean-carrying problem from the U.S. standpoint. The volume is well illustrated with maps, cuts of various types of ocean carriers, etc. Copies of the work may be obtained from THE RAILWAY AND MARINE WORLD'S book department.

Cuba-Brighton Collision

A formal investigation into the causes which led to a collision between the s.s. Cuba and the Montreal Transportation Co.'s barges Brighton and Dorchester, in Lake St. Francis, Nov. 12, 1908, was held recently at Montreal, by Commander O. G. V. Spain, Wreck Commissioner, with Capts. Nash and Reid as nautical assessors. Judgment was delivered as follows: It appears from the evidence that on Nov. 12, the Montreal Transportation Co.'s tug Glide, with a tow of three light barges, Ungava, Brighton, and Dorchester, was proceeding up Lake St. Francis, when they encountered a heavy gale of wind from about west-north-west; owing to this strong wind, and the adverse current, and finding that they were not making any headway, it was decided to come to anchor, which was done, the first barge Ungava letting go both anchors with 75 fathoms of cable on the starboard anchor, and 60 fathoms on the port; the tug Glide then moored alongside the barge Ungava, and made fast to her on the starboard or north side, thereby showing they recognized that vessels proceeding down the lake would pass on the south or port side of the tow, the barges Brighton and Dorchester mooring astern of the Ungava, with very short scopes; in fact, the scopes were so short that they were sufficiently close together for a man to walk from one end of the tow to the other. On the approach of darkness the regulation anchor lights were placed in position, two lights on the barge Ungava, one on the tug Glide, and each of the barges Brighton and Dorchester also had one light; in the case of the two latter vessels there was an infringement of Art. 11, of the Rules of the Road. In the case of the Brighton she only carried one light, which was not in accordance with the regulations, as she was over 150 ft. long, and in the case of the barge Dorchester, her light was placed in contravention of sec. A of Art. 11; both barges' lights were hung on the port corners of the deckhouse aft, and visible on the port or south side of the vessels only, and although this had no effect on the collision, the lights should have been visible all round the horizon; the fact of their anchoring in this position, the tug Glide taking her position on the north side of the tow, and the lights of the barges Brighton and Dorchester being placed on their port side goes to prove, in the opinion of the Court, that they all agreed and accepted the fact that there was ample room for vessels to pass clear of the tow to the south, the channel is approximately ¾ mile wide at this point, and there was room to go either north or south of the tow; at no time was the tail of the tow less than 300 ft from the gas buoy, as a more powerful tug named Emmerson passed twice on the day in question, once with barges in tow, and measuring 64 ft. wide; it appears to the Court, taking this into consideration, that a steamer like the Cuba, with only 26 ft. beam, if carefully navigated, should pass easily, the weather at the time being perfectly clear. The lights of the steamer Cuba were seen for some time approaching almost directly for the tow, without apparently slackening speed; this vessel was proceeding from Oswego to Quebec, coal laden; the master was below at his supper, the mate being in charge of the vessel at the time of the collision; there was no lookout man, the mate assumed that duty, the master stating that he had no other reliable man on board that could fill that position; a pilot (so-called), François Laduc, was at the wheel; the weather conditions are generally accepted, that is to say, that there was a strong wind, dark but clear night, and lights could be seen at full range. The so-called pilot, and also the mate of the Cuba saw the lights on the tow, which they, by their evidence, considered was a tow under way, though the lights did not conform to that opinion, as the lights carried by the Ungava indicated that they were the regulation lights required by law for a vessel at anchor. There appears to have been a very ineffective lookout, and lax discipline, kept on board the Cuba, and also faulty navigation on the part of the officers of that vessel. After seeing the lights of the tow, the Cuba still kept on at full speed, showing both her red and green lights, until within about 100 ft., when the captain of the Ungava called out to the Cuba to port his helm, which the Cuba did, but not in time to avoid striking the Brighton slightly on her port side, sufficiently, however, to send her stern to the northward, and with enough force to carry away three out of the four lines which fastened the Dorchester to the Brighton; the Cuba's port bow then striking the Dorchester on the port bow, doing damage to the Dorchester, and also very considerably hurting herself, the Cuba then drifted clear and proceeded on her way, without ascertaining if there was any danger to the vessels she had collided with. The Court considers that the master and mate of the Cuba should be and they are hereby severely censured, and is also of the opinion that measures should be taken to secure competent and responsible men as pilots of vessels in inland waters. The officer in charge of the tug Glide, who was presumably in charge of the whole tow, is censured for the infringement of the Rules of the Road, in not having the proper lights on the Brighton and Dorchester, and warned to be careful in future. This matter is brought to the attention of the Montreal Transportation Co., and in future officers of vessels not carrying the proper lights will be severely dealt with. In this particular case, as before remarked, the lights in question had nothing to do with the collision.

Richelieu and Ontario Navigation Company.

Following are extracts from the report for the year 1908: The gross earnings were $1,241,747.81, and the net profit, after providing for fixed charges, interest, etc., $250,741.84. The operating expenses, exclusive of fixed charges, were 69% of the gross earnings, a saving of 3% as against the previous year. Four dividends at the rate of 1¼% quarterly were paid during the year.

In the last annual report your directors recommended that a sister ship to the Rapids King be built at an early date for the Rapids division. The necessity of such a steamer having become more and more apparent, on the advice of naval architects the steamer Brockville, now in this service, is being lengthened, rebuilt and modernized, and will go into commission as the Rapids Queen this coming summer. Your directors also recommend the immediate building of a large twin-screw steamer, full canal size of the most modern type, for the Lake Ontario-Thousand Island trade. This steamer to be so built as to take the place of any of the main line steamers of the company, either on the Toronto, Quebec or Saguenay divisions. Plans and estimates are being prepared for this steamer, which should go into commission on the opening of the tourist season, 1910.

The Insurance Fund has been credited with $36,000 out of the year's earnings, and $108,662.00 now stands to the credit of this account, of which $101,154.50 has been invested in bonds. The bond issue and the sale of £200,000 thereof, as well as the entire redemption of the outstanding 1895 issue referred to in the last annual report have been successfully accomplished, and during the past year £3,400 of the new 1907 bonds were also redeemed. The company's steamers, hotels, shops and wharves have been thoroughly maintained and improved during the past year.

The directors for the current year are as follows: President, R. Forget, M.P.; Vice-President, W. Wainwright; Directors, Sir Henry M. Pellatt, Hon. J. P. B. Casgrain, Hon. L. J. Forget, H. M. Molson, C. O. Paradis, G. Caverhill, W. Hanson and A. H. Sims.

Harbor and River Improvements.

The Dominion Department of Public Works expended during the year ended Mar. 31, 1908, $11,199,384.94, of which the following amounts were for works connected with the marine interests: Harbor and river works, $2,447,882.02; dredging and plant, $3,344,306.56; slides and booms, $144,716.54.

For several years the department has been systematically carrying on the improvement of the principal harbors on the Great Lakes, along the St. Lawrence waterway, and on the Atlantic and Pacific coasts. The points which the Royal Commission on Transportation recommended should be equipped after the most approved and modern methods for handling the export and import trade of the country were: Fort William and Port Arthur, Depot Harbor, Midland, Port Colborne, Kingston, Ont.; Montreal, Quebec, Que.; St. John, N.B.; Halifax, Sydney, N.S.; Vancouver, Victoria, and the termini on the Canadian Northern Ry. and the G.T. Pacific Ry. The improvement of these ports is under way. The amounts expended at this harbor, where work has been progressing, is as follows:

	1899 to 1903	1904 to 1908
Montreal	$503,536.12	$ 520,410.48
Quebec	19,467.65	793,099.56
Port Arthur	53,268.87	469,811.50
Fort William	98,449.65	747,495.65

The express companies have notified their agents that the order-in-council declaring the Canada Temperance Act, which applies within the limits or in the vicinity of any public works, applies also to all those portions of the provinces of Quebec, Ontario and Manitoba, except in the provisional district of Rainy River, Ont., lying within 20 miles of each side of the located line, and including the line itself, of the National Transcontinental Ry., from the Quebec bridge to the limits of St. Boniface, Man., excepting within the limits of incorporated cities and towns within the said area, prohibits express companies from carrying intoxicating liquors into the territory named.

The Board of Railway Commissioners has issued the following order: 6167. Feb. 4. In the matter of the application of the Commercial Acetylene Co. of New York, for an order directing express companies operating in Canada and subject to the jurisdiction of the Board, to classify for transportation acetylene gas when shipped under the so-called safety storage system. Upon hearing counsel for applicant, the G.T.R. and the C.P.R. Companies, the evidence adduced, and what was alleged—it is ordered that express companies operating in Canada, and under the jurisdiction of the Board, be directed to accept and carry acetylene gas under the rules and regulations prescribed in connection therewith in Official Express Classification 18, and at the rating therein provided; and that a supplement be issued to Express Classification 16, as now in effect, to provide for the said changes becoming effective not later than Mar. 1.

Express Money Order Business, Etc.

In the case of the American Bankers' Association vs. the American Express Co., et al, submitted to the Interstate Commerce Commission Nov. 11, 1908, it was alleged that defendant express companies, by dealing in domestic and foreign exchange, money orders, letters of credit, travellers' cheques and drafts, and foreign money, trespass upon the business of bankers, and by the unfair use and exercise of their business as common carriers violate the act to regulate commerce by unjust discrimination against complainants. Defendants averred that they are subject to the act only as forwarders of goods by express and not in respect to any other kind of business carried on by them, and that their financial business has no relation to their business as common carriers, and does not constitute interstate or foreign commerce.

The Commission held Jan. 5, 1909, upon defendants' motion to dismiss complaint and complainants' request for subpœna duces tecum, that as there may be some question of unjust discrimination involved in the matter, the motion to dismiss the complaint is denied; but as the information sought by complainants through the issuance of subpœna duces tecum does not at this time seem to be necessary to a showing of unjust discrimination in the transportation of money, it does not appear that it would be proper to impose the large expense that preparation of the information would involve. The request for such subpœna is also denied. There can be no doubt as to the jurisdiction of the Commission of any question of discrimination connected with the service of the express companies as carriers; but even if unjust and undue discrimination, free from criminal act, were shown to exist in their practices, it is clearly the duty of the Commission to go no further in destruction or disturbance of the business of the carrier, or in depriving the public of conveniences and facilities of value to it, than is necessary in order to remove the discrimination to the extent that it is unjust or undue. The extent, if any, to which defendants transport money for themselves for the purpose of settling balances in the carrying on of their financial operations has not been shown. The relationship of the cost of this service and of the charges made therefor has not been presented. There may or may not be some question of unjust discrimination involved therein, and complainants should be given an opportunity to present their proofs in support of this alleged discrimination, and the defendants should have an opportunity to answer same. The Commission shall therefore, unless advised by complainants of their desire to dismiss this proceeding, set it down in due time for hearing of further testimony along the lines herein indicated.

Telegraph and Cable Matters.

The T. & N.O. Ry. has opened telegraph offices at Cochrane and Charlton, Ont.

The C.P.R. has opened a telegraph office at Aylen, Ont., and closed its telegraph office at Naiscootyong, Ont.

O. E. Wood, who died at Ithaca, N.Y., Jan. 30, it is claimed took the first telegraph message by sound, and was the first superintendent of telegraphs in New York City.

The latest figures to hand showing the extent of the telegraph lines in operation in the Dominion are:

	Miles of line	Miles of conductors	Offices
G.N.W. Tel. Co....	11,775	48,652	1,360
C.P.R.....	10,294	51,009	1,150
Western Union....	2,638	9,849	219
Government Lines.	6,929	6,929	393

A board of investigation has been appointed to enquire into differences between the Great North Western Telegraph Co. and its operators as follows: Chairman, Judge McGibbon, Lambton; J. G. O'Donoghue, Toronto, on behalf of the men, and J. F. Mackay, Toronto, appointed by the Labor Department. The company declined to nominate a representative.

The Prime Minister informed the House of Commons Jan. 27 that the cost of construction of Marconi wireless stations in Canada to Mar. 31, 1907, had been $132,-641.65, and for maintenance, $200,198.48, while the expenditure for maintenance for the year ended Mar. 31, 1908, had been $56,232.56. There were 15 stations in operation, and during the year ended Mar. 31, 1908, there had been sent for and received by the Government 4,886 messages, containing a total of 57,583 words.

B. S. Jenkins, General Superintendent C.P.R. Telegraphs, Winnipeg, is reported to have stated that during the year additional wires will be strung through from Winnipeg to Calgary and over the Edmonton, Macleod and Crow's Nest lines; also on the main line west from Calgary, and that additional facilities will also be provided in the mountains for both telegraph and telephone communication between the mountain hotels. It is also stated to be the intention, as soon as the double-track east of Winnipeg is completed, to operate a superimposed telephone circuit between Winnipeg and Montreal, at the same time using it for telephone service between Winnipeg and Fort William for railway service only.

Referring to the recent order-in-council bringing into force the clause of the act amending the Railway Act passed last session of the Dominion Parliament, by which all telegraph companies are placed within the jurisdiction of the Board of Railway Commissioners, those associated with the principal companies concerned, state that there are at present no important telegraph questions for the Board's consideration. On the question of rates, etc., it is pointed out that there was never any complaint. They point out that rates here are as good, if not better, than in any other part of the world. Ten words for 25c., and a cent for each extra word, is a vast difference from 25c. and 2c. a word which is the charge in the U.S., and in this connection it is declared that there can be no change.

The Mackay Companies.

Following are extracts from the trustees' report: The Mackay Companies still owns the whole or part of the capital stock of 102 prosperous cable, telegraph and telephone companies in the U.S., Canada and Europe, including the entire capital stock of the Commercial Cable Co. and the various companies constituting the land line system known as the Postal Telegraph. The outstanding preferred shares of $50,000,000 have not been increased during the past two years, and the outstanding common shares of $41,380,400 have not been increased during the past four years. Dividends have been regularly paid on the preferred shares since April, 1904, at the rate of 4% per annum, payable quarterly, and on the common shares since Jan., 1905, such dividends having been increased to 4% per annum, payable quarterly, commencing July, 1906.

The physical properties of the subordinate companies are maintained in excellent condition. All reconstruction is charged to operating expense. All extensions, improvements and investments are being paid for from annual receipts and not by the issue of shares or bonds. The Mackay Companies has no debts. Owing to the agitation which has been going on, particularly in England and Canada, for government Atlantic cables and the reduction of rates, G. G. Ward, Vice-President and General Manager of the Commercial Cable Co., addressed an open letter to the Committee on Foreign and Insular Trade of the New York Board of Trade and Transportation, Jan. 14, in which he points out the attitude of the company on the subject.

During 1908 the earnings of the Commercial Cable Co. (which has paid regular quarterly dividends for over 19 years) show a decrease in gross receipts and net profits. This was due to the fact that in the spring, powerful steam fishing vessels operated their deep sea nets or trawls on the bottom of the ocean off the coast of Ireland, in such a manner as to disrupt the company's submarine cables, as well as those of other companies. A trawl is practically a crude mass of iron and wood, which is dragged along on the bottom of the ocean. The interruption so seriously affected public business that protests were made by commercial bodies, not only throughout the U.S., but in England. At the request of your trustees, the U.S. Government called the attention of the British Government to this reckless interruption of international communication and destruction of property. Thereupon the British Government appointed a commission of enquiry, which reported in the fall, recommending that stringent inspection be made of these trawling vessels. The interruptions still continue, and all the cable companies are still affected. Inspection is not enough. Your trustees believe that steam operated trawls should be prohibited in that particular part of the sea. The cable companies are still urging the British Government to adopt some real remedy.

Notwithstanding this decrease in the gross receipts and net profits of the Commercial Cable Co., and the depression of business which prevailed throughout the U.S. during the past year, growing out of the panic and financial crisis of the fall of 1907, the profits which the Mackay Companies might draw from the companies which it controls have increased. Economies, which have been rendered possible without impairing the service, have more than offset the decrease in gross receipts. More important still, the

NORTH AMERICAN LIFE

ANNUAL MEETING

REPORT FOR THE YEAR 1908

The Twenty-eighth Annual Meeting of the North American Life Assurance Company was held at its Home Office in Toronto, on Thursday, Jan. 28th, 1909, when the following report of the business of the Company for the year ended Dec. 31st, 1908, was presented:

CASH INCOME

The cash income for the year from premiums, interest, etc., was $1,897,078.28, showing the satisfactory increase of $81,980.59.

REDUCTION IN EXPENSE RATIO

The business has been conducted on a conservative basis, as is shown by a further reduction in the ratio of expenses to premium income, thereby placing the North American Life in the front rank of economically managed Canadian companies.

PAYMENTS TO POLICYHOLDERS

The amount paid on policyholders' account was $654,991.05, and of this sum $368,831.76 represents payments for Dividends, Matured Endowments and Investment Policies.

ASSETS

The Assets increased during the year by the sum of $854,762.01, and now amount to $9,590,638.09. The Assets continue to be, as heretofore, invested in the best class of securities available; a detailed list of these will be published with the Annual Report for distribution.

NET SURPLUS

After making ample provision for all liabilities and paying the sum of $124,771.26 for dividends to policyholders, the net surplus was increased to $876,214.15.

INSURANCE

The policies issued during the year, together with those revived, amounted to the sum of $4,465,224.00, making the total insurance in force $40,341,091.00.

AUDIT

A monthly examination of the books of the Company was made by the Auditors, and at the close of the year they made a thorough scrutiny of all the securities held by the Company. A committee of the Board, consisting of two Directors, made an independent audit of the securities each quarter.

L. GOLDMAN,
Managing Director.

J. L. BLAIKIE,
President.

The Annual Report, containing a detailed list of the securities, will be sent in due course to each policyholder.

service now rendered by the telegraph and cable systems, controlled by the Mackay Companies, is faster and more efficient than ever before. The financial results of the entire year serve to demonstrate the soundness of the plan on which the Mackay Companies is formed; namely, so wide a distribution of its interests as to minimize the effect of any decrease in profits from one particular source.

During the past year additional wires have been strung on one of the transcontinental land lines, and the service of the Postal Telegraph Company has been extended in the U.S.

The Mackay Companies' holdings of stock in the American Telephone and Telegraph Co., commonly known as the Bell Telephone Co., are nearly six times larger than those of any other stockholder.

During the past year, H. V. Meredith, Montreal, was elected a trustee of the Mackay Companies, thereby giving to the Canadian shareholders two representatives, the other being R. A. Smith, Toronto.

Dominion Government Telegraph System.

The total number of miles of telegraph lines under the control of the Dominion Department of Public Works, according to the report for the year ended Mar. 31, 1908, just presented to Parliament, was 7,225, comprising 393 offices, which transmitted during the year a total of 105,000 messages. All the lines were maintained in good order and worked fairly satisfactorily. No new lines of any considerable length were constructed during the year, but a number of extensions were made to existing lines in the Maritime Provinces, in the province of Quebec, particularly in the Chicoutimi district, and in Saskatchewan and Alberta. The cost of maintenance exceeded the revenue, but the advantages accruing to the portions of the country served by these lines more than compensate for the expense borne by the Dominion. The greater portion of the Government telegraph lines is constructed through very sparsely inhabited districts and along the Gulf of St. Lawrence, where private companies would not obtain sufficient revenue to justify the building and operation of a service. As the country is opened up and railways built many of the Government telegraph lines will necessarily be abandoned or perhaps transferred to the control of railway and other companies. In several instances it has been found that the public interest is best served by transforming lines originally constructed as telegraph into telephone lines, the operation of which are more simple and fulfil to a greater degree the needs of the community. In some cases the dual operation of the line for both telegraph and telephone was attempted, but the results can hardly be said to be satisfactory.

The total revenue from the lines was $122,432.53, and the expenditures $386,567.34. Signal service messages, meteorological service messages, and reports, and fisheries bulletins are handled free of toll. The number of officers at the different stations is 393.

A.R.E. & M. of W. Association.

At the American Railway Engineering and Maintenance of Way Association's meeting in Chicago, Mar. 16, the President, W. McNab, Principal Assistant Engineer G.T.R., read an address, the principal portion of which follows:

"Your Association has completed a decade of active work, and during that period has made an enviable record, and now occupies a prominent position in the front rank of railway organizations and engineering societies. The advantage gained by this status turns on the beneficial influence it exerts in connection with the objects of the Association—the advancement of knowledge pertaining to the scientific and economical location, construction, operation and maintenance of railways—an influence which has been imparted to the railway world in a degree of usefulness, universal in its scope and almost unparalleled in its import. This feature should be especially gratifying to the members on this particular anniversary. More especially should this appeal to us, as few (if any) kindred bodies have, within the same period or similar length of time, acquired the growth, stability, practical usefulness and, in general, the high standing attained by this Association.

"In modern days, the science of railway engineering occupies a wide range in the domain of civil engineering in the generic sense. This fact was appreciated even in the early days of railway construction, by the compilers of the lexicons of that period, the term 'civil engineer' being defined by them as 'one who plans railways, harbors, docks, etc.'—railways apparently being given first place in importance. From these early days down to the time when the present classification of expenditure was introduced, each railway was practically a law to itself in regard to physical standards, as well as to clerical and accounting methods considered necessary for its proper care. In the course of time, however, the field covered by what is comprehended under the term railway engineering, became so enlarged and so important, that direct supervision in detail from one source was found inadequate, even though the authority enjoyed the broad title of civil engineer. During that period there was, in a more or less degree, a lack of proper appreciation of the value of technical education and training as an adjunct to the practical working of the railway, and the results of experiments made from time to time by certain railways, individually, to establish a justification for proposed changes were, in regard to real value, not altogether satisfactory to the railway world in general. The experience gained from such investigations, desirable or undesirable as the case might be, was often acquired only after the expenditure of large sums of money, direct or indirect, and the ascertained facts were jealously guarded by the interests concerned. To the railway world, however, the results of such investigations, even if known to be of benefit, did not meet all the requirements essential to a comprehension of what was expedient from an economic standpoint, and the lesson which should have been taught, viz., that as much, if not more, valuable experience is to be acquired through failures rather than from successes, was not properly brought home.

A. SHIELDS,
Master Mechanic Canadian Northern Railway.

"The text-books upon particular subjects connected with railway engineering in use in earlier days, were produced under private or individual auspices. As a general rule they were ably edited, yet the perspective embraced was circumscribed by reason of existing circumstances, and the value of their use was necessarily limited on account of lack of systematic re-issue of such volumes with supplements to meet changing conditions. Special articles upon railway technical matters, which appeared from time to time, lacked the value of full discussion, and information thus imparted did not meet requirements; therefore, the interest created could only be looked upon as more or less temporary and superficial. Railway engineering, as a great department of knowledge, eventually came to be so subdivided in order to meet the conditions of the times, that each subdivision practically developed into a distinct science, yet each department retained possession of all the elements tending to form a harmonious whole. Evolution in this respect, however, progressed slowly, and the methods and standards in use were in many instances adhered to too long, partly because their chief recommendation lay in the fact that they were time-honored, or that there was a lack of knowledge of better substitutes. Nowadays, fewer text-books on details of railway construction and maintenance emanate from private sources, for the output of your Association, viz., the conclusions and principles of practice emanating from its various committees, which eventually find their way into the Manual of Recommended Practice, have become the source of appeal in their respective spheres. If reference be made to the discussions preceding the adoption of such conclusions and principles of practice to be found in our Proceedings, it will be noted that every detail has been thoroughly covered. The bibliography of the Association is, in consequence, liberally made use of to advantage, not only by the members, but by the executive officers of our railways, as being practically authoritative on railway technical details. In this general connection, we are amply justified in stating that there need be no hesitancy in accepting as good modern practice, based upon scientific methods, the general principles which are recommended therein. You are all aware that before any of the various recommendations are adopted and disseminated, they have been thoroughly discussed, and voted upon in open convention by the most competent and up-to-date body of railway engineers to be found anywhere, and in no other organization is there a greater degree of care exercised to guard against inconsistencies than is exhibited in our own.

But while there is every reason to be proud of our achievements during these past ten years, we should not rest content, but endeavor to keep our work up-to-date by eliminating from our Recommended Practice what in course of time has become obsolete, and perfecting that which is considered worthy of retention, in order that our recommendations may be safely relied upon as representing the best practice that can be devised for the time being.

In no quarter of the world do the diversities of nature, both physical and climatic, exist in a greater degree than on the North American Continent, and for this reason the problems confronting railway engineers afford ample opportunity for the exercise of that particular knowledge which your Association was formed to advance, namely, that per-

Galena-Signal Oil Company

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,
PRESIDENT

taining to the scientific location, construction, operation and maintenance of railways. Great progress has been made in that respect since the formation of the Association ten years ago. It is realized more fully that the railway problems coming under our immediate purview are being brought under the influence of common conditions and tendencies. We meet the propositions which ever present themselves with the knowledge that conditions to-day are not to be governed entirely by the experience acquired in earlier days. It is our endeavor, also, to realize how, in carrying out the objects of the Association, true economics require proper discernment between what is expedient and what is essential, as well as a clear insight into what will tend to the permanent commercial success of the companies by which we are respectively employed. We are also striving, and not unsuccessfully, for a better understanding of the relationship of capital invested to maintenance and operating expenses. In this respect it is borne in mind, that as the ratio of progress of all kinds is ever increasing, and that as railways are commercial undertakings, the various factors which produce the greatest permanent profit per cent. of the expenditure, as well as those which have an adverse effect, must be carefully studied. We realize more and more the value of a free exchange of experiences and the practical uses that such exchange can be put to, as well as the results brought about by scientific analysis of theories that have not yet been put to experimental tests."

Railway Statistics for 1907-1908.

In submitting his annual report of the steam railway statistics for the year ended June 30, 1908, J. L. Payne, Comptroller of Railway Statistics, says the various tables are based upon schedules and classifications which were put into effect in 1907. With the introduction of these new forms it is claimed perfect uniformity was secured in the method of preparing railway statistics in both Canada and the United States. During the year it was found necessary to widen some of the classifications, notably with respect to operating expenses, and these will be applied to the statistics for the twelve months now current. It is hoped, he adds, further changes may not be called for in the near future.

The total railway mileage in Canada on June 30, 1908, was 22,966, an addition of 514 miles as compared with 1,099 for the year ended June 30, 1907. There were, however, 4,327 miles of line reported as being actually under construction, and it is now known that upwards of 750 miles were put in operation very shortly after June 30, 1908. The distribution by provinces is as follows:

	Miles	Increase
Ontario	7,932.90	294.99
Quebec	3,573.65	69.51
Manitoba	3,110.91	36.45
Saskatchewan	2,081.30	56.44
British Columbia	1,732.83	64.78
New Brunswick	1,509.36	18.78
Nova Scotia	1,344.05	2.58
Alberta	1,323.02	.....
Prince Edward Island	267.50	.....
Yukon Territory	90.91	0.31

The total increased mileage, however, is partly offset by the abandonment of some tracks, so that the net increase is 514 miles. During the year there was an increase in second track of 144 miles, bringing the total up to 1,211; and an increase of 454 miles of terminal, yard and siding tracks. The aggregate of all tracks in the Dominion was 28,600 miles, against 27,796.80 miles at June 30, 1907.

The capital invested is $1,239,295,013, of which $607,425,349 is represented by stocks, and $631,869,664 by bonds and other funded debt. These figures show an increase of $18,856,758 in stocks, and of $48,500,447 in bonds, etc. The figures, however, do not include the cost of the Intercolonial and the Prince Edward Island Railways, owned by the Dominion Government; the Temiskaming and Northern Ontario Ry., owned by the Ontario Government, and the New Brunswick Coal and Ry. Co.'s line, owned by the New Brunswick Ry., or the cost to June 30 of the National Transcontinental Ry. between Moncton and Winnipeg. The expenditures on these lines total $325,345,031, making a grand total of $1,564,640,044. The amounts include cash grants in aid of railways, but it has been found impossible to estimate the value of the lands granted to aid railway construction. In regard to stock and bond liability the report states that a revision of the statistics is necessary, and may be undertaken during the current year, as some of it is no longer a legal liability at all; and in other cases it has disappeared altogether, or appears in some other form. During the year $4,374,323 was added to the amount granted by way of subsidies to railways, $4,221,727.30 being by the Dominion Government, $68,284 by the Provincial Governments, and $84,311.70 by municipalities. The Dominion Parliament and Provincial Parliaments have guaranteed railway companies' bonds to the amount of $58,920,551. The acreage of land voted by the Dominion and the Provincial Parliaments totals 52,284,183 acres.

The number of passengers carried during the year was 34,044,992, an increase of 5.90%; the number of passengers carried one mile was 2,081,960,864, against 2,049,549,813; the number of passengers carried one mile per mile of road was 90,650, an actual decrease of 636 in the density of passenger traffic for the year; the number of passengers carried per mile of railway was 1,482, an increase of 51; the average receipts per passenger was $1.921, an increase of .009 cent; the average passenger journey was 61 miles, and the average number of passengers per train 54. The passenger train mileage was 31,950,349, against 30,220,461 in 1906-07; the mixed train mileage was 6,210,807, against 5,971,414 for 1906-07.

The number of tons of freight hauled was 63,071,167, a decrease of 1.24%; the average receipts were .723 cent, against .812 in 1906-07; the number of tons hauled one mile was 12,961,512,519, against 11,687,711,830; the density of freight traffic as shown by the number of tons hauled one mile per mile of line was 564,374, against 520,564; average distance hauled 206 miles, against 183; average number of tons per train 278, against 260; revenue freight train mileage 40,476,370, against 38,923,890; mileage of loaded freight cars 748,924,820, of which 400,494,410 miles were north or east, and 348,430,410 miles were south or west; mileage of empty freight cars, 284,944,529; total freight car mileage, 1,033,869,349. The commodities carried were classified as follows:

	1907-8	1906-07
Products of mines	22,636,227	18,460,172
Products of forests	12,912,226	10,229,635
Products of agriculture	9,396,967	9,521,661
Manufactures	6,655,719	7,974,641
Products of animals	2,472,359	2,469,266
Merchandise	2,008,267	2,309,084
Miscellaneous	6,938,135	5,533,426

The total of the figures for 1907-08 shows a shortage of 51,267 tons when compared with the table showing the total freight carried. Of the total tonnage relating to commodities 38,821,418 tons were reported as originating on the line, and 24,198,482 as having been received from connecting roads.

The gross earnings were $146,918,313.61, an increase of $180,098.93, the distribution being as follows: Passenger service, 31.89%; freight service, 63.81%; stock yards, elevators, etc., 0.28%; car mileage, switching, etc., 0.19%; telegraphs, rents and other sources, 3.83%. Receipts from freight service, stock yards, elevators, etc., decreased $1,583,557.16, while receipts from passenger service, car mileage, switching, telegraphs, rents, etc., increased $1,763,656.09, the net increase being $180,098.93. The gross earnings represented an average of $6,389.37 per mile of railway as compared with $6,535.64 in 1906-07.

The operating expenses aggregated $107,304,142.51, an increase of 3.42%; the distribution being as follows: Way and structures, 19.37%; maintenance of equipment, 18.89%; conducting transportation, 58.23%; general expenses, 3.51%. The cost of conducting transportation increased $5,160,727.33, while each of the other items showed decreases amounting to $1,604,257.09, leaving a net increase of $3,555,470.24. The principal increases in conducting transportation were on account of wages and the cost of fuel. The operating expenses averaged $4,672.30 per mile of line, an increase of $51.40 a mile; the operating expenses per train mile of all trains was $1.364, a decrease of .017 cent. The cost of running a train one mile has increased from $0.779 in 1898-99, to $1.364 in 1907-08, while the gross earnings per train mile have only increased from $1.192 in 1898-99, to $1.869 in 1907-08. The percentage of operating expenses to gross earnings was 73.04, an increase of 2.34%.

The net earnings were $39,614,171.10, against $42,989,537.41, a decrease of $3,375,366.31. The net earnings were equal to $1,724.90 per mile of line, as compared with $1,941.73, a decrease of $189.83. On a capitalization of $1,239,295,013, representing the stock and bond issue, the net earnings would yield a dividend of 3.19%. There were, however, 29 out of 87 reporting railways which showed a deficit on the year's operations.

Railways Outside Dominion Jurisdiction.

There appears to be considerable doubt as to what railway companies are not under the Board of Railway Commissioners' jurisdiction. At the 1908 parliamentary session a return was made to the Senate by the Department of Railways transmitting a list, prepared in the Commission's offices, of companies which it was stated were not under the Board's jurisdiction. This list was published in our Oct., 1908, issue, and we were shortly afterwards informed by the Board's Secretary that it was incorrect. Subsequently the Secretary furnished us with a revised list, which was published in our Mar. issue, pg. 209. He has since advised us that the Moncton and Buctouche Ry. is not subject to the Board's jurisdiction, and should be added to that list.

In the list referred to as published in our Mar. issue, there is only one electric railway, viz., the Hamilton, Grimsby and Beamsville. Being of the opinion that there are a number of other electric railways which are not under the Board's jurisdiction, we communicated further with the Secretary, who advises us that the Board's Law Clerk does not know of a complete list of railways subject to the Board's jurisdiction, and of those not subject to it, and that therefore the list published in our Mar. issue, with the addition of the Moncton and Buctouche Ry. as made above, will have to be taken as approximately correct.

The Interstate Commerce Commission has decided the Act to Regulate Commerce, that in complaints for recovery of damages caused by unreasonable or unduly discriminatory rates, the cause of action accrues when the payment is made; in any other complaints for recovery or damages for alleged violations of the act to regulate commerce of which the Commission has jurisdiction, the cause of action accrues when the carrier does the unlawful act or fails to do what the law requires.

STEAM RAILWAY STATISTICS FOR YEAR ENDED JUNE 30, 1908.

In the following table the column headed gross earnings includes passenger and freight earnings, as well as miscellaneous earnings; the next four columns give the operating expenses classified under their various headings, while the last gives the net earnings, which is arrived at by deducting the totals of the four columns referred to from the figures in the gross earnings column. The minus mark (—) before figures in the net earnings column shows that there was a deficit in the operations of the line to the extent of the figures given. The numbers in brackets—thus (1)—after the name of a railway refer to notes on page 243. The cents have been omitted in all cases, and the figures in the totals shows the aggregate earnings, etc., including the cents, omitted from the detailed items.

Name of Railway	Mileage	Passenger Earnings	Freight Earnings	Gross Earnings	Maintenance of Way and Structures	Maintenance of Equipment	Conducting Transportation	General Expenses	Net Earnings
Alberta Ry. & Irrigation Co. (1)	111.82	$ 59,424	$ 134,622	$ 204,094	$ 77,239	$ 19,642	$ 65,658	$ 15,525	$ 26,027

THE "DETROIT"

CAR DOOR

This is positively the only door that answers all requirements

The track forms a weather-proof door hood.

Hanger cannot be knocked off by being side scraped.

Tread of track and hangers protected from the weather.

Requires no tin or galvanized iron or other fixtures between top of door and bottom of track to make door weather-proof.

Runway of track inclined slightly downward, producing friction, making door always hang close to car and always in position.

It is stronger than the combined strength of all other doors—therefore, the cheapest at any price.

Let us send you full particulars

Notes to Steam Railway Statistics.

(1) The Alberta Railway and Irrigation Co. has trackage rights over 1.60 miles of the C.P.R.

(2) The Algoma Central and Hudson Bay Ry., and the Manitoulin and North Shore Ry., are owned by the Lake Superior Corporation. The latter railway has 1.38 miles of second track.

(3) The Atlantic, Quebec and Western Ry. has parliamentary power to take over the Atlantic and Lake Superior Ry., but the amalgamation has not been completed.

(4) The Bay of Quinte Ry. operates 19 miles under trackage rights. The Thousand Islands Ry. is owned by the same interests.

(5) Mackenzie, Mann & Co. (Ltd.) interests own or control and operate the following railways: Canadian Northern Ry.; Canadian Northern Ontario Ry.; Canadian Northern Quebec Ry.; Edmonton, Yukon and Pacific Ry.; Halifax and Southwestern Ry.; Inverness Ry. and Coal Co.; Quebec and Lake St. John Ry.; Schomberg and Aurora Ry. The Canadian Northern Ry. operates 349.44 miles under lease and 255.50 miles under contract. The Canadian Northern Ontario Ry. has trackage rights over 4.00 miles, into the Union Station, Toronto. The Edmonton, Yukon and Pacific Ry. earnings, etc., are included in those of the C.N. Ry. The Halifax and Southwestern Ry. has trackage rights over 2.30 miles of other company's lines.

(6) The C.P.R. mileage includes 3,018 miles of lines of proprietary companies; 1,294.50 miles of lines operated under lease; 168.40 miles operated under contract, and it has trackage rights over 93.90 miles of lines of other companies. It has 209.90 miles of second track. The C.P.R. returns include the earnings and expenses of the Esquimalt and Nanaimo Ry. The lines operated by the C.P.R. include the Kingston and Pembroke Ry. and the Montreal and Atlantic Ry., which report separately. The C.P.R. owns, with the New York Central and Hudson River Rd., the Toronto, Hamilton and Buffalo Ry. The Montreal and Atlantic Ry. mileage includes 60.50 miles of leased lines. It has 6.40 miles of second track.

(7) The Caraquet Ry. mileage includes 16.78 miles of lines operated under lease.

(8) The Central Ontario Ry. figures contain the returns of the operation of the Marmora Ry. and Mining Co., the line of which company it operates under lease.

(9) The Delaware and Hudson Co. owns and operates the Napierville Junction Ry., and the Quebec, Montreal and Southern Ry.

(10) The Dominion Atlantic Ry. mileage includes 32 miles of line operated under lease; it has also trackage rights over 14.51 miles of lines of other companies.

(11) The G.T.R. mileage includes 161.30 miles operated under lease. It also has trackage rights over 9.87 miles of other companies' lines. It has 697.16 miles of second track. The earnings and expenses of the Magnetawan River Ry. are included in those of the G.T.R. The G.T.R. owns and controls the Canada Atlantic Ry., St. Clair Tunnel, and the G.T. Pacific Ry., the latter of which had not commenced operations during the last financial year. It also controls the Central Vermont Ry., which operates the Montreal and Province Line; the Montreal and Vermont Junction Ry., and the Stanstead, Shefford and Chambly Ry. The Canada Atlantic Ry. mileage includes 59.85 miles of leased lines. It has 0.88 mile of second track.

(12) The Great Northern Ry. (U.S.) owns and operates the following lines in Canada: Brandon, Saskatchewan and Hudson Bay Ry.; Midland Ry. of Manitoba; Crow's Nest Southern Ry.; Kaslo and Slocan Ry.; Red Mountain Ry.; Nelson and Fort Sheppard Ry.; Vancouver, Victoria and Eastern Ry. and Navigation Co.; New Westminster Southern Ry.; Victoria Terminal Ry. and Ferry Co., and Victoria and Sidney Ry. The Bedlington and Nelson Ry. mileage includes 8.67 miles operated under lease. The Nelson and Fort Sheppard Ry. mileage includes 4.70 miles of leased lines. The New Westminster Southern Ry. has trackage rights over 1.48 miles.

(13) The Intercolonial Ry. has trackage rights over 40.30 miles of other companies' lines. It has 16 miles of second track.

(14) The Kent Northern Ry. has as an extension, the St. Louis and Richibucto Ry., which line has not been operated regularly for some years. Whatever traffic there may have been over it is included in the K.N. Ry. earnings and expenses.

(15) The Lake Erie and Detroit River Ry. is controlled by the Pere Marquette Rd., and it operates under lease the London and Port Stanley Ry., which is practically owned by the city of London, Ont. The P.M. Rd. has trackage rights over 142.13 miles of other companies' lines, and the London and Port Stanley Ry. over 0.42 mile.

(16) The Maine Central Rd. owns and operates the Hereford Ry. (including the Dominion Lime Co.'s line), and the Princeton Branch of the Washington County Ry.

(17) The Massawippi Valley Ry. is operated by the Boston and Maine Rd.

(18) The Morrissey, Fernie and Michel Ry. mileage includes 5.03 miles of leased lines.

(19) The New York Central and Hudson River Rd. owns the Ottawa and New York Ry.; the St. Lawrence and Adirondack Ry., and controls the Toronto, Hamilton and Buffalo Ry., which it owns jointly with the C.P.R. It controls the Rutland Rd., which owns the Rutland and Noyan Rd., and also controls the Michigan Central Rd., which controls the Canada Southern Ry. This latter line has 242.98 miles of second track. The Ottawa and New York Ry. has trackage rights over 1.90 miles. The St. Lawrence and Adirondack Ry. mileage includes 13.30 miles of leased lines. It has also trackage rights over 8.92 miles of the lines of other companies.

(20) The Quebec Ry., Light and Power Co. mileage includes 2.00 miles operated under contract. It has six miles of second track.

(21) The Toronto, Hamilton and Buffalo Ry. has trackage rights over 4.36 miles of other companies' lines. It has 2.04 miles of second track. It is owned by the New York Central and Hudson River Rd., and the C.P.R.

(22) The Wabash Rd. does not own any track in Canada, but operates over G.T.R. tracks under lease.

(23) The following lines were either not operated during the financial year, or did not make returns: Albert Southern Ry.; Bessemer and Barry's Bay Ry.; Bruce Mines and Algoma Ry.; Hillcrest Ry., Coal and Coke Co.; International Ry. of New Brunswick; Pontiac and Renfrew Ry.; Quebec Bridge and Ry. Co.; and Vancouver Copper Co. (Lenora-Mount Sicker Ry.).

BARRETT JACKS

FOR RAILWAY AND CONTRACTORS

FOR HEAVY WORK. THE LEAST EXPENSIVE AND QUICKEST JACKS

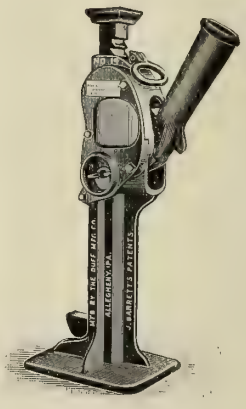
TRIP JACK, 15 TON

¶ TRIP JACKS for ordinary use. Capacities ranging from 10 to 15 tons. They are double-acting, that is, they lift the load on both the up and down movement of the lever. A light weight jack, positive in lifting, in holding and tripping.

10-TON AUTO LOWERING JACK

¶ AUTOMATIC LOWERING JACKS differ from the trip jacks by lowering the load instead of dropping it. Double-acting. Capacity, 10 - 20 tons.

LIGHT, STRONG, QUICK



15-TON AUTO LOWERING JACK

Judgment re Average Demurrage.

6264. Feb. 8.—In the matter of the complaint of the Wallaceburg Sugar Company, Ltd., of Wallaceburg, Ont., complaining that the effect of the operation of certain of the Canadian Car Service Rules is unfair and burdensome to large shippers; and applying for an order directing the adoption of what is known as the "Average Plan of Car Service." Upon the hearing of the complaint and counsel for the Grand Trunk, Canadian Pacific, and Michigan Central Railway Companies, the evidence adduced, and what was alleged—it is ordered that the application be, and it is hereby, dismissed.

D'Arcy Scott, Assistant Chief Commissioner, gave the following judgment:

The average demurrage plan, which the applicant seeks to have established, may be described as the giving of credit of free time by a railway company for use of a freight car to a consignee, when the amount of time he takes to unload the car is less than the amount of time allowed to do so by the Car Service Rules; which credit, or spare time, is set off against excess time for the use of other cars for which the railway company now charges the consignee demurrage. At the hearing of this case, it was urged by the applicant, that as the average system existed in Michigan where some of its competitors were, that it should be adopted in Canada, at least in so far as the sugar refiners were concerned. It was also stated that the Michigan refiners were able to purchase their raw material in Canada, but the Canadian refiners were denied the privilege of purchasing in Michigan; that the United States manufacturer was protected by a duty of $1.77 per 100 lbs., while the protection granted the Canadian manufacturer was but 83c., and that, therefore, some special consideration should be granted the applicant. I cannot see how the fairness or the justice of the system upon which charges for car service in Canada are made is affected by these conditions which surround the sugar refiners of this country, or why, because such conditions exist, a radical change in the system should be made.

Mr. Gordon, General Manager of the Wallaceburg Company, told us that while they can regulate the number of cars of beets ordered per day from the farmers, they cannot control the number of cars per day which the railway companies may deliver, and that as a result they are sometimes "swamped." He said that, on an average, they unloaded 22 cars a day during the past year, but have unloaded as many as 90 cars in a day. About 60% of the beets consumed at the refinery are hauled by rail; the haulage of the other 40% being about equally divided between water transports and teams. That the company is capable of handling a fair number of cars within the time allotted by the Canadian Car Service Rules is quite apparent from the statement submitted with its application, dated Nov. 11, 1908. It shows that during a certain period 1,051 cars were unloaded, and that the average time per car was 31½ hours. Of this number of cars, 855 were not held longer than the 48 hours' free time allowed for unloading under the Car Service Rules. This proves that, under ordinary circumstances, 48 hours is sufficient time to be allowed for unloading a car of beets.

If special circumstances occur, for which the consignee is not responsible, which prevent him from unloading the cars delivered within the allowed free time, the Car Service Rules provide that demurrage shall not be charged for necessary additional time. For instance, allowance of extra time is made when cars are tendered to the consignee under conditions for which the railway company is responsible in numbers beyond his ascertained reasonable ability to unload, or where the weather is inclement and unsuitable for unloading. These rules are interpreted, not by the railway company interested, but by the Canadian Car Service Bureau, whose Manager, Mr. Duval, stated, under oath, that the rules are interpreted most liberally to the consignee, and that the object of the Bureau is to secure the quick release of cars, rather than the collection of demurrage for the railways. This can be well understood even from the railway point of view, because while the car is held the company can only get $1 per day for it, whereas the earning capacity of a freight car in service is about three times that amount.

The average system suggested, in my opinion, is not justifiable under the contractual relations, which exist between the consignor or consignee (as the case may be) and the railway company. The contract of carriage is, that the railway company will carry the goods to the point where they are to be delivered to the consignee, who in turn is to unload and release the car with all reasonable dispatch. For more certainty and uniformity of practice, rules have been adopted, which say in effect that "reasonable dispatch" for unloading shall not, in the case under consideration, exceed 48 hours. If a man exceeds this reasonable time in unloading, he is penalized by a charge of $1 per day for the extra time he may hold the car. Such a provision is in the public interest, because it makes a consignee prompt in releasing cars consigned to him, and thus increases the supply of available cars for the shipping public. In my opinion, the average system might have the effect of making a consignee dilatory about unloading so long as he had free time to his credit, and if he had not free time to his credit the circumstances would be the same as they are under the present rules.

The Canadian Car Service Rules have only been in force since March 1, 1906, and it has taken some time to get the public to understand them. They may be defective in some details and require to be amended, but I think they are founded on sound principles, which should not be departed from. The uncontradicted evidence of Mr. Duval, of the Car Service Bureau, to the effect that cars are being released more quickly by consignees under these rules than was done formerly, proves that the desired result is being accomplished. The intention is that, under the Car Service Rules, each car shall be dealt with by itself and without reference to the movements of other cars. This insures equal treatment of the smaller shipper or consignee with the larger one. But, if the average plan were in force, I can well see that an injustice would be done the small dealer by giving an advantage or preference to the dealer who had a large number of cars to unload. Suppose a dealer with a large capacity for storage received 50 cars of merchandise, which under the rules he had two days to unload, and unloaded them all the first day, he would then have 50 days to his credit. The next day, he and a small competitor each received one car. The small competitor would have to unload in two days or be penalized, while the other could hold his car for 50 days' free time, which might prove to be of very material advantage. It may be said that this is an extreme case. It doubtless is, but it shows how the average demurrage plan might work out unless there were limitations upon it. Mr. Gordon suggested that the plan might be adopted for those in his line of business only. I do not think it would be advisable at this early date to start making exceptions to the general principles laid down in the car service order, which has not yet been in effect for three years. These principles are, in my opinion, sound, and should not be interfered with. If the applicant cannot get redress under the rules from the Car Service Bureau, he may apply to this Board, and his complaint will be heard. I am, therefore, of opinion that this application should be dismissed.

April Birthdays.

Many happy returns of the day to—

J. A. Armstrong, Chief Train Dispatcher C.P.R., Ottawa, born at South Durham, Que., April 6, 1863.

F. J. Balch, Assistant General Freight Agent Ottawa and New York Ry., Ottawa, born at Massena, N.Y., April 15, 1870.

Adam Brown, formerly President Wellington, Grey and Bruce Ry. (now G.T.R.), Vice-President G.N.W. Telegraph Co., and Postmaster of Hamilton, born at Edinburgh, Scotland, April 3, 1826.

A. E. Edmonds, District Passenger Agent C.P.R., Detroit, Mich., born at Woodstock, Ont., April 8, 1866.

J. H. Flock, K.C., Honorary Counsel Canadian Ticket Agents' Association, London, Ont., born at Toronto, April 6, 1834.

B. W. Folger, Manager Niagara Navigation Co., Toronto, born at Kingston, Ont., April 8, 1872.

W. E. Fowler, Master Car Builder C.P.R., born at Weymouth, Dorsetshire, Eng., April 27, 1856.

F. A. Gascoigne, Superintendent Car Service, C.P.R. Eastern Lines, Montreal, born at Gosport, Hants, England, April, 1866.

J. P. Gay, Manager G.T. Despatch Fast Freight Line, Detroit, Mich., born at Hamilton, Ont., April 26, 1857.

B. C. Gesner, formerly Air Brake Inspector I.C.R., now travelling representative Galena Signal Oil Co., born at Cornwallis, N.S., April 23, 1859.

J. Murray Gibbon, Advertising Agent C.P.R., London, Eng., born at Udewella, Ceylon, April 12, 1875.

J. M. Horn, city freight agent Canadian Northern Ry., Winnipeg, born at Schoots, Lanarkshire, Scotland, April 12, 1880.

B. S. Jenkins, General Superintendent C.P.R. Telegraphs, Winnipeg, born April 8, 1859.

J. Kyle, Assistant Master Mechanic Canadian Northern Ry., Edmonton, Alta., born at Toronto, April 11, 1877.

J. B. Lambkin, Assistant General Passenger Agent Intercolonial Ry., Halifax, N.S., born at Quebec City, April 5, 1858.

J. S. Lawrence, ex-Superintendent C.P.R., Medicine Hat, Alta., born at Toronto, April 9, 1863.

D. McNicoll, Vice-President C.P.R., Montreal, born at Arbroath, Scotland, April 7, 1852.

P. Mooney, General Freight and Passenger Agent Halifax and Southwestern Ry., Halifax, N.S., born at St. Catherines, Que., April 19, 1871.

R. S. Richardson, Assistant Superintendent C.N.Q.R., Montreal, born at Napanee, Ont., April 9, 1865.

W. A. Ritchie, District Superintendent The Pullman Co., Montreal, born at Edinburgh, Scotland, April 13, 1854.

E. W. Smith, Superintendent Dining and Parlor Car Service, G.T.R., Toronto, born at North Bridge, Mass., April 21, 1869.

W. S. Tilston, Chief of Montreal Board of Trade Transportation Bureau, born at Manchester, Eng., April 14, 1877.

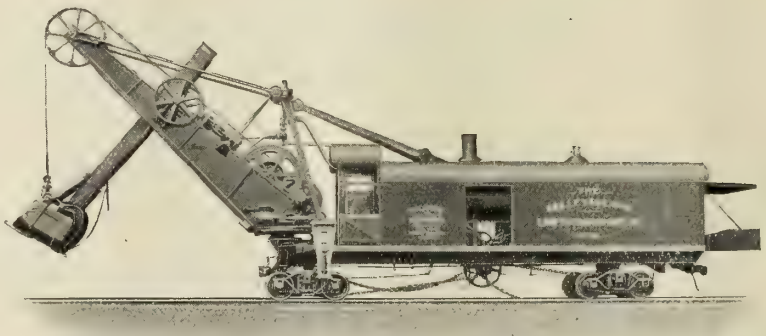
W. Wainwright, Fourth Vice-President G.T.R., Montreal, born at Manchester, Eng., April 30, 1840.

W. Woollatt, ex-General Superintendent Buffalo Division Pere Marquette Rd., Walkerville, Ont., born at Weedon, Hertfordshire, Eng., April 2, 1855.

LOCOMOTIVES

Pacific Type Passenger Locomotive built for the Intercolonial Railway. Total weight of engine, 194,500 pounds. Weight on driving wheels, 132,000 pounds; diameter of driving wheels, 72 inches. Boiler pressure, 200 pounds. Maximum tractive power, 29,200 pounds.

STEAM SHOVELS



A high-class and powerful machine, absolutely reliable under all conditions of service.

MONTREAL LOCOMOTIVE WORKS, LTD.

BANK OF OTTAWA BUILDING, MONTREAL, CANADA.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alberta and Great Waterways Ry.—An act has been passed by the Alberta Legislature incorporating a company with this title to construct a number of lines in the province. By a resolution passed by the Legislature, Feb. 25, the Government is authorized to guarantee the company's bonds to the amount of $20,000 a mile for the construction of the main line from Edmonton to Lac la Biche and Fort McMurray, 350 miles; and an additional amount of $400,000 to provide terminals at Edmonton. W. R. Clarke, of Kansas City, Mo., is one of the principal promoters of this railway; and he is reported to have given assurances to the Legislature that work preparatory to actual construction will be gone on with at once, and that contracts will be let at an early date. The country through which the line will run is reported to be rich in minerals and the railway would give connection between Edmonton and the great waterways of the Mackenzie River basin, on to the Arctic ocean.

J. A. L. Waddell, C.E., Kansas City, Mo., in an interview in Vancouver, B.C., Mar. 3, said: "We have just secured a contract for undertaking all the engineering work of the A. and G. W. Ry. It is our intention to place survey parties in the field within 60 days, and this season will see construction well advanced from the Edmonton end. The entire line will be completed and in operation within three years. The charter had been secured by W. R. and D. O. Clarke, of Kansas City, Mo., and the capital will be supplied mainly from Europe. The route from Edmonton will run north by east for 125 miles, to a point west of Lac la Biche, and thence straight to Fort McMurray.

Calgary and Knee Hill Ry.—An act has been passed by the Alberta Legislature extending the time within which this projected railway may be constructed. Starting from Calgary, it is proposed that the line shall proceed northeasterly for about 60 miles through the Carbon, Rosedale and Knee Hill districts. While the bill was going through committee, it was stated that no one interested in the line—surveyors, engineers or any one else—had been over the route since 1907, and that nothing whatever was being done towards construction.

Canada Central Ry.—The Ontario Legislature is being asked to pass an act extending the time for the commencement and completion of the company's authorized railways. Ryckman, Kerr and MacInnes, Toronto, are solicitors for the company.

Canadian, Liverpool and Western Ry.—The application to the Dominion Parliament for the incorporation of a company with this title met with considerable opposition before the Railway Committee of the House of Commons. There was general opposition to the granting of extensive rights over water powers, it being argued that the main object of the promoters was to secure control over these, and that the power to construct railways, and to operate lines of steamships was being sought in order to the more easily secure Dominion legislation. There was also a particular opposition on the ground that the powers asked for could be granted by the Quebec Legislature. After a lengthened discussion, some protective clauses were inserted by agreement, and the clause declaring the works to be for the general advantage of Canada was carried by 50 to 20. The bill was finally reported as amended. (Mar., pg. 171.)

Central Ry. of Canada.—Application is being made to the Dominion Parliament for an act extending the time within which this projected railway may be constructed; increasing its bonding powers; confirming agreements with the Ottawa Valley Ry., the Ottawa River Ry., and the Montreal Bridge and Terminal Co.; authorizing the company to connect its line with railways on the south side of the River St. Lawrence by means of a tunnel and to provide terminal facilities in or near Montreal for the use of the company and other railway companies. H. W. Raphael, Montreal, is acting Secretary.

Crow's Nest and Northern Ry.—A press report states that the company will complete the first 12 miles of its line from Crow's Nest to Crown, B.C., during the current year. C. L. Butterfield, Spokane, Wash., is Chief Engineer.

Flathead Valley Ry.—The British Columbia Legislature has passed an act incorporating a company with this title for the purpose of constructing a railway from Corbin on the Eastern British Columbia Ry., following the east fork of the south fork of the Michel Creek, southerly to the summit between that creek and a tributary of the Flathead River; thence to the Flathead River, and along the valley of that river, on to the International boundary, a distance of about 40 miles. The company is given all the usual powers; its head office is declared to be at Cranbrook; its capital is fixed at $2,000,000, and it is given authority to issue bonds for $35,000 per mile constructed. The provisional directors are: D. C. Corbin, A. J. Devlin and J. A. Harvey.

Goat River Water Power and Light Co.—Application is being made to the British Columbia Legislature to incorporate a company with this title for the purpose, among other things, of constructing standard or narrow gauge railways, to be operated by steam or electricity, within a radius of 10 miles of Goat River canyon, Kootenay district, and to connect with the C.P.R. line from Creston to Kootenay Landing. The company is asking for all the usual powers. The provisional directors are: E. V. Bodwell, J. H. Lawson, jr., and H. G. Lawson, Victoria.

Graham Island Ry.—The Railway Committee of the B.C. Legislature has reported in favor of a bill to incorporate a company with this title for the purpose of constructing a railway from near Lena Island, Skidegate Inlet, Queen Charlotte Islands, following the valley of the Houna River, northerly to Camp Robertson, thence to Camp Wilson, and on to or near Shields Island on Rennel Sound; and from any point on such railway to Massett Inlet. The company may make arrangements for various purposes with other companies; its capital stock is fixed at $1,000,000, and it may issue bonds for $30,000 a mile. The company is also given power to promote the incorporation of any company for any purpose which may seem directly or indirectly calculated to benefit it. The provisional directors are: P. D. Hillis, E. W. Tracksell, L. L. Butler and Z. M. Hamilton, of Victoria.

Halifax and Eastern Ry.—Replying to questions in the Nova Scotia Legislature, Mar. 11, the Premier said the Government had not had any negotiations with the Canadian Northern Ry. nor with other parties with reference to the construction of a railway between Halifax or Dartmouth, and any point on the Intercolonial Ry. within Halifax County, northeasterly in the direction of Country Harbour, Guysboro or Canso. The Government had not received from the Acadia Coal Co., nor from any persons who were jointly interested with the Government in the surveys over the route, any part of the $34,478.65 which the special survey made in 1906 cost. The Government was demanding from the Acadia Coal Co. its amount due under the agreement.

Hardy Bay and Quatsino Ry.—Application is being made to the British Columbia Legislature for an act incorporating a company with this title for the purpose of constructing a railway from near Hardy Bay, westerly to Coal Harbor, Quatsino Sound, or nearby, with power to construct branch lines of not more than 20 miles in a direct line from such railway. The capital stock of the company is fixed at $250,000, and it asks power to issue bonds for $35,000 a mile. It is applying for all the powers usually conferred upon railway companies. The provisional directors are: Col. H. Appleton, F. Appleton, Victoria, B.C.; and F. J. Marshall, London, Eng.

Intercolonial Ry.—The supplementary estimates submitted to the House of Commons provide for the appropriation of $2,500 for a 100-ton track scale at Aston Junction, and $4,000 for a siding for passenger cars at Gibson Junction, N.S.

International Ry. of New Brunswick.—T. Malcolm, the general contractor for the construction of this line, stated at St. John, N.B., Mar. 10, that about 25 miles of grading had to be completed, and that it was proposed to put 1,500 men on the work as soon as spring opened.

Interprovincial Ry. Bridge Co. of N.B.—In connection with the project to construct a bridge over the Restigouche River near Campbellton, N.B., on the New Brunswick-Quebec boundary, T. Malcolm, the general contractor, said in St. John, N.B., Mar. 10, the bridge will connect up the International Ry. of New Brunswick with the Atlantic, Quebec and Western Ry. (the Atlantic and Lake Superior Ry. section). The connection thus established would enable the whole of the Chaleur Bay district to have a direct route for its fish and other products with the New England markets.

Kettle Valley Lines.—The Kettle River Valley Ry. is applying to the Dominion Parliament for an act extending the time within which it may construct the lines of railway already authorized to be constructed. E. C. Myres, Toronto, is Secretary of the company.

Kootenay and Alberta Ry.—In connection with the application to the British Columbia Legislature for the passing of an act incorporating a company with this title, the Railway Committee reported: "The public interest does not require that at this present session the preamble should be held to be proved." The Legislature adopted this recommendation and the bill has been withdrawn. The application for the charter was made by J. B. Ferguson, J. H. Senkler, K.C., and E. Bloomfield, Vancouver, B.C. (Mar., pg. 173.)

Lacombe and Blind Man's Valley Ry.—The Alberta Legislature has passed an act incorporating a company with this title, with authority to construct a railway from Lacombe, through Blind Man's Valley.

Lake Superior and Long Lake Ry. and Transportation Co.—Application is being made to the Ontario Legislature for an act incorporating a company with this title for the purpose of constructing a railway from near Black's Siding on the C.P.R., near the Black River, Thunder Bay district, northerly to the southwest angle of Owl Lake; from the northeast angle of Owl Lake to the southeast angle of Long Lake, and from the northeast angle of Long Lake to the National Transcontinental Ry., with power to operate car ferries on Owl Lake and Long Lake in connection with the sections of the railway. It is also desired to have all the necessary powers to construct wharves, docks and terminals, and other powers necessary to the operation of the railway. R. A. Pringle, Cornwall, Ont., is solicitor for applicants.

Manitoulin and North Shore Ry.—It is said that at a conference between officers of the Lake Superior Corporation and the Ontario Government, Mar. 9, the question of the extension of this railway was discussed, and that as a result a definite plan will be submitted to the Government by the company.

McGillivray Coal and Coke Co.—By an act passed by the Alberta Legislature, this company is given authority to construct a tramway to connect its coal mines with the C.P.R.

Meadow Creek Ry.—The British Columbia Legislature has passed an act incorporating a company with this title, authorizing the construction of the following railways: (1) Commencing between mileposts 40 and 41 on British Columbia Southern Ry. near Yahk, southeasterly to Meadow Creek, and following the creek easterly and southerly to the International boundary, about 10 miles; (2) From the British Columbia Southern Ry., about 2.5 miles west of Cranbrook, southwesterly through lots 5249, 2310, 5801, 2311 and 6313, to the southwesterly end of Smith's Lake, thence northwesterly to Perry Creek, about eight miles; and (3) branch lines from either of the above not exceeding in any one case five miles in length. The company is given all the powers usually conferred on railways. The head offices are to be at Cranbrook, its capital is fixed at $200,000, and it may issue bonds for $10,000 a mile. The provisional directors are: M. B. King, J. H. King and B. A. Carter.

Montreal Bridge and Terminal Co.—Application is being made to the Dominion Parliament for an act extending the time for carrying out the company's undertaking, confirming agreements with other companies, increasing its bonding powers and share capital, changing the name of the company and authorizing it to connect its terminal stations in Montreal with railways on the south side of the River St. Lawrence by means of bridges or tunnels. C. A. Sara, 11 St. Sacrament St., Montreal, is Secretary of the company.

New Brunswick Docks and Terminal Co.—Application is being made to the New Brunswick Legislature for an act incorporating a company with this title for the purpose of constructing docks, dockyards, wharves, piers and terminals at Bathurst, Newcastle and such other port or ports on the Bay Chaleur and Miramichi River as may be selected for the purpose. The provisional directors are: G. E. and T. J. Drummond, E. McDougall, Montreal; W. F. C. Parsons, Londonderry, N.S.; J. J. Drummond, Midland, Ont.; W. M. MacLeod, R. W. Cooper, London, Eng. The company is being organized in the interests of the Canada Iron Corporation, which has ore mines in the vicinity of Bathurst. (Jan., pg. 17.)

The Niagara Peninsular Ry. Co., which was originally incorporated to construct a railway from Port Colborne and in the townships of Humberston and Wainfleet, is applying to the Ontario Legislature for an act authorizing it to extend its line northerly to St. Catharines. The capital stock is fixed at $200,000, and the corresponding section of the act of 1907 is repealed. The provisions of the Ontario Railway Act are made to apply to the company, and the special provisions contained in secs. 9, 10 and 11 of the act of 1907 are repealed. (Mar., pg. 173.)

Northern New Brunswick and Seaboard Ry.—Application is being made to the New Brunswick Legislature by the Twin Tree Mines Ry., for an act changing the name of the company to the Northern New Brunswick and Seaboard Ry., and amending the company's previous acts, 4 Edward VII, chap. 88, and 8 Edward VII, chap. 85, by defining Alston Point on the north side of Carron Point, on the south side of the entrance to Bathurst harbor, as the terminus of the proposed railway; by increasing the capital to $1,000,000; by increasing the amount of debentures which may be issued from $250,000 to $500,000, repayable in 30 instead of 20 years, and by repealing sec. 14 of the last-mentioned act. The foregoing changes are due to the fact that this charter will be used by the Canada Iron Corporation, Ltd., to connect its iron mine up the Nipisiguit River with Bathurst.

Owen Sound and Meaford Ry.—A deputation of residents along the route of this projected railway waited on the Ontario Government Mar. 4, and asked Government assistance in the construction of the line. The estimated cost of the railway, including the bridge across the Sydenham River, is $850,000, and the deputation stated that it was estimated the sale of $750,000 of bonds would net $675,000. In order to make the bonds the more readily saleable, the municipalities asked the Government to guarantee the interest. Owen Sound had agreed to become liable for $100,000 of the bond issue. The Premier stated that the matter would receive every consideration, and some aid might possibly be given.

Pacific Coast Coal Mines (Ltd.).—The British Columbia Legislature has passed an act authorizing the company to construct a railway in the Cranberry and Cedar districts, from its coal mine to the coast, or to connect with some other line of railway communication; and also in any other parts of the districts named, from any coal mine which may be owned or operated by the company from time to time, to some convenient points of shipment, with power to construct branch lines from any point along the railway. The company is authorized to construct telegraph and telephone lines, and it is declared that upon the company filing with the Chief Commissioner of Lands a plan and profile of its proposed railway, now under construction from its mine in Cranberry District to Boat Harbor, the same shall be deemed to be a railway constructed under the authority of this act. It is further declared that nothing in the first three clauses shall render it obligatory on the company in the operation of any railway or railways constructed by it to engage in or carry on the business of common carriers. The Lieut.-Governor, however, may from time to time pass orders requiring the company to carry passengers and freight on any of its lines, in which case the company shall, as to such railway, carry passengers and freight as required by the provisions of the Railway Act.

Prince Edward Island Ry.—The Minister of Railways, replying to a question in the House of Commons recently, said eight tenders were received for the construction of the branch railway from Harmony to Elmira, in King's Co., P.E.I. The question of accepting either of them was under consideration. There had been expended out of the appropriation of $31,000 voted last season for the construction of the line, $3,077.91. It was the intention to proceed with the work.

The supplementary estimates submitted to the House of Commons provide for the following amounts: Further amount required for extension of wharf at Souris, $23,000; land claims in connection with Montague branch, $6,851.51; land claims in connection with Murray harbor branch, $4,383.77; land claims in connection with the Vernon River branch, $2,216.69.

Prince Edward Island Tunnel.—Speaking at the Empire Club, Toronto, recently, Rev. Father Burke stated that no system of navigation could be found strong enough to establish and maintain winter communication between Prince Edward Island and the mainland, and that the only thing which would ever meet the needs of the island was the tunnel which had been promised at the time the island province joined in Confederation. (Mar., pg. 175.)

Prince Rupert and Port Simpson Ry.—The Railway Committee of the British Columbia Legislature has reported in favor of the passing of an act incorporating a company with this title, having for its object the construction of a railway from Prince Rupert to Port Simpson, with branch lines not to exceed 10 miles in any one case. The company is given all the powers usually conferred upon railway companies; its head office is to be at Victoria; its capital stock is fixed at $1,000,000, and it may issue bonds for $35,000 a mile. The provisional directors are: M. King and H. B. Robertson, of Victoria.

Quebec, Montreal and Southern Ry. An announcement has been made by the Delaware and Hudson Co., which owns this railway, that it is expected to open the extension between Pierreville and St. Philomene by May 1. The ballasting on this mileage is being done by the company, and the bridge work is being pushed forward. The Beaucourt and Gentilly bridges have been completed, and everything is ready for erecting the superstructure of the Nicolet bridge.

Salisbury and Albert Ry.—In connection with the passing of the bill asking for the incorporation of a company with the title of the Salisbury and Harvey Rd. Co., for the purpose of taking over the old Salisbury and Harvey Ry., the House of Commons objected to the use of the word "railroad" as part of the title on the ground that there might be some confusion as to its interpretation, as "railway" is the word used in all Canadian acts. As a result of the discussion it was finally decided to drop the name Salisbury and Harvey Rd., and to call the line the Salisbury and Albert Ry. The act gives the company all the rights, properties, privileges and franchises of the old company.

Sault Ste. Marie and St. Joseph Island Ry.—The Ontario Legislature is being asked to pass an act incorporating a company with this title to construct a railway from the C.P.R. near Sault Ste. Marie, to and through Campment D'Ours and St. Joseph Island, with authority to operate car ferries between the mainland and the islands. P. T. Rowland, Sault Ste. Marie, Ont., is solicitor for applicants.

The provisional directors named in the bill are: T. J. Foster, G. H. L. Armstrong, H. E. Bishop and P. T. Rowland. The head offices are to be at Sault Ste. Marie; the capital is fixed at $500,000, and securities to the amount of $40,000 a mile may be issued.

South East Kootenay Ry.—The British Columbia Legislature has granted an extension of three years within which this company may commence the construction of its projected railway, and expend 10% of the amount of its capital upon construction.

St. John River Valley.—Application is being made to the New Brunswick Legislature for an act to incorporate a company for the purpose of constructing a railway from St. John along the valley of the St. John River to Centreville, Grand Falls or Edmundston. At a meeting of the Woodstock, N.B., Board of Trade, Mar. 1, a resolution was passed appointing a committee to confer with committees from the Boards of Trade of St. John and Fredericton in the interests of the bill.

St. Maurice and Eastern Ry.—Application is being made to the Dominion Parliament for an act incorporating a company with this title with power to construct a railway from the National Transcontinental Ry. at St. Prosper, Champlain county, westerly to Shawinigan Falls, Que. Bisaillon and Brossard, Montreal, are solicitors for applicants.

Temiskaming and Northern Ontario Ry.—The question of the extension of the branch of this line from Charlton, through Elk Lake to Gowganda, Ont., is still under the Government's consideration. Several petitions have been received from persons interested in the development of the district urging the immediate construction of the extension.

The Commissioners have given instructions for the clearing of portions of the surveyed route for the extension of the branch from Charlton to Gowganda. The object of this work is to keep winter communication with Gowganda open as long as possible.

Contracts have been awarded to the Forest City Paving and Construction Co., London, Ont., for the construction of a round-house, locomotive foreman's office, coal chute and trestle and for reinforced concrete arch cul-

verts at mileposts 218½, 221 and 222½. A contract has also been let for the construction of a machine shop and the installation of a heating system in the round-house, all at Cochrane, Ont. The work will be commenced immediately.

Tobique and Campbellton Ry.—Application is being made to the New Brunswick Legislature for an act amending 4th Edward VII, chap. 86, incorporating the company. J. W. Niles, Tobique, N.B., is Secretary of the company.

Twin Tree Mines Ry.—See Northern New Brunswick and Seaboard Ry.

Victoria and Barclay Sound Ry.—W. K. Houston, H. H. Jones, W. E. Laird and C. L. Betterton, Victoria, B.C., are named as provisional directors in the act passed by the B.C. Legislature, incorporating a company with this title. The company is authorized to construct a railway extending from Victoria by way of Otter Point and San Juan to Barclay Sound, near Sarita River, with branch lines not exceeding 12 miles in any one case. The company is given all the powers usually conferred upon railways. The head offices are to be at Victoria; its capital is fixed at $1,500,000, and it may issue bonds to the amount of $50,000 a mile of line constructed.

Winnipeg and Northern Ry.—The Manitoba Legislature is being asked to pass an act amending 5 and 6 Edward VII, chap. 122, incorporating this company. H. J. Macdonald, Winnipeg, is solicitor for the company.

A Railway to Hudson Bay.

Jno. Armstrong, Chief Engineer of the survey which has been going on since Oct. last, of a route for a railway to Hudson Bay, has presented a tentative report to the Minister of Railways. Two of the four parties sent out had completed their work by Feb. 28. Party 1, working from the Pas, Sask., completed its section of 127 miles Feb. 20; Party 3 completed its work Jan. 20, but had since been engaged in some additional work upon an optional route; Parties 2 and 4, it was expected, would complete their work by Mar. 15, but it was thought likely that these two parties might have to undertake some additional work during the summer. The result of the surveys, Mr. Armstrong says, has been more than satisfactory. The route mapped out does not present the difficulties that were anticipated, and for the greater part of the distance it will be possible to carry on construction cheaply and rapidly. Optional routes have been suggested. The total cost of the line, either to Fort Churchill or Port Nelson, together with the necessary terminals and harbor improvements at each place, Mr. Armstrong estimates at between $17,000,000 and $18,000,000. The Fort Churchill route, he says, would cost $11,608,000 for the railway and about $6,000,000 for harbor and terminal works; the length of the line to be constructed would be 465 miles. The distance to Port Nelson is put at 397 miles, and the cost of the railway is estimated at $8,677,000, but the terminal and harbor works necessary would be much more costly than at Fort Churchill. On the whole, Mr. Armstrong favors further examination of Port Nelson before a definite selection of a port on Hudson Bay is made. The estimates for the construction of the line are based on the requirements of a route to handle the traffic for from seven to ten years, a period long enough to test the usefulness of the route. Sixty-pound rails and wooden trestles and culverts would be used.

With regard to the Nelson River, Mr. Armstrong states that from information obtainable it would seem that by canalizing some portions it would be possible for ocean-going vessels to enter Lake Winnipeg from Hudson Bay. From Lake Winnipeg a channel of 33 ft. already exists to the south end of the lake, and thence the canal might be extended via the Red River to Winnipeg. The Minister of Railways, referring to the matter in the House of Commons Mar. 6, said the idea that Winnipeg might yet be an ocean port, was rather staggering, but it was too large a question to discuss at present.

The suggestion that Port Nelson, which is a land-locked harbor, should be the terminus of the projected railway, does not meet with favor in Winnipeg, where Fort Churchill has been always regarded as the natural terminus of any railway. It is stated that western capitalists had made considerable investments and improvements at Fort Churchill, in the expectation that a railway would ultimately reach there. In this connection, J. W. Tyrrell read a paper on "Hudson Bay as a National Asset," at the recent meeting of the Ontario Land Surveyors' Association. He has made several exploratory trips into Hudson Bay for the Dominion Government. In the course of his paper he said, after making complete surveys of the mouths of both the Churchill and the Nelson Rivers, he could not think that the mouth of the latter could, with any reasonable expense, ever become a desirable harbor. "We were obliged," he said, "in a small vessel, drawing a comparatively small amount of water, to lie about 30 miles off the shore, and even in trying to get into the mouth of the river in a small sailboat, we were stranded high and dry at least 10 miles from the mouth of the river." Fort Churchill was, he declared, beyond all question, the most advantageous port on the west coast of the bay. The harbor was an excellent one, possessing good anchorage in from four to nine fathoms of water at low tide; the area of this depth might be greatly extended at small cost. From records extending back a great number of years the average dates of the opening and closing of Fort Churchill harbor were June 18 and Nov. 18, making the open season exactly five months. There would be no difficulty in keeping the mouth of the harbor open during the early part of Nov., and with the help of icebreakers it could, if necessary, be kept open throughout the winter, as the strong tidal and river currents would very materially assist in clearing out the ice. So far as the construction of a railway was concerned, there were no unusual difficulties in the way. He had been over the route from Prince Albert to Fort Churchill, and had reported favorably on it. Dr. Otto Klotz, who was also present at the gathering, said, from personal observation, he was of opinion that York Factory, which was at the mouth of Nelson River, lacked the acquirements of an available harbor.

The Minister of Railways, in reply to questions asked in the House of Commons recently, stated that the total amount appropriated on account of surveys for this projected railway was $100,000, of which there had been expended, to Jan. 25, $61,567.72. The number of men employed on surveys, since they were fully organized about Oct. 1, 1908, had averaged about 110, and the total number of days of employment of all men to Jan. 31, was 15,352, including Sundays. The first actual line was run by Party 1, at Frog River, about 35 miles from the Pas, on Sept. 14, 1908. No decision as to construction would be reached pending receipt of estimates and reports upon the completion of the survey.

The Algoma Steel Co. has sold 5,400 tons of steel rails to the New York Central and Hudson River Rd. for Aug. delivery.

D. Corrigan and F. McCallum, two G.T.R. conductors of long service, were found guilty at Toronto, Mar. 8, of conspiring with a number of other persons to defraud the company, by issuing false tickets for the Montreal-Toronto trains.

Railway Commissioners' Traffic Orders.

6299. Feb. 10.—In the matter of the complaint of Macdonnell and O'Brien, of Hervey Jct., Que., against rates charged by Canadian Northern Quebec Ry. and Quebec & Lake St. John Ry. on empty box cars from Hervey Jct., on the C.N.Q.R., to Latuque, on the Q. & L.S.J.R.; and applying for an order directing the said companies to file joint tariffs on through traffic originating in points on the C.N.Q.R. and destined to points on the Q. & L.S.J.R. Upon the reading of what was alleged on behalf of the railway companies, and the hearing of counsel for them, and upon the report of the Chief Traffic Officer of the Board—it is ordered that the maximum charge made by any railway company under the Board's jurisdiction in a through shipment of new empty cars over two or more lines of railway, be not more than $5 a car. That the C.N.Q.R. at once prepare and submit to the Board a joint tariff for the shipment of new empty cars over the lines and portions of the lines of the C.N.Q. and the Q. & L.S.J. railway companies. That the Advisory Committee of the Canadian Freight Association submit without delay an amendment to the Canadian Classification providing for the lower minimum charge to apply on new empty cars moved over a joint route composed of two or more lines of railway.

COAL RATE FROM TABER, ALTA.

6319. Feb. 13.—In the matter of the complaint of W. B. Bashford, of Rosthern, Sask., alleging excessive freight rates of the C.N.R. on coal from Taber, Alta. Upon hearing this application and what was alleged on behalf of the railway company, it is ordered that the C.N.R. and the C.P.R. companies do forthwith cause to be filed with the Board a joint tariff on coal shipped from Taber, Alta., destined to Dalmeny, Sask., making provision for same freight rate that exists from Taber to Rosthern, Sask.

COAL RATE, HUNTINGDON, QUE., TO OTTAWA.

6387. Feb. 27.—In the matter of complaint of A. Baile, of Montreal, against an overcharge by the G.T.R. of 20c. per ton on a shipment of coal in car N.Y.C. 34181, from Huntingdon, Que., to Ottawa, Ont.; and applying for an order directing the railway company to refund to complainant the amount of the overcharge. Upon the reading of what was alleged in support of the application and on behalf of the railway company; and upon the report and recommendation of the Traffic Officer of the Board—it is ordered that the railway company be authorized to refund to the complainant the amount of the overcharge, viz., 20 cents a ton on the said carload of coal.

MOVABLE PARTITIONS FOR INDIVIDUAL SHIPMENTS.

6411. Feb. 19.—In the matter of the application of East Clover Bar branch of Alberta Farmers' Association, requiring railways to provide movable partitions in cars to enable individual farmers to make individual shipments. Upon hearing this application in the presence of a representative of applicants, and hearing what was alleged by him, it is ordered that the application be refused.

TRANSCONTINENTAL RATE CASE.

6543. Feb. 25.—In the matter of the application of the Vancouver Board of Trade for a refund under order dated Aug. 11, 1906, in what is known as the Transcontinental Rate Case, July 31, 1907: Upon hearing this application and hearing what was alleged by counsel for the Board of Trade, and it appearing that all complaints had been adjusted, including the claim of the Woodward Department Stores, referred to in letter, Feb. 23, 1909, it is ordered that the application be dismissed.

THE ELECTRIC HEADLIGHT

The following letter was received under date of May 8, 1908, from Mr. J. W. Cleary, Travelling Engineer Pyle-National Electric Headlight Co.:

"I learn from_____the Master Mechanic here, that an engineer running between_____ and_____discovered a broken rail with the Pyle-National Electric Headlight and made the stop without ditching his train. One or two pairs of wheels got off, but that was a small affair to what it would have been where a foot of the rail was broken off. Also an engineer running east of here found some cars shoved out on the main line. He saw them with the 'Electric' and made the stop without hitting them."

Railway Finance, Meetings, etc.

Alberta Ry. and Irrigation Co.—Approximate net profits from all sources, exclusive of land sales, for Jan., $30,348, against $28,475 for Jan., 1908. Total net profits for 7 months ended Jan. 31, $250,126. Approximate railway receipts for Feb., $19,420, against $12,914 for Feb., 1908.

The amount of tax paid to the Alberta Government by the company, under the Railway Corporation Tax Act for 1908, was $23,281.53.

In the course of the examination of T. C. Bovill, Deputy Minister of Finance, before the Public Accounts Committee of the House of Commons, Mar. 19, he stated that among the assets of the Dominion there was carried at par, a loan of $14,075 to this company. No interest had been paid since 1887, and no special effort had been made to collect it.

The Buffalo and Lake Huron Ry. Co.'s half-yearly meeting was held at Liverpool, Eng., recently. The report for 6 months ended Dec. 31, 1908, showed that after providing for the interest on the first and second mortgage bonds, the balance, including the amount brought forward from the previous half-year, was £14,711 13s. 11d., enabling a dividend of 5s. 3d. a share to be paid, and a balance of £927 0s. 8d. to be carried forward. The directors were re-elected for the current year as follows: Chairman, M. H. Maxwell, Liverpool; J. M. Synge, Westerham, Kent, and E. Ashton, Liverpool, Eng. The line is leased to the G.T.R. Co.

Canadian Northern Ry.—The Manitoba Legislature has before it a measure authorizing the Government to guarantee bonds for about 210 miles of the C.N.R., at the rate of $13,000 a mile, and terminal bonds to the extent of $3,000,000. In asking that the measure be read a second time, Mar. 6, the Premier stated that the reasons for increasing the guarantee from $10,000 to $13,000 a mile were so manifest that he need not cite them. With regard to the proposal to guarantee the $3,000,000 of terminal bonds, he stated that the annual interest payable by the Dominion Government, through the Transcontinental Railway Commission, and the Grand Trunk Pacific Ry., for their interest in the Winnipeg terminal property, exactly equalled the amount of interest on the bonds to be guaranteed by the Provincial Government. In the course of the discussion reference was made to the fact that the Legislature had already authorized the guarantee of $1,000,000 of bonds for terminal purposes, and it was understood that, in the event of the present bill passing, this amount would be consolidated in the $3,000,000.

Canadian Northern Quebec Ry.—An action is being heard in the Superior Court at Montreal, in which a farmer named Lapointe, residing at Longue Pointe, is seeking to recover $2,000 as damages from the Chateauguay and Northern Ry., one of the companies amalgamated as the C.N.Q. Ry. Co. The ground of the action is that while his property was expropriated for the purposes of an electric railway, the company afterwards used the line for trains run by steam, thus changing the character of the road, and causing more damage to the adjoining properties.

Canadian Pacific Ry.—Under the provisions of the Railway Corporation Tax Act, the Alberta Government received, during 1908, $182,190 from the C.P.R.

Judgment has been reserved in the appeal of the C.P.R. against the assessment of the lands granted to the British Columbia Southern Ry. by the Provincial Government. The lands involved are 3,000,000 acres in extent and the taxes are about $150,000 a year. The C.P.R. maintains that only a small part of the lands sold or offered for sale are assessable in any case.

Central Ontario Ry.—We were advised, Mar. 16, that there was no truth in the press reports that the C.O.R. had been sold to the G.T.R., and also that there had been no negotiations between the respective companies.

Crow's Nest Coal Co.—At the annual meeting in Toronto, Mar. 12, G. G. S. Lindsey, President and General Manager; Hon. R. Jaffray, Vice-President; E. R. Wood, and Sir H. Pellatt, declined re-election, and directors for the current year were elected as follows: E. Rogers, Toronto; Col. Clough, New York; J. P. Graves, Spokane, Wash.; W. F. Robertson, Granby, Que.; E. C. Whitney, H. B. McGiverin, Ottawa; R. N. Young.

Cuba Ry.—The gross earnings of the seven months ended Jan. 31, were $1,065,868, against $1,053,125 for the corresponding period 1907-08, while the net receipts were $198,647, against $107,147.

Detroit River Tunnel.—The authorized capital stock of this company is $30,000, all of which is in Michigan Central Rd. treasury. It is also authorized to issue $15,000,000 of first mortgage bonds, which are to be guaranteed by the M.C.R. Of these bonds, an amount of $10,000,000 is ready to be placed on the market.

Dominion Atlantic Ry.—Gross earnings for Jan., $69,950, against $70,426 for Jan., 1908.

Grand Trunk Pacific Ry.—Subscriptions were recently invited on the London, Eng., market for an issue of £1,000,000 of G.T.P. Ry. debentures. The issue price was 90 and the debentures are redeemable in 1936 at 105. The object of the issue is to provide additional rolling stock to be delivered during the current year for use on the Lake Superior branch, and on the Prairie Division.

A resolution has been submitted to the House of Commons by the Government, authorizing it to raise $10,000,000 by means of a loan, and to advance it either in one sum or by instalments to the G.T. Pacific Ry., to aid it in completing the Prairie Division. The money is to be advanced by the Government upon the pledge of an issue of bonds bearing 4% interest, secured upon the company's railway, but subject to any prior lien or charge by a mortgage or deed of trust. The bonds are also to be guaranteed by the G.T.R. In default of payment of interest the Government is to have the right to be "deemed to be the holder of such bonds and entitled to the rights and remedies available to bondholders, arising according to the terms of such mortgage when default is made in payment of interest or principal of such bonds." The resolution provides for the repayment of the loan to the Government, with 4% interest, payable half-yearly within ten years.

Intercolonial Ry.—A resolution was passed Mar. 11, at a meeting of the New Brunswick Union of Municipalities, opposing the leasing of the Intercolonial Ry. by the Dominion Government, and favoring the discussion by municipal governing bodies of the question of urging the Government to establish a Public Utilities Board.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—The directors have authorized an issue of $6,048,000 of new stock, equal to 24% of that outstanding, to be issued to existing stockholders at par, one-third of the new stock to be preferred, and two-thirds common.

In connection with the taking over of the Wisconsin Central Ry., the holders of the W.C.R. preferred stock, the amount of which outstanding is $11,207,104, are depositing their scrip with a trust company, receiving in return therefor permanent receipts. It is stated that the C.P.R., as controlling the M., St. P. and S.S.M. Ry., has consented to allow that company to issue its own obligations calling for the payment of 4% annually to the holders of W.C.R. preferred stock, for the 99 years of the lease, instead of merely guaranteeing the dividends on that issue as proposed in the original plan.

The Wisconsin Central Ry. directors have passed a resolution authorizing the leasing of the line for 99 years to the M., St.P. and S.S.M. Ry. Co., and the directors of the latter company have ratified it. The shareholders of the W.C.R. will meet in Milwaukee, Wis., April 11, for the purpose of confirming the leasing of the line.

E. Pennington, heretofore Vice-President and General Manager, has been elected President, succeeding the late T. Lowry; he retains for the present his position as General Manager. The position of Vice-President has not been filled. H. Lowry has been elected a director to fill the vacancy on the board caused by his father's death.

With the new issue of stock the company will have $31,248,000 of stock outstanding. Of this $10,416,000 is 7% preferred stock, and $20,822,000 common stock, on which the current rate of interest is 6%. The C.P.R. controls the company through the ownership of 51% of the stock, and will exercise its right to subscribe to the full extent of its holdings, and in accordance with its usual custom, will take up any of the stock to be issued which is not taken up by the shareholders.

Ontario Sault Ste. Marie Ry.—The annual meeting was held March 17, the business being of a purely formal character. The officers and directors for the current year are: President, C. M. Hays; Vice-President, E. J. Chamberlin; Secretary-Treasurer, F. Scott; other directors, W. Wainwright, M. M. Reynolds, R. S. Logan, W. H. Biggar, Jos. Hobson; General Auditor, W. H. Ardley.

Pere Marquette Rd.—A press report from Detroit, Mich., says it was semi-officially announced Mar. 5, that the P.M.R., had finally passed under the control of J. P. Morgan, and that in all probability the company's lines, franchises, etc., would be disposed of to the Baltimore and Ohio Rd. "The deal," one of the company's officials is quoted as saying, "simply awaits the outcome of the negotiations for a settlement of the financial difficulties of the Cincinnati, Hamilton and Dayton Rd."

A Detroit, Mich., dispatch, Mar. 17, says W. Cotter, President, states that there is no truth in the report of a pending sale of the P.M.R. to the Baltimore and Ohio Rd.

Quebec and Lake St. John Ry.—Gross earnings for Feb., $37,071.19, against $31,941.04 for Feb., 1908. Aggregate gross earnings for 2 months ended Feb. 28, $83,320.24, against $68,216.53 for same period 1908.

Quebec Central Ry.—Gross earnings for Jan., $53,671.62; expenses, $50,322.78; net earnings, $3,348.84; against $68,640.25, gross earnings; $57,695.20 expenses; $10,945.05, net earnings for Jan., 1908. Aggregate gross earnings for 7 months ended Jan. 31, $607,348.13; expenses, $428,247.47; net earnings, $179,100.66, against $638,006.77 gross earnings; $443,587.23 expenses; $194,419.54 net earnings for same period 1907-08.

St. Mary's and Western Ontario Ry.—Following are the officers and directors for the current year: President, T. O. Robson; Vice-President, F. E. Butcher; Treasurer, H. L. Rice; other directors: D. Boins, A. Baird; Secretary, J. W. Graham; Chief Engineer, G. E. Hyde; Chairman of Advisory Board and executive, J. Chalmers; other members: J. W. Graham, H. L. Rice. The railway is leased to the C.P.R.

Tilsonburg, Lake Erie and Pacific Ry.—During the passage of this company's bill through the Railway Committee of the House of Commons recently, it was stated that the line had been acquired by the C.P.R. The line was originally operated as an independent company, but in 1904 the C.P.R. took it over under lease for 99 years.

White Pass and Yukon Ry.—Gross earnings for seven months ended Jan. 31, $885,066.

C. P. R. Betterments, Construction, Etc.

Wharf at St. Andrews, N.B.—The C.P.R., as exercising the rights and franchises of the New Brunswick and Canada Ry., has deposited with the Department of Public Works, Ottawa, plans and description of the site of a proposed wharf to be constructed at St. Andrews, N.B. Approval of plans is asked for.

Plans have been submitted to the St. Andrews, N.B., council for the construction of a wharf there at a cost of $20,000. It will be 290 ft. long, and it is proposed to start construction at once.

The New Brunswick Southern Ry. is now owned by the C.P.R.

McAdam-Aroostook Junction, N.B.—The programme for the season's work includes the carrying out of further works of improvement between McAdam and Aroostook Junction, N.B. During the past three years considerable work has been done in the way of reducing gradients, strengthening bridges and laying heavier tracks on this section of line. The work is to be continued during the current season, and it is expected that it will be so far completed that by the fall the company will be able to run much heavier trains over it than at present.

Windsor St. Station, Montreal.—Plans are reported to have been completed for the extension of this station. The new buildings will, it is said, cover the entire block of land bounded by Windsor, Osborne, Mountain and St. Antoine Streets. The total area of the new terminals will be about 400,000 sq. ft. The new head office buildings will have a total frontage of 275 ft. on St. Antoine St. Eight new tracks will run into the terminals, which will have nearly four times the accommodation of the present buildings.

Place Viger Extensions.—The C.P.R. has withdrawn its application to the Board of Railway Commissioners for power to expropriate certain lands between Notre Dame and Craig streets, in connection with its Place Viger terminal extension plans. The opposition to the carrying out of the company's proposal was on behalf of the Montreal Brewing Co., the ground taken being that its premises would be entirely surrounded by the railway yards and property, and there would be no means of getting in or out from it. D. McNicoll, Vice-President C.P.R., in reply to a question as to the withdrawal of the plans, is reported to have said that the company had secured all the land it required.

Montreal-Toronto Second Track.—A Montreal dispatch states that it has been officially announced that the construction of the second track as far as Smith's Falls, Ont., will be completed during the current season, and that a start will be made preparatory to the construction of a second track between Smith's Falls and Peterborough, a distance of 133 miles. The work on this section, which, it is said, will be done this season, will consist of reducing gradients and curvature, and strengthening bridges. The principal object of this work is said to be to have the main line in order to suit the gradients of the proposed Georgian Bay and Seaboard Ry., which will extend from Victoria Harbor to Peterborough, Ont. The section of this line between Victoria Harbor and Coldwater has been completed, and is being operated as a branch of the company's Toronto-Sudbury line.

Campbellford, Lake Ontario and Western Ry.—A meeting of representatives of the towns through which this projected railway would pass, was held at Cobourg, Ont., Mar. 24, for the purpose of urging upon the C.P.R. the desirability of the early construction of the line.

Connection with G.T.R. Near Toronto.—The C.P.R. has given notice of its intention to apply to the Board of Railway Commissioners for authority to construct a branch line from its railway at milepost 10.15 in lot 8, con. 4, Etobicoke tp., York county, to the G.T.R. in lot 9, con. 1, Etobicoke tp., and Y connections.

Toronto Junction, Ont.—The C.P.R. has been having some negotiations with the West Toronto council with a view to the removal of the wooden bridge over the tracks at Weston road, which is in a bad state of repair.

St. Mary's and Western Ontario Ry.—Application is being made to the townships of Blanshard, Usborne and Exeter, to pass by-laws granting loans of $10,000 each to the company in connection with its proposal to construct a line from St. Mary's to Exeter, Ont. Speaking at Exeter recently, J. W. Graham, Secretary of the company, said the proposed extension was estimated to cost $25,000 a mile, and municipal aid to the extent of $80,000 a mile had been obtained towards the construction of the 15 miles easterly from St. Mary's. The line would be commenced, he said, within six months after the municipalities had passed the by-laws, and it was expected that it would be in operation by 1911. Three surveys have been made for the proposed extension, but no decision has been announced as to which route will be adopted.

Fort William, Ont.—A delegation from Fort William, Ont., appeared before a committee of the Ontario Legislature, Mar. 13, to ask for approval of the agreement with the C.P.R. granting a further exemption from taxation, and the carrying out of certain works of improvement. The agreement fixes the tax at $30,000 a year for 15 years.

Fort William to Winnipeg Second Track.—With the exception of a distance of about 18 miles, the second track between Fort William, Ont., and Winnipeg, Man., had been completed at the end of 1908. It is proposed to complete this 18 miles during the coming season.

Central Division Improvements.—During the season of construction of 1909, it is proposed to carry out the following works of betterment upon this division: To lay 60 miles of 85-lb. steel between Fort William and Winnipeg, and on the Estevan section; to do 100 miles of ballasting on the Souris and Estevan sections; to construct an overhead bridge at First St., Brandon; to do 30 miles of ballasting on the Yorkton section; to construct an extension to passing tracks and new tracks on the Last Mountain and Estevan sections.

Teulon Northerly.—During the current year it is proposed to extend the present line from its existing terminus two miles north of Komarno towards the Icelandic River, Man. The distance between these points is 26.5 miles, and it is hoped to complete 17 miles this season.

Brandon Round-House.—Tenders were received to Mar. 10 for the construction of a six-stall addition to the round-house at Brandon, Man.

Mowbray Southeasterly.—Track will be laid this season on the extension of the Mowbray branch, for 6.5 miles from Mowbray, Man.

Virden Northerly.—Among the new work to be done during the current year is the laying of 10 miles of track on the new branch from Virden, Man., on the Broadview section of the main line, northwesterly.

Lanigan to Prince Albert, Sask.—Plans have been filed at Prince Albert, Sask., by the C.P.R. for a line from Lanigan to Prince Albert, passing through Humboldt, the Hoodoo country, crossing the South Saskatchewan River at St. Louis, and entering Prince Albert from the east. General Manager Bury is quoted as saying that as soon as the gap between Wynward and Lanigan is closed, the line from Lanigan to Prince Albert will be commenced.

Pheasant Hills Branch.—Tracklaying will be completed during the present year from Wilkie, Sask., the present terminus, 99.5 miles west of Saskatoon, to Hardisty, Alta., the present terminus of the Wetaskiwin branch, a distance of 131.7 miles.

Western Division Improvements.—The betterments to be undertaken on this division this year include the following: The provision of a gravity water supply at Regina, Sask., the water to be taken from Pilot Butte; the construction of a new hump yard at Moose Jaw, Sask.; construction of additional passing tracks on the Swift Current section; ballasting for 50 miles on the Portal section; ballasting 17.2 miles on the Lethbridge section and 100 miles on the Edmonton section; ballasting 30 miles on the Macleod branch; laying 100 miles of 85-lb. steel on the Edmonton section; 53 miles on the Macleod section, and three miles on the Cranbrook section; constructing extensions to and additional passing sidings, and a number of betterments on bridge works.

Regina, Sask., Spur Tracks.—A map has been submitted to the Regina city council, showing the route of a branch line with spur tracks which the company proposes to erect for warehouse accommodation in the city. The branch is to start near the Bulyea branch, run across the Eastern Annex and up Eighth Ave. to Broad St., with spurs into blocks 184, 185, 186 and 187. The branch and spurs are expected to be constructed as soon as weather permits.

Lacombe Branch.—During the current year it is proposed to extend this branch, which now terminates at Stettler, Alta., 35 miles easterly.

Weyburn Westerly.—A branch line will be constructed during the current year from Weyburn, Sask., on the Portal section, 20 miles west.

Cheadle-Alix.—It is proposed to start construction during the current year upon a branch line from Cheadle, on the Calgary section of the transcontinental line, 40 miles northerly.

Lethbridge, Alta., Shops.—We are advised that the press reports that the company proposed to erect shops for the Western Division at Lethbridge, Alta., and to employ 600 men there, is premature, and that nothing definite has been done with this end in view.

Lethbridge-Macleod Cutoff.—During the current season the construction on the steel bridges across the Belly and Old Man Rivers, on the Lethbridge-Macleod cutoff, on the Crow's Nest branch, will be continued.

Kipp Northerly.—Construction will be proceeded with during the current season on a branch line, starting from Kipp, on the Macleod section of the Crow's Nest Branch, to 28.5 miles north on the Little Bow River.

Crow's Nest Pass Branch.—The Privy Council has passed an order granting the C.P.R. 25.55/1000 acres of land in the s.w. quarter of sec. 29, tp. 9, range 22, west of the 4th principal meridian, for use as a right-of-way and station ground, at $25 an acre, and recommends the selling by public auction of the balance of the quarter section at an upset price of $25 an acre.

Kootenay Central Ry.—A press report states that the C.P.R. is not likely to award any contract at present for construction upon any part of this line. The despatch states that tenders were asked for during Feb. for the grading of 30 miles of line "from the connecting point on the Crow's Nest Pass branch between Cranbrook and Fernie, to north of Fort Steele, B.C.," and

it was expected by railway men that this work would be proceeded with early in the spring."

Pacific Division Improvements.—The betterments proposed to be carried out on this division during the current year include: Replacing of steel cantilever bridge at Cisco, with a heavier bridge of the same type; extensive replacement of wooden bridges with permanent structures, changes of line, additions to passing tracks; yard improvements at Kamloops, Mission Junction, Spence's Bridge, North Bend and Vancouver, B.C.; ballasting 16 miles on the Cascade section; erecting a 280-ft. steel arch on the Esquimalt and Nanaimo Ry.

Railway Rolling Stock Notes.

The Duluth, South Shore and Atlantic Ry. is reported to have ordered 400 freight cars.

The Crossen Car Mfg. Co., Cobourg, Ont., has delivered 43 flat cars to the J. D. McArthur Co., Winnipeg.

The T. & N.O. Ry. has ordered two 6-wheeled switching locomotives from the Canadian Locomotive Co., Kingston, Ont., for delivery during the summer.

The G.T. Pacific Ry. has ordered 10 colonist cars, 5 parlor cafe cars, 16 first-class coaches, 8 second-class coaches, 3 dining cars, and 8 sleeping cars, from the Canada Car Co., Montreal.

The Canada Car Co., Montreal, is building 46 Hart convertible ballast cars and one plow distributing car for the Hart-Otis Car Co., Montreal; and 4 Lidgerwood unloading cars and 25 flat cars for F. H. Hopkins & Co., Montreal.

The C.N.R., between Feb. 15 and Mar. 15, received the following additions to rolling stock: 3 consolidation locomotives, from the Canadian Locomotive Co., Kingston, Ont., and 12 cabooses from the Crossen Car Mfg. Co., Cobourg, Ont.

The C.P.R., between Feb. 12 and Mar. 14, received the following additions to rolling stock: 42 box cars, 8 first-class cars, 2 Pacific type locomotives, and 3 switching locomotives, from its Angus, Montreal, ships; 3 vans from its Farnham, Que., shops, and 291 steel frame box cars from the Dominion Car and Foundry Co., Montreal.

The C.P.R., between Feb. 12 and Mar. 14, placed orders for the following rolling stock: 86 box cars, 102 refrigerator cars, 500 stock cars, and 10 mixed traffic locomotives, type D10, at its Angus, Montreal, shops; 4 vans at its Farnham, Que., shops; 500 steel coal cars at the Dominion Car and Foundry Co., Montreal; and 2 Pacific type locomotives at the American Locomotive Co., Schenectady, N.Y.

The Hart-Otis Car Co., Montreal, has received orders for cars as follows: 20 Hart convertible all-wood ballast cars, 34 ft. long, 40 tons capacity, and one double plow distributing car, from E. F. and G. E. Fauquier, Ottawa, for N.T.R. contract work; 10 similar cars from the Quebec Contracting Co., Quebec, for N.T.R. contract work; 16 similar cars from the Willard Kitchen Co., Fredericton, N.B., for N.T.R. contract work; 18 all-steel Otis dumping gondola cars, 24 ft. long between couplings, 50 tons capacity, for handling broken stone and sand from the Bird's Hill Sand Co., Winnipeg; and 20 all-wood Otis dumping gondola cars, 1909 type, 36 ft. long, 40 tons capacity, from the Pacific Coast Coal Mines Ltd., Victoria, B.C.

The Minister of Railways stated in the House of Commons, Mar. 1, that the cost of construction of I.C.R. motor cars 225, 226 and 227 had been $55,800. During 1907, one of the cars ran between St. John and Hampton, N.B., and a second between Halifax and Windsor Junction, N.S., while the third was used as a spare car while the others were being worked into shape. More or less minor defects incidental to all new enterprises were encountered, but were being gradually remedied. During 1908, one of the cars was run on the River Ouelle branch, and gave good satisfaction. The revenue had not been worked out, but the expense of maintaining the three cars had been to that date $4,669.11. One car was then running between Halifax and Windsor Junction, N.S., and the other two were in the shops for general repairs in order to be ready for the coming summer's business.

Following are chief particulars of the 25 mogul locomotives under construction for the G.T.P.R., by the Canadian Locomotive Co., Kingston, Ont., mentioned in our Feb. issue:

Weight on drivers	138,176 lbs.
" total	161,976 lbs.
Cylinders	20" by 26"
Drivers, diam.	63"
Boiler, type	Extended wagon top.
" working pressure	200 lbs.
Heating surface, tubes	1,688 sq. ft.
" " firebox	188 sq. ft.
" " total	1,876 sq. ft.
Tubes, no. and diam.	271–2"
" length	11'-11"
Grate area	33.43 sq. ft.
Capacity, coal	10 tons.
" water	7,000 U.S. gals.
Tractive effort	28,063 lbs.
Brakes	Westinghouse.
Journal bearings	Canadian bronze.
Springs	Montreal Steel Works.
Steam heat equipment	Gold Safety Car Heating and Lighting Co.
Jacks	one 15-ton Norton, to each locomotive.

Great Northern Railway Lines in Canada.

Manitoba Great Northern Ry.—An act has been passed by the Manitoba Legislature, incorporating a company with this title, the provisional directors being: L. W. Hill, R. I. Farrington, Jas. Fisher, C. P. Wilson, and J. F. Fisher. The company is authorized to construct a single or double track railway from Winnipeg to Brandon, thence to Elkhorn, and on to the western boundary of the province; also a line from Morden northwesterly to Rathwell, and thence, still northwesterly, to the Winnipeg-Elkhorn line; together with such branch lines as may be necessary or convenient. The line may be constructed in sections, and the company may acquire plans and surveys now existing for these lines or for any portions of the same. It may also enter into agreements with other railway companies for any purpose, and it is authorized to acquire the existing constructed lines of the Midland Ry. Co. of Manitoba, viz.: A line from the International boundary at Gretna to Portage la Prairie; and a line from the International boundary in range 4, west of the principal meridian, to Morden. The company's capital stock is fixed at $2,500,000, and bonds to the amount of $20,000 a mile of line constructed may be issued. The company is also authorized to carry on an express business, to construct telegraph and telephone lines, and to maintain bridges.

Midland Ry. Co. of Manitoba. The Manitoba Legislature has passed an act authorizing this company to construct, in connection with its authorized line between Winnipeg and the International boundary, a branch running from such line on the east side of the Red River, in tp. 1, range 2 or 3 east, to the west side of the Red River in tp. 1, range 2, east of the principal meridian. The company is also authorized to sell the lines already constructed under its charter to the Manitoba Great Northern Ry.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—The Board of Railway Commissioners has authorized the company to open for traffic the portions of its line from Huntingdon to Cloverdale; from Olivers to the International boundary near Blaine, Wash.; and from Olivers to the Fraser River bridge, at New Westminster, B.C. These pieces of line connect up the company's lines south of the Fraser River, with the bridge over the river, and so with the line from New Westminster to Vancouver, constructed by the Vancouver, Westminster and Yukon Ry., which the V. V. and E. Ry. and N. Co. acquired.

Press reports state that the company will ask for tenders at an early date for the laying out of its terminals on Burrard Inlet, Vancouver. The work, it is expected, will extend over about three years. A Stewart, Assistant Chief Engineer, and J. S. Napp, Right-of-Way Agent, have been in Vancouver for some time in connection with the work. (Mar., pg. 195.)

The Dominion Government is asking Parliament for authority in its Government Harbors and Piers Act, to lease breakwaters, wharves and piers under the control of the Department of Marine and Fisheries to municipal corporations, railways or shipping companies. The Department of Public Works has power to lease wharves, etc., coming under its jurisdiction, and the present bill extends that power to the Department of Marine.

The public accounts for Ontario for the year 1908 show that the present value of the certificates issued by the Treasurer for aid to railways is $2,511,670.53. The interest paid on the certificates is 1¾ % every six months, and the total amount will be paid off by 1948. The total amount which the province will have to pay to clear the principal and interest is $4,086,288.74. Against the present indebtedness of the province, which amounts to $12,733,340, the Temiskaming and Northern Ontario Ry. is placed as an asset. The amount expended on the railway to Dec. 31, 1908, was $13,982,764.55.

Locomotive Fuel Consumption.

The cost of fuel consumed by locomotives on the various Canadian railways during the year ended June 30, 1908, was $17,718,486.24. In volume the aggregate consumption was 5,970,791 tons, against 5,608,954 in 1906-07. Following are details, two cords of wood being calculated as one ton of fuel:

Locomotive	Coal.		Wood.		Total Tons Fuel.	Miles run	Fuel consumed per 100 miles
	Anthracite.	Bituminous.	Hard.	Soft			
	Tons.	Tons.	Cords.	Cords.			Tons.
Freight		3,306,499	176	23,391	3,318,283	42,291,082	7.84
Passenger	1,404	1,440,057	216	10,699	1,446,919	30,504,171	4.74
Mixed	2,684	346,463	282	3,267	350,921	7,410,971	4.73
Switching	334	595,318	2	4,879	598,092	14,941,179	4.00
Construction	415	255,185	1	1,831	256,576	5,474,838	4.69
Total	4,837	5,943,522	677	44,067	5,970,791	100,622,241	

The average cost of fuel was $3.19 a ton. The consumption per 100 miles was slightly larger for all classes of locomotives than in 1906-07, the figures for 1906-07 being: Freight, 7.29 tons; passenger, 4.57 tons; mixed, 4.05 tons; switching, 3.76 tons; construction, 4.54 tons.

Orders by the Railway Commissioners.

Beginning with June, 1904, we have published in each issue summaries of orders passed by the Board of Railway Commissioners, so that subscribers who have filed our paper have a continuous record of the Board's proceedings. No other paper has done this. Complete copies of any of the orders summarized below, or of others previously passed by the Commission, will be furnished for 25 cents, cash to accompany requests for copies in all cases.

6292. Feb. 17.—Directing G.T.R. to protect Foxmead crossing, near Atherly, Ont., by electric bell.

6293. Feb. 18.—Directing W.E. & L.S.R. Ry. to equip all its cars with air brakes within 3 months from date of order.

6294. Feb. 26.—Authorizing Bell Telephone Co. to place its wires across the M.C.R. tracks in Crowland tp., Ont.

6295. Feb. 19.—Authorizing Water Commissioners of Guelph, Ont., to lay a main under C.P.R. in Guelph, and a water conduit across G.T.R. in Puslinch tp., Ont.

6296. Feb. 19.—Authorizing city of Vernon, B.C., to lay sewer pipes under C.P.R.

6297. Feb. 19.—Authorizing C. H. Winslow, Millbrook, Ont., to lay water pipe under G.T.R. track.

6298. Feb. 19.—Authorizing C.P.R. to construct a spur to Pintsch Compressing Co.'s premises, North Bay, Ont.

6299. Feb. 10.—Fixing maximum charge to be made by shipments of new empty cars over two or more railways. See pg. 251.

6300. Feb. 19.—Authorizing Robitaille Eureka Distillery to place electric wire under Quebec Ry., Light and Power Co.'s tracks near Beauport station, Que.

6301. Feb. 15.—Authorizing C.N.Q. Ry. to ballast its Montford branch; make suitable ditches along its right-of-way; remove all brush; replace the rail now in use with a heavier rail; provide a platform and shelter for passengers at Chapleau; supply regular passenger trains with baggage cars; appoint a permanent agent at Montford; and certain other requirements.

6302. Feb. 20.—Authorizing Scarboro Independent Telephone Co. to place its wires across C.P.R. in Scarboro tp., Ont.

6303. Feb. 20.—Authorizing Bell Telephone Co. to place wires across G.T.R. at Boucher St., Meaford, Ont.

6304. Feb. 20.—Authorizing Alberta Government Telephones to place wires across C.P.R. at Standard Soap Works, Calgary, Alta.

6305. Feb. 20.—Authorizing Alberta Government Telephones to place wires across C.P.R. tracks near Strathcona, Alta.

6306. Feb. 13.—Dismissing application of Guernsey, Sask., Board of Trade for order directing C.P.R. to give to Guernsey a lower rate on grain to the terminal elevators at Fort William than at present.

6307. Feb. 13.—Dismissing application of Saskatchewan Grain Growers' Association alleging excessive rates on lumber and coal shipments.

6308. Feb. 13.—Dismissing complaint of Elstow, Sask., Board of Trade, alleging delay on part of railway companies in transportation and delivery of coal shipments.

6309. Feb. 13.—Dismissing complaint of W. O. Miller, Tessier, Sask., alleging inability to secure a settlement from the C.N. Ry. for property taken for railway purposes.

6310. Feb. 13.—Authorizing G.T.P. Ry. to construct, within 15 days, a temporary crossing over tracks at Zelma, Sask., and dismissing petition for a station and freight room accommodation.

6311. Feb. 13.—Dismissing petition of residents of Rush Lake, Sask., requesting C.P.R. to construct a highway over its tracks there.

6312. Feb. 13.—Dismissing complaint of C. L. Mintminnick of Churchbridge, Sask., that G.T.P. Ry. has failed to compensate him for right-of-way through his property.

6313. Feb. 13.—Dismissing petition of farmers and grain growers in Saskatoon County, Sask., for loading platform at a siding of C.N.R. Goose Lake branch on sec. 8-36-6, w. 3.

6314. Feb. 13.—Dismissing complaint of Strassburg, Sask., Board of Trade respecting C.P.R. freight rates on lumber shipments.

6315. Feb. 13.—Dismissing complaint of J. R. Standen and others of Osage, Sask., alleging that C.P.R. proposes closing its station there, and asking that the same be continued.

6316. Feb. 13.—Dismissing complaint of Rosaleigh School District 820 of Frobisher, Sask., of failure of C.P.R. to provide station agent or operator at Hirsch, Sask.

6317. Feb. 13.—Dismissing application of C.P.R. for authority to construct branch line in Regina, Sask., from northerly boundary of its station grounds between Broad and Rose Sts. across Dewdney St. and 8th Avenue.

6318. Feb. 13.—Dismissing complaint of J. L. Sundabe, Hitchcock, Sask., that C.P.R. has refused to put in a crossing over road allowance in sec. 22, tp. 3, r. 9, w. 2 m.

6319. Feb. 13.—Requiring C.P.R. and C.N.R. to file with Board joint tariff on coal shipped from Taber, Alta., destined to Dalmeny, Sask., making provision for same rate that exists from Taber to Rosthern, Sask.

6320. Feb. 13.—Authorizing C.P.R. Co. to move the existing westerly connection of spur across blocks 7 and 11 in Estevan townsite, Sask., and re-establish the easterly connection, thereby reinstating the location and length of spur as the same existed prior to said change made by the Co., and rescinding order of May 6, 1908.

6321. Feb. 13.—Ordering C.N. Ry. to erect and maintain a third-class station at Condie, Sask., and place an agent in charge on or before June 1.

6322. Feb. 13.—Ordering C.N. Ry. to erect fences on both sides of its right-of-way where the same crosses the lands of H. K. Miller, of Lumsden, Sask., on or before May 15.

6323. Feb. 13.—Ordering C.N. Ry. to fence along both sides of its right-of-way through sec. 32, 19, 21, w. 2 m., on or before May 15,

6324. Feb. 13.—Authorizing C.N. Ry. to construct crossing across its right-of-way in Aberdeen, Sask., and to grade approaches and furnish all necessary planking.

6325. Feb. 13.—Directing C.N. Ry. to establish gates on either side of its right-of-way and station grounds on 23rd St., Saskatoon, on or before May 15, and to continue the filling between its main line and Goose Lake branch.

6326. Feb. 8.—Directing C.N. Ry. to fence both sides of its right-of-way between Dauphin and Gilbert Plains, on or before Sept. 1.

6327. Sept. 1.—Granting permission to Pere Marquette Rd. and Lake Erie and Detroit River Ry. to load and unload on and from car ferries plying between Conneaut, Ohio, and Port Stanley, Ont., and forward to their destination trains in transit in the United States or Canada, on such ferries or on the lines of the said railway companies when the Lord's Day begins, and do any work necessarily incidental thereto, including the returning of empty cars which have been placed in the slip tracks at Port Stanley before 6 a.m. or after 8 p.m. upon the Lord's Day.

6328 to 6330. Feb.13.—Directing council of Dundurn, Sask., to elect whether it accepts permanent crossing over C.N. Co.'s tracks and station grounds 700 ft. south of the south limit of Clark St., and a temporary crossing over and at or near the north end of existing elevator track, such last crossing, if elected to be taken, to remain in existence and to be used only till the company may lay an additional track between the existing main line and the elevator track; and upon the laying of such new track, the temporary crossing at the end of the elevator track shall be closed, or the council may elect to take a permanent crossing as provided in order of Nov. 29, 1907, and immediately upon the council electing as aforesaid the Ry Co. shall construct such crossing and perform the grading and lay planking.

6331. Feb. 13.—Directing C.P.R. and C.N.R. Co.'s to agree upon terms for the erection of union station and establishment of joint facilities at Maryfield, Sask., on or before May 1, and to file agreement with Board. If the companies are unable to agree upon terms within time mentioned, then the same shall be settled by the Board, upon application of any interested party.

6332. Feb. 13.—Directing C.N.R. to construct a fence along both sides of its right-of-way where the same crosses the n.e. quar. sec. 21, tp. 19, r. 21, w. 2 m.

6333. Feb. 13.—Directing C.N.R. to construct farm crossing across the right-of-way through lands of C. Mann, Lumsden, Sask., to furnish gates and put in planking.

6334. Feb. 13.—Authorizing G.T.P.R. to refund overcharge admitted by letter of J. E. Dalrymple, Feb. 8, 1909, on shipment of settlers' effects from Mt. Forest to Moose Jaw, Sask.

6335. Feb. 20.—Amending order 1876 of Oct. 22, 1906, by striking out the clause limiting the speed to 15 miles an hour at which the C.P.R. shall operate trains over portion of the line from Bolton to Craighurst, Ont., authorized to be operated by said order.

6336. Feb. 20.—Authorizing Stormont Telephone Co. to place wires across G.T.R. tracks at Aultsville, Ont.

6337. Feb. 20.—Authorizing city of Winnipeg to lay sewer under C.P.R., Brown and Sutherland spur, where same intersects Sutherland Ave., Winnipeg.

6338. Feb. 19.—Authorizing Robitaille Eureka Distillery to place water pipe under Quebec Ry., Light and Power Co.'s tracks near Beauport, Que.

6339. Feb. 16.—Authorizing C.P.R. to construct its railway across 15 highways in Medonte tp., Ont.

6340. Feb. 22.—Ordering that G.T.R. crossing on Main Street, Welland, Ont., be protected by gates and watchmen.

6341. Feb. 12.—Directing that M.C.R. crossing on South Main St., Welland, Ont., be protected by flagmen, warning persons of approach of trains 17 and 31.

6342. Feb. 22.—Authorizing Okanagan Telephone Co. to place wires across C.P.R. at Vernon, B.C.

6343 to 6346. Feb. 22.—Authorizing Winnipeg Electric Ry. to place transmission wires across the C.P.R. in St. Boniface at four points.

6347. Feb. 22.—Authorizing the city of Winnipeg to lay a sewer under C.P.R. at Barton Ave.

6348. Feb. 25.—Authorizing Manitoba Government Telephones to erect wires across C.N. Ry. at Rat Portage Lumber Co.'s spur, Norwood, Man.

6349 to 6352. Feb. 26.—Authorizing Manitoba Government Telephones to erect wires across C.P.R. tracks at various points.

6353 to 6356. Feb. 26.—Authorizing C.N.-O.R. to erect telegraph wires across the

G.N.W. Telegraph Co.'s wires at various points in Ontario.

6357. Feb. 26.—Authorizing Manitoba Government Telephones to erect wires across C.P.R. tracks 2¾ miles east of Plum Coulee, Man.

6358. Feb. 26.—Authorizing C.N.O.R. to erect wires across G.N.W. Telegraph Co.'s and Bell Telephone Co.'s wires, lot 3, con. 1, Cumberland tp., Russell Co., Ont.

6359 to 6363. Feb. 26.—Authorizing Alberta Government to erect wires across C.P.R. tracks at various points.

6364. Feb. 26.—Authorizing C.N.O.R. to erect telegraph wires across G.N.W. Telegraph Co.'s and Bell Telephone Co.'s wires at Longueuil St., L'Orignal, Ont.

6365. Jan. 27.—Authorizing C.P.R. and C.N.O.R. to construct branch lines in Parry Sound, Ont.

6366. Feb. 22.—Extending until May 1, 1909, order 6167, dated Feb. 4, 1909, directing express companies subject to the Board's jurisdiction in Canada to accept and carry acetylene gas under rules and regulations prescribed in connection therewith in the official Express Classification no. 18, and at the rating therein provided; and that a supplement be issued to Express Classification no. 16, as now in effect, to provide for the said changes becoming effective not later than March 1, 1909.

6367. Feb. 25.—Authorizing C.N.O.R. to take part of lot 22, con. 11, Mara tp., Ont., for diverting a highway.

6368. Feb. 22.—Varying order 5869, Dec. 16, 1908, and authorizing C.N.O.R. to construct its railway across highway on lot 20, con. 2, York tp., Ont., also rescinding order 6192, Feb. 4, 1909, dismissing the application.

6369. Feb. 27.—Authorizing C.P.R. to cross with its Sudbury-Kleinburg branch, highways in Vespra, Ont., and amending order 6139, Jan. 27, 1909.

6370. Feb. 13.—Authorizing the town of Indian Head to construct water pipe across C.P.R. property and under its tracks, Indian Head, Sask.

6371. Feb. 17.—Authorizing city of Calgary to lay water main under C.P.R. tracks at Fourth St. West, Calgary, Alta.

6372. Feb. 17.—Dismissing application of S. Ottewell, Clover Bar, Alta., for permission to allow his cattle to run under G.T.P.R. bridge at s.w. 13.53, 23 west 4th mer.

6373. Mar. 5.—Authorizing C.P.R. to operate bridge at mile 4.2, Guelph branch, Ontario Division, of its line.

6374. Feb. 26.—Authorizing C.P.R. (B.C. Southern Ry.) to construct and operate branch line, or spur, to F. Dailey's premises, lot 3063, group 1, east of Kootenay District, B.C.

6375. Feb. 26.—Approving C.P.R. plan showing bridge over highway near Highlands, Que.

6376. Feb. 17.—Dismissing complaint of C. Knight, Calgary, Alta., against the C.P.R., alleging discrimination in live stock rates from Strathmore to Hochelaga; also from Calgary et al and Winnipeg, and alleged discrimination between the complainant and P. Burns & Co.

6377. Feb. 17.—Authorizing city of Calgary, Alta., to lay water pipe under C.P.R. tracks at First St. West.

6377a. Feb. 26.—Authorizing Toronto Electric Light Co. to erect temporarily, certain wires for the conveyance of electricity over G.T.R. right-of-way and tracks near Lansdowne Ave., Toronto.

6378. Feb. 27.—Authorizing Bell Telephone Co. to erect wires and cables across G.T.R. tracks at Station St., Lennoxville, Que.

6379 to 6385. Mar. 1.—Authorizing Argyle Rural Municipality to erect wires across C.N.R. tracks at various points in Manitoba.

6386. Jan. 18.—Dismissing complaint of G. E. Barber Co., Ltd.; Hall & Fairweather, Ltd.; C. H. Peters & Sons, A. C. Smith & Co., and the W. F. Hathaway Co., Ltd., and the city of St. John, N.B., against an arrangement with the C.P.R., the I.C.R. and the Seely Packet Line, for handling grain products from the west for ports on the Bay of Fundy, from stations on the Dominion Atlantic Ry. in Nova Scotia.

6387. Feb. 27.—Authorizing G.T.R. to refund to A. Baile, Montreal, the amount of overcharge, namely, 20c. a ton on carload of coal shipped from Huntingdon, Que., to Ottawa.

6388. Feb. 26.—Authorizing Bell Telephone Co. to place wires under G.T.R. tracks at siding, corner of 7th con. and Crowland Rd., Crowland, Ont.

6389, 6390. Feb. 17.—Authorizing city of Calgary, Alta., to lay water mains under the C.P.R. tracks at Eleventh St. West and Thirteenth St. East.

6391. Feb. 17.—Dismissing application of city of Calgary for agreement between the city and C.P.R., dated Dec. 13, 1906, and the Board's order of same date with respect to subway under C.P.R. tracks at Osler St. and First St. East, Calgary.

6392. Feb. 17.—Dismissing complaint of T. Fitzgerald, Crossfield, Alta., that C.P.R. train employes in that district are employed an excessive length of time on continuous duty.

6393. Feb. 15.—Authorizing city of Medicine Hat, Alta., to construct a subway from the interesection of Toronto St. with North Railway St., under C.P.R. right-of-way, to the intersection of Toronto St. with South Railway St.

6394. Feb. 15.—Dismissing application of city of Medicine Hat, Alta., for an order authorizing the construction of an overhead bridge on Ottawa St., over C.P.R. right-of-way.

6395. Feb. 15.—Authorizing city of Medicine Hat to extend Main St. across C.P.R. lands and right-of-way, forming a public highway; and authorizing the city to construct a public crossing under the C.P.R. Saskatchewan River bridge, between the east pier and the east abutment, at the city's cost.

6396. Feb. 17.—Authorizing R. Lake, Blairmore, Alta., to lay water pipe under C.P.R. tracks at road allowance n.e. quar., sec. 34, tp. 7, r. 4, w. 5 m.

6397. Feb. 19.—Dismissing complaint of W. Robinson, Hurry, Alta., that the G.T.P.R. has constructed its right-of-way across his homestead, made a deep cut through his property, and thrown waste material over his land.

6398. Feb. 19.—Dismissing complaint of Alberta Farmers' Association, respecting condition of the Edmonton, Yukon & Pacific Ry. bridge, approved by order 5691, Nov. 24, 1908.

6399. Feb. 17.—Authorizing city of Calgary, Alta., to cross C.P.R. spur on Second St. East with Calgary St. Ry. tracks.

6400. Feb. 19.—Dismissing complaint of A. Landals, Strathcona, Alta., that the C.P.R. has constructed a wagon road across his property, cutting his place in three parts and shutting him off from water.

6401. Feb. 19.—Dismissing application of town of Vegreville, Alta., for authority to construct a highway crossing over C.N.R. tracks at Main St.

6402. Feb. 19.—Dismissing application of Parkdale Coal Co., Edmonton, Alta., against G.T.P.R. continuing its right-of-way through portion of lot 22, Edmonton Settlement Survey.

6403, 6404. Feb. 17.—Authorizing city of Calgary, Alta., to lay water pipe and sewer pipe under C.P.R. tracks at Eighth St. West, and Fifth St. West, respectively.

6405. Feb. 17.—Authorizing Calgary Gas Co. to lay gas main under C.P.R. tracks at Eighth St. West.

6406. Feb. 8.—Dismissing application of city of Winnipeg for authority to construct a bridge between Brown and Brant Sts., over C.P.R. yards, and directing the C.P.R. to contribute towards the cost of construction.

6407. Feb. 8.—Approving C.P.R. location line across road allowance on its Molson branch, between mile 99 and 124.

6408. Feb. 8.—Authorizing city of Winnipeg to construct crossings over the Louise Bridge spur at Talbot, Chalmers, Poplar and Gordon Sts., and over the old main line, or Selkirk branch, C.P.R., at Talbot, Chalmers and Nairn Sts., and ordering that all expense in connection with necessary grading, etc., be borne by the city.

6409. Feb. 8.—Dismissing application of D. A. Keizer, Engineer of St. Paul's municipality, for authority to lay a culvert under C.P.R. tracks at Rossmore Ave., lot no. 3, St. Paul's, Winnipeg.

6410. Feb. 19.—Authorizing Edmonton Radial Ry. to cross with its tracks the Edmonton, Yukon & Pacific Ry., at corner of Hardisty Ave. and Curry St., Edmonton, Alta.

6411. Feb. 19.—Dismissing application of East Clover Bar Branch of Alberta Farmers' Association, requiring railways to provide movable partitions in cars, to enable farmers to make individual shipments.

6412. Feb. 19.—Dismissing application of C.N.R. for authority to construct a spur from its main line to Cushing's mill and lumber yard, Edmonton, Alta.

6413. Feb. 19.—Approving location of C.P.R. branch line from Peave Ave. to Sixteenth St., along the south side of Mackenzie Ave., Edmonton, Alta.

6414. Feb. 19.—Authorizing city of Edmonton, Alta., to extend Sixteenth St. south, across C.N.R. lands and right-of-way, to join Sixteenth St. north of the said railway lands; and ordering that all expense in connection with the necessary grading, etc., be borne by the city, and that the C.N.R. shall receive no compensation for the use by the city of lands covered by the extension.

6415. Feb. 19.—Dismissing complaint of J. C. Haddock, Wabamun, Alta., that the G.T.P. Ry. Co. took possession of his lands on east half sec. 8, tp. 53, r. 4, w. 5 m., without full settlement.

6416. Feb. 19.—Dismissing application of J. Gainer & Co., Strathcona, Alta., for lower minimum weight on live hogs in double-decked cars; also for order authorizing C.P.R. to rebate to applicants excessive freight on two cars live hogs shipped from Wetaskiwin and Strathcona to Victoria, B.C.

6417. Feb. 19.—Dismissing complaint of C. Hind, Mannville, Alta., alleging excessive freight rates by the C.P.R. on a horse shipped from St. John, N.B., to Strathcona, Alta.

6418. Feb. 19.—Dismissing complaint of P. Reid, Blackfalds, Alta., that C.P.R. has removed gates andcut posts and wires where the railway affects his property, causing loss by cattle getting on the right-of-way and being killed.

6419. Feb. 19.—Dismissing application of city of Edmonton, for an order declaring that the plan, profile and book of reference of the C.P.R. location through Edmonton is not in accordance with the Railway Act, and that same be annulled.

6420. Feb. 19.—Dismissing complaint of United Farmers of Alberta that railway companies had not fenced their right-of-way, that grain cars are not provided with proper grain

doors, that freight rates are excessive, that serious losses are sustained by reason of stock cars not being promptly spotted for unloading; and that in districts where new railway lines are being built, farmers are compelled to sustain heavy losses because the companies do not fence or protect their right-of-way while work is being done thereon.

6421. Feb. 19.—Authorizing G.T.P.R., on or before April 1, 1909, to construct a suitable temporary crossing for use of farmers desiring to cross the tracks with farm implements, between sections 12 and 13, tp. 53, r. 23, w. 4 m.; between mile 77 and 112; and that the temporary crossing shall be discontinued when the permanent subway is constructed.

6422. Feb. 17.—Authorizing the municipality of Didsbury, Alta., to open a street across Calgary and Edmonton Ry. right-of-way and tracks, in the line and of the width of Hespler St., in an easterly direction, to the easterly boundary of C. & E. R. lands, all expense in connection therewith to be borne by the municipality; any questions that may arise as to protection (if any) to be reserved for further consideration; and the crossing of the C. & E.R. lands at Waterloo St. shall not be affected by this order.

6423. Feb. 25.—Ordering the crossings in the village of West Lorne, Ont., be protected by gates to be installed by the M.C. Rd.; the gates to be controlled from a tower between the M.C.R. and Pere Marquette lines; detail plans to be submitted to engineer of Board; the gate operators to be appointed by the M.C. Rd., and the cost of installing gates and erecting tower to be borne equally by the M.C. Rd. and P.M. Rd.

6424. Feb. 25.—Ordering that the M.C. Rd.'s and Pere Marquette Rd.'s crossings in Dutton, Ont., be protected by gates.

6425. Mar. 1.—Authorizing the city of Calgary, Alta., to place its electric light and power wires across C.P.R. tracks at Eighth St. East, Calgary, Alta.

6426. Feb. 26.—Authorizing the C.P.R. to construct a branch line, or spur, from a point at chainage 141.77 on the Quebec section of its line, to the premises of Leroux Bros., lots 456 and 457; together with another spur commencing from a point on the first-mentioned spur 431 ft. in an easterly direction.

6427. Feb. 27.—Authorizing the Esquimalt and Nanaimo Ry. to construct a spur to the Shawinigan Lake Lumber Co.'s premises, lot 13, Malahat district, Vancouver Island, B.C.

6428. Feb. 27.—Authorizing C.P.R. to construct two branch lines, or spurs, on the s.e. quar. sec. 11, tp. 24, r. 1, w. 5 m., near Calgary Jct., Alta., for the Alberta Portland Cement Co.

6429. Feb. 27.—Authorizing C.P.R. to construct a branch line or spur in Abbottsford, B.C., to the Abbottsford Shingle Co.'s premises, on the n.e. quar. sec. 15, tp. 16, east coast meridian, B.C.

6430. Mar. 3.—Approving location of Kootenay Central Ry. from a point on the southern boundary of lot 109, G 1,547, to a point on the B.C. Southern Ry., north of Galloway, lot 3,063 A 320, East Kootenay, mileage 103.4 to mileage 173.29.

6431. Mar. 3.—Amending order 6160, Feb. 4, 1909, authorizing the Manitoba Government Telephones to cross C.P.R. tracks ¼ mile west of Brookdale, Man., by adding the following clause, viz.: "It is further ordered "that the poles on each side of the track be "guyed back so as to make it impossible for "them to fall on the track."

6432. Mar. 3.—Authorizing the Bell Telephone Co. to place its wires across T.H. & B. Ry. tracks ½ mile northwest of Chantlers station, Ont.

6433. Mar. 3.—Authorizing the C.N.O.R. to erect telegraph wires across Bell Telephone Co.'s wires, lot 20, con. 2, tp. Alfred, Ont.

6434. Mar. 3.—Authorizing A. B. Greenwood to place a telephone line across G.T.R. tracks at side road between lots 20 and 21, con. 7, North Gwillimbury, Ont.

6435 to 6438. Mar. 2.—Authorizing the Hamiota rural municipality, Man., to place wires across G.T.P.R. tracks at four points.

6439. Mar. 2.—Authorizing the city of Winnipeg to lay a sewer under C.N.R. tracks, where the same intersect Lombard St., known as the Winnipeg Transfer Ry.

6440. Feb. 25.—Ordering that the crossings of the highway by the M.C. Rd. and P.M. Rd., in Rodney, Ont., be protected by folding fence gates.

6441. Feb. 17.—Dismissing application of city of Calgary respecting subway under C.P.R. tracks at Osler St., and First St. East, Calgary, Alta.

6442. Feb. 19.—Dismissing application of H. Harvey, Strathcona, Alta., alleging loss sustained on certain goods shipped from Edmonton to a flag station on the C.N.R.

6443. Feb. 8.—Directing the C.N.R. to stop the train known as the "St. Paul Flyer" at St. Agathe, Man.; and to stop no. 7, due to arrive at Winnipeg at 7.25 a.m., at St. Agathe.

6444. Feb. 19.—Dismissing complaint of J. Gainer & Co., Strathcona, alleging excessive freight rates charged by the C.P.R. on live stock from Wetaskiwin, Alta., to Winnipeg, Man.

6445. Feb. 19.—Limiting approval of G.T.P.R.'s location plan, sec. 17, tp. 53, r. 23, w. 4 m., through Edmonton, known as its freight line, to 50 ft. on either side of the centre line as appearing upon the said plan.

6446. Feb. 19.—Dismissing complaint of H. A. Glaspell, alleging delay in delivery of express parcels by the Dominion Express Co., at Vegreville, Alta.

6447. Mar. 3.—Approving location of C.P.R. Touchwood Hills branch, from a point in sec. 15, tp. 28, r. 7, w. 2 m., at Theodore, Sask., to a point in sec. 30, tp. 28, r. 10, w. 2 m., and thence to a point in sec. 20, tp. 32, r. 17, w. 2 m., on the Quill Lakes branch.

6448. Mar. 3.—Authorizing the Chatham, Wallaceburg & Lake Erie Ry. to operate its trains over the crossing under the M.C. Rd. tracks on west side of Town Line Road, near Charing Cross, Ont.

6449. Mar. 2.—Approving revised location of C.P.R., mileage 1 to mileage 12.3, between Broadview and Grenfell, Sask.

6450. Mar. 2.—Approving location of Burk's Falls & French River Ry., from station 0 to station 55, lot 3, con. 1, Armour tp., Parry Sound district, Ont.

6451. Mar. 2.—Authorizing C.N.O.R. to open for traffic that portion of its railway between Rosedale and Queen St., Toronto, Ont.

6452. Mar. 2.—Amending order 5568, Nov. 3, 1908, by adding after the word "crossing" in the 6th line of paragraph 1, the words, "or by establishing electric connection by any other device or method which will indicate whether or not the bell is in good working order." This order refers to electric bells at crossings. See Dec., 1908, pg. 867, Jan., pg. 13.

6453. Feb. 19.—Dismissing complaint of C. N. Corbett, Edmonton, Alta., alleging excessive express charges by express companies in the west.

6454. Mar. 3.—Authorizing C.P.R. to construct a branch line or spur in St. Louis, Montreal parish, Que., to the Hartt & Adair Coal Co.'s premises.

6455. Mar. 3.—Authorizing the G.T.R. to construct four branch lines from a point on its branch to the premises of the Erie Realty Co., and of other traders north of Eastern Ave., Toronto, and thence westerly to Lever Bros.' premises, south of Eastern Ave.

6456 to 6460. Mar. 3.—Authorizing the Canadian Machine Telephone Co. to place its wires across T.H. & B.R. tracks at 5 points in Brantford, Ont.

6461. Mar. 3.—Authorizing the Alberta Government to place wires across the Edmonton, Yukon & Pacific Ry. tracks, 1½ miles east of Strathcona, between secs. 22 and 27, tp. 52, r. 24, w. 4 m.

6462. Mar. 3.—Authorizing Great Northwestern Telegraph Co. to place its wires across G.T.R. tracks, leading from its main tracks to Canadian Ship Building Co.'s yards, Bathurst St., Toronto.

6463. Mar. 3.—Authorizing Manitoba Government Telephones to place wires across C.P.R. tracks ½ mile west of Minnedosa station, Man.

6464. Feb. 4.—Authorizing G.T.R. to connect its tracks with the Hamilton Radial Ry. tracks near Burlington, Ont.

6465. Feb. 4.—Authorizing the Hull Electric Ry. to cross C.P.R. tracks in Hull, Que.

6466. Feb. 25.—Ordering that an electric bell be installed at the crossing of L'Esperance Road, Tecumseh, Sandwich East tp., Ont., by the G.T.R.; cost of installation, to an amount not exceeding $300, to be borne by the township, and the maintenance to be at the expense of the G.T.R.

6467. Mar. 5.—Authorizing the Chatham, Wallaceburg & Lake Erie Ry. to open for traffic portions of its line on Union St., Aberdeen Bridge, King, Third and Raleigh Sts., from Raleigh St. to William St., and on William and Queen Sts., Chatham, Ont.

6468. Mar. 5.—Approving P.M. Rd.'s Standard Passenger Tariff, C.R.C. 190.

6469. Mar. 5.—Authorizing C.P.R. to use and operate 25 bridges on its Toronto-Sudbury line.

6470. Mar. 5.—Authorizing C.P.R. Co. to construct a branch line or spur to the Okanagan Produce Co.'s premises, lots 4, 3 and 2, block 24, Vernon, B.C.

6471. Mar. 8.—Authorizing C.N.R. to connect its Hallboro extension with its Neepawa branch, near Hallboro.

6472 to 6474. Mar. 8.—Authorizing Bell Telephone Co. to erect its wires across the Central Ontario, C.P., and Brockville, Westport and N.W. Rys., at various points in Ontario and Quebec.

6475. Mar. 8.—Authorizing B.C. Telephone Co. to erect wires across E. and N.R. at Nanaimo, B.C.

6476, 6477. Mar. 8.—Authorizing Caradoc and Ekfred Telephone Co. to erect wires across the M.C.Rd. and G.T.R. at two points in Ontario.

6478. Mar. 6.—Authorizing C.P.R. to use 23 bridges on its Guelph and Goderich line.

6479. Mar. 6.—Authorizing South Leeds and Pittsburg Telephone Co. to erect wires across Thousand Islands Ry.

6480. Mar. 8.—Approving location of C.N.O. through Hardy, McConkey and Blair tps.

6481. Mar. 8.—Authorizing C.P.R. to use bridges on its Ottawa section, over Mill Creek and Back River.

6482. Mar. 8.—Authorizing C.P.R. to use 41 bridges on its Quebec section, between mileage 10.1 and 151.0.

6483. Mar. 8.—Authorizing C.P.R. to construct bridges over Lachine Canal, Montreal, near Ogilvie Flour Mills Co.'s premises; and rescinding order 6266, Feb. 16.

6484. Mar. 6.—Authorizing C.N.R. to construct its Hallboro branch across the C.P.R. Rapid City branch, in Manitoba.

6485. Mar. 6.—Authorizing G.T.R. to construct spur line to F. A. Laurie's premises, Lot 28, Parry Sound district, Ont.

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

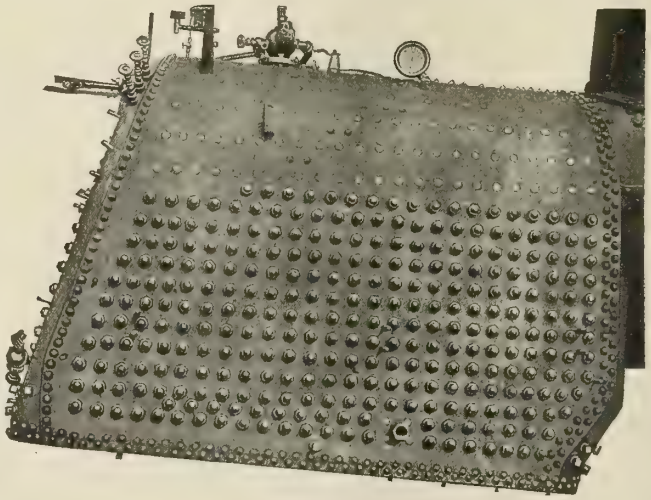
THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

AMERICAN BRAKE SHOE AND FOUNDRY COMPANY

NEW YORK MAHWAH, N.J. CHICAGO, ILL.

N. J. HOLDEN & CO., Agents, 302 St. James St., MONTREAL



AN INSTALLATION OF THE TATE FLEXIBLE STAY

THE TATE FLEXIBLE STAYBOLT.

THE PERFECT STAY

For Locomotive Fire Boxes

Over a million and a half bolts in service on over 100 railroads throughout the United States

Manufactured and Sold in Canada by

CANADA FOUNDRY COMPANY, Limited
TORONTO, ONT.

AGENTS FOR THE

We Carry the Largest and Most Extensive Assortment of Supplies of all Kinds Handled by any House in Canada

Babbit Metal, Valves, Steam-cocks, Gauges, Washers, Waste, Packing of all kinds, Car Bits, Braces, Angle Braces, Augers. All kinds of Carpenters' Tools, Machinists' Tools, Lathe Tools, Drills, Wrenches, etc.

LET US HAVE YOUR ENQUIRIES, OUR PRICES WILL CONVINCE YOU

RICE LEWIS & SON, LTD., TORONTO

6486. Mar. 6.—Authorizing C.P.R. to construct spur line for C. G. Johnson, in Vancouver, B.C.

6487. Mar. 9.—Authorizing G.T.R. to construct spur line to W. D. Morris' premises, Ottawa, Ont.

6488. Mar. 8.—Temporarily approving agreements of the Bell Telephone Co. with various rural telephone companies, provided tolls are not higher than those charged immediately previous to July 13, 1906, and authorized by law to charge.

6489. Mar. 8.—Authorizing city of Calgary, Alta., to erect light and power wires across C.P.R. at 8th St.

6490. Mar. 8.—Ordering that tender trucks (weighing 100,000 lbs. or over when loaded) of steam locomotives used in passenger service be equipped with steel-tire wheels on or before Dec. 1, 1909.

6491. Mar. 9.—Authorizing S. Hollingsworth, of Blueberry Creek, Castlegar, B.C., to lay wooden pipe under C.P.R.

6492. Mar. 8.—Authorizing Bell Telephone Co. to erect wires across G.T.R. at Kent St., Simcoe, Ont.

6493. Mar. 9.—Authorizing Credit Municipal Canadien to lay pipes under G.T.R. at the Upper Lachine Road, Rockfield, Que., near boundary line between town of St. Pierre and Montreal West, and west of the Simplex Ry. Appliance Co.'s works at St. Pierre aux Liens, Que.

6494. Mar. 6.—Authorizing G.T.R. to construct spur lines to the Dyment-Mickle Lumber Co.'s premises, Nipissing district, Ont.

6495. Feb. 19.—Authorizing G.T.P.R. to take parts of various lots in the n.w. ¼ of sec. 18, tp. 53, north range 24, w. 4th mer., Edmonton, Alta.

6496. Mar. 11.—Authorizing C.P.R. to construct spur line to Columbia River Lumber Co.'s premises near Tappen, B.C.

6497. Mar. 11.—Authorizing C.P.R. to construct spur line to Manitoba Gypsum Co.'s premises, Winnipeg.

6498. Mar. 10.—Authorizing Bell Telephone Co. to erect wires across C.V.R. ½ mile west of Farnham, Que.

6499. Mar. 12.—Authorizing C.P.R. to divert original road allowance between secs. 25 and 26, tp. 16, r. 5, w. 2nd mer., Sask.

6500. Mar. 9.—Authorizing C.P.R. to construct spur line to Montreal Light, Heat and Power Co.'s premises, Montreal.

6501. Mar. 12.—Authorizing Winnipeg Electric Railway Co. to cross, at rail level, the C.P.R. line across Logan Ave., Winnipeg.

6502. Mar. 12.—Dismissing application of Toronto and Niagara Power Co. for approval of location of transmission line from Cainsville to Brantford, Ont.

6503. Mar. 11.—Authorizing C.N.O.R. to permanently divert side road lying between lots 13 and 14, con. 1, Gloucester tp., Ont.

6504. Mar. 9.—Authorizing N., St. C. & T. Ry. to connect its tracks with T.H. & B. Ry. tracks in Crowland tp., Ont.

6505. Mar. 12.—Directing Montreal Light, Heat and Power Co. to remove power wires placed across C.P.R. in vicinity of Lachine canal, Que.

6506. Mar. 12.—Authorizing C.P.R. to use bridge 37A on its Webbwood section, Ont.

6507. Mar. 12.—Authorizing C.P.R. to use bridge at mileage 27.34 and at highway crossing at Nelson St., Sudbury, on its Cartier section, Ont.

6508. Mar. 12.—Authorizing C.P.R. to use bridges 5.5 and 27.6 on its Teeswater section, Ont.

6509. Mar. 12.—Authorizing C.P.R. to use five bridges, 2.2, 6.8, 23.8, 27.3 and 30.1, on its Orangeville branch, Ont.

6510 to 6512. Mar. 12.—Authorizing C.P.R. to use certain bridges on its Sault Ste. Marie, Port Burwell and North Toronto branches, Ont.

6513. Mar. 12.—Authorizing Manitoba Government Telephones to cross G.T.P.R. 4½ miles east of St. Boniface station.

6514. Mar. 12.—Authorizing G.T.R. to construct spur line to Shirback, Connor & McLachlan's premises, Himsworth tp., Ont.

6515. Mar. 13.—Authorizing Wood Products Co. of Canada, Ltd., to erect wires across G.T.R. at Donald, Haliburton, Ont.

6516. Mar. 12.—Authorizing C.P.R. to use six bridges on its Owen Sound section, Ont.

6517. Mar. 12.—Authorizing Central Ontario Ry. to construct spur line to R. J. Graham Co.'s premises, Frankford, Ont.

6518. Mar. 9.—Authorizing C.N.O.R. to build across six highways in Gloucester tp., Ont.

6519. Mar. 12.—Authorizing Saraguay Electric Light and Power Co. to erect wires across C.P.R. in Notre Dame municipality, Hochelaga County, Que.

6520. Mar. 15.—Approving C.P.R. plans for proposed rearrangement of interlocking plant at Richmond St., London, Ont., at crossing of London St. Ry.

6521. Mar. 12.—Authorizing Northern Colonization Ry. (C.P.R.) to build across highways and divert certain portions of the highways between Nominingue, Que., and ten miles n.w.

6522. Mar. 16.—Authorizing municipality of Hamiota, Man., to erect wires across C.P.R. near Hamiota.

6523. Mar. 13.—Authorizing G.T.R. to build a bridge and approaches for vehicular traffic, on A. M. Dickie's farm crossing, in London tp., Ont.

6524. Mar. 16.—Authorizing Wainfleet tp., Ont., to lay culvert under G.T.R.

6525. Mar. 16.—Authorizing Essex Terminal Ry. to join its track with the C.P.R. at or near McDougal St., Sandwich West tp., Ont., and amending order 5204, by striking out the words "on the gravel road."

6526. Mar. 16.—Authorizing the G.T.R. to construct spur to C. A. Larkin's premises, Toronto.

6527. Mar. 16.—Authorizing C.P.R. to construct spur line in Stonewall, Man., to A. Patterson & Co.'s premises.

6528. Mar. 16.—Authorizing Bell Telephone Co. to erect wires across C.P.R. near Farnham, Que.

6529. Mar. 16.—Approving location of C.P.R. proposed new station and freight shed at Weston, Ont.

6530. Mar. 17.—Approving location of C.N.O.R. through Roberts tp., Ont.

6531. Mar. 17.—Directing G.T.R. to construct and operate spur line to Christie, Henderson & Co.'s premises, Toronto.

6532. Mar. 17.—Authorizing C.P.R. to build across highways in Bentinck tp., Ont.

6533. Mar. 17.—Approving temporarily agreements of Bell Telephone Co. with various rural telephone companies, provided that the tolls charged by same are not higher than was charged immediately previous to July 13, 1906, authorized by law.

6534. Mar. 18.—Approving location of Q.M. & S.R. new station at Sorel, and Pierreville, Que.

6535. Mar. 18.—Rescinding order 6490, of Mar. 8, 1909, in regard to engines weighing 100,000 lbs. or over being equipped with steel-tire wheels, on or before Dec. 1, 1909.

6536. Mar. 9.—Authorizing St. Mary's & Western Ont. Ry. to construct spur line to D. Maxwell & Sons' premises, St. Mary's, Ont.

6537. Mar. 16.—Authorizing C.P.R. to build across certain highways in Bentinck tp., Ont.

Abandonment of Locomotive Works Project.

In regard to the proposal of Beyer, Peacock & Co., Ltd., of Manchester, Eng., to establish locomotive works near Montreal, which was considerably discussed towards the end of 1907, the following extract from the remarks of Sir Vincent Caillard, Chairman of Directors at that company's recent annual meeting, will be of interest: "I come now to capital expenditure in suspense. At the general meeting last year I gave a full explanation of what this item comprised, and I may, perhaps, be allowed to express our regret that the project we then had in view with regard to Canada has not been carried out. This disappointment most certainly cannot be ascribed to any lack of encouragement on the part of the Canadian railway companies—and I am glad to have this opportunity of stating that in public—nor can it be ascribed to any want of energy on our part. I should like to add, with regard to the Canadian companies, that they treated us with every courtesy and kindness and gave us a warm welcome, but circumstances arose beyond our control. I need scarcely remind you of the financial crisis, the effects of which extended far into last year, and that trade depression reigned throughout the year, and is still with us. Circumstances arose, I say, beyond our control, which led us reluctantly to the conclusion that we had better abandon our Canadian project. I explained last year that even if we should have to abandon this scheme, there would be scarcely any, if any, risk of loss, and I am glad to repeat that statement now."

Railway Commissioners' Titles.—An Ottawa press despatch of Mar. 9 says: "The Railway Commission has proclaimed itself a democratic body, and does not want to be addressed as 'their Lordships,' etc., but orders the presiding officer to be addressed as 'Mr. Chairman,' and the others as 'Mr. Commissioner.'" In our Oct., 1908, issue, we gave authoritative information as to the use, or misuse, of titles in this connection, in the hope that we might induce our contemporaries to conform to the rules of etiquette, but the frequent and recent use of the prefix "Judge," "Mr. Justice," or "The Hon.," when referring to the Chief Commissioner, makes us feel that our effort in that direction has been largely in vain.

Steel Tire Wheels for Tenders.—The Board of Railway Commissioners passed the following order 6535, Mar. 18: In pursuance of the powers conferred upon the Board by secs. 30 and 264 of the Railway Act, and of all other powers possessed by it in that behalf; and upon the report and recommendation of the Inspector of Railway Equipment and Safety Appliances, it is ordered that tender trucks where the tender when loaded (weighs 100,000 lbs. or over) of locomotives used in passenger service by companies operating railways by steam power, under the legislative authority of the Parliament of Canada, be equipped with steel-tire wheels on or before Dec. 1, 1909; and that the use in such service on or after Dec. 1 next, of tender trucks (where the tender when loaded weighs 100,000 lbs. or over) of locomotives equipped with cast-iron wheels, be prohibited, except in cases of emergency, in which it may be necessary to use the same to take trains to divisional or terminal points. And it is further ordered that every such railway company be liable to a penalty not exceeding $100 for each and every failure to comply with the foregoing regulations within the time of its coming into force and thereafter. This order rescinds order 6490 passed Mar. 8, the only difference between the two being a slight verbal one.

PROPRIETORS

ARTHUR M. GRANT,
MANAGER

Canadian Northern Ry. Construction, Etc.

Canadian Northern Quebec Ry.—The Board of Railway Commissioners has ordered the company to effect considerable improvements on its Montford branch between St. Jerome and Arundel, Que. The length of line covered by the order is about 40 miles, but the first 10 miles is reported to be comparatively good. Guy Tombs, the company's General Freight and Passenger Agent, stated subsequently that workmen were busy all last summer ballasting the track, digging ditches, erecting new stations and doing other work. New and heavier rails had been purchased in the fall; these had been delivered and were ready to be laid as soon as the spring opened up. Other betterments would be gone on with during the season.

The Canadian Northern Ontario Ry. has under construction on the wharf at the foot of York St., Toronto, a freight warehouse 350 by 40 ft., and one story high.

The Ontario Premier announced in the Legislature, Mar. 18, that the Government had decided to aid the C.N.O. Ry. to the extent of 4,000 acres a mile, or a total of 2,000,000 acres, for the construction of a line from Sudbury to Port Arthur, a distance of about 500 miles, the line to be constructed through the great clay belt. The company, said the Premier, asked for a land grant and for a guarantee of bonds. The Government decided to decline to guarantee any bonds, and to offer to the company a grant of 4,000 acres a mile, provided it proceeded at once with the construction of the 500 miles of railway, and to carry it through the southern portion of the great clay belt. The Government would retain the pine timber and minerals on the land granted, and the right to say when and at what price the land is to be put on the market for sale. If the company agreed to these terms, a bill would be prepared and laid before the house for approval.

A deputation from the western part of the province waited on the Government, Mar. 17, and asked that a generous subsidy be granted the company. Prior to this the company had, in response to the request of the Government, submitted a proposal, with respect to the construction of the line, asking for a cash subsidy of $3,000 a mile and 7,500 acres of land a mile, or a guarantee of bonds.

President Mackenzie, in an interview, Mar. 17, said: "If what I hear is true concerning the restrictions put upon the land grant, then the thing is almost valueless to us. The land up there, according to the general idea, is not much use anyway, and if we are to be bound by all sorts of restrictions in handling it, then the aid they give us will be practically nil."

Canadian Northern Ry.—Plans have been deposited with the Dominion Minister of Public Works, showing the location of a proposed steel dock at Port Arthur, Ont., upon the water lots lying between the north side of Park St., produced, and the south side of Lincoln St., produced.

A bill is before the Manitoba Legislature providing for the guarantee of bonds for the construction of 210 miles of line. The bond issue will be at the rate of $13,000 a mile. The bill also provides for the guarantee of $3,000,000 of bonds for terminal purposes. The station and terminals under construction, for which the guarantee of bonds is given, are to be used jointly by the C.N.R., the National Transcontinental Ry., and the Grand Trunk Pacific Ry.

We are advised that the company has not yet taken into serious consideration the question of electrifying its new shops at Winnipeg. A press report stated that the company had announced that its shops would be electrified in the near future, and that power would be supplied from the Winnipeg Electric Ry. plant at Lac du Bonnet.

A delegation from the territory north of Oak Point, Man., recently waited upon the Manitoba Government to urge the completion of the branch from Oak Point. Track has been laid as far as Lundar, and the delegation asked that it be extended along the lake shore to the narrows of Lake Manitoba, instead of directly northerly as previously intended.

Duluth, Winnipeg and Pacific Ry.—A company with this title was registered at St. Paul, Minn., Mar. 19. It has been organized for the purpose of constructing a line from Virginia, the southern terminus of the Duluth, Rainy Lake and Winnipeg Ry., to Duluth, Minn. The D.R.L. and W. Ry. was lately acquired by the Canadian Northern Ry.

Alberta Midland Ry.—The Alberta Legislature has passed an act incorporating a company with this title for the purpose of constructing a number of railways in the province. In the course of the discussion in committee, it was stated that the lines mentioned in the bill were those covered by the charter of the Alberta Central Ry., a company holding a Dominion charter, and that they were extensions of the Canadian Northern Ry. The routes of the various lines mentioned in the bill as it came before the committee were as follows: From Strathcona via Calgary to the confluence of the Little Bow and Belly Rivers, thence southerly to Lethbridge, with a branch from near Bittern Lake northeasterly to Vegreville; a branch from the crossing of the Little Bow River, southerly via Macleod to the southern boundary of the province; a branch from the last mentioned line between Macleod and the crossing of the Belly River, westerly to the western boundary of the province; a branch from between Cardston and the southern boundary of the province, to the western boundary of the province. In passing through committee provision was made for the construction of the following additional lines: From Calgary to Banff; from Cochrane northerly to join the C.N.R. at Pigeon Lake; an extension into Wetaskiwin; an extension to Nanton; and an extension from Content to Red Deer and on to Rocky Mountain House.

The Government Act for the guaranteeing of C.N.R. bonds to the extent of $13,000 a mile, provides for the construction of 850 miles of line, and covers practically the whole of the lines mentioned in the bill. In the discussion before the Legislature it was stated that the C.N.R. would commence the construction of the Athabasca Landing extension, and the line from Vegreville to Camrose and Calgary this season, and might possibly construct the lines in the Crow's Nest Pass country. (Mar., pg. 183. See also Saskatchewan and Alberta Railways, Feb., pg. 125.)

Level Crossings Protection.—The House of Commons has passed a bill providing for the appropriation by the Government of $200,000 a year for five consecutive years for the purpose of "aiding in the providing of protection, safety and convenience for the public in respect of existing highway crossings at rail level." The sums voted are to be placed to the credit of The Railway Grade Crossing Fund, and to be applied under the authority of the Board of Railway Commissioners. The Board may fix the amount the Dominion shall pay up to 20% of the cost of elimination and not exceeding $5,000 for each crossing not to exceed four tracks; where there are five or more tracks it is to be regarded as two crossings. Not more than three crossings in any one municipality will be eliminated in any one year. The act provides that municipalities shall contribute towards the elimination of the crossings, but the percentage to be contributed is not fixed.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Canadian Pilling Co. has recently installed a turntable tractor at the C.P.R.'s Quebec roundhouse. This makes 32 installed on the C.P.R. system at various points.

E. L. Dyer has issued a booklet, "How to test wire, how to build fences and about concrete posts," which can be obtained by mailing 10c. in stamps or coin to him at King St. and Atlantic Ave.

The Northern Electric and Manufacturing Co., Ltd., Montreal, has been awarded the contract for supplying and installing a Western Electric alternator, exciter and switchboard equipment for the town of Iberville, Que.

The Goldschmidt Thermit Co., 103 Richmond St. West, Toronto, has issued a 36 pg. booklet, "Instructions for the use of Thermit in Railroad Shops," which should prove of interest to railway mechanical men. A copy will be sent on application.

The Holden Co., Ltd., has been incorporated under the Dominion Companies Act, with $45,000 capital stock and head office in Montreal, to acquire the business heretofore carried on by N. J. Holden Co., Ltd., and to carry on a general railway and contractors' supply business, etc.

The Meaford Wheelbarrow Co., Ltd., Meaford, Ont., has secured the Canadian rights to manufacture the line of roller bearing wheelbarrows and concrete carts made by the Sterling Wheelbarrow Co., of Milwaukee, Wis., and will offer the same to the general trade.

The B. Greening Wire Co., Ltd., Hamilton, Ont., is installing electric welding machinery in its works for the more economical welding of the iron frames for their wire door mats, wire guards, tellers' cages, etc., and for the wire chain fittings, and the welding of wire generally.

C. F. Medbury, until recently Manager of the Westinghouse Electric and Manufacturing Co.'s office, has been appointed Manager of the Canadian Westinghouse Co.'s Montreal office, suceeding H. D. Bayne, who recently resigned, and who has since sailed on an extended tour through Europe.

The B. Greening Wire Co., Ltd., Hamilton, Ont., has in press a series of illustrated catalogues of goods manufactured in its various departments. The first one relates to the wire screening, wire cloth and perforated metal departments. It is copiously illustrated, and contains a number of useful tables, which will prove of value to anyone interested in screening wire cloth, or perforated metals. Copies will be sent by the B. Greening Wire Co., on request, to any address.

Owing to the rapid increase in the export business of The Page Wire Fence Company of Walkerville, Ont., since the introduction of its Empire white fencing for railway, farm and ranch use, it has been thought best to have the foreign business handled by a company of a name similar to that of the fencing, and to this end The Empire Fence Export Co., Ltd., has been formed. It is owned and controlled by the same people as the old company. The head office and factory will be at Walkerville, Ont.

Canadian Pacific Ry.—M. McD. Duff has been appointed Assistant to the Manager, C.P.R. Steamship Lines, with office at Montreal. The Manager, A. Piers, has his office in Liverpool, Eng.

F. A. Gascoigne, heretofore Car Accountant, has been appointed Superintendent Car Service, Eastern Lines. Office, Montreal.

J. D. Altimas has been appointed Car Accountant, vice F. A. Gascoigne, promoted. Office, Montreal.

A. S. Maynard has been appointed Chief Commissary Agent, in charge of the purchasing of commissary supplies for the company's hotels, steamships and dining cars. The office is a branch of the Purchasing Department. Office, Montreal.

L. Fisher, heretofore Road Foreman of Locomotives, Saskatoon, Sask., has been appointed Road Foreman of Locomotives, Souris, Man., vice J. Scott, transferred.

J. Scott, heretofore Road Foreman of Locomotives, Souris, Man., has been appointed Road Foreman of Locomotives, Saskatoon, Sask., vice L. Fisher, transferred.

Jno. McRae has been appointed roundhouse foreman, Revelstoke, B.C., vice G. Chapman, resigned.

G. H. Tedlock has been appointed Locomotive Foreman, North Bend, B.C., vice D. Inches, resigned.

H. Vollans, heretofore Assistant Roadmaster, has been appointed Roadmaster, Cascade section, Pacific Division, vice A. Munro, deceased.

O. Johnson has been appointed Assistant Roadmaster, Cascade section, Pacific Division, vice H. Vollans, promoted.

H. M. Tait has been appointed Travelling Passenger Agent, C.P.R. Steamship Lines, for the State of Washington, with office at Seattle.

Grand Trunk Pacific Ry.—G. W. Robb, heretofore General Foreman Motive Power, G.T.R., Ottawa, has been appointed Assistant Master Mechanic, G.T.P.R. Office, Rivers, Man.

W. J. McKee, heretofore Locomotive Foreman, G.T.R., Hamilton, Ont., has been appointed Locomotive Foreman, G.T.P.R., Melville, Sask.

Grand Trunk Ry.—D. J. McCuaig, heretofore Locomotive Foreman, Ottawa, has been appointed General Foreman Motive Power Department, at Ottawa, Ont., vice G. W. Robb, resigned to enter G.T.P.R. service. No successor to D. J. McCuaig as Locomotive Foreman has been appointed and he will discharge the duties of both positions.

W. W. Yeager, heretofore leading machinist, Hamilton, has been appointed Locomotive Foreman, Hamilton, Ont., vice W. J. McKee, resigned to enter G.T.P.R. service.

The following agents have been appointed: St. Paul, Que., W. T. Parker; Dominion, Que., W. J. Mallett; Convent, Que., W. J. Mallett; River Beaudette, Que., J. A. Perrier; Morrisburg, Ont., G. A. Godfrey; Omemee Junction, Ont., J. M. Rutherford; Scotia Junction, Ont., S. Blatherwick; Mimico, Ont., W. E. Millar; Thorold, Ont., J. W. Ralston; Norwich, Ont., I. J. Heldman; Amherstburg, Ont. (outside agency), R. L. Kitchen; Goldstone, Ont., R. J. Hyde; Port Huron (Pass.), Mich., C. R. Clarke.

Intercolonial Ry.—A. J. Tingley, heretofore Police Inspector, has been appointed acting Special Agent, vice E. A. Williams, Special Agent, resigned to enter the Thiel Detective Agency service.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—E. Pennington, Vice-President and General Manager, has been elected President, vice T. Lowry, deceased. Mr. Pennington will continue to act as General Manager.

Niagara Gorge Rd.—E. S. Jerred has been appointed Canadian Travelling Passenger Agent, with office at Toronto, vice C. Graves, resigned.

Quebec and Lake St. John Ry.—See Canadian Northern Quebec Ry.

Temiskaming and Northern Ontario Ry.—S. B. Clement, heretofore Assistant Engineer, has been appointed Chief Engineer, vice G. A. McCarthy, resigned to enter private business. Office, North Bay, Ont.

The Western Canada Railway Club, which was recently formed in Winnipeg, held its inaugural meeting at the Royal Alexandra Hotel, Mar. 9. The proceedings were opened by an address from the Honorary President, W. Whyte, Second Vice-President C.P.R. A paper was read by G. J. Bury, General Manager C.P.R. Western Lines, entitled "A Review of Organizations and a Suggestion," which dealt with the history of labor organizations, and indicated their relation to rail way operation. A number of the members took part in the discussion, which was summed up by the Honorary President.

Canada Port, Docks, Storage and Warehouse Co.—Application is being made to the New Brunswick Legislature for an act incorporating a company with this title, with offices at St. George, N.B., and a capital of $99,000. The company is asking for very extensive powers, to construct docks, warehouses, elevators and all terminal facilities. The provisional directors are: G. W. Marsh, W. L. E. Marsh, J. Doust, Toronto; R. W. Agnew, C. H. Clarke, New York city. Two of the Toronto directors, Marsh and Marsh, some years ago were interested in a venture to establish a steamship line between Maritime Province ports and the West Indian Islands, and latterly were interested in a venture to acquire a controlling interest and rights at Letang, N.B.

Sir Thos. G. Shaughnessy, President C.P.R., stated recently that the company had invested $5,000,000 of its surplus funds in Dominion 10-year 3¾% debentures.

E. de la Hooke, Secretary-Treasurer Canadian Ticket Agents' Association, London, Ont., has nearly recovered from a heavy fall on the ice on Mar. 9, which injured his hip.

The G.T.R., according to a Montreal dispatch, has decided to obey the Imperial Privy Council's judgment, by putting on a third-class passenger service between Montreal and Toronto at 2c. per mile.

The annual meeting of the Montreal Warehousing Co. was held Mar. 3. Following are the directors for the current year: C. M. Hays, President; E. H. Fitzhugh, Vice-President; W. M. Ramsay, J. W. Loud, W. Wainwright.

The C.P.R. Y.M.C.A. building at Kenora, Ont., was opened recently by Wm. Whyte, Second Vice-President C.P.R. The building is a substantial one and well equipped, special attention being paid to the living and boarding accommodation.

The monthly meeting of the Canadian Railway Club was held in Montreal, Mar. 2, when a paper was read by E. E. Lloyd, Chief Clerk office of Auditor of Stores and Mechanical Accounts, C.P.R., entitled Shop Timekeeping and Labor Distribution.

It is reported from Mexico City, that Sir Wm. C. Van Horne and associates have purchased the Pan-American Rd., and that it is their intention to extend it to a connection with the Guatemala Ry. system, and to construct branch lines in Mexico.

An order for the winding-up of the Spanish River Navigation Co. was made in Toronto Mar. 23. The company's affairs are said to be in a bad condition. P. H. B. Dawson, of Sault Ste. Marie, is appointed provisional liquidator, and reference is to the Local Master at Sault Ste. Marie.

Peter Fountain, a G.T.R. freight conductor, of Sarnia, pleaded guilty at the Stratford, Ont., Police Court, Mar. 26, to two charges of forgery. He used the names of Trainmaster Bowker at Stratford, and Superintendent Gillen at Toronto. On request of counsel he was remanded for sentence.

A recent press despatch from Winnipeg announced that the C.P.R. had decided to abolish its Secret Service Department. We are advised that the company has not had such a service for some time past, merely having a staff of men for making open inspections and investigating claims and irregularities.

H. G. Elliott, Assistant General Passenger Agent G.T.R., was, at the recent 32nd annual meeting of the Grand Chapter of Quebec Royal Masons, elected Grand First Principal Z, but for personal reasons he declined, and E. A. Evans, General Manager and Chief Engineer Quebec Ry., Light and Power Co., was chosen.

The C.P.R. is reported to have let a contract to Foley, Welsh & Stewart, for the construction of 600 miles of irrigation ditches to complete the western section of its system in Alberta. The main canal will be 40 ft. wide and will carry 6½ ft. of water. A quarter of a million acres will be served by the new system when completed.

Replying to questions in the House of Commons recently the Minister of Railways stated that during Dec., 1908, the number of permanent employes on the I.C.R. had been 7,192, and of temporary employes, 1,286, with a pay roll of $464,971.96. On the P.E.I. Ry., during the same month, there were 461 permanent and 204 temporary employes, the pay roll amounting to $26,034.33.

The Interstate Commerce Commission's Division of Prosecutions announced, Mar. 7, that an indictment containing 21 counts has been found in the District of Vermont against the C.P.R., and an indictment containing a similar number of counts against the Quaker Oats Co. The C.P.R. is charged with giving transportation of certain stockfeed and other grain products from Richford, Vt., to Boston, Mass., and nearby points, free of charge, and the Quaker Oats Co. is charged with receiving the concession.

During Jan., 18 employes were killed and 20 injured in the course of their work on Canadian railways. Of the fatalities 5 were due to collisions, 3 each to being run over and to being caught between cars; 2 each to derailments and to falling material, one each to a fall, to an explosion of dynamite, and to death by what is known as "bends" in a tunnel worker. Of the other accidents, 6 were due to explosions of steam, 5 to falls, 4 to falling material, 3 to derailments, and one each to being run over and to a collision.

MAINLY ABOUT PEOPLE

Lady Shaughnessy and Miss Shaughnessy are in Europe.

G. Shanks, C.P.R. yardmaster at Adamville Jct., was killed in a head-on collision there, Mar. 18.

E. B. Osler, M.P., director C.P.R., has been re-elected President Ontario Rifle Association for the current year.

Mrs. Robt. Stevenson, a sister of Lord Mount Stephen, and of Mrs. Robt. Meighen, died at Montreal, Mar. 3, aged 78.

Hugh Sutherland, Executive Agent C.N.R., Winnipeg, has been elected Chairman of the Selkirk Centennial Fair Committee.

Hon. J. S. Hendrie, M.P.P., has been re-elected Chairman of the Railway Committee of the Ontario Legislature for the current session.

The engagement of Miss R. Bosworth, daughter of G. M. Bosworth, Fourth Vice-President C.P.R., to D. B. Seeley, Montreal, is announced.

R. Kerr, Passenger Traffic Manager C.P.R., Montreal, attended the recent meetings of the Transcontinental Passenger Association at Chicago, Ill.

S. B. Morris, C.P.R. ticket agent, Rodney, Ont., has been re-elected Grand Master Workman of the Ancient Order of United Workmen of Ontario.

Miss Madeline Crossen, daughter of W. J. Crossen, President Crossen Car Manufacturing Co., Cobourg, Ont., is engaged to L. E. Jordan, of Ottawa.

D. Marshall, it is reported, will shortly be appointed Minister of Railways for Alberta, a new position about to be created by the Provincial Government.

H. R. Charlton, G.T.R. Advertising Agent, recently returned to Montreal from Seattle, Wash., where he arranged for the G.T.R. exhibit at the forthcoming Yukon exhibition.

J. M. Mackenzie, Miss Mackenzie and the Misses Ethel and Grace Mackenzie, of Benvenuto, Toronto, sailed for England in the middle of March and are expected to return in May.

H. P. Dwight, President G.N.W. Telegraph Co., Toronto, who has had a slight attack of pneumonia, was on Mar. 30 reported to be progressing very satisfactorily towards recovery.

J. W. Leonard, General Manager C.P.R. Eastern Lines, who has been at Preston Springs, Ont., since January, on account of ill-health, is reported to have considerably improved.

R. Boswell, after 19 years' service with the Dominion Transport Co. in Toronto, was presented with a clock, an oak secretaire and a gold fountain pen, by the staff, on retiring from the company's service, Mar. 17.

B. W. Folger, Manager Niagara Navigation Co., accompanied by Mrs. Folger and two daughters, who left Toronto in the middle of Jan. for Europe, returned at the end of March, after spending most of the time in Munich.

S. R. Poulin, Division Engineer National Transcontinental Ry., delivered an address to the Canadian Society of Civil Engineers' Winnipeg branch, Mar. 11, on the construction of the line between Moncton and Winnipeg.

T. Henry, Traffic Manager, and H. F. Chaffee, Assistant General Passenger Agent, Richelieu and Ontario Navigation Co., attended recent conferences of the South Eastern Passenger Association at Chicago, Cincinnati and St. Louis.

D'Arcy Scott, Assistant Chief Commissioner, who was to have held a sitting of the Board of Railway Commissioners at Montreal, Mar. 2, was prevented from attending, owing to the death of Mrs. M. P. Davis, Mrs. Scott's mother. The sitting was postponed for a week.

A. B. McDonald, who has recently been appointed general foreman car shops, I.C.R., Moncton, N.B., was born at Moncton, Sept. 16, 1869, and entered I.C.R. service Dec., 1889; was appointed charge hand Oct., 1904; car foreman, April, 1905; and General Foreman, Feb., 1909.

G. W. Robb, who has been appointed Assistant Master Mechanic G.T.P.R., Rivers, Man., was presented with a cabinet of silverware by the G.T.R. shop employes at Ottawa Mar. 13, on the occasion of his resigning the position of general foreman Motive Power Department there.

W. Alderson, who has recently retired from the position of General Car Inspector G.T.R., Toronto, after 50 years' service, was presented, Mar. 6, with an illuminated address and a purse of gold, and Mrs. Alderson with an umbrella and bouquet, by the staff of the car department of the whole G.T.R. system.

A Philadelphia, Pa., dispatch says: W. P. Henszey of the Baldwin Locomotive Works, one of the most prominent designers of locomotives in the world, died there, Mar. 23, from pneumonia, aged 77. During the 50 years of his connection with the works it is estimated that he designed more than 32,000 locomotives.

W. R. Baker, Secretary C.P.R., who is at present on a visit to Europe, was recently received by the Prince and Princess of Wales, and subsequently lunched at Marlborough House. He has been spending some time in the south of France with James Redmond, of Montreal, and is expected to return to Montreal in April.

W. McNab, Principal Assistant Engineer, G.T.R., Montreal, was re-elected President American Railway Engineering and Maintenance of Way Association, at the annual meeting held in Chicago Mar. 18. He occupied that position for a portion of the past year, having succeeded to it on the death of the previous President.

The Lord Chancellor and Lord Collins, two of the Judicial Committee of the Privy Council, before whom the G.T.R. Penny Fare case was recently argued, are shareholders in the G.T.R. On their desiring to know if counsel had any objection to their being members of the Board, it was stated that there was no objection whatever.

E. Dussault, who died at Quebec Mar. 7, held the contract for construction of the breakwater extension there, and amongst other works undertaken by his firm are the construction of the Government wharf at Levis, Que., and two lightships in the Traverse, and in partnership he built a branch of the Quebec Central Ry.

G. J. Bury, General Manager; W. B. Lanigan, Assistant Freight Traffic Manager, C.P.R. Western Lines, and T. R. Flett, Superintendent District 3, C.P.R., Brandon, Man., were guests at the Lanigan, Sask., Board of Trade dinner recently. The chief topic of discussion was of Lanigan as the future railway centre of the province.

Lord Strathcona has sent $2,000 to the fund being raised for the building of a new armory for the 65th Regiment at Montreal, and has also contributed $1,000 to the organ fund of the new All Saints' Cathedral, Halifax, N.S. He has offered $10,000 a year to encourage physical and military training, including rifle practice, in Canadian public schools.

C. McLellan, for over 50 years an employe of the G.T.R., died at Stratford, Ont., Mar. 16, aged 70. He was an apprentice in the London and Northwestern Ry. shops at Crewe, Eng., and after coming to Canada was engaged in the G.T.R. shops at Montreal, Brantford and Stratford, being latterly foreman of the running repair shops, from which position he retired two or three years ago.

W. Gell, Master Mechanic G.T.P.R., who has been in the London, Ont., hospital for some time past, and who recently underwent a serious operation, was reported, at the middle of March, to be progressing very favorably and was allowed out, but he suffered a relapse, which, though not at the time we write considered very serious, has necessitated his return to the hospital.

J. M. Egan, who recently returned from Brazil, where he is said to have assisted in building one of the largest railroads in that country, was, from Jan., 1882, to Sept. 1, 1886, General Superintendent Western Division C.P.R., Winnipeg; Sept. 1, 1886, to Feb., 1888, General Superintendent St. Paul, Minneapolis and Manitoba Ry.; and at a later date became President of the Central Georgia Ry., and Ocean Steamship Co.

Mrs. Nixon, wife of W. J. Nixon, C.P.R. train dispatcher, Medicine Hat, Alta., and her two children, were killed at Montreal, Mar. 17, in the accident at the Windsor St. station, Montreal. Mrs. Nixon and the children were in the ladies' waiting-room, awaiting the arrival of Mr. Nixon, who is a brother of A. J. Nixon, Assistant Superintendent G.T.R., London, Ont., and who was on the train which ran into the station.

H. D. Mackenzie, whose appointment as General Foreman of Locomotive Shops, I.C.R., Moncton, N.B., was announced in our last issue, was born at Churchville, N.S., July 22, 1865,a nd entered I.C.R. service July 26, 1881, since when he has been, to Sept. 1, 1897, machinist apprentice; Sept. 1, 1897, to Oct., 1899, charge hand at Moncton and Stellarton, N.S.; Oct. 16, 1899, to Feb. 1, 1909, Mechanical Foreman, Stellarton, N.S.

F. H. McGuigan, formerly Fourth Vice-President G.T.R., who has been a fruitful source of copy to the daily press since he resigned the Vice-Presidency of the G.N.R. (U.S.), has recently been named as a possible Manager for the Dominion Steel Co. Mr. McGuigan recently entered into business on his own account and at present is engaged in the construction of the Ontario Government's power transmission line, which will probably occupy his attention for some time to come.

C. S. Richardson, who was recently appointed District Freight Agent C.P.R., Buffalo, N.Y., was born at New York City, Sept. 26, 1870, and was, from Feb., 1885, to Feb., 1887, clerk General Eastern Passenger Agent's office, West Shore Rd., New York; Feb., 1887, to Feb., 1890, ticket agent C.P.R., New York; Feb., 1890, to Feb., 1896, Travelling Passenger Agent C.P.R., New York; Feb., 1896, to Feb., 1901, Contracting Freight Agent C.P. Dispatch, New York; Feb., 1901, to Sept., 1903, Travelling Freight Agent C.P.R., Syracuse, N.Y.; Sept., 1903, to Jan., 1905, Freight and Passenger Agent C.P.R., New York; Jan., 1905, to Jan. 15, 1909, Travelling Freight Agent C.P.R., Buffalo, N.Y.

T. McHattie, who has recently been appointed Superintendent of Motive Power and Car Department, Central Vermont Ry., St. Albans, Vt., was born at Dufftown, Banffshire, Scotland, Aug. 8, 1854, and entered railway service Oct. 2, 1870, since when he has been consecutively to 1878 in locomotive shops, Great Western Ry. (now part of the G.T.R.) at Hamilton, Ont.; June, 1878, to Aug., 1886, locomotive engineer, same road; Aug., 1886, to April, 1889, locomotive foreman, G.T.R., at Palmerston, Ont.; April, 1889, to April, 1898, general foreman in charge of locomotives, same road, at London, Ont.; April, 1898, to Jan., 1909, Master Mechanic, Eastern Division, same road, at Montreal.

W. U. Appleton, whose appointment as Assistant to the Superintendent of Motive Power, I.C.R., Moncton, N.B., was announced in our last issue, was born at Moncton, Jan. 29, 1878. He entered the I.C.R. service as messenger, and was transferred to the locomotive shops as apprentice, Sept., 1895, since when he has been from Dec., 1899, to April, 1901, clerk in Mechanical Superintendent's office; April to Sept., 1901, machinist, Moncton shops; Sept., 1901, to Oct., 1902, clerk to Superintendent of Machinery and Rolling Stock; Oct., 1902, to May, 1903, clerk Master Car Builder's office; May, 1903, to May, 1904, clerk General Superintendent's office; May, 1904, he was appointed Chief Clerk to Superintendent of Motive Power, which position he still also holds.

Imperial Service Medals for long and meritorious service were presented to I.C.R. employes at St. John, N.B., recently. Following are the names of the recipients, with their occupation and length of service: G. Collard, brakeman, 34 yrs.; D. Driscoll, porter, 26 yrs.; P. Driscoll, porter, 31 yrs.; A. Fraser, blacksmith, 25 yrs.; I. B. Humphrey, station master, 36 yrs.; W. Kelley, conductor, 46 yrs.; J. H. Magee, tinsmith, 35 yrs.; J. Millican, conductor, 47 yrs.; M. Manson, porter, 25 yrs.; J. McAnulty, porter, 25 yrs.; D. McDonald, porter, 26 yrs.; E. L. Perkins, storekeeper, 36 yrs.; T. W. Prince, engineer, 44 yrs.; A. Rainnie, conductor, 48 yrs.; R. M. Scott, locomotive inspector, 36 yrs.; E. P. Shaw, checker, 35 yrs.; I. G. Stevens, policeman, 27 yrs.; E. Shaw, crossing man, 33 yrs.

E. Pennington, who has been elected President Minneapolis, St. Paul and Sault Ste. Marie Ry., consequent on the death of T. Lowry, was born at La Salle, Ill., Sept. 16, 1848, and entered railway service in 1869, since when he has been; to 1870, warehouseman; 1870 to 1872, brakeman; 1872 to 1875, conductor; 1875 to 1877, roadmaster; 1877 to 1879, Superintendent of Construction, 1879 to 1882, General Roadmaster; 1882 to 1884, Assistant Superintendent Chicago, Milwaukee and St. Paul Ry.; 1884 to June, 1888, Superintendent Minneapolis and Pacific Rd.; June, 1888, to Apr. 15, 1898, Superintendent Minneapolis, St. Paul and Sault Ste. Marie Ry.; Apr. 15, 1898, to Feb. 1, 1899, General Superintendent, same road; Feb. 1, 1899, to Mar., 1909, Vice-President and General Manager, same road.

P. W. Snider, Superintendent C.P.R. Telegraph Department, St. John, N.B., died there Mar. 22, of Bright's disease. He was born in Halton County, Ont., July 14, 1854, and learned telegraphy in the Dominion Telegraph Co.'s office at St. Catharines, Ont., in 1870. He was subsequently employed by the same company in Brantford, London, Toronto and Ottawa until 1877, when its lines were extended to the Maritime Provinces. He opened its office at St. John, N.B., in Oct., 1877, and was section manager for the Maritime Provinces until the consolidation of that company with the Western Union Telegraph Co. in 1881. From Aug., 1881, to 1889, he was cashier of the Western Union's St. John office, and was then appointed Manager of the C.P.R. Telegraphs, St. John office. In 1890 he was appointed circuit manager for the Maritime Province district, and in charge of the maintenance of lines, and in Nov., 1903, was appointed Superintendent.

D. Sutherland, who has recently been appointed General Agent, C.P.R., Prince Rupert, B.C., was born at Niagara Falls, Ont., Sept. 21, 1873, and entered railway service 1888, since when he has been consecutively: Dec., 1888, to Dec., 1890, clerk in District Passenger Agent's office, C.P.R., Toronto; Dec., 1890, to Oct., 1893, clerk in Assistant Freight Traffic Manager's office, same road, Toronto; Oct., 1893, to May, 1896, clerk in General Freight Agent's office, same road, Toronto; May, 1896, to May, 1897, clerk in General Freight Agent's office, same road, St. John, N.B.; May, 1897, to May, 1899, City Freight Agent, same road, St. John, N.B.; May, 1899, to Dec., 1901, Travelling Freight Agent, Atlantic Division, same road, covering New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland; Dec., 1901, to Nov., 1906, General Freight Agent, Newfoundland Ry.; Dec., 1906, to Jan., 1909, Travelling Freight Agent, C.P.R., Vancouver, B.C.

Edward S. Piper, President of the N. L. Piper Railway Supply Co., Ltd., died in Toronto Mar. 24, aged 67, after several months' illness. He was a son of the late Noah L. Piper, one of the original York pioneers. He was educated at the Model School and Upper Canada College, Toronto, and at Dr. Tassie's grammar school in Galt. On leaving school he was associated with his father in the house-furnishing business. He was soon made a partner, and at his father's death succeeded to the business. He had a genius for invention, and patented many improvements in railway lamps. His success with these and other inventions led him to merge his house-furnishing business into that of railway supplies, in which he built up a very successful trade. He invented and patented many other railway appliances, including orderboards, semaphores, street gates, etc., which the railways have adopted and are still using. He was widely known among railway officials throughout the Dominion. He was an Anglican, a Freemason, an Oddfellow and a Forester. He is survived by a widow, one daughter and four sons. One of his brothers, H. L. Piper, is Managing Director of the Hiram L. Piper Co., Ltd., Montreal.

Cause of C.P.R.'s Montreal Accident.

In giving evidence at the inquest into the causes of the recent accident at Windsor St. station, Montreal, when an uncontrolled train ran into the waiting-room there, H. H. Vaughan, Assistant to the Vice-President C.P.R., said: "The cause of the accident had evidently been that the plug had been struck by the driving wheel, a very rare occurrence with this style of engine. It is a thing which would happen very suddenly. It was caused by the breaking of the spring hanger, which was probably due to some hidden defect in the material. Defects in the spring hangers are constantly occurring on account of their very severe service, although they are made of the best material possible. The breaking of this spring hanger would lower the boiler on one side, and cant it two or three inches toward the wheels. If the engine had lurched over as far as possible the driving wheel would have come in contact with the washout plug. That blown-out plug was the only thing that I could find on the boiler to account for the escape of steam. The needed repairs had all been made at Newport, and I received a report to that effect from the B. & M. locomotive foreman there. There were always minor repairs to be made after every run of 125 or 150 miles."

Asked as to how he accounted for the scalding of the engineer, he said he could not speak from knowledge, but proceeded to give his views as to what must have taken place after the fireman jumped: "My idea is that at first the engineer did not think that anything serious had happened. Otherwise I am convinced that he would have shut the throttle and applied the air brakes immediately. I do not suppose we have a man but would have done that. I think the engineer got off his seat to go to the side where the plug had blown out, and then found that the steam and water he was getting was very much worse than he expected. He probably at first thought that the gauge glass had broken, and as he felt for that he got a whole spurt of hot steam and water in his face, and very likely inhaled some of the boiling vapor. Either that overcame him or he fancied that the whole side of the boiler had blown out, and staggered to the gangway and got off. I think this because it is so infinitely easy for an engineer to close the throttle and apply the air. I have often seen engineers leave their places and look at anything suspicious, leaving the engine running, and I am convinced that from his side of the cab, the thing seemed trivial, and the engineer went to fix it, with the result I have stated."

Mr. Vaughan then stated that while he could not speak from actual knowledge, as he had not seen the work done, the C.P.R. had had the track measured and an estimate of the efficiency of the brakes, under the conditions that were known to have existed, prepared by the Westinghouse Co., and on this information, which could be verified by the experts who supplied it, he gave the following explanation as to why the brakes did not act: "It is 1,930 ft. from the station buffer block to where the brakeman had first taken alarm. The brakeman thinks he acted very quickly; but he was excited. Probably three or four seconds elapsed between his realizing where the train was and actually applying the brake. He had to turn around, enter the door, think where the valve was, and then open it, all of which would have taken three or four seconds. At that time the train was probably travelling from 50 to 55 miles an hour, or from 70 to 80 ft. a second, so that it would have run 250 ft. before the valve was opened. Then after the valve is opened it would probably take 1¼ seconds before the full brake pressure was set. In addition, the broken spring hanger on the engine prevented the brakes from working on the engine, so that the train had only a small percentage of its total weight braked. Assuming a speed of 55 miles an hour, with the last car 300 ft. from the laundry, leaving about 1,600 ft. to the buffer bars at the station, and allowing for the length of the train, we would expect the train to have a speed of about 25 miles an hour when it hit the stop block, which would be sufficient to account for the accident. It is inconceivable that with the brake in perfect working order at Montreal Jct., it should be out of order when it was applied. As to the brakeman's idea that the brake did not set right, this was probably due to the fact that he was only accustomed to feeling the brakes applied from the engine, which was quite different to the effect when the brakes were applied from the rear of the train."

Cost of Accidents.—The Secretary of the Board of Railway Commissioners has issued the following circular to railway companies: "I am directed by the Board to request you to be so good as to furnish, for the use of the Commission, statements, under separate heads, all losses, direct and indirect, sustained by your company in Canada and charged or chargeable to the company during the company's last five financial years—including the cost of all repairs and renewals, damages for injuries to persons, payments in settlement of possible claims, and all other expenses—caused by and due to the following: head-on and rear-end collisions, side pitch-ins, open switches, broken rails."

The Minister of Railways, replying to questions in the House of Commons recently, stated that it was not the intention of the Government to add to the obligations already incurred in granting aid to railways. This was the reply to the final question, the previous questions having to do more particularly with an interview which the Premier of Alberta had with the Prime Minister and the Minister of Railways, when the desirability of aid being granted by the Dominion Government for the construction of railways in Alberta was urged.

Repairing Heavy Steel Sections

For welding locomotive frames, driving wheel spokes, mud rings, gear wheels, crank shafts, stern-posts of steamships, rudder stocks, anchors, and other steel sections, the Thermit Process offers the only method by which the repair may be made without removing the broken part. Heavy steel sections of all kinds may be welded IN PLACE. Simply send us a blue print of the parts to be repaired and we will submit an estimate immediately.

A large number of Thermit repairs are described in "REACTIONS," the Thermit Quarterly. Copies will be sent free on request. Write also for Pamphlet No. 20-N illustrating over 30 important Thermit welding operations.

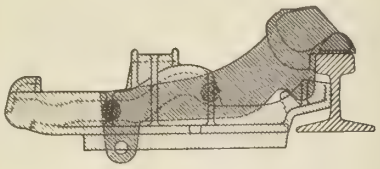
Railway Lands Patented.—Letters patent were issued covering railway land in Manitoba, Saskatchewan, Alberta, and British Columbia, during Nov., 1908, as follows:

	Acres.
Canadian Northern Ry	15,939.67
C.P.R., grants	659.73
G.T. Pacific Ry.	158.88
Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co.	325.00
	17,083.28



The plan of having a single size applicable to a wide range of rail weights and heights is a valuable feature of Hayes Derails. It vastly simplifies ordering and stock keeping. For instance, size 5 of any model may be used on any ordinary rail from 4 to 6 inches high, which limits include most of the rails in common use.

The sliding type may be operated by any mechanism which is used to throw a switch; it works in with existing conditions in any track without special attachments.

25,000 Hayes Derails are now in use on over 300 roads. They are made in Canada at Hamilton, Ontario.

Address: Hayes Track Appliance Co., Geneva, N.Y.

National Transcontinental Railway.

The report of the Commissioners of the N.T.R. for the nine months ended Dec. 31, 1908, presented to the House of Commons, shows that there had been expended $18,866,212.84, making a total expenditure since the initiation of the work of $45,924,156.88. There were 668.65 miles of grading completed, and 309.12 miles of track laid. The entire line is under contract with the exception of the entrance into Winnipeg. Contracts for steel superstructure and viaducts amounting to 23,765 tons have been awarded, and 6,995 tons have been practically completed. Contracts for 174,818 tons of 80-lb. rails have been awarded, of which 105,692 tons are being furnished by the Dominion Iron and Steel Co., and 69,123 by the Algoma Steel Co. The necessary fastenings for these rails have been ordered through Canadian manufacturers. The McArthur contract for the construction of the section between Winnipeg and the Fort William branch of the G.T. Pacific Ry. has been approximately 82% completed, and the work is to be finished so as to permit of the operation of the line in Sept. During the year certain items of classification were disputed between the engineer acting for the G.T. Pacific Ry., and the Commissioner's Chief Engineer, and as, after considerable discussion, they found they could not agree in every particular, it was decided to put in force the arbitration clauses of the N.T.R. Act. Accordingly C. Schreiber was decided upon as third arbitrator. No further progress can be made towards a settlement of the differences until the snow has finally cleared away.

The through mileage from Moncton to Winnipeg is 1,804.84, and the work done in the different districts is as follows: District A., Moncton to the New Brunswick line, 255.10 miles, 39% done; district B., from the New Brunswick line to Clear Lake, long. 74° w., Que., 398.74 miles, 53% done; district C., from Clear Lake, Que., to Quebec-Ontario line, nothing done; district D., from Ontario-Quebec line to near long. 84° w., 248 miles, about 4% done; district E., from long. 84° w., to near long. 89° 30′ w., 259.91 miles, nothing done; district F., from long. 89° 30′ w., to east bank Red River near Winnipeg, 374.66 miles, 87% done. In district C. it is estimated that there are 2,500,000 acres of good farming land available on its being cleared, while an additional 1,250,000 acres will be available on being drained. The Hurricanaw River will give navigation for about 70 miles southerly of the railway. In district D. it is estimated that there are 1,344,000 acres of land available for agricultural purposes on its being cleared on the first 185 miles; 3,800,000 acres on the next 100 miles, and 500,000 acres in the Missanabie River valley, in addition to large areas which will require drainage, and from mileage 325 to mileage 475 there is about 1,600,000 acres of good sandy loam available.

With reference to the cost of the line the Minister of Railways said a memorandum by the Chief Engineer, dated Feb. 9, confirmed his estimate of April 3, 1908, placing it at $63,427 a mile. From information supplied by the Finance Department it was stated that loans of £1,425,428 1s. 7d. and £2,689,851 7s. 11d. at 3½% had been raised for the purposes described in clause 23, chap. 71, of the statutes of 1903; the interest charged on these loans to Jan. 31 had been £85,520 13s. 0d. The debentures issued by the commissioners, now amounting to $46,000,000, and deposited with the Minister of Finance, were not issued in respect of these loans, but were issued generally as money was required for payment of construction work. The statute makes no provision by means of which the commissioners can make payment of the interest on these debentures as it accrues, until such time as there is a net revenue and income derived from the operation of the line, when the principal and interest becomes a first lien thereon.

A semi-official statement has been made at Moncton, N.B., that the line between Moncton and Chipman, N.B., the starting point of the Canada Eastern Ry. branch of the Intercolonial Ry., will be so far completed by the fall as to permit it to be opened for the carrying of coal and other freight.

A. E. Doucet, District Engineer, Quebec, in reviewing the work done on his district, says progress under very favorable circumstances is being made, there being over 6,000 men employed between the Quebec-New Brunswick boundary and Weymontachene River. On the south side of the St. Lawrence River easterly the work is practically completed for 150 miles, and there are over 3,000 men employed on the remaining mileage to the New Brunswick boundary. On the north side of the St. Lawrence River track had been laid from Cap Rouge to Portneuf River, where there was a gap of 12 miles on which some steam shovel work was required. Beyond this track had been laid 68 miles, where a bridge was being constructed over the Milieu River by the Dominion Bridge Co. The bridge has a total length of 3,000 ft., and is 175 ft. above water level. It is expected that the bridge will be completed in May. Beyond the Milieu River track had been laid for 48 miles to the St. Maurice River, beyond which no track had been laid. Supplies and material had been taken into points 71 miles beyond the St. Maurice River, and a certain amount of work had been done.

J. D. McArthur, in an interview Mar. 6, said the Winnipeg-Lake Superior section of the line would be completed so far as the grading was concerned by May 1. The last section of the grading was about half completed. Tracklaying will be pushed, and it is hoped to get it ready for operation for the fall.

In an interview at Winnipeg Mar. 12, S. R. Poulin, District Engineer, stated that track was expected to be laid between St. Boniface and the Winnipeg River, 113 miles, in a few days thereafter. Tracklaying would be resumed on the east bank of the Winnipeg River April 1, and on the same date another gang would start laying track westerly from the junction with the G.T.P.R. Lake Superior branch. Ballasting would be proceeded with simultaneously from the two ends. There was nothing, he said, to prevent the line being completed between Winnipeg and Lake Superior Jct. by Sept. 1. Easterly of this junction, very satisfactory progress was being made on the other 150 miles of the route in district F. The first 80 miles had been fully cleared and prepared for the grading gangs, and grading was being proceeded with on 50 miles. Clearing gangs were at work on the remaining 70 miles.

Tenders will be received to April 8 for the construction and erection of a steel and concrete bridge and approach spans over the Red River between Winnipeg and St. Boniface, Man., together with grading and approach spans over certain streets in Winnipeg.

THE QUEBEC BRIDGE.

During the discussion of the vote of $150,000 in the House of Commons for the preparation of plans for the reconstruction of the bridge across the St. Lawrence at Quebec, the Minister of Railways said the engineers had decided that they could not use any part of the material prepared for the former bridge; it was useful for nothing but scrap. The engineers hoped to have the plans for a bridge 150 ft. above high water ready by the autumn, but it would not be possible to ask for a vote on account of construction until next session. The G.T.P.R. Co. had not made any overtures to the Government with regard to the building of the bridge, but the company had been giving consideration to the question of carrying on traffic across the river in connection with the expectancy that the N.T.R. tracks would be laid from Moncton to Levis during 1910.

Some newspapers have been advocating the construction of a tubular bridge under the water, and this was mentioned during the discussion. The Minister said he saw the suggestion made, but thought it would be utterly impracticable. The water at that point is 200 ft. deep, and the current is very rapid.

GRAND TRUNK PACIFIC RAILWAY.

On Mar. 16, in the course of his speech in the House of Commons on the work of the Department of Railways for the year, the Minister of Railways read a report dated Feb. 5 from C. Schreiber, the Department's Consulting Engineer on the G.T.P.R. The report stated that from Winnipeg to 8.50 miles west of Battle River, 683.50 miles, grading and bridging was completed, and track laid over the whole distance, with suitable sidings at each station, of which 92 miles had a full lift of ballast, 502 miles had a first lift, and 89.50 miles was a skeleton track having no ballast. Station buildings had been completed at West Winnipeg, Melville, Portage la Prairie, Nokomis and Rivers; others were in course of erection at Biggar and Wainwright, while contracts had been let for those at Scott, Iwana, Allan, Lazare, Kelliher, Semans, Leney, Punnichy, Bradwell, and Goblenz. Engine houses had been erected at Rivers and Melville, while others were in course of erection at Watrous, Biggar and Wainwright. Water services had been provided at Beaudry, Elie, Harte, Rivers, Lazare, Welby, Gerald, Melville, Watrous, Bradwell, Earl and Biggar; and was being provided at Portage la Prairie, Squirrel Creek, Pope, Quadra, Miniota, Uno, Atwater, Birmingham, Ituna, Mostyn, Touchwood, Wainwright, Quinton, Raymore, Nokomis, Iwana, Landis, Reford, Unity, Winter, Yonker, Artland and Dunn. Grain elevators had been erected at 31 points, 39 elevators in all having being erected, while loading platforms had been constructed at 52 points. There had been erected on each side of the line 345 miles of fencing. A two-line telegraph wire has been strung from Winnipeg for 672 miles, and a single-line wire from mileage 672 to Battle River. This section of the line was opened for public traffic Sept. 21, 1908, since when it had been successfully operated. On the section from Battle River to Wolfe Creek, 241 miles, the steel viaduct over the Battle River was completed Dec. 11, and the Clover Bar bridge over the Saskatchewan River on Dec. 26, 1908. The Battle River bridge consists of 51 spans of 50 ft., and one of 150 ft., making in all 2,700 ft., and is 180 ft. high. The grading and bridging were practically complete from the Battle River to 50 miles west of Edmonton, 172 miles, so that there was no impediment to the laying of track over the whole distance. From mileage 50 west of Edmonton to Wolfe Creek (the western limit of the Prairie section), 69 miles, about 75% of the grading had been done and a number of the culverts built. There were two gangs of men engaged in driving piles for pile and trestle bridges. The grading and bridging on this section should be finished by July. The work, at the time of the report, was practically closed down for the winter, with the exception of the pile

driving for bridges, the construction of concrete piers and pedestals for the Pembina River bridge, and some grading in rock cuttings and muskegs between mileage 65 west of Edmonton and Wolfe Creek. On the Mountain section the first 100 miles easterly from Prince Rupert was under contract and fair progress was being made with the grading, which is largely composed of solid rock. The quantities excavated were 633,396 cubic yards of solid rock, 94,470 cubic yards of loose rock, and 94,407 cubic yards of earth. There had been 32 culverts constructed on the 100 miles, and a capacious wharf and warehouse had been erected at Prince Rupert. There were 1,850 men and 90 horses and mules engaged on the work. This was the only work in progress on the mountain service, which is about 836 miles long.

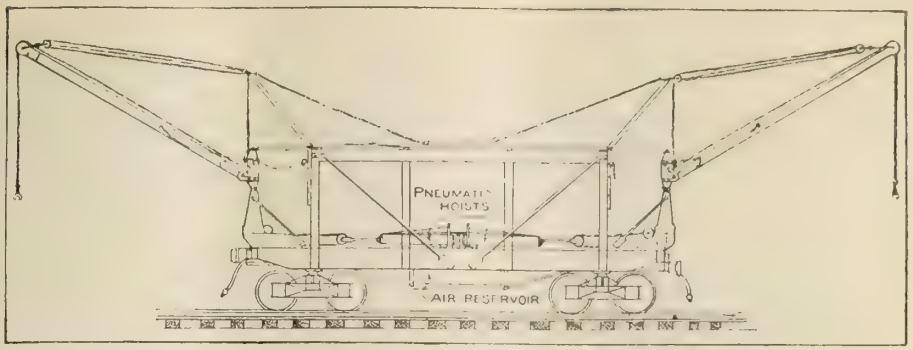
Replying to questions as to the financing of the line, the Minister of Railways said the Government had guaranteed bonds in respect of the construction of the Western Division N. T. Ry. to the amount of £3,200,000, all of which had been issued and sold at 92½, the net proceeds of the sale being $14,385,600. The sum of $10,335,482.92 had been paid on account of work done on the Prairie section; $2,150,852.30 on account of the Mountain section; and the balance, $1,899,264.78, was deposited in bank to the credit of the Receiver-General. The G.T.R. Co. had guaranteed series A bonds to the amount of £2,100,000, and series B bonds to the amount of £1,354,000. Certain debenture equipment stock of the G.T. Pacific Ry. had also been guaranteed by the G.T.R. The whole of series A bonds, which realized £1,975,705, had been used for construction on the Prairie division, and £128,000 of the series B bonds, which realized £1,228,755, had been expended on the Mountain section.

The final location of the G.T. Pacific Ry. between Wolfe Creek and Prince Rupert has been completed, and it is stated that surveys will be started during the summer for the branch from near Fort George to Vancouver. In connection with the construction going on in the vicinity of Prince Rupert tenders have been asked for the supply of 300,000 cross and switch ties, and 4,000 telegraph poles.

The British Columbia Legislature has before it a bill ratifying an agreement between the Government and the company extending the time within which the company must complete the survey and subdivision of the townsite of Port Rupert, and in some other respects varying the agreement previously made with respect to the same. It is announced that the first sale of lots at the townsite will be made May 1.

Grand Trunk Pacific Branch Lines.—The Alberta Legislature has passed the act authorizing the granting of aid, by way of guarantee of bonds, for the construction of 491 miles of branch lines in the province. The Legislature was informed that the company would construct the line from Wainwright to Calgary and Coutts this fall. (See Saskatchewan and Alberta Lines, Feb., pg. 125.)

Pacific Northern and Omineca Ry.—In the passing of this company's bill for an extension of time through the British Columbia Legislature, it was given permission to construct a branch from the Skeena River, by way of the Copper and the Telkwa Rivers, to a junction with the G.T.P. Ry. at the confluence of the Bulkley and Telkwa Rivers. This branch is to form part of the main line of the G.T.P.R. The company is given until 1911 to construct this branch, and to 1910 to construct 15 miles of its line between Kitimat and the Copper River. (Mar., pg. 185.)



Derrick Car for Handling Railway Rails.

The increase in the weight of railway rails in recent years makes the use of machinery for handling them a necessity. A number of railways have appliances for this purpose, but an unusual type is adopted by an eastern line. The machine consists of a flat car with a derrick at each end, which is worked by a pneumatic hoist, taking air from the brake system. The car carries an air reservoir connected directly with the train line, and when this tank is to be filled the locomotive engineer allows the air pump to run the pressure up to 80 lbs. When the train is moved a valve is closed, shutting off the connection between the train pipe and the reservoir. The reservoir will hold sufficient pressure to handle 20 rails after being shut off from the train line.

The accompanying illustration shows the construction of the derricks. Each cylinder operating a derrick has a piston with a travel of 7 ft., and a pulley is attached to the end of the piston rod. A full movement of the piston pulls the hoisting cable 14 ft. The hoisting cylinders for the two derricks are independent, each being worked by a separate air cock. Both derricks can be worked simultaneously in loading or unloading rails.

Railway Rolling Stock Statistics.

Returns for the year ended June 30, 1908, show that there were added to the rolling stock of the various Canadian lines 368 locomotives, 8,302 freight cars, and 384 passenger cars. On that date there were in service 1,122 passenger, 2,392 freight and 358 switching locomotives, a total of 3,872, against 964 passenger, 2,206 freight, and 334 switching locomotives at June 30, 1907. This motive power was equivalent to 169 locomotives for every 100 miles of line, against 156 for the preceding year. In the passenger service there was one locomotive for every 30,343 passengers carried, as against one for 33,337 in 1907. In the freight service there was one locomotive to every 26,368 tons of freight hauled, as compared with one to every 28,951 tons in 1906-07. The number of passenger miles per passenger locomotive was 1,855,580, and the number of ton miles per freight locomotive was 5,418,692, showing an increase of 270,509 in passenger miles, and 120,545 in ton miles, per locomotive as compared with 1906-07.

The number of passenger cars of all kinds in service June 30, 1908, was 4,026, an increase of 384 over June 30, 1907, the distribution among the various classes being: 1st class, 1,493; 2nd class, 487; combination, 422; emigrant, 303; dining, 114; parlor, 63; sleeping, 236; baggage, express and postal, 873; others, 35.

The cars available for freight service showed an increase of 8,302, the number available being 115,709, distributed as follows: box, 72,863; flat, 21,759; stock, 5,047; coal, 11,616; tank, 197; refrigerator, 2,423; others, 1,804. In addition there were 7,180 pay, gravel, derrick, caboose, and other cars in the various companies' service. Excluding the companies' cars the supply of freight cars represented an average of 5,039 cars per 1,000 miles of line, against 4,783 in 1907. The capacity of the cars was 3,277,394 tons, an average of 28.28 tons per car; the figures for 1907 were incomplete, but they showed a car capacity of 2,908,903 tons, or 27.56 tons per car. In regard to available car supply it must be borne in mind, says the report, that the normal number of cars undergoing repairs is about 5.02% (at one period during 1907-08 the percentage reached 9.5), so that it may be assumed that at least 5,808 cars are in the shops at all times.

Victorian State Railways, Australia.—A bill is being introduced into the local Parliament providing for the expenditure of £1,000,000 on improvements of the various lines, additions to rolling stock, additional telegraph and telephone lines, etc. The railways are controlled by a commission of which T. Tait, formerly Manager of Transport, C.P.R., is chairman.

Telephone Dispatching on the C.P.R.—In reference to the particulars which we gave in our last issue respecting the extensions of the system of telephone dispatching on the C.P.R., we are officially advised that appropriations have been made for the stringing of a telephone wire between Fort William and White River, Ont., and that the work of erection will be commenced as soon as weather permits. The dispatchers will be located at White River. Appropriations have also been made for a telephone circuit between Winnipeg and Brandon, Man., and Medicine Hat and Calgary, Alta., which will be put in operation during the summer.

The Eastern Canadian Passenger Association held a meeting at Toronto, Mar. 2, for the consideration of rates for the forthcoming Alaska-Yukon Exhibition at Seattle, Wash., and for other business.

A resolution was submitted to the House of Commons, Mar. 8, by Hon. H. R. Emmerson, asking the House to secure by lease or otherwise such branch lines now connecting with the I.C.R. as will serve as direct and profitable feeders to the traffic of the said railway. After some discussion the debate was adjourned.

A bill introduced into the House of Commons by J. Conmee, M.P., has for its object the insuring to every railway employe of the privilege of exercising his franchise wherever he may be. The voter will be required to present at the poll, where he may be on the date of the election, a certificate from his home constituency certifying his right to vote. He will then vote for the candidate of his choice, and his sealed vote will be forwarded to his home constituency, and counted along with the other votes cast.

Total.....	£1,062,305	£1,053,331	£ 8,974	

ELECTRIC RAILWAYS

Projects, Construction and Betterments.

Belleville Radial Ry.—Application is being made to the Ontario Legislature for an act incorporating a company with this title, with power to construct an electric railway in Belleville, and through the tp. of Thurlow and Port Ann, and Tyendinaga to Shannonville. The capital of the company is placed at $250,000, and it may issue bonds to the amount of $25,000. The offices are to be at Belleville, and the provisional directors are: W. B. Deacon, J. Elliott, F. Ketcheson, J. G. Lindsay, A. McGie, W. S. Morden, Belleville. The line may be constructed in two-mile sections, but construction shall be carried on continuously so as to form one continuous railway, and the Ontario Railway and Municipal Board may approve of plans for the construction of different sections.

British Columbia Electric Ry.—Work in connection with the reclamation project undertaken by the company will be started early in April. This is in connection with what is known as the Stave Lake power plant. The surveyors have practically completed their work, and the construction of the pipe lines and dyke will probably be in hand before high water time. R. W. Le Baron is the engineer in charge of construction. In connection with the power development it is proposed to construct an electric railway from Burnaby Lake to New Westminster, and another from near Burnaby Lake to Port Moody, B.C.

Brantford Street Ry.—The most important piece of work to be undertaken in connection with the reconstruction of the street railway in Brantford, Ont., which is owned by the same interests as the Grand Valley Ry., is the relaying of the Colborne and Market street lines. According to the contract with the city this work must be done within three and four months respectively from May 1. The reconstruction of the line on other streets, and the construction of some additional lines, has to be completed within two years. When the lines are reconstructed in accordance with the agreement, there will be 16 miles of electric railways in the city.

Calgary, Alta.—The Calgary, Alta., city council has ordered 400 tons of 80-lb. steel, 710 tons of 60-lb. steel, and the ties necessary for its line. It has also placed orders for the following electrical equipment and rolling stock: A 750 h.p. 3-cylinder compound engine with the Robb Engineering Co., Amherst, N.S.; generator set and switchboard; six cars, pay-as-you-enter type, with the Preston Car and Coach Co., Preston, Ont., and six similar cars with the Ottawa Car Co., Ottawa, Ont.

Cobourg, Port Hope and Haverlock Electric Ry.—When this application and that of the Cobourg, Peterborough and Kawartha Lakes Ry. came before the Railway Committee of the Legislature recently, the promoters of each company presented their claims for consideration, The committee expressed a desire that they should come to an agreement, to merge the two bills in one, but they were unable to do so, and both bills were reported

Grand Valley Ry.—The lines projected by this company include a line from Brantford to Port Dover, Ont., 33.66 miles, passing through Mount Pleasant, Boston, Townsend Centre, Waterford, Bloomsburg, and Simcoe; from Brantford to Woodstock, where connection will be made with the Woodstock, Thames Valley and Ingersoll Ry., owned by the same interests; and the extension of this line from Ingersoll to London; and an extension of the present line between Brantford and Galt, from Blue Lake to St. George. This latter extension will be six miles, and it is said arrangements have been completed for going on with its construction this season.

Levis County Ry.—A new 250 k.w. motor generator is being installed at the company's substation. The present equipment at the station consists of two 250 k.w. motor generators. The company purchases its power, the current being brought into the substation by an 11,000 volt, 3-phase high-tension line.

Manitoba Radial Ry.—Application is being made to the Dominion Parliament for an act extending the time for the commencement and completion of the line of railway authorized by the act 6-7 Edward VII, chap. 105. Smith and Johnson, Ottawa, are solicitors for applicants.

Montreal and Southern Counties Ry.—Several important contracts are reported to be let in connection with the construction of this projected electric railway. It is understood that the company will use the southern roadway on the Victoria Jubilee bridge for the laying of its tracks. At present a single track only will be laid, supplemented for traffic purposes by two switches. This, it is anticipated, will enable all the traffic offering until the line is extended to Longueuil, Chambly, and other points. Work will, it is said, be commenced at an early date upon the substation and car barns at St. Lambert, so as to have them completed during the coming season. E. A. Mumford, Secretary of the company, states that the tubular steel poles for the electric installation have been purchased, together with all the necessary appliances for the overhead work on the Victoria bridge, and that tenders will shortly be invited for the supply of all the electrical equipment necessary.

Montreal Terminal Ry.—When the application made by this company for various amendments to its act of incorporation was before the Railway Committee of the House of Commons, the clause authorizing the company to "lay out, construct and operate an elevated railway from the western limits of Montreal to the eastern limits of Maisonneuve," was withdrawn. The application therefore resolved itself into one for an extension of time within which to construct lines already authorized. Representatives of the city of Montreal urged that no further extension of time should be granted until the company produced its plans. It was stated that the company had had seven years in which to do so, and still they were not forthcoming. The further consideration of the bill was postponed.

Morrisburg Electric Ry.—The Ontario Legislature is being asked to pass an act amending the act incorporating this company, by authorizing it to extend the main line from Ormond, continuing through the townships of Winchester, Osgoode and Gloucester, to Ottawa, passing near the villages of Kenmore, Metcalfe and Greeley; and by extending the line from Ste. Therese to connect with the main line in Osgoode tp., and by increasing the capital stock from $500,000 to $1,000,000. The petitioners are: C. M. Willard, H. Loughridge, W. M. Loughridge, J. W. Bogart, G. W. Bogart, R. Merkley.

Ottawa and St. Lawrence Ry.—Application is being made to the Ontario Legislature for an act incorporating a company for the purpose of constructing an electric railway from the boundary line between Ontario and Quebec, in Lancaster tp., Glengarry county, westerly along the north shore of the St. Lawrence River, to Brockville, thence northwesterly to Perth, connecting there with the Lanark County Elec-

New Trails to the
Canadian Game Lands

Before the six railways of the Canadian Northern System followed the old fur trails into the Canadian game lands, only a hardy few dared to go in. But now, the back places of the woods—wealthy in moose, caribou, deer and bear—may be quickly and easily reached. The Canadian Northern system serves a wide range of undisturbed territories. Here are a few suggestions:

The country between Parry Sound and Sudbury, traversed by the CANADIAN NORTHERN ONTARIO RAILWAY, is a land of lonely muskeg and brulé, the native country of the white-tailed deer. From Sudbury north to Sellwood this same line goes in through a moose hunting territory unequalled in Ontario.

The CANADIAN NORTHERN QUEBEC and QUEBEC AND LAKE ST. JOHN RAILWAYS span the native country of the ouananiche, northern brook trout, and the spruce-shored lakes of the Roberval country, where moose and caribou abound.

The eastern shore of Nova Scotia, from Yarmouth to Halifax, is served by the HALIFAX AND SOUTH WESTERN RAILWAY. On the barrens, slightly inland from the railway, are some of the best places for big moose in the east.

THE CANADIAN NORTHERN RAILWAY from Port Arthur to Edmonton, with many branches, griddles almost undisturbed haunts of moose, caribou, deer, wolves, bear, and all species of four-footed and feathered game.

For Information, General and Special, Address the Information Bureau, Canadian Northern Railway, Toronto

tric Ry.; from Morrisburg to Ottawa, connecting there with the Lanark County Ry.; with branch lines from Kenmore to Metcalfe and Russell connecting with the Ottawa and New York Ry. The company desires to have power to amalgamate with the Lanark County Electric Ry., and all railway lines intersecting; to acquire by purchase any electric railway within the territory comprised within its territory; to contract with the Brockville, Westport and Northwestern Ry. for trackage on that part of its line between Brockville and Athens; and to acquire running rights over the tracks of the Cornwall Electric Ry. It also desires to have power to operate steam and other vessels on the St. Lawrence River, and any inland waters touched by the company's lines. The company's offices are to be at Ottawa; its capital is fixed at $1,000,000, and it may issue bonds to the amount of $20,000 a mile. The provisional directors are: W. J. Armitage, W. L. Redmond, W. P. Walker, M. S. Beckstead, F. Iveson, C. S. Cossett, L. H. Daniels, T. Berney, J. L. Rolston, W. O. Riddell, J. E. Askwith. In passing through committee it was decided to change the name of the company to the Ottawa and St. Lawrence Ry., instead of that mentioned in the application for a charter—the Eastern Ontario Counties Electric Belt Line Ry. Co.

Ottawa Electric Ry.—The supplementary estimates for the Department of Agriculture submitted to the House of Commons, contain an item of $10,500, being the further amount required for construction of a branch of the electric railway to the experimental farm, Ottawa, including cost of fence.

Peterborough Radial Ry.—By an act under consideration by the Ontario Legislature, the company is asking for an extension of five years for the completion of the lines authorized.

Port Arthur and Fort William Electric Ry.—Tenders are being asked by the Commissioners for rails, ties and other construction material required for the double-tracking of the electric railway connecting Port Arthur and Fort William, Ont.

Quebec Ry., Light and Power Co.—E. A. Evans, General Manager, stated in an interview, Mar. 11, that extensive improvements were under consideration, which, if carried out, would mean extended operations, and giving the company a much greater earning capacity. These improvements would mean the expenditure of a large amount of money, and were necessitated by the fact that Quebec city is extending on every hand, and that the tourist traffic to the city is increasing at a very great rate.

St. John to Edmundston, N.B.—Application is being made to the New Brunswick Legislature for an act incorporating a company for the purpose of constructing a railway, with authority to use electric power, from St. John, along the valley of the St. John River to Centreville, and to Grand Falls or Edmundston. J. J. F. Winslow, Fredericton, N.B., is solicitor for applicants.

Simcoe Electric Ry. and Power Co.—The Ontario Legislature is being asked to pass an act incorporating a company with this title, with power to construct an electric railway from Midland to Coldwater, Ont., and branches or extensions. The company also asks for authority to lease from the Crown the big shute of the Severn River, and develop the water power there, and dispose of electrical energy for commercial purposes. W. Finlayson, Midland, Ont., is solicitor for applicants.

Stratford and St. Joseph Radial Ry.—The Ontario Legislature is being asked to pass an act extending the time within which this company may construct its projected electric railway between Stratford and St. Joseph, on the shore of Lake Huron, Ont. J. U. Vincent, Ottawa, is solicitor for the company.

Toronto, Niagara and Western Ry.—The company's application for an extension of time for the construction of the several lines of electric railway which it has been authorized to construct, has been approved by the House of Commons. There was considerable opposition to the passing of the bill, the principal ground taken being that although the company had been granted several extensions of time, no serious construction had been done. It was stated that the company had made a considerable expenditure in acquiring its right-of-way, and in the construction of abutments for bridges, etc. One of the members stated that the promoters of the company informed the Railway Committee that about $250,000 had been expended; that a portion of the line had been constructed at Mimico, the abutments of a bridge at Twelve Mile Creek, Bronte, put in, and other work done.

Toronto Ry.—Car barns are to be erected in the northwest part of the city, either on Bloor St. or Lansdowne Ave. While the site has not definitely been announced, it is thought that it will be on Lansdowne Ave. A switch has already been put into that property.

Windsor Tunnel and Lake Erie Co.—A press report states that the company expects to start construction on its projected line early in July. The line will connect Windsor, Sandwich, West Vereker, New Canaan, McGregor, Huron and Oxley, and will have a total length of about 30 miles. It is proposed to connect the line with the Detroit River tunnel, and so secure connection with the electric railway lines in Detroit, Mich. The officers are: President, R. A. Bailey, Detroit, Mich.; Vice-President, Dr. J. A. Smith, Windsor, Ont.; Treasurer, W. Boug, Windsor; Secretary, J. G. Leggatt, Windsor.

Winnipeg Electric Ry.—It was stated Mar. 10, by Manager Phillips, that the proceeds of the issue of £300,000 of new stock, which was being made in London, Eng., would be used for the extension of lines, the relaying of track on streets to be paved or repaved by the city, and the provision of new cars.

Electric Ry. Finance, Meetings, Etc.

Berlin, Ont.—The Berlin, Ont., city council, Mar. 15, by a vote of nine to five, decided to take the management of the electric railway owned by the city from the Light Commissioners, and to operate it directly by the council.

British Columbia Electric Ry.—Gross earnings for Jan., $200,280; operating expenses, $105,006; net operating earnings, $95,274; renewal funds, $13,958; net earnings, $81,316; approximate income from investments, $13,550; net income, $94,866; against $171,160, gross earnings; $90,724, operating expenses; $80,436, net operating earnings; $10,750, renewal funds; $69,686, net earnings, $11,036, approximate income from investments; $80,722, net income for Jan., 1908. Aggregate gross earnings for 7 months ended Jan. 31, $1,343,919; net earnings, including estimated income from investments, $630,005; against $1,167,960 gross, and $583,042 net, for same period 1907-08.

Halifax Electric Tramway.—Railway receipts for Feb., $12,537.02; against $12,272.37 for Feb., 1908. Total receipts for 2 months ended Feb. 28, $26,322.61, and for 3 weeks ended Mar. 21, $9,127.39; against $25,192.46, and $8,762.34 for same periods 1908.

London St. Ry.—Gross earnings for Jan., $17,737.83; expenses, $12,985.11; net earnings, $4,752.72; Feb. gross earnings, $16,497.00; expenses, $12,724.38; net earnings, $3,772.62; against $17,284.37 gross earnings; $12,969.20 expenses; $4,315.17 net earnings for Jan.; and $16,094.87 gross earnings; $12,746.52 expenses; $3,348.35 net earnings; for Feb., 1908.

Montreal St. Ry.—Total earnings for Feb., $284,090.21; operating expenses, $199,912.17; net earnings, $84,178.04; city percentage on earnings, $16,373.83; interest on bonds and loans, $15,164.36; rent leased lines, $498.67; surplus, $52,141.18; against $270,224.43, total earnings; $201,449.05, operating expenses; $68,775.38, net earnings; $14,567.24, city percentage on earnings; $17,935.96, interest on bonds and loans; $444.43, rent leased lines; $35,827.75, surplus for Feb., 1908. Aggregate total earnings for 5 months ended Feb. 28, $1,514,614.68; operating expenses, $959,551.64; net earnings, $555,063.04; total charges, $145,341.74; surplus, $409,721.30; against $1,458,462.81, total earnings; $943,475.93, operating expenses; $514,936.88, net earnings; $148,134.68, total charges; $366,852.20, surplus, for same period 1907-08.

Nelson Electric Tramway.—A resolution has been passed by the city council of Nelson, B.C., to purchase the rights and franchises of the Electric Tramway Co. The company has been in difficulties for some years past, and since the fire at the car barns in May, 1908, when the cars were destroyed, it has shown no desire to renew the service. The company offered the city the whole of its property in the city, including tracks, etc., valued at $75,000, for $10,000.

Quebec Ry., Light and Power Co.—Negotiations, it is reported, are in progress for the transfer of a controlling interest in this company to a British financial syndicate. Another report says the C.P.R. is likely to acquire control.

Southwestern Traction Co.—The Ontario Legislature has decided that the company's bonding power shall not exceed $25,000 a mile of line. Application was made to have it increased to $33,000 a mile.

Southwestern Traction Co.—It was reported from London, Ont., Mar. 23, that the London and Western Trust Co. had been appointed to act as receiver of the S.T. Co., during a temporary financial difficulty, which it is anticipated will be speedily adjusted.

Winnipeg Electric Ry.—The Manitoba Legislature has passed an act authorizing the company to issue $1,500,000 of debenture stock, and a meeting of the shareholders has been called for April 7 to authorize the directors to make an issue of £300,000 of 4½% perpetual consolidated debenture stock under the act, and to authorize the execution of a mortgage to the British Empire Trust Co., to secure the same. This issue of debentures has been underwritten by Sperling & Co., and Kitcat, Mortimer and Arthur, London, Eng., and is being offered to the public at 97. The debentures are being issued subject to the existing issue of $1,000,000 of 5% mortgage bonds, redeemable Jan. 1, 1927, and to the $4,000,000 of 5% mortgage bonds redeemable 1935, and certain provisions as to future issues, either for extensions, or for redeeming previous issues. The trust deed provides that the company may purchase any of the stock on the market at or below 105 plus accrued interest, or may redeem the whole or any part, to be selected by drawings, of the stock at 105, the same premium becoming payable by reason of a voluntary liquidation of the company.

SIX GOOD

BOOKS

FOR

RAILROAD MEN

THE ENGINEERING NEWS BOOK DEPARTMENT

220 BROADWAY, NEW YORK

ECONOMICS OF RAILWAY OPERATION

By M. L. BYERS

C.E., Ch. Eng. M. of W., Mo. Pac. Ry.

672 pp., many diagrams and forms illustrating the best modern practice - $5 net

The only publication explaining in detail the operative systems of American railways. Sir William Van Horne says of it: "I regard it as a most useful and valuable book."

TRACK AND TRACK WORK

(Third Edition, Revised and Enlarged)

By E. E. R. TRATMAN

Assoc. M. Am. Soc. C.E.

520 pages, 232 illustrations, 44 tables and an appendix of statistics of standard track construction - - - $3.50 net

The standard treatise on this subject.

DESIGN OF TYPICAL STEEL RAILWAY BRIDGES

By W. CHASE THOMSON

M. Can. Soc. C.E. Assist. Eng. Dominion Bridge Co.

178 pages, 21 figs., 5 fold. plates - $2 net

FIELD PRACTICE OF RAILWAY LOCATION

By WILLARD BEAHAN

270 pages, 50 illustrations - $3.00 net

RIGHT OF WAY SURVEYING

By A. I. FRYE

8vo, 50 pages - - - - - $1.00 net

RAILWAY LOCATION AND CONSTRUCTION

By E. N. McHENRY

88 pages, 2 folding plates - $1.00 net

Any of these books will be sent, postpaid, on receipt of price, or further details with full list of contents will be given if desired.

KEEP YOURSELF POSTED ON THE LITERATURE OF YOUR SPECIALTY

For the guidance of technical men we issue, at intervals, notices of **new** and **recommended** books on various subjects, by all publishers. This service is **absolutely free** to all and involves no obligation of any kind whatever.

Mark on the attached coupon the special subjects on which **you** wish to be kept informed regarding **new** publications, adding any subjects not mentioned thereon in which you are interested. Send us this coupon **at once** and we will send you these notices as issued.

ELECTRIC RAILWAY STATISTICS FOR YEAR ENDED JUNE 30, 1908.

The following abbreviations are used in the names of railways—E., electric; E. R., electric railway; E. S. R., electric street railway; Ry., railway; S. R., street railway. The minus mark (—) in the column for net earnings shows that there was a deficit in the operations of the line to the extent of the figures given. The numbers in brackets—thus (1)—after the name of a railway refer to notes below.

Name of Railway	Mil'ge	Gross Earnings	Net Earnings	Proportion of Earnings to Working Expenses	Earnings per Car Mile	Operating per Car Mile	Passenger Car Mileage	Freight Car Mileage	Locomotive Mileage	Passengers Carried	Freight Carried
				p.c.	cts.	cts.					Tons

Notes to Electric Railway Statistics.

(1) The Brantford St. Ry. is owned and operated by the same interests which own the Grand Valley Ry., and the Woodstock, Thames Valley and Ingersoll Ry.

(2) The statistics for the Brantford and Hamilton Ry. cover its operations for one month only, the line being a new one. The B. and H. Ry. is owned by the Dominion Power and Transmission Co., which also owns or controls the Hamilton and Dundas St. Ry., the Hamilton, Grimsby and Beamsville Electric Ry., the Hamilton Radial Electric Ry., and the Hamilton St. Ry.

(3) The British Columbia Electric Ry. owns local electric railways in Victoria, Vancouver and New Westminster, and a suburban line connecting the last two cities.

(4) The Cape Breton Electric Co. owns the local electric railway in Sydney, and owns jointly with the Dominion Coal Co. the Sydney and Glace Bay Ry.

(5) The Galt, Preston and Hespeler St. Ry., together with its leased line, is operated in connection with the C.P.R., under a lease. The C.P.R. also owns the Hull Electric Co.

(6) The International Transit Co. is one of the companies owned by the Lake Superior Corporation at Sault Ste. Marie, Ont., and connects with the Trans-St. Mary's Ry. at Sault Ste. Marie, Mich., owned by the same company.

(7) The Montreal Park and Island Ry., and the Montreal Terminal Ry., are owned by the Montreal St. Ry.

(8) The Niagara Falls Park and River Ry. is owned by and operated in connection with the International Ry. of Buffalo, N.Y.

(9) The Niagara, St. Catharines and To-

ronto Ry. also owns the Niagara Falls, Wesley Park and Clifton Ry., and the Port Dalhousie, St. Catharines and Thorold Electric St. Ry.

(10) The Port Arthur St. Ry. was owned by the City of Port Arthur, Ont., during the period covered by these statistics. It is now owned jointly by the cities of Port Arthur and Fort William.

(11) The Quebec Ry., Light and Power Co. operates a steam freight service over its Montmorency Division, the statistics of which are given in the steam railway statistics.

(12) The Sandwich, Windsor and Amherstburg Ry. owns and operates the Windsor and Tecumseh Electric Ry., and the statistics given include the operation of both lines. The S.W. and A. Ry. is in its turn owned by the Detroit United Ry.

(13) The St. Thomas St. Ry. is owned by the city, and operated by a commission.

(14) The Toronto Ry. owns the Toronto and York Radial Ry.

Electric Railway Notes.

The Winnipeg Electric Ry. is building at its own car shops, 30 double-truck cars, 32 ft. 11 ins., length of body; 45 ft. 4 ins., length over all. These cars will be equipped with G.E. 80 motors and Westinghouse air brakes.

Press reports recently stated that the Montreal and Southern Counties Ry. had ordered 6 observation type electric cars, 56 ft. long, to be built at the G.T.R. shops, Montreal. On Mar. 22, we were officially advised that the order had not been placed.

N. M. Cantin, who was actively engaged in the promotion of the Stratford and St. Joseph Electric Ry., was charged in the Toronto Police Court, Mar. 4, with stealing a certificate of 9,000 shares of stock in a mining company. The charge was withdrawn, the Crown Attorney stating he was satisfied there was no theft, and that the matter should not have been brought into court at all.

The Ontario Railway and Municipal Board is being asked by Vaughan and Markham townships to order the Toronto and York Radial Ry. to properly construct the road between the rails, and for 18 ins. on either side, and to keep same in proper repair. The townships allege that the railway company has not properly removed the snow from its road, but has done it in such a way as to block traffic on the highway.

The British Columbia Electric Ry. is constructing at its car shops, New Westminster, 16 passenger cars and one observation car for its Vancouver lines; six cars and a shunter for its New Westminster line; six box cars and an electric locomotive for the Chilliwack line, now nearly completed; seven box cars, two flat cars and an electric locomotive for its Lulu Island line. It has, it is reported, in addition, placed orders for some electric locomotives.

The Calgary Electric Ry. has ordered 4 pay-as-you-enter cars from the Preston Car and Coach Co., Preston, Ont., of which the following are chief particulars: Length of body, 28 ft.; length of rear vestibule, 7 ft.; length of front, 4½ ft.; with bull-nose roof, semi-elliptic side sash and deck sash, 14 walk-over cane upholstered seats and 2 stationary seats; P.C. & C. Co.'s automatic folding door fixtures, positive sand boxes. The cars are to be equipped with Westinghouse 101-B motors.

The Winnipeg Electric Ry. Co. is objecting to the city's application to the Legislature for amendments to its charter, in so far as they refer to power to lay conduits in streets, and to compel companies operating wires to rent space in those conduits. The company

states that in accordance with the city by-law passed last summer, compelling the company to put all wires underground, it had commenced that work and had made excavations. The city had, however, stopped the work on the ground that the company had no power to use streets and lanes for conduits.

The question of the operation of street cars on Sundays has come up for consideration by the Ontario Legislature in bills put forward by various company and municipally owned lines at the current session. The general policy of the Government in regard to these was stated by the Premier in reply to a deputation from London, Mar. 10, asking that such operation be not allowed. He stated the Government had no right to decide the question of Sunday cars on purely moral grounds. Neither London nor any other municipality would get Sunday cars unless the people voted for them, and it will be a future and not a past vote.

Grain Elevator Notes.

The Alberta Pacific Co.'s elevator at Ponoka, Alta., and 20,000 bush. of grain, were destroyed by fire recently.

Conger & Co.'s elevator at Rouleau, Sask., was destroyed by fire recently, together with about 70,000 bush. of grain.

Arrangements are reported to have been made for the erection of an elevator at Wainwright, Alta., for M. Orr, Stoughton, Sask.

The Vancouver Milling and Grain Co. has let a contract for the construction of an elevator of 115,000 bush. capacity at Vancouver, B.C.

The Northern Elevator Co. has commenced work on the construction of elevators at Leslie and Elfors, Sask., and is said to be contemplating the erection of another one at Wynyard, Sask.

Clark and Hannah's elevator, Orangeville, Ont., and about 20,000 bush. of grain, were destroyed by fire recently. The estimated loss is $12,000, of which $4,000 represents the elevator.

K. Burnett, Nanton, Alta., is reported to have secured a site in Vancouver for the construction of an elevator there, which it is stated will be ready for operation for dealing with the coming season's winter wheat.

Press reports state that 43 elevators will be built in Alberta during the current year, divided as follows: Alberta Pacific Elevator Co., 25; Alberta Grain and Elevator Co., 8; and private firms, 10. Most of these, it is stated, will be erected in the southern part of the province.

As a result of a recent meeting between a New Westminster, B.C., deputation and members of the Calgary Grain Conference, a committee of six has been formed to investigate the question of the erection of terminal elevators at New Westminster for the purpose of handling grain from the prairie provinces.

An order-in-council has been passed establishing fees for the inspection and weighing of grain as follows: For inspection, grain in sacks, one-third cent. per cental; in bulk, 50c. per carload; and 50c. per 1,000 bush.; for weighing, 30c. for each carload into and out of elevators, and 30c. per 1,000 bush. for each cargo from elevators.

Application is being made to the city council of Vancouver, B.C., by H. Mooer & Co., Kingston, Ont., for assistance in the erection of a terminal elevator at that port to cost $400,000, by way of exemption from taxation and a guarantee of bonds. Press reports state that the request is not likely to be granted, as the Dominion Government and the C.P.R. have under consideration proposals for the construction of elevators at that port.

F. W. Peters, Assistant to Second Vice-President C.P.R., Winnipeg, who was in Vancouver recently, is stated to have assured the local authorities that the company is prepared to deal with the question of erecting elevators on the Pacific coast, and that it will be found that when grain begins to move westward, elevators will be there to deal with it. When the time came, the matter would be principally in the hands of F. F. Busteed, General Superintendent of the Pacific Division, who superintended the erection of the terminal elevators at Fort William, Ont.

The Alberta Grain Growers' convention at Calgary, recently, adopted a resolution to urge the Dominion Government to undertake the erection and operation of a terminal elevator on the Pacific coast, to deal with Alberta grain shipped west, and failing action by the Government, to urge the C.P.R. to undertake it, to be ready to handle the 1909 crop. The convention also desired amendments to the Manitoba Grain Act, in its application to Alberta, so that any farmer wishing to put grain through elevators by sale or otherwise be enabled to obtain cars in the same proportion as if loaded from platforms, and that the companies keep books for the purpose of entering requests for cars.

Regarding the C.P.R. elevator which is to be constructed by the John S. Metcalfe Co., on Maple Island, near Victoria Harbor, Ont., at the terminal of the Georgian Bay and Seaboard Ry. (C.P.R.), we are advised that in the main it will be the same as the one recently constructed by the same firm for the G.T.P.R. at Tiffin, Ont., a description of which appeared in our Dec., 1908, issue. In the case of the C.P.R. elevator, the working house will be smaller, and the power plant larger than that of the G.T.P.R. Any other differences are of a minor character. The capacity of the new elevator will be 2,000,000 bush., and the contract price is about $900,000.

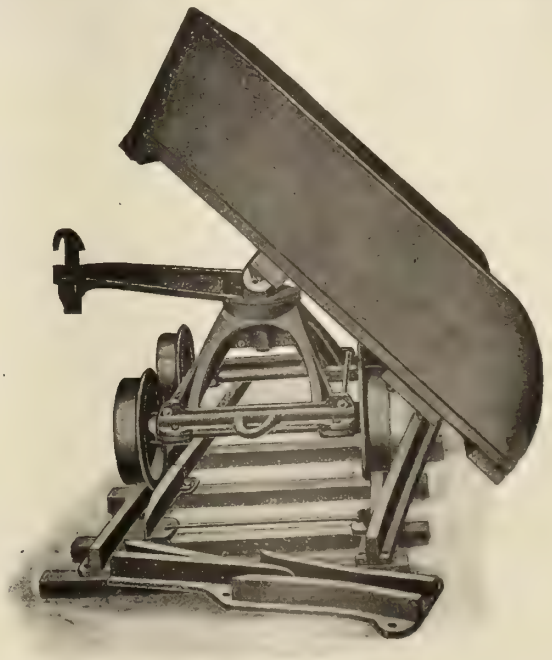
MARINE DEPARTMENT.

The Sagamo-Kenosha Collision.

Commander O. G. V. Spain, R.N., Dominion Wreck Commissioner, has given the following judgment in connection with the investigation of the collision which occurred between the Muskoka Lakes Navigation and Hotel Co.'s steamboats Sagamo and Kenosha, at Beaumaris, Ont., Aug. 11, 1908:

"The court having made a full and exhaustive enquiry into all the circumstances attending the casualty, and having carefully reviewed the whole of the evidence that it was possible to obtain from the officers and crews of the vessels themselves, and also from passengers, finds as follows: The accident was caused by the Kenosha striking the port quarter of the Sagamo with her stem. The court considers that the officers of the Kenosha are in fault, that the Captain was below at the time of the accident, and the deck was in charge of Jas. Ariss, the mate, who was under the influence of liquor, and incapable of performing his duties in a satisfactory manner. There were large numbers of passengers on board each vessel, and it was much more by good luck than good management that a serious disaster was averted. R. Hanson, Captain of the Kenosha, who holds a certificate of competency as master of a passenger vessel in the minor inland waters, is severely censured, not only for being below at the time his vessel was leaving the dock, but also for leaving the deck in charge of an officer who was under the influence of liquor. The certificate held by Jas. Ariss, as mate in the minor inland waters, is cancelled, as the court considers that an officer who is intoxicated when in charge of a vessel, more especially a vessel carrying large numbers of passengers, is not a fit and proper person to hold

Champion Revolving Dump Car



The CHAMPION CAR is radically different from any now on the market. It is simple, strong, compact and being built entirely of iron except the bed, is extremely durable. The bed revolves and may be dumped on either side or end. Write for catalogue of cars and drums.

HAMILTON, CANADA

this position. The master and officers of the Sagamo are exonerated from blame. The court desires to bring to the notice of the Manager of this company, the grave responsibility that rests, not only with the officers of the vessels, but with himself. Too great care cannot be taken on board passenger vessels in seeing that the masters and officers are thoroughly competent and sober. It appears by the evidence that on previous occasions it was known to the Manager that mate Ariss had been under the influence of liquor on duty, and the court considers that, being aware of this fact, the company should not have kept this officer in such a responsible position, where the lives of numbers of passengers might at any time be left in his sole charge."

Hudson Bay Co.'s Steamboat Service.

This company has now a complete service covering the ocean journey to the Labrador coast, and Ungava, Churchill, York and Moose Factories in Hudson Bay, and all the navigable streams in the interior waters of Northwest Canada. Following is a list of the steam vessels which will be operated during the year, together with their respective routes:

Discovery—London, Eng., to Hudson Bay.
Pelican—London, Eng., to Labrador, Ungava and Hudson Bay points.
Port Simpson—Stikine and Skeena Rivers, B.C.
Hazelton—Stikine and Skeena Rivers, B.C.
McKenzie River—McKenzie River, B.C.
Wrigley—McKenzie River, B.C.
Peace River—Peace River, Alta.
Messenger—Peace River, Alta.
Grahame—Athabasca River, Alta.
Primrose—Athabasca River, Alta.
Saskatchewan—Saskatchewan River, Sask.
Churchill—Churchill River, Keewatin Terr.
Lac Seul—Lost Lake and Lac Seul, Keewatin Terr.
Inenew—James Bay.
Eskimo—James Bay.

The whole of the company's transport service is directed and supervised from Winnipeg, where the head office for Canada is located.

The St. Lawrence Power Development.

C. J. Smith, President; A. A. Wright, H. A. Calvin, L. Henderson and F. King, counsel, representing the Dominion Marine Association, waited on the International Waterways Commission in Buffalo recently, and presented a memorial, of which the following are the main points:

"In pursuance of the opportunity afforded by your commission, we have caused careful examination to be made of the plans submitted by the Cedars Rapids Manufacturing and Power Co. respecting its proposed works in the Cedars Rapids of the St. Lawrence River, and submit that the proposed works, if permitted to be undertaken, would very seriously interfere with the interests of navigation on the St. Lawrence, by diverting water from its present channels, by completely barring other necessary channels, by overloading and congesting the canal at this point, by entailing risk of accident in the proposed works and possible blockades, and by causing derangements of present conditions, the consequence of which it is impossible for expert engineers or others to estimate with any degree of certainty.

"It appears that the proposed works would completely bar the river to The Calvin Co., whose rafts are obliged to take the channel now proposed to be closed; and that the channels now available for certain boats of the Richelieu and Ontario Navigation Co.,

STRONGER
Than Stock-Weather and Wear

and others, would be materially altered, or rendered useless, while, of course, no guarantee can be given that other equally satisfactory means of passing the Rapids will be afforded. While engineers may be able to estimate the probable volumes of water, and the possible or even probable direction and velocity of currents, experience alone will give certain results, or settle the questions of grave importance whether proposed new channels will be safely navigable for the vessels requiring to use them. It has been admitted that undertakings by power development companies to meet future emergencies, and to protect or indemnify navigation interests, should not be accepted, and that the protection should be applied before the development is permitted.

"We have a larger duty to perform than merely to protect the interests of the two companies above named, and their cases are cited merely as concrete examples sufficient in themselves to warrant refusal of sanction for the proposed works, without reference to the other dangers and difficulties entailed, such as the congestion of canals, the risk of accident to the works and the chance of blockades, not to mention the various other perils which can only be foreseen with reference to other cases where navigators are proved to have suffered by the positive evidence of increased insurance rates. We beg leave to refer to various previous memorials and petitions submitted to your commission, in which they have, through their individual bodies, declared themselves unalterably opposed to power developments on the St. Lawrence and other rivers which may in the present, or future, possibly interfere to any extent with any navigation interests; and we refer again to the well-defined policy already laid down by your commission that the interests referred to are to be considered paramount; we submit that it is abundantly apparent that these interests would be directly and definitely prejudiced and interfered with by the proposed works, and that the rights of navigators would also be rendered liable to the other indirect perils and difficulties referred to, and that, therefore, the plans submitted cannot properly be given the sanction for which the promoters ask. We therefore pray that the plans and proposals submitted be not sanctioned by your Commission."

Memorials were also presented by the Shipping Federation of Canada, Montreal Board of Trade and Montreal Chambre de Commerce, to the same effect. A meeting took place, Mar. 8, in Ottawa, when the deputation placed its views of the Long Sault Development Co.'s proposals before the Premier, the Ministers and Chief Engineers of the Railways and Canals, and Public Works Departments, and the Chief Engineer of the Marine Department, during which the plans were thoroughly discussed.

Shipping Federation of Canada.

The annual meeting was held in Montreal Feb. 10. In submitting the sixth annual report for the year 1908, Hugh A. Allan, President, said:

The season of navigation opened April 30 with the arrival of the s.s. Corsican, and the last ocean vessel to leave was the s.s. Dahomey, Nov. 26. The number of seagoing vessels that arrived during the season was 739, of a tonnage of 1,958,604 tons, compared with 742 vessels of a tonnage of 1,923,658, showing a decrease of 3 vessels and an increase of 34,946 tons. The passenger business eastbound shows an increase, which may be accounted for by the U.S. travelling public appreciating the natural advantages of the St. Lawrence in preference to other routes. The westbound traffic shows a considerable falling off. The number of cattle shipped increased 2,565; the number of sheep shipped (which is the smallest since 1879) decreased 1,274. The apple shipments decreased 262,608 barrels; cheese decreased 169,480 boxes; eggs decreased 17,547 cases; lard decreased 13,077 packages; flour and meal decreased 127,408 barrels; lumber decreased 9,663,118 feet b.m.; butter increased 26,365 packages; box meats increased 13,439 boxes; pulp and paper increased 18,456 tons; hay increased 8,939 tons; grain and seeds decreased 1,482,207 bush. Time, however, works its own cure, and already there are signs of improvement and, as in past years any improvement in trade in the west always reflects itself on Montreal, we may probably look for a gradual betterment during the coming year.

There was a decrease in employment of longshoremen during the season, the daily average being 669, as compared with 786 in 1907. The season passed without any recurrence of labor troubles. The new bonus system is appreciated by the regular men who look to the wharves annually for their living, and has had the effect of retaining until the close of navigation the greater number of the men who signed the contract at the beginning of the season, thereby reducing the floating element which caused so much trouble by making unreasonable demands when the call for labor exceeded the supply.

The marine signal service stations that were opened in Oct., 1907, for reporting vessels and conveying to them the conditions of the river, have been found of great advantage. This was especially so during the unprecedented period of fog and bush fires which we passed through, enabling us to know the whereabouts of vessels that were delayed with passengers on board. Although the present system works well in clear weather, the executive committee consider it would still be of greater advantage if wireless communication could be set up between vessels and the shore in smoky or thick weather; this latter point is receiving the Minister's consideration. Another matter is the work done in connection with the dredging of the Beaujeu channel below Quebec; a 30 ft. channel with a width of 600 ft. has been opened during the season, enabling vessels drawing under 30 ft. to reach Quebec at any state of the tide. Dredging operations are being continued, and the intention is to extend the width of the channel to 1,000 ft. It is very gratifying to learn that a start has been made to deepen the St. Lawrence ship channel to 35 ft., and that good progress has been made with the deepening at Cap-à-la-Roche. I think it is only fair to mention the satisfactory condition in which the different aids to navigation have been kept during the season. From the record kept of reports and complaints from masters and pilots, the following figures show a very satisfactory condition for the season. In 1906, 52 defects were reported; in 1907 47, and in 1908, 17.

The question of the rental of the permanent sheds, and how best to reach the upper storeys, has been under consideration by the Montreal Harbor Commissioners. The executive committee considers that the charging of rentals for the permanent sheds is a very unwise step, and is not in accordance with the policy of making Montreal a free port, which policy was first adopted by the Government when it took over the Lake St. Peter debt, and has been continued since then by the reductions from time to time in the wharfage rates. While the committee admit that the erection of these sheds has been very beneficial to the trade of the port, they do not believe that the policy of making steamers of the regular lines trading to the port, whose bills of lading only call for delivery at ships' rail, pay all the rental charges, while the merchants and receivers of freight, who benefit by the improved wharf accommodation, receive this benefit without cost to themselves. The executive committee does not ask for free sheds, but it considers that the new conditions call for a re-arrangement of these charges so that all parties benefiting shall pay a proportion of the benefits received. It was stated by the Chairman of the Harbor Commissioners at a meeting of the Manufacturers' Association, that $30,000 has been saved in three months in the handling of freight on the wharves, and as the season of St. Lawrence navigation extends over seven months of the year, it is reasonable to suppose that the saving during the whole season will amount to about $70,000. The executive committee therefore is of opinion that this saving should enable the Commissioners to reduce the charges of rentals to the regular lines, and thinks it well also to point out that a tramp steamer might come to the port and have her cargo handled without contributing a cent to shed rentals. In the committee's opinion the Harbor Commissioners should be asked to consider whether the system prevailing at Boston and Portland of covering the cost of shed accommodation by a charge on the goods cannot be adopted here. If this were done, the regular lines running to Montreal would be put on a par with the lines running to Boston and Portland, and therefore able to compete with them.

The Federation has protested for years against the sick mariners' dues of 2c. a ton, charged 3 times a year on every ship arriving in any of the provinces except Ontario. The monies collected from these dues form part of the Consolidated Fund of Canada, and a large surplus has accumulated. The Government introduced a bill during the last session reducing the dues from 2c. to 1½c. per ton. It is to be hoped that in the near future this unjust impost will be abolished altogether; the charge falls upon vessels which gain no advantage from the fund; besides, not being levied in Ontario, the tonnage from that province goes free both in home ports and in the U.S., an unfair discrimination against the other provinces.

The cordial relations that have existed between the Federation and the different Government departments have continued during the year, and to this I attribute largely the success of our work, and it gives me pleasure to testify to the assistance, co-operation and assiduity of the Minister of Marine, and the other officers of his department.

THE HARBOR COMMISSIONERS' REPLY.

The Montreal Harbor Commissioners replied to Mr. Allan in an interview in the Montreal Witness as follows: "Mr. Allan's remarks were somewhat misleading. Out of the total revenue for the port of Montreal, which amounts to about $500,000, the shipping companies contributed last year $29,500; the merchants, manufacturers and railway companies contributed the balance. The shed rental charge this year is only 3% on the actual cost, which is a very moderate rental, considering that these new magnificent steel sheds are the best of their kind, and have more than doubled the storage capacity in the central part of the harbor. The erection of these sheds has enabled the steamship companies using them to handle freight with very much greater despatch and at greatly reduced cost. The cargo of a steamer of one of the leading lines using this port on a voyage last season was loaded and unloaded, a total of 13,000 tons in 72 hrs., a time record which has not been surpassed by any of the modern ports in Europe. There has also been a saving to the steamship com-

panies as far as labor costs are concerned, not as many men being required now as heretofore, owing to the erection of these fine new sheds. The rental asked from the shipping companies for this year will be less than one-fifth of the total revenue, and therefore, his statement that the merchants and receivers of freight benefit by the improvements carried on in the port of Montreal, without cost to themselves, is incorrect. Before these sheds were definitely decided upon by our predecessors in office, the shipping people unanimously agreed to pay 3 % interest on the cost of construction. One of the largest companies has already agreed to the new rental charge without criticism. As to wharfage rates, in 1896 the harbor commissioners, having a surplus and no improvements being carried on, the wharfage rates were reduced 25 %. In 1901, 60 % of the wharfages on exports were reduced 50 %. This means a reduction in revenue approximately $100,000 a year. It is not the commissioners' intention to raise the wharfage rates to where they were prior to 1896, but to make a small increase with due regard to the port's best interests to enable them to meet their obligations. As far as the 'free port' is concerned, the commissioners have not been given to understand that this is the Government's intention, and they do not know of any 'free port' in the world."

Since the foregoing statement was made, the commissioners have reconsidered the matter of an increase in wharfage rates, and announced that the increased charges, of which notice had been given, would not be put in force this year, but most probably would be next year.

Atlantic and Pacific Ocean Marine.

J. White has been appointed harbor master at Charlottetown, P.E.I.

J. P. Esdaile, steamboat inspector for Nova Scotia since 1889, died at Halifax Mar. 14.

The Allan Line s.s. Virginian, after being overhauled, has returned to service, completing her first passage since then on Mar. 12.

The Dominion Public Works Department received tenders, Mar. 23, for the construction of three ice piers on the Annapolis River at Annapolis Royal, N.S.

The Elder-Dempster Co. is reported to have decided to place steamships on the route between Montreal and the Atlantic terminals of the Tehuantepec Ry. of Mexico, at Coatzacoalcos.

Capt. C. Cameron, who was in command of various trans-Atlantic liners for 25 years, and who until recently was captain of the White Star s.s. Oceanic, died at Southampton, Eng., Mar. 14.

The C.P.R. has extended the privileges of its pension fund to the crews engaged on its Atlantic steamships. The minimum pension is the same as that granted to the staff on shore, viz., $20 (in sterling £4 2s. 2d.) a month.

W. J. Dott and G. R. Nicholson are reported to have been appointed joint managers of Allan Bros. and Co., London and Liverpool, Ltd., at Liverpool, Eng., representatives of the Allan Line, succeeding the late W. Beckett Hill.

The Dominion Department of Agriculture received, Mar. 17, offers of a steamboat required for quarantine service at Halifax, N.S. The size of the vessel desired is: Length, 80 ft.; breadth, 20 ft.; draught, 8 ft.; with a speed of about 10 knots an hour.

The s.s. Stikkelstad, which sailed from Glasgow, Scotland, Nov. 23, 1908, for Sydney, N.S., has been given up as lost, and from the wreckage found along the west

F. L. YOUNG - - General Manager

coast of Scotland it is assumed that she was wrecked shortly after leaving Glasgow.

The following Government appointments in Nova Scotia have been announced: F. P. Chiasson, harbor master, Margaree; P. L. McFarlane, harbor master, Baddeck; S. C. McMillan, receiver of wrecks, Isaac's Harbor district; J. Melonson, Port Warden, Annapolis Royal.

The British Secretary of State for the Colonies recently announced that the whole question of the promotion and extension of trade relations between Canada and the West Indies, including improved steamship communication, would be covered by the Royal Commission appointed to enquire into it.

The Leyland Line, which it was recently announced was to withdraw from the St. Lawrence route, has been amalgamated with J. H. Welsford & Co., owners of the Gulf Transport Line, in England. The bulk of the Leyland staff will be retained by the new management, and a considerable reduction of capital will be made.

The Newfoundland barque Lairnia was wrecked recently at Chance Cove, about 15 miles from Cape Race, and became a total loss. She got safely to shore after considerable difficulty. She was a wooden vessel, built at Glasgow, Scotland, in 1869, her dimensions being: Length, 125.1 ft.; breadth, 24.1 ft.; depth, 13.6 ft.; tonnage, 251 register.

The Union Steamship Co. is reported to have decided to build another steamship similar to the s.s. Makura for the Canada-Australia route, at a cost of about $2,000,000. It is stated that the company, which at present receives a subsidy of $325,000 annually, is prepared to place two more vessels on the route, if the subsidy is increased by $100,000.

The Osaka Shosen Kaisha, which is to inaugurate a trans-Pacific service in June, in connection with the Chicago, Milwaukee and Puget Sound Ry., has chartered the British s.s. Strathearn, owing to its inability to complete some of the vessels under construction by the time mentioned. One of the six vessels to be operated by the company is to be named Canada Maru.

The Nippon Yusen Kaisha's s.s. Aki Maru, which arrived at Seattle, Wash., recently, reported that telegraph communication had been maintained with either the Japanese shore station or the Vancouver Island station throughout the whole voyage across the Pacific. This was not accomplished direct with shore stations all the time, but by means of relays through other vessels of the same fleet leaving or approaching either shore.

The Minister of Marine gave notice in the House of Commons, Mar. 3, of a resolution empowering the Government to enter into a contract for a subsidized line of steamships between Canada and France. The aggregate amount to be paid is not to exceed $200,000 a year, and at least 15 round trips must be made during the year. The Government's intention is said to be to enter into a new contract with the Allan Line for a 15-knot service, replacing the present 12-knot service.

Press reports state that the keels of two Atlantic liners for the C.P.R. have been laid at Govan, Scotland. It is stated that the new vessels will be a great advance on the present Empresses, both in accommodation and speed. Sir Thos. G. Shaughnessy, while in St. John, N.B., recently, stated in response to a question as to the transfer of the Empress vessels to the Pacific route, that he had nothing to add to what had already been said, except that the scheme had not assumed a definite shape.

C. N. Armstrong, who recently returned to Montreal from London, Eng., is reported to have said that the work in connection with the projected "all red" route from England, via Black Sod Bay, Ireland, will be pushed on, immediately on the passage of the bonus bills by the British Parliament. The subject does not appear to have been mentioned in the British Parliament during the present session, in any form, and there seems no likelihood of the matter being dealt with during the present year at any rate.

The grounds on which the Allan Line is protesting against the entrance of the White Star Line into the Canadian trade, are that the latter line agreed to remain out of the St. Lawrence trade, or else to keep its name out of it. The steamships Laurentic and Megantic will, as has been announced, take up the St. Lawrence route on the opening of the season, operating in conjunction with the Dominion Line as the Dominion-White Star Line, and this is looked upon as an infraction of the agreement with the Allan Line. Both the Dominion and White Star Lines are owned by the International Mercantile Marine Co. The matter is being arbitrated upon.

The Canada Line, a joint service between continental Europe and Canada, operated by the Hamburg American Line, the Holland American Line, and the North German Lloyd, in connection with the C.P.R. and G.T.R., was inaugurated Mar. 19 by the sailing of the s.s. Prinz Oskar from Rotterdam for Halifax. Three twin-screw steamships will be utilized on the route, viz., Prinz Oskar and Prinz Adalbert, sister vessels, of 6,000 tons gross, owned by the Hamburg American Line, and Willehad, 4,800 tons gross, owned by the North German Lloyd. The ports of call are: Halifax, St. John and Portland, Me., on the winter schedule, and Quebec and Montreal in the summer. The Canadian office of the line is at Montreal, under J. Thom's management, and agencies have been established at Quebec, Toronto and Winnipeg.

Maritime Provinces and Newfoundland.

Capt. R. Keay has been appointed harbor master at St. Andrews, N.B.

The La Have Steamship Co., Ltd., has declared a dividend of 5% for the past year.

N. Martin has been appointed harbor master and port warden of Port Hawkesbury, N.S.

An order-in-council was passed recently, rescinding a previous order prohibiting the use of trawls in St. Mary's Bay, N.S., from Oct. 1 to June 30.

The Halifax and Inverness Steamship Co.'s s.s. Strathlorne is having her machinery installed at Halifax. The hull was built at Mahone Bay, N.S. When completed she will be operated between Halifax, Cape Breton ports and Prince Edward Island.

The C.P.R., under the franchise of the New Brunswick and Canada Ry., has deposited with the Dominion Public Works Department, plans and description of the site of a wharf which it proposes to construct at St. Andrews, N.B.

The Island Tug Co., Charlottetown, P.E.I., owns 2 steam tugs and one twin-screw passenger and freight steamer Harland. The latter is under contract with the P.E.I Government, and the tugs have been hired by the Dominion Government to attend the dredges Montague and Prince Edward.

The North Shore Steam Ship Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $50,000 and office at Sydney, N.S., to own and operate steam and other vessels, and to carry on the business of shipowners and common carriers within and without the Dominion. The provisional directors are: J. T. Burchell, J. A. Young, W. F. Burns, C. M. Burchell and H. Ross, Sydney, N.S.

At a recent meeting of the St. John Board of Public Works, the question of increased wharf accommodation was referred to a committee. It was stated that the Eastern Steamship Co. is making application for the berth now occupied by the s.s. Senlac, which is to be removed to another route. The company, it is said, will put on a morning boat, to connect with the s.s. Prince Rupert.

The Marine Department has given notice that the whistling buoys formerly moored near Pubnico harbor lighthouse, Shelburne harbor entrance, Liverpool bay, northeast shoal off the south coast, Nova Scotia; and near Indian rocks, P.E.I.; the gas buoy and the bell buoy at Thrumcap shoal, Halifax harbor, N.S., and the bell buoy at Prim reefs, Hillsborough Bay, P.E.I., have been replaced by combined gas and whistling buoys.

Press reports state that the s.s. Senlac, which has been operated between Halifax and St. John for the past few years, is about to be withdrawn from that route, and run between Gaspe, Quebec, and Campbellton. She is managed by W. Thomson & Co., St. John, N.B., and receives about $10,000 a year in subsidies. It is stated that the opening of the railway between Halifax and Barrington has interfered with her trade. The Senlac was recently quarantined with smallpox on board, and the agents are reported to have said that she will be laid up.

Application is being made to the N.B. Legislature for an act incorporating the New Brunswick Docks and Terminals, Ltd., with power to construct and operate docks, dockyards, wharves, piers and terminals at Bathurst and such other port or ports on the Bay Chaleur and Miramichi River, as may be selected for the purpose. Those mentioned in the application are: G. E. Drummond, T. J. Drummond, E. McDougall, Montreal; W. F. C. Parsons, Londonderry, N.S.; J. J. Drummond, Midland, Ont.; W. M. MacLeod, and R. W. Cooper, London, Eng.; all of whom are interested in the Canada Iron Corporation Ltd.,

The Avon Marine Insurance Co., of Windsor, N.S., was wound up recently. It was organized in 1851, in the days when wooden shipbuilding was a flourishing industry in the province. The original capital stock paid up was $25 a share, and for 3 years dividends of $65 a share were paid, and subsequently for a number of years dividends of $50, $45 and $40. In the winding up $112 a share, making a total of $44,800, has been paid to the shareholders. The Secretary of the company was presented with the office furniture, and the President with a model of a barque.

The s.s. Beothic, built at Glasgow, Scotland, for Job Bros., St. John's, Nfld., for sealing purposes, arrived there recently. The arrangement of holds, crew's quarters, etc., is similar to that on other vessels of the same firm. Forward under the peak deck are the crew and firemen's quarters, on the bridge deck are captain's room and chart room, and underneath this the saloon, with staterooms on each side, having accommodation for 10 passengers. Her dimensions are: Length over all, 252.8 ft.; length between perpendiculars, 240 ft.; breadth (moulded), 35.6 ft.; depth (moulded), 19.2 ft.; depth of hold, 16.11½ ft.; mean draught (laden), 17.9¼ ft.; tonnage, 1,140.13 gross, 471.42 register; deadweight (including bunkers), 1,505 tons; total water ballast, 412 tons; capacity for grain, 94,460 cubic ft.; capacity for bales, 90,000 cubic ft.

Province of Quebec Marine.

The Shipping Federation of Canada has established a branch office at Quebec.

A press report states that two fire boats are to be provided for Montreal harbor. The local shipping interests have been pressing for such for several years.

The Sincennes McNaughton Line, Ltd., has been granted supplementary letters patent increasing its capital stock from $250,000 to $750,000, in shares of $50 each.

F. St. Louis, one of the oldest captains on the St. Lawrence River, died at Montreal recently, aged 89. He was in the R. & O.N. Co.'s employ for 58 years, and latterly had charge of the steamboat Three Rivers.

The amount distributed by the shipping companies operating at Montreal, to the longshoremen, as bonus in accordance with the agreements for service for the last season, was about $50,000. The average bonus paid was $30.

The city of Quebec has given notice of an application to the Provincial Legislature for amendments to its charter of incorporation, providing authority to operate a ferry system across the St. Lawrence River between Quebec and Levis, to borrow money for that object and for other purposes.

The list of coast, lake and river officers for the current year, given on another page, contains the s.s. Restigouche, owned by Bouchard Bros., Quebec. We are advised that the name of this vessel is to be changed to either Lady of Gaspe or Prince Edward, prior to the opening of navigation.

An order-in-council was passed Mar. 6, amending the Montreal Pilotage District by-law 44, by adding the following paragraph: "Provided, however, that vessels coming into the harbor of Montreal by way of the Lachine Rapids shall be exempt from pilotage dues on entering the harbor."

The Department of Marine has given instructions to the operators of the various wireless telegraph systems under its control that they will communicate to passing vessels equipped with wireless apparatus any information, not already published, respecting changes in aids to navigation on the routes such vessels are taking, and also, if requested, information as to the weather conditions prevailing during the previous 24 hours.

The Yale Shipping Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $33,000 and office at Montreal, to own and operate steam and other vessels, and to carry on the business of common carriers, within and without the Dominion. The provisional directors are: C. A. McCollough, New York, N.Y.; N. M. Ward, Orange, N.J.; W. A. Taft, Arlington, Mass.; G. I. Dewar, Ottawa.

Ship Pass of Balmaha Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $36,000 and office at Montreal, to own and operate steam and other vessels, and to carry on the business of ship owners and common carriers within and without the Dominion. The provisional directors are: C. A. McCollough, New York; N. M. Ward, Orange, N.J.; W. A. Taft, Arlington, Mass.; G. I. Dewar, Ottawa.

The Dominion Barging Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $75,000 and office at Lachine, Que., to build, purchase or otherwise acquire, and to operate tugs, barges and other vessels for the towage and conveyance of merchandise by water, and to carry on a general forwarding, warehousing and wharfinger business. The provisional directors are: P. Johnson, A. J. Brown, F. G. Bush, Montreal; W. Beadie and J. McLaughlin, Lachine, Que.

The Pacific Pass Coal Fields, Ltd., has been incorporated under the Dominion Companies Act, with a capital of $5,000,000 and office at Montreal, to acquire interest in coal and other mines, and mining rights, etc., and in connection therewith to own and operate steam and other vessels, wharves, docks, etc. The provisional directors are: A. H. Cook, J. G. Scott, V. Boswell, G. E. Amyot, J. T. Ross, A. E. Doucet, Quebec, Que.; E. B. Greenshields, Montreal; A. de Bernis and R. Brutinel, Edmonton, Alta.

The question of constructing a dry dock at Quebec has received a fresh impetus by the recent receipt of a letter from Sir Thos. G. Shaughnessy, President C.P.R., by J. G. Scott, and which was read at a recent meeting of the Quebec Board of Trade, in which he said: "I quite agree with your views about a suitable graving dock either at Quebec or Montreal. No doubt Quebec would be the better place, because I imagine that the large passenger ships of the future will wish to make Quebec their terminus."

In connection with the Richelieu River improvements the Department of Public Works has opened an office at St. John's, Que. The work to be done consists of dredging, blasting and the construction of a movable dam, and there has been expended to date on the work $18,918.97. P. Paradis was engineer in charge. Tenders were asked, Feb. 8, for the construction of two centre hopper dumping scows, for the purpose of replacing worn-out scows as tenders for the dredge Richelieu. The contract for their construction has not been awarded.

The National Navigation Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $300,000 and office at Quebec, Que., to build, repair, purchase, sell and navigate vessels of all descriptions; to float and raise sunken or wrecked vessels; to enter into contracts for the towing and salvage of vessels, and generally to engage in the business of common carriers on land and water. The provisional directors are: I. Montreuil, S. Martel, N. Mercier, J. A. Guerard, T. Gagnon, J. A. Fafard, and J. Cote, all of Quebec.

C. C. Ballantyne and L. E. Geoffrion, of the Montreal Harbor Commission, were in consultation with the Minister of Marine, Mar. 9, in relation to the proposed improvements to the harbor for the current year. Four sheds on the Jacques Cartier pier will be equipped with grain conveyors, and another marine leg will be added to the grain elevator. Electric transporters, designed by the Chief Engineer for handling cargo from ship to shed, or to vehicles, will be installed for the upper storeys of sheds 2 and 7, on trial; and in the meantime the upper storeys of all the other sheds are being equipped with wooden chutes. The plan of improvements, which is intended to be spread over the next 25 years, is under consideration, and it is expected that the Chief Engineer's specifications, etc., will be ready by May 1.

Ontario and the Great Lakes.

J. P. Healy has been appointed Government wharfinger at Rossport, Ont.

The Railways and Canals Department received, Mar. 23, tenders for stone protection on Summit Level, on the Welland Canal.

Burnet and Simpson, Birdsall, are having built a steamboat on Rice Lake. The machinery is being built at the Doty Engine Works, Goderich.

The Great Lakes Steamship Co., Ltd., of Toronto, is reported to be in negotiation for the construction of one or more steamers for delivery next spring.

The Lehigh Portland Cement Co., of Belleville, which operated the s.s. Salaberry last year, will not have any vessels in service during the current year.

F. Mills, Beaumaris, is building a steamboat for operation during this season, the machinery for which is being supplied by the Doty Engine Works Co., Goderich.

The C.P.R. is reported to be arranging for a canoe service to the Gowganda mining district, from Biscop, near Sudbury, to start as soon as river navigation is open.

The Lemcke Tug Co., Ltd., Lion's Head, Ont., owners of the tug W. E. Gladstone, which was wrecked in the fall, will not replace her for the forthcoming season.

The Minister of Public Works, in response to a question in the House of Commons, Mar. 11, said that the question of taking over Whitby harbor was under consideration.

The contract for the new boilers to be supplied to the Dominion Public Works Department's dredge Assiniboine has been awarded to the Doty Engine Works Co., Goderich.

The Inland Revenue Department received tenders, Mar. 29, for the privilege of ferrying across Lake Temiskaming, between Old Mission, Que., and Old Fort Temiskaming, Ont.

Smith and Howe, Port Stanley, are building a steam fishing tug, which will have a compound engine, 75 n.h.p., and boiler, which are being constructed at the Doty Engine Works, Goderich.

The Niagara Navigation Co., and the Richelieu and Ontario Navigation Co., are reported to be considering the question of equipping their vessels with a system of wireless teleg raphy.

J. Walsh, one of the three men who were sentenced to life imprisonment in 1900, in connection with the attempted blowing up of lock 24 on the Welland Canal, died at the Kingston penitentiary Mar. 4.

W. Hanna & Co., Port Carling, are building a steamboat for service on the Muskoka lakes. She will be 85 ft. long over all, by 16 ft. beam. The engine and boiler are being supplied by the Doty Engine Works Co., Goderich.

The larger of the two steamboats which the Temagami Hotel and Steamboat Co. is building, as mentioned in our last issue, will be equipped with a triple-expansion engine and water tube boiler by the Doty Engine Works Co., Goderich.

The G.T.R. car ferry Ontario No. 1 was recently taken in hand at Cobourg for some slight alterations in her accommodation. It is said that the dining and sitting rooms are to be enlarged and the plumbing and steam heating equipment overhauled.

The Merchants Steamship Co.'s new vessel, which was mentioned in our last issue, and which is expected to arrive at Toronto from England, early in July, will be named Mapleton. She will be operated under the management of J. & J. T. Mathews, Toronto.

E. A. Turner, accountant Montreal Transportation Co. at Montreal, has been appointed Manager at Kingston, in succession to L. Henderson, whose appointment as General Manager has already been announced. Mr. Turner has been with the company for 20 years.

The Western Navigation Co 's s.s. Kaministiquia, was launched at Newcastle-on-Tyne, Eng., Mar. 9. She is of full canal size and is expected to be in service on the lakes soon after the opening of navigation, under command of E. L. Stephen. The company's headquarters are at Fort William.

The Collingwood, Ont., council is considering the request of R. Morrill, for a lease of certain land at the eastern end of Harbor St., 100 ft. each way from the present water line, for the installation of a marine railway for hauling out steamboats for repairs in connection with his yards.

The Conger Coal Co. is reported to have bought the Tonawanda, N.Y., steamboat A Weston for operation between Toronto and

Charlotte, Oswego and other U.S. ports, in the coal trade. She was built in 1882, her dimensions being: Length, 163 ft., breadth, 31 ft.; tonnage, 511 gross, 269 net.

The Ministers of Railways and Canals and Public Works received a deputation representing Goderich, Guelph and Stratford, Mar. 2, who urged the necessity for the proper protection of the entrance to Goderich harbor. It was agreed that the work was necessary, and attention was promised as early as possible.

T. C. Sims, Little Current, Ont., operating the Eastern Manitoulin Royal Mail Steamship Line between Cutler and Manitoulin, has bought the steamboat Bon Ami to replace the Iroquois, destroyed by fire last year. The Bon Ami was built in 1894, her dimensions being: Length, 108 ft.; breadth, 21 ft.; tonnage, 226 gross, 149 register.

Revillon Bros., Montreal, have placed an order for the construction of a steam barge for carrying freight and passengers on Lake Nipigon, and for carrying supplies in connection with the National Transcontinental Ry. construction work in that district. The machinery, consisting of a twin-screw outfit, is being supplied by the Doty Engine Works Co., Goderich, Ont.

At the Huntsville, Lake of Bays and Lake Simcoe Navigation Co.'s annual meeting at Toronto recently, the directors' report showed an increase in gross earnings over those of 1907, but on account of the increased boat service in 1908, the net earnings were somewhat less than in the previous year. Following are the officers for the current year: President, C. O. Shaw; Vice-President, H. Foster Chaffee; Secretary, W. J. Moore; Treasurer, J. W. McKee.

The reports as to ice conditions on the Great Lakes indicate an early opening of navigation this season. There is considerably less ice in all the lakes and channels than at this time last year. The ice fields in Superior were reported recently to be small in the central and eastern parts; in Michigan, small and broken up; in Huron, none in the southern portion; Erie, neither large nor heavy; while in Ontario there were practically no fields formed during the winter.

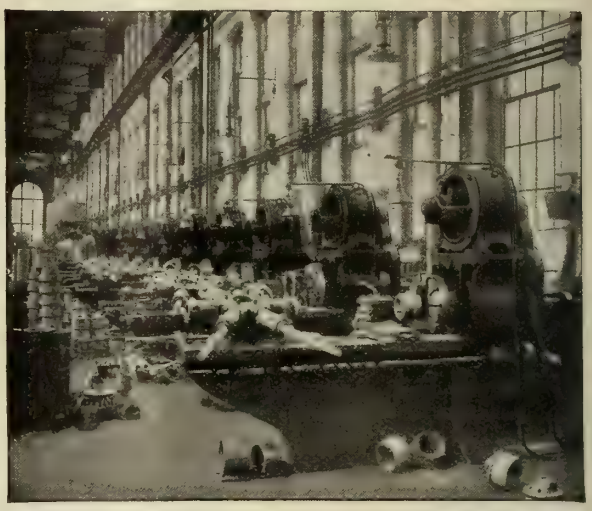
The Hamilton and Fort William Navigation Co. recently obtained an order declaring it to be entitled to any material in the Canadian Shipbuilding Co.'s yard at Toronto, subject to the return of any of it found not to belong to the Navigation Co. The material claimed was to be used in the construction of a steam vessel, at a cost of $297,000, of which $30,000 had been paid. The Navigation Co. has deposited security to the extent of $40,000. The Shipbuilding Co. is in liquidation.

The Gowganda Transport Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $100,000 and office at Toronto, to carry on the business of common carriers; to construct or acquire wagon roads, tramways, etc.; to construct or otherwise acquire steam and other vessels, wharves, docks, etc., and to carry on a general navigation business. The provisional directors are: A. C. McKenzie, Beaverton; R. B. Henderson and A. H. Royce, Toronto.

The reports of the U.S. Lake Survey give the Feb. levels of the great lakes, in feet above tide water, as follows: Superior, 601.48; Michigan and Huron, 579.94; Erie, 571.40; Ontario, 245.28. It is estimated that during March, Superior will be 1½ ins. lower; Michigan and Huron, 1½ ins. higher; Erie, 2½ ins. higher, and Ontario 2¾ ins. higher. Compared with the Feb. averages for 10 years, Superior is 8¼ ins., Michigan and Huron 1¾ ins., Erie 9½ ins., and Ontario 20½ ins. lower.

The Haileybury Navigation Co., Ltd., Haileybury, the incorporation of which company

The important saving in the power bill of the railroad shop effected by individual motor drive



YOU are naturally interested in the problem of increasing the efficiency of your shops.

You want to get more and better work out of your shops and you want to get it at the lowest possible cost.

You realize that a saving of 25% in your power bill is a considerable item and one worth investigating.

Then you will be interested in the Western Electric Individual Motor Drive for the Railroad Shop.

Let us give you some facts—

First, with Western Electric Individual Motor Drive you pay only for the power used in actual production. There is no power wasted in turning idle pulleys, shafting, and slipping belts. From actual tests, this waste power amounts to from 25 to 50% of the total power delivered by the engine.

You know how important it is to perform every operation at the greatest possible speed. Now, on a belt driven lathe, the cone steps give speed variations of about 50% each. If the first speed is too high for the operation, the next choice of speed is 50% lower than necessary. With the Western Electric variable speed motor any desired speed can be maintained without inconvenience to the operator. Consequently the speed of the operation is greatly increased and the machine becomes much more productive.

The portable machine, an absolute necessity in operation on very large work, is made reliable and practical by means of the electric motor drive.

The saving in floor space and the ease and quickness with which any machine may be moved at any time are points which alone should recommend the direct motor drive system to you.

If you are interested— if you want to know more about this system just write us and we will gladly give you full information.

Write to-day for our Bulletin No. 714.

was announced in our last issue, has placed an order with the Doty Engine Works Co., Goderich, for the construction of a steel passenger steamer for service on Lake Temiskaming. She will be equipped with fore and aft compound engine and Fitzgibbon boiler, and will be capable of a speed of 14 miles an hour. Her dimensions will be: Length, 85 ft.; beam, 17 ft. It is expected that she will be completed in June.

The steamboat Aletha, owned by Mrs. A. Roys, Kingston, has been sold to the Quinte Navigation Co., Picton. The price stated to have been paid is about $8,000. The vessel is being overhauled and put into good condition for the season. She is under charter to the Lake Ontario and Bay of Quinte Navigation Co., Kingston, for the spring and fall, on the Kingston-Belleville run, and will probably be operated on the bay route during the summer, relieving the Quinte Navigation Co.'s steamboat Brockville.

The Brockville Transportation Co., Brockville, Ont., has purchased the steamboat Bermuda from J. Davidson, Bay City, Mich., and will operate her under the U.S. flag, anywhere between Quebec and Duluth, Minn. She is a wooden vessel, and is said to be probably the only one operating on the lakes rated 100 at Lloyd's. She was built by Capt. Davidson in 1907, her dimensions being: Length, 220 ft.; breadth, 41 ft.; draft, 14 ft.; tonnage, 1,312 gross, 1,079 net, and has capacity for 60,000 bush. of grain.

The Richelieu and Ontario Navigation Co.'s s.s. Brockville has been thoroughly overhauled and lengthened by 17.6 ft., making her total length 197.6 ft. The stateroom accommodation has been increased to 60 rooms, and a large observation cabin on the hurricane deck, as well as a large promenade space, have been added. She has also had new engines and boilers installed. The name of the vessel is to be changed to Rapids Queen, and she will be operated during the season in conjunction with the Rapids King.

The Richelieu and Ontario Navigation Co. has placed an order in Detroit, Mich., for the construction of a twin-screw steamer. The contract provides that the vessel shall be modern in every respect, with 150 staterooms, supplied with running water; 10 parlor rooms, fitted with shower baths, etc.; dining, smoking, library, and music rooms, with observation deck, to all of which special attention is to be paid. When completed, the vessel will be operated between Lake Ontario ports and the Thousand Islands.

The Huntsville, Lake of Bays and Lake Simcoe Navigation Co., during the past year, made considerable additions and improvements to its property. Docks have been erected and telephone connections made between the important resorts in the district. The retiring directors were re-elected at the recent annual meeting. Following are the officers for the current year: President, C. O. Shaw; Vice-President, H. F. Chaffee, Toronto; General Manager, S. H. Jacobs; Secretary and Assistant General Manager, W. J. Moore; Treasurer, J. McKee.

The Western Dry Dock and Shipbuilding Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $1,000,000, and office at Toronto, to carry on the business of a dry dock company, and in connection therewith to construct or otherwise acquire graving and other docks, etc., for the building, repairing and docking of vessels; to carry on a general shipbuilding business, and to build and operate vessels of all kinds. The provisional directors are: J. H. Spence, C. E. H. Freeman, A. Singer, Toronto. It is reported that the company intends to construct a dry dock at Port Arthur.

Replying to questions in the House of Commons, Mar. 3, the Minister of Railways and Canals stated that the expenditure on the Newmarket canal, on the Holland River, to Mar. 31, 1908, amounted to $31,-444.26; and that from April 1 to Dec. 31, 1908, there had been expended $156,873.65. The following contracts had been let for the work now in progress: For construction of sec. 2, let to J. Riley and assigned to the York Construction Co., $652,009.50; for cement, two contracts to the Lakefield Cement Co., at $26,000; and to the Hamilton Bridge Co., for three bridges, amount of contract $17,-792. The contracts for section one had not been let.

An order-in-council has been passed, making regulations for the governance of a ferry across the narrows of Lake Temiskaming, to be known as the Old Fort Temiskaming Ferry. These provide that the limits of the ferry shall extend, on the Ontario side, one mile above and one mile below a point near the old Fort Temiskaming, and on the Quebec side, one mile above and one mile below the Old Mission. Suitable landing stages must be provided, subject to the approval of the Inland Revenue Department. The licensee shall provide a suitable vessel for the conveyance of passengers, cattle and ordinary vehicles, and during the season of navigation shall run as often as may be found necessary for the public convenience, daily from 6 a.m., the number of such crossings to be determined from time to time by the Inland Revenue Department. The boat shall be placed on the route on or before May 1, and the license shall be granted for 5 years from May 1, 1909.

Manitoba, Saskatchewan, Alberta, Etc.

The Pioneer Navigation and Sand Co. is reported to be arranging to build large docks at the foot of Grove St., Winnipeg.

The Northern Dredging Co., Ltd., with headquarters at Chicago, Ill., has been registered under the Northwest Territories Ordinance respecting foreign companies, to carry on business in Alberta.

A contract for the machinery for a steamboat, now under construction for the Fisheries Department, to be utilized on Lake Winnipegosis, has been placed with the Doty Engine Works Co., Goderich, Ont.

In connection with the recent failure of A. Booth & Co., Chicago, Ill., who were intimately connected with several fishing companies in Canada, W. V. Booth, President, and F. B. Robbins, Assistant Treasurer, have been indicted for conspiracy to defraud the Continental Bank of Chicago of $300,000.

It is announced that a new steamboat will be in operation on the Red River this season. John Hyland is having built, at St. Boniface, Man., a vessel 185 ft. long, 44 ft. beam, with a draught of 4½ ft., and equipped with engines capable of developing a speed of 18 miles an hour. Cabin accommodation is being provided for 50 passengers, while for excursions, etc., there is to be ample accommodation for a large number. The first trip will be made about May 1.

A press report states that a company is being formed in Calgary, Alta., to operate a steamboat on the Bow River. It is said that a vessel is to be built with a flat bottom and arrow stern wheel, and to be specially adapted for use on the rapid and shallow waters of the river. Power will only be required when running against the current, and in a contrary direction a brake will be utilized. The boat will be run between Calgary and St. George's Island, with afternoon trips to other points.

The concrete work in connection with the works at St. Andrew's Rapids, near Winnipeg, is reported to be nearly completed, the work having been carried on throughout the winter. The steel for the superstructure has not arrived, and the wood for the lock gates has also been delayed, so that the gates will not be completed until after the spring floods. A. Dufresne, Resident Engineer, is reported to have said recently that the locks would be opened for light draught vessels as soon as the ice breaks.

B.C. and Pacific Coast Marine.

A steamboat is reported to be under construction at Victoria for excursion passenger service on the Victoria Arm.

Capt. T. Whelan, formerly of Foley, Welsh & Stewart's steamboat Caledonia, and later of that firm's steam tug Lottie N., was drowned in Burrard Inlet recently.

The British ship Lord Shaftesbury, while proceeding down the Fraser River for Sidney, in tow, with lumber, recently, grounded on a sandbar, and was subsequently laid up at New Westminster for examination.

Foley, Welsh and Stewart, G.T.P.R. contractors, are constructing a stern-wheel steamboat at Victoria, similar in design to their steamboat Skeena, for operation on the Skeena River in supplying their construction camps.

Application has been made to the Governor-General in Council, by E. Mener, New Westminster, B.C., for approval of a site for the construction of a wharf and marine slip on the north shore of Lulu Island, on the north arm of the Fraser River.

The Dominion Fish Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $75,000 and office at Vancouver, to carry on a general fishing business, and in connection therewith to own and operate boats, vessels, wharves, etc.

The Vancouver Industrial and Development Co., Ltd., has been incorporated, with a capital of $250,000 and office at Vancouver, to carry on a mining and quarrying business, and for the purposes of the business, to own and operate steam and other vessels.

The Canadian and Foreign Commission and Export Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $20,000, to carry on a general commission business, and in connection therewith to own and operate steam and other vessels for carrying passengers and merchandise.

MacKay, Smith, Blair & Co., Ltd., has been incorporated under the B.C. Companies Act, with a capital of $300,000 and office at Vancouver, to carry on a general mercantile business, to own and operate steam and other vessels, and to receive goods as wharfingers, warehousemen and carriers.

The Puget Sound Navigation Co. is considering plans for the construction of a fast turbine steamboat for service between Seattle, Wash., and British Columbia. The plans show a vessel 250 ft. long, with accommodation for 1,500 passengers, and capable of a speed of 21 knots an hour. It is proposed to have the vessel in operation by 1910.

The C.P.R. has, we are officially advised, decided to install wireless telegraph apparatus on all its B.C. coast steamships, but no decision has been arrived at as to which system will be utilized. Preparations are now being made for installing a system on the s.s. Princess May, and the Princess Royal will probably be dealt with immediately afterward.

The Banfield Creek motor lifeboat, which was built last year at Bayonne, N.J., for the Dominion Government, at a cost of about $15,000, was recently taken to Victoria, almost a total wreck. It appears that she was left near the life saving station, improperly moored, and, during a slight storm, broke loose and was driven on the rocks at Robbers Island.

Steamboats are under construction for B. T. Brynalson, Vancouver; T. Marion, Quesnel; and N. S. Clark, Ashcroft. Those for the latter two are stern-wheelers. The machinery for each is being supplied by the Doty Engine Works Co., Goderich, Ont.; that for the first-mentioned vessel being a compound surface condensing engine of 100 n.h.p., with Scotch boiler.

The number of sea-going vessels arriving at Vancouver during 1908 was 3,558, with an aggregate tonnage of 3,116,225 tons, an increase of over 50% since 1903. There was an increase also in the coasting trade of 2,706 vessels and 1,059,526 tons in the same period. The figures quoted for 1908 are stated to exceed the combined tonnage of all the Puget Sound ports, and to compare favorably with those of San Francisco.

The Vancouver Pilotage Authority Report for 1908 shows receipts of $22,191 and disbursements of $21,227.56, leaving a balance at bank of $963.44. The arrivals were: 5 British and 14 foreign sailing, and 88 British and 208 foreign steamers; departures, 5 British and 13 foreign sailing, and 86 British and 208 foreign steamers. There were 5 pilots in service during the year, 4 holding first-class licenses, and one a second-class license.

The G.T.P. Ry. has placed orders with the Polson Iron Works, Toronto, for the neces-

The Grand Trunk Railway Company of Canada.

Notice is hereby given that the Ordinary General half-yearly meeting of the Grand Trunk Railway Company of Canada will be held at the City Terminus Hotel, Cannon Street, London, E.C., on Wednesday the 21st day of April, 1909, at twelve o'clock noon precisely, for the purpose of receiving a report from the Directors, for the election of Directors and Auditors, and for the transaction of other business of the Company.

Notice is also given that a resolution will be submitted to the meeting to assent to and accept an Act of the Parliament of Canada entitled "The Grand Trunk Act, 1909," and to authorize the Directors to exercise the powers conferred by the said Act.

Notice is also given that the Transfer Books of the Company in London and Canada will be closed from Saturday, the 20th day of March, to the day of meeting, both days inclusive.

By Order,

C. RIVERS WILSON, President.
H. H. NORMAN, Secretary.

Dashwood House, 9 New Broad Street, London, E.C., 12th March, 1909.

FENCE TALK No. 3

Page "High Carbon" Wire Fences only seem to cost a cent or two more a rod than "hard drawn" wire fence. They really cost fully three cents a rod less—and then some. Figure it for yourself:

Page "High Carbon" horizontal wires—the wires that have to stand the pulling strain, are made of a grade of steel wire containing 0.30 carbon. Other fences' horizontals are "hard steel," or hard drawn wire, at best containing 0.10 carbon.

High Carbon Page wire will stand a strain of 2,400 pounds.

The other kind breaks at 1,800 at best.

That explains why a "High Carbon" Fence will stretch tighter and stand up longer.

That accounts for Page "High Carbon" Fences needing but two fence-posts to the other fence's three.

See now what that figures in a mile of fencing:

Two cents a rod more for Page Fence in the first place, or $6.40.

100 fewer posts for the Page Fence—because the tougher wire lets it stretch tighter and stay tighter. Are the 100 posts worth 12c. apiece? Call it that—tho' it's nearer 20c. a post, most places. But call it $12.00 saved in posts—which balances the 2c. a rod more first cost and leaves $5.60 to the good.

What does it cost your company to dig 100 post holes? To deliver 100 posts? To set and tamp 100 posts? To staple the fencing 100 times oftener than you need to with a "High Carbon" Fence?

Doesn't ten dollars look small for all that extra work?

Well that is only a part of the saving you make on every mile of "High Carbon" Fence you put up, as compared with "Hard Drawn" wire fence.

Our book, sent from the nearest Page place for your asking, tells the rest—and tells you how to prove "High Carbon" betterness beforehand.

The Page Wire Fence Co., Ltd., Walkerville, Toronto, Montreal, St John, Vancouver, Victoria.

"PAGE FENCES WEAR BEST"

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 9,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Maps, as enumerated below, showing these lands in detail, will be sent free on application.

Map No. 1—Winnipeg to Second Meridian	$ 8.00	to $15.00	per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00	to 25.00	per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10, W. 4th Meridian (generally)	8.00	to	per acre.
Map No. 5—South-Western Alberta	8.00	to 15.00	per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—4th Meridian to Range 7, West 5th Meridian	10.00	to 25.00	per acre.
Map No. 7—Part of Western Saskatchewan, 3rd to 4th Meridians	10.00	to 25.00	per acre.

All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160 Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
"	"	9.00	"	"	213.70	"	"	"	73.46	"	"	180.00
"	"	10.00	"	"	239.70	"	"	"	81.62	"	"	200.00
"	"	11.00	"	"	263.60	"	"	"	89.78	"	"	220.00
"	"	12.00	"	"	287.60	"	"	"	97.96	"	"	240.00
"	"	13.00	"	"	311.55	"	"	"	106.10	"	"	260.00
"	"	14.00	"	"	335.60	"	"	"	114.32	"	"	280.00
"	"	15.00	"	"	359.50	"	"	"	122.44	"	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 525,000 acres of selected lands in Manitoba and Saskatchewan which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

sary machinery for two steamboats which the company is to construct at Victoria, B.C., by day labor during the current year. The vessels will be similar to the company's s.s. Distributor, built by A. Watson, at Victoria, last year, the machinery for which was also supplied by the Polson Iron Works, and they will also be operated on the Skeena River.

The Corinthian-Malin Head Collision.

Following is the full text of Justice Bargrave Deane's judgment, concurred in by Admiral Stewart and Capt. Acton Blake, Elder Brethren of Trinity House, delivered in the Admiralty Division of the High Court of Justice, London, Eng., in the case arising out of the collision between the Allan Line s.s. Corinthian and the Ulster Steamship Co.'s s.s. Malin Head, Sept. 13, 1908, near Grosse Isle, St. Lawrence River. In our Jan. issue, we published Commander Spain's judgment in the same case, and it will be seen that the English Court judgment is in entire agreement with that.

Justice Bargrave Deane, in his judgment, said: "I have to ask myself whether, in my opinion, the non-blowing by the Malin Head of a whistle when she hard-aported caused the possibility of this collision; in other words, was the non-blowing of the whistle a possible cause of this collision? I wish to put myself within the wording of the Lord Chief Justice in the case of the Anselm. That is a very difficult case for me to deal with; for this reason, that on looking at the Anselm case, which was a decision overruling this Court, I find this: The case is reported in 1907 P.D., at pg. 156, and in my judgment I said this: 'That was a case not of alteration of helm, but of reversing engines—no signal was sounded when those engines were reversed, although the rules say that when the engines are reversed three blasts shall be given on the whistle, denoting that fact. Here again was a definite breach of that rule, and a breach which I think it is my duty to say was a serious breach. It cannot be too strongly impressed upon officers in charge of ships that they must obey the regulations. If they do not obey the regulations, they run a very serious risk. Here again I have to ask myself the question—and I have the advantage of the Elder Brethren's advice. In our opinion his not obeying the regulations did not in this case contribute to the collision.' This is a definite finding of fact. I turn to the decision of the Court of Appeal, and in the judgment of the Lord Chief Justice I find this: 'Then there is the non-signalling that she was reversing. We are advised by our nautical assessors, who have also advised us with regard to the port helm signal, that the non-indicating to this vessel which was rapidly approaching, that the Anselm was reversing her engines, was abstaining from giving her information which might be useful, if only for the purpose of calling her marked attention to what was going on in front of her. That seems to me the essence and pith and marrow of the rule which indicates that these signals are to be given.' Then later on I find this: 'I therefore come to the conclusion that the Anselm was to blame in these three respects, and that as regards two of them, namely, neglect to give sound signals when porting and when reversing, it is quite impossible to come to the conclusion that they had no effect upon the collision.' Later still he says this: 'When persons are attacked, and it is proved against them that there is a serious breach of statutory rules, I have very grave doubt whether they can be said to fulfil the obligations upon them if they do not satisfy the Court by affirmative evidence that the breach of the rules has no possible effect.' That is distinctly a question of fact. I had the advantage of seeing the witnesses in the case of the Anselm, the Court of Appeal had not. The Elder Brethren who sat with me also had an opportunity of seeing the witnesses, and they advised me in that particular case the non-giving of the signal had no possible effect upon the collision. The Court of Appeal, advised by two different gentlemen who did not see the witnesses, said that as a matter of fact I was wrong. It is a very awkward position which this Court is put into when it, being advised by two nautical gentlemen so competent as our Elder Brethren always are, should be overruled on a question of fact by two gentlemen of whom we know nothing, and who have not seen the witnesses. The Lord Chief Justice said this Court has to be satisfied that in fact the non-giving of the signal had no possible effect. I am advised in this case by the Elder Brethren, and I agree with them, that in this particular case the non-blowing of the signal when the hard-aporting took place had no effect, because it is distinctly proved by the Corinthian's witnesses that they saw the vessel hard-aporting for a considerable time before the collision. They put it at five minutes, and if that be so, who can say that the fact that a blast was not blown had any effect upon the knowledge of those who were navigating the Corinthian? I feel, as I have said, that I am in an awkward position with regard to the Court of Appeal, but I have to take my own line, and, as a matter of fact, I am advised and I find that the non-blowing of the signal by the Malin Head did not affect the collision, and that therefore she is not to blame for that. I start again with this, that I find these two vessels were approaching each other end on, or so nearly end on that it was the duty of each, under the rules, to port. The Corinthian starboarded, and I think that she was breaking the rule under the circumstances. If they were end on, or nearly end on, and the rule is clear, why did she starboard? I think it is clear from the evidence of the Corinthian. They say they wanted to make the Margaret Tail buoy, and they say it is not a narrow channel, and therefore they could go where they liked. They say they wanted to make the Margaret Tail buoy because the weather was sufficiently thick for them to anchor upon the north side of the channel if they did not find the buoy. They could not anchor in the middle of the river, but out of the channel on the north side, and it is perfectly clear that when the Corinthian saw the Malin Head, the pilot and master determined to go well to the north, and turned to go up to the north, and persevered in that, and then, seeing the other vessel was porting, there was nothing for them to do but to reverse the engines, and they reversed them, but it was too late, because it was then impossible to avoid the collision. The fact that this vessel meant to go to the north, emphasizes rather the fact of her starboarding than that she was on the starboard bow of the plaintiffs' vessel. Something has been said about the Malin Head being beached improperly. I think that the whole matter depends upon whether or not there was at that time a state of atmosphere which enabled her to proceed safely on up the river. It is true she went on and got as far as a place called Indian Cove, not far from Quebec, when she was overtaken by fog. If that is so, and I believe it is, then she did her best to get herself and her cargo up to Quebec, and she probably would have arrived at Quebec, or got into some safe place, before she sank. As it was, having to anchor before she got to Quebec, she was overtaken by circumstances as to which no blame attaches to her, and she was beached at the best place she could be beached at. I do not think any blame can be attributed to her for that, and I think she would have been wrong if she tried to beach herself at the other place which was suggested. As far as I know I have dealt with all the points, and I think the fact that the Malin Head kept on at full speed to try and avoid the collision was the right course for her to take. If she had reversed, she would probably have been struck further forward. I do not think any blame can be attached to her for any other matter, and therefore I must find the Corinthian alone to blame."

Georgian Bay Ship Canal.

The final report of the board of engineers appointed by the Dominion Government to ascertain the feasibility of construction and probable cost of a ship canal from Montreal to the Georgian Bay by the Ottawa River valley, Lake Nipissing and the French River, has been laid before Parliament. It states that a 22-ft. waterway, capable of carrying the largest lake freight vessels, 600 ft. in length, 60 ft. wide, and having a draught of 20 ft., can be established for about $100,000,000 within a period of 10 years, and that the annual maintenance of the same would be, approximately, $900,000, which includes the operation of storage reservoirs for the better distribution of the flood waters of the Ottawa River. The distance from Montreal to the mouth of the French River, on Georgian Bay, is 440 miles, and upon this waterway there would have to be constructed 27 locks, 18 main dams, 28 miles of canal excavation, and 66 miles of channel dredging. The remaining mileage consists of long stretches of deep-water navigation on the Ottawa and French Rivers and across Lake Nipissing. The report states that to make Lake Nipissing the summit level, and not the divide between the Mattawa River and Lake Nipissing, would cost an additional $10,000,000, and involve an additional 10 miles of rock cutting.

It is stated that the current in the Ottawa River would not exceed three miles an hour, and practically slack water would obtain over a large part of the waterway.

It is estimated that the probable time taken by a lake freight steamboat, 12-mile maximum speed, from French River to Montreal, would be 70 hours, and that the season of navigation will average 210 days, from May to Nov. The engineers say that with a storage system as planned, and the tributary basins thereto, required for the navigation project, a reliable supply can be secured at various dams amounting to 1,000,000 h.p., which can be developed for about $50 per h.p.

The report recommends that an understanding be arrived at between the Dominion, Quebec and Ontario Governments, governing the disposal and control of all water powers, water lots and islands on the proposed route, in view of the possible canalization of the rivers utilized. Recommendations are also made in regard to the conservation of forests in relation to water supply and for the appointment of a special commission to examine the great canals of the world before any further plans of construction are made. These great canals include the Suez Canal, between the Mediterranean and Red seas; the Corinth canal, which is a sea level canal cut for some miles through solid rock, in Greece; the Baltic ship canal in Germany; the Manchester ship canal in England; the Forth and Clyde ship canal in Scotland, and the canal under construction across the Isthmus of Panama.

The only question which is not fully treated of in the report, is that relating to the storage of the flood waters of the Ottawa River. "The study of this question," A. H. Laurent, the engineer in charge of the work, states, in a report to the Minister of Public Works, dated Jan. 9, "has to be continued, and supplementary reports will be issued as the collection of the necessary data progresses."

Enlargement of the Welland Canal.

L. Henderson, General Manager Montreal Transportation Co., in an interview recently, presented his views on the proposed deepening of the Welland canal to allow vessels of large tonnage carrying grain cargoes to pass through, as against the proposed construction of the Georgian Bay canal. The main points raised by him were that the Canadian route offered the natural geographical advantages for carrying grain from the far west, but that this route needed to be given the best possible facilities in order to meet the competition offering from the U.S. routes by the improvements to the Erie Canal, now under way, on which over $100,000,000 is to be spent. Given a reasonable improvement of the Canadian trade route, he considered that not only would the Canadian carriers hold their own trade, and ship Canadian grain by Canadian routes to the markets in Europe, but they would secure a large slice of the trade offering from the U.S. Northwest, by the simple process of offering better service and lower rates.

He was very glad to see by reports of the proceedings of Parliament that the Minister of Railways and Canals, when asked as to the construction of the Georgian Bay canal and the enlarging of the Welland canal, said they would become national necessities within a few years, and that the enlargement of the Welland canal would enable the St. Lawrence route to retain its trade despite the immense expenditures which the State of New York is making for the enlargement of the Erie canal. Those acquainted with trade conditions on the Great Lakes and the St. Lawrence will heartily endorse the Minister's position. They know very well that if the larger steamers now trading on the Upper Lakes could go through to Lake Ontario with their big cargoes, that grain could be carried to the foot of lake navigation for half a cent a bushel over the rate to Buffalo. The only charge to add to this to put grain f.o.b. ocean steamers is the river rate, which at present is 1⅞c. a bushel, including the Montreal terminal charges. This makes 2⅜c. a bushel, as against the rate from Buffalo to f.o.b. steamers at New York, which at present is over 6c. a bushel, and rarely falls below 4½c., which would give a big margin to work upon to keep business coming this way.

The enlargement of the Welland canal, he considered, was a much more feasible scheme than the construction of the Georgian Bay canal, which, according to all latest Government surveys, could hardly cost less than $150,000,000, while long before it could be built, the Erie canal improvements would be finished, and trade diverted to that channel. On the other hand, the enlargement of the Welland canal could be done for about one-sixth of this cost, and within one-sixth of the time, and it will suit the trade quite as well or better.

One of the largest factors in lake transportation was the securing of return cargoes, which greatly affected the situation. While vessels using the proposed Georgian Bay canal would be entirely dependent for return cargoes on what freight they could get out of Montreal, which is comparatively limited, those using the St. Lawrence and Great Lakes route would not only have the Montreal trade, but also the enormous amount of coal which is annually shipped from Lake Ontario and Erie ports to Fort William and Port Arthur, which amounts to over 1,000,000 tons a year now.

On this account the saving to Manitoba and the West on hard coal alone would be very large in case the new Welland canal were built, as hard coal is about 40c. a ton cheaper on Lake Ontario and Erie ports, owing to proximity to the mines in Pennsylvania, and with the new canal low freights could be secured, which are not now possible, owing to the shallow draught of the present Welland canal. At present, although the distance is some 300 miles farther from Fort William to Buffalo than to Georgian Bay ports, vessels would rather go to Buffalo at the same rate of freight, on account of the return freights they can get.

What Canada needs, and what Montreal should earnestly work for, is to cheapen this transportation as much as possible, so as to keep our own trade for our own trade routes, and the best way to do this is to improve our waterways along practical, sensible lines, where the quickest and greatest benefit can be obtained at a minimum cost. Our waterways have always been the great regulators of freight rates, and every reasonable effort should be made to keep them so. It looks as though the Government was anxious to push through the Welland canal improvement project, and he believed that it will ultimately do so, but Montreal should give it some encouragement, and not lie down and take too much for granted.

The scheme he suggested is to deepen the Welland canal from 14 to 22 ft., with a widening of the channel and locks to permit of accommodating vessels up to 10,000 tons, instead of the present accommodation for 2,000 ton boats; to make the channel so large as to be of identical accommodation to the foot of the lakes with the canals and locks at Sault Ste. Marie, while at the foot of the lakes the cargo could be transhipped to barges for transportation to ocean vessels at Montreal, thus securing the longest possible haul for the largest possible cargoes.

The result of such an improvement of the Welland canal would be that the through trip to the foot of lake navigation could be made by 10,000 ton steamers, instead of by 2,000 ton boats as at present. This would mean a saving of a full 2c. a bush. on wheat, which would mean a saving of $2,000,000 on a crop of 100,000,000 bush., and would probably draw a great deal of trade from U.S. sources, as well as holding the Canadian trade.

The result of this improvement, put in tabulated form, would be as follows:

U.S. ROUTE.

Fort William to Buffalo	1.5c.
Buffalo to New York	3.5c.
f.o.b. charges, New York	.90c.
	5.90c.

CANADIAN ROUTE.

Fort William to Kingston or Prescott	2.00 c.
Kingston to f.o.b. ocean steamer, Montreal	1.875c.
	3.875c.

This shows a difference in favor of the Canadian route of over 2c. a bush. with the enlarged Welland canal, which, with the increased trade which would undoubtedly come this way both from the Canadian Northwest and the northwestern states under such economical charges, would undoubtedly cause an improvement in the shipping facilities, and which would lead to further reductions in the rates, and thus to further advantages of the Canadian route over those offered even by the improved Erie canal.—Montreal Gazette.

Notices to Mariners.

The Dominion Department of Marine has issued the following notices:

No. 14. Feb. 25.—28. New Brunswick, south coast, Bay of Fundy, Passamaquoddy Bay, St. Andrews, aids to navigation.

No. 15. Feb. 26.—29. Ontario, Lake Ontario, Wicked Point, color of light. 30. Ontario, Georgian Bay, Western Islands, Double Top rock, intended change in character of light. 31. Ontario, Lake Superior, Thunder Cape, change in character of light. 32. United States of America, Lake Erie, Buffalo harbor entrance, Horseshoe reef light, characteristic to be changed.

No. 16. Mar. 2.—33. British Columbia. Fraser River, New Westminster, railway swing bridge, alteration of lights. 34, British Columbia, Boundary Bay, Mud Bay, Serpentine and Nicomekl Rivers, railway swing bridges, lights. 35. British Columbia, Strait of Georgia, Mary Island, Sharkspit, buoy established.

No. 17. Mar. 15.—36. Ontario, Lake Ontario, Bay of Quinte, Trenton, position of gas buoy changed. 37. Ontario, Detroit River, construction of tunnel between Detroit and Windsor, caution.

No. 18. Mar. 15.—38. Nova Scotia, Bay of Fundy, Chignecto channel, Eatonville, lighthouse established. 39. Ireland, east coast, Dundrum Bay, St. John's Point light, character altered. 40. Ireland, east coast, Skulmartin, light vessel, character of light altered.

No. 19. Mar. 17.—41. Quebec, River St. Lawrence, English Bay, St. Pancras Point, lighthouse established. 42. Quebec, River St. Lawrence, Goose Island, Hospital Rock back range light, red stripe painted on tower.

No. 20. Mar. 22.—43. British Columbia, Vancouver Island, west coast, Carmanah, change in character of light, intended change in fog signal. 44. British Columbia, Vancouver Island, Victoria harbor, Laurel Point, change in position of light.

Considerable activity has prevailed recently at lake ports where vessels were berthed for the winter. Most of the steamboats are being overhauled and wharves are being put in order in preparation for an early opening of navigation. It is reported that the Niagara, St. Catharines and Toronto Navigation Co.'s vessels will be in operation between Toronto and Port Dalhousie early in April. The Canadian route for ocean-going vessels will apparently be utilized to a greater extent this year than last, as according to reports a scheme is on foot, by a U.S. syndicate, to operate a line of steamboats in the grain traffic between U.S. ports and Montreal.

Trade and Navigation Statistics.

In addition to the statements of customs revenue collected at the various ports of entry throughout the Dominion, together with tables showing the quantities of goods imported, and the duties paid thereon, with the countries of origin, as well as tables showing the quantities of goods exported, with the countries to which they were sent, the report of the Minister of Customs, for the year ended Mar. 31, 1908, contains a series of tables showing the number of vessels arriving and departing at and from the various ports classified under several headings.

The first of the tables deals with the sea-going vessels entered and cleared at each port during the fiscal year. The tables show that sea-going vessels were entered or cleared at 119 ports distributed as follows: Prince Edward Island, nine ports; Nova Scotia 63, New Brunswick 23, Quebec 11, and British Columbia 12. In all there were 15,087 vessels of 10,189,275 tons entered, bearing the flags of 14 different nations. The leading nations were: Great Britain, 8,474 vessels of 6,931,577 tons; United States, 5,504 of 1,789,532 tons; Norway and Sweden, 789 of 1,036,118 tons. Of vessels declaring outwards there were 14,717 of 9,301,996 tons, bearing the flags of 16 different countries, the leading nations being: Great Britain, 8,444 vessels of 6,004,598 tons; United States, 5,120 of 1,759,739 tons; Norway and Sweden, 816 of 1,100,427 tons. A classification of the vessels shows that of the British vessels entered inwards 4,254 of 6,434,744 tons were steamers, and 4,220 of 496,833 tons were sailing vessels, and of those sailing from Canada, 3,865 of 5,421,029 tons were steamers, and 4,579 of 583,569 tons were sailing vessels; while of the foreign vessels entered inwards, 3,625 of 2,787,444 tons were steamers, and 2,988 of 470,254 tons were sailing vessels; and of those leaving Canada 3,332 of 2,857,620 tons were steamers, and 2,941 of 439,778 tons were sailing vessels. Of the vessels credited to Great Britain 4,969 vessels of 1,213,027 tons entered inwards, and 5,593 vessels of 1,393,633 tons were registered in Canada. The freight carried and the number of the crews were as follows:

INWARDS.

	Tons Weight.	Tons Measurement.	Crew.
British	1,306,822	254,373	193,852
Canadian	202,939	1,449,054	68,317
Foreign	887,154	36,618	140,763
Total	2,396,915	1,740,045	402,932

OUTWARDS.

	Tons Weight.	Tons Measurement.	Crew.
British	2,706,334	714,085	154,071
Canadian	616,248	291,480	75,613
Foreign	1,454,787	538,499	143,040
Total	4,777,369	1,544,064	372,724

Following is the number of vessels with their tonnage arriving at or clearing from the principal ports in the Dominion, in the sea-going trade:

	Entered Vessels	Entered Tonnage	Cleared Vessels	Cleared Tonnage
Halifax, N.S.	1,065	1,076,424	1,045	978,482
Sydney, N.S.	264	368,775	453	439,024
NorthSydney, N.S.	792	250,414	644	243,002
Louisburg, N.S.	297	358,396	315	373,263
Yarmouth, N.S.	736	200,554	721	207,995
St. John, N.B.	1,333	1,083,616	1,236	775,521
St. Andrews, N.B.	527	36,627	506	34,374
Quebec, Que.	333	1,248,958	168	539,914
Montreal, Que.	399	1,363,972	377	1,325,199
Vancouver, B.C.	1,336	994,830	1,434	1,050,413
Victoria, B.C.	1,181	1,377,808	1,161	1,318,179
Nanaimo, B.C.	288	309,476	500	378,674

The second series of tables show the description, number and tonnage of Canadian and U.S. vessels trading on the rivers and lakes between Canada and the U.S. (exclusive of ferriage). The tables cover the arrivals and departures at 90 ports distributed as follows: New Brunswick, 2 ports; Quebec 11, Ontario 71, Saskatchewan 1, British Columbia 2, Yukon 3. The total number of vessels entered inwards was 22,322 of 9,712,052 tons register, and carrying 336,581 as crews, divided as follows:

	Vessels.	Tons Register.	Crew.
Canadian, steam	7,956	4,203,542	183,356
" sail	1,079	249,764	5,401
U.S. steam	8,459	4,188,702	132,874
" sail	4,828	1,070,044	14,950

A further description of the vessels shows:

	Number of Vessels.	Tons Register.
Screw steamers	13,167	5,764,029
Paddle steamers	3,178	2,601,595
Stern-wheel steamers	70	26,620
Schooners	1,789	574,978
Sloops	499	52,833
Barges	3,619	699,997

The total number of vessels entered outwards was 23,486 of 10,371,708 tons register, and carrying crews totalling 358,092, divided as follows:

	Vessels.	Tons Register.	Crew.
Canadian, steam	7,986	4,355,872	201,497
" sailing	1,212	302,008	5,928
U.S., steam	8,450	4,572,384	134,264
" sailing	5,838	1,141,444	16,403

A further description of the vessels shows:

	Number of Vessels.	Tons Register.
Screw steamers	13,208	6,550,436
Paddle steamers	3,153	2,349,612
Stern-wheel steamers	75	28,208
Schooners	1,845	588,900
Sloops	173	2,331
Barges	5,032	852,221

The third set of tables shows the number of British and foreign vessels engaged in the Canadian coasting trade. These returns were collected from 193 ports distributed as follows: Prince Edward Island, 10 ports; Nova Scotia 62, New Brunswick 22, Quebec 14, Ontario 68, British Columbia 14, Yukon Territory 3. The total number of vessels engaging in this trade was 81,012, distributed as follows:

INWARDS.

	No.	Tonnage.	Crew.
British	79,213	25,096,442	1,148,669
Foreign	1,799	1,638,304	28,297
Total	81,012	26,734,746	1,176,966

OUTWARDS.

	No.	Tonnage.	Crew
British	72,660	22,259,971	1,017,253
Foreign	1,565	1,535,118	26,486
Total	74,225	23,795,089	1,043,739

Of the vessels arriving, 54,368 of 21,314,515 tons were steamers, and 24,845 of 3,781,927 tons were sailing, and of the vessels departing, 47,846 of 18,549,764 tons were steamers, and 24,814 of 3,710,207 tons were sailing, flying the British flag. A further classification shows the following:

	Vessels.	Tonnage.
Screw steamers	81,531	30,377,035

During Jan., two navigation employes were killed and 5 injured in the course of their work. The deaths were caused, one by drowning, and one by being caught between a boat and a wharf. Of the other accidents, 2 each were due to falling material and to explosions, and one to a fall.

The question of dividing the Marine and Fisheries Department into two separate departments, is under consideration by a parliamentary committee. The opinion has been expressed that it is impossible for one deputy minister to perform satisfactorily the executive duties relating to both marine and fisheries matters.

Northumberland Straits Icebreaking Steamship.

The icebreaking steamship which is being constructed for the Dominion Government by Vickers, Sons and Maxim, Ltd., London, England, for the winter navigation of Northumberland Strait between Prince Edward Island and the mainland, is to be delivered May 11. The contract price is £103,000, and there has been paid to date on account of construction $125,316.66.

The specifications provide for a twin-screw mail and passenger steamship having the following principal dimensions: Length between perpendiculars, 250 ft.; length over all, 279 ft. 6 in.; breadth, moulded, 46 ft.; depth to upper deck, 27 ft.; depth to main deck, 19 ft.; upper deck to promenade deck, 7 ft. 9 in.; load draught, mean, 18 ft.; indicated h.p., 6,000; dead weight on 18 ft. draught, 600 tons; dead weight on trial, 500 tons. The vessel is being built and engined under Lloyd's special survey, is to be classed 100A1 at Lloyd's, two deck rule, with water ballast and double bottom, fore and aft, and will comply with all the Board of Trade requirements for passenger service. The hull is of steel, with special strengthening to fit her for the service for which she is designed. She has a cut water stem, elliptical stern, and is fitted with nine watertight bulkheads, two steel masts, and a short bowsprit. She will be provided with a short bridge deck, promenade deck, forecastle deck, upper deck, main deck, and a steel lower deck. The wheel house, captain's and officers' quarters are placed on the bridge deck; the deck saloon and entrance, smoke room and an official suite are on the promenade deck; the first-class dining saloon is forward, the first-class staterooms amidships, and the mail room and store room aft on the upper deck; the main deck is generally to be used for cargo, while the accommodation for the second-class passengers and engineers are placed aft, and for the firemen and trimmers forward. The main cargo hold is forward of the coal bunkers and boiler room, and a deep tank and trimming bank are placed aft of the engine room. Steam steering gear is fitted, with an emergency hand steering gear. Three lifeboats, a cutter, gig and dinghy are provided with all necessary appliances, and in every other department the appliances are of the latest and most approved pattern. The vessel is to be heated throughout with steam and lighted with electricity, a searchlight 24 inches in diameter and of 25,000 candle power being placed on the foremast. The first-class dining saloon has seating accommodation for 60 persons, and the staterooms are fitted with berths for one, two, three or four persons. The second-class accommodation is fitted with sofa seats and folding backs forming 20 beds. Ample bath and lavatory accommodation is provided.

The vessel is to be propelled by twin screws set well clear of the ship's side, not to overlap, and to turn outwards in going ahead. The screws are to be driven by two sets of inverted, direct-acting, triple-expansion, surface-condensing engines, each set having three cylinders working on separate cranks, placed at an angle of 120 degrees to each other in sequence of high, low and intermediate, when the engines are going ahead. The engines are to be capable of developing 6,000 collective indicated horse power. The battery of boilers is to consist of two double-ended boilers, 14 ft. 10 in. by 21 ft.; and two single-ended boilers, 14 ft. 10 in by 11 ft.; the double-enders to be fitted with six, and the single-enders with three withdrawable furnaces, the mean inside diameter of the furnaces being 3 ft. 10 in., each fitted with fire grates 5 ft. 9 in. long. The boiler tubes

OUR RAILROAD FENCES

We can furnish Light or Heavy Fencing, Hinge or Straight Stay, to meet all conditions.

We are adding to and improving our plant each year, and our customers can depend on securing something better than we had previously furnished.

We are prepared to furnish all material and labor, and turn out to the Railroad a complete job, as we have a number of experienced fence builders always in our service.

Send us your Specifications and we shall be pleased to furnish prices either by mail or otherwise.

Steel and Wood Frame Gates for Railroads at special prices.

STEAM PUMPS, DIVERS, JACKS, HAWSERS AND LIGHTERS

are 2½ in. outside diameter. The boilers have to stand a water test pressure of 360 lbs. to the square inch, and are designed for a working pressure of 180 lbs. to the square inch. The total heating surface of the boilers is not to be less than 14,600 sq. ft., and the total fire grate surface not to be less than 395 sq. ft. A system of forced draught is to be fitted.

The contractors have to give a guarantee that the vessel is sufficiently strong and capable of dealing with drift ice fields 15 ft. in thickness. The vessel will be named Earl Grey.

Grounding of Lightship Anticosti.

The following decision has been given by Capt. L. A. Demers, Chief Examiner of Masters and Mates, re the grounding of the Dominion lightship Anticosti on White Island Reef, N.S., the same being concurred in by J. Bain and P. Lachance:

"The evidence adduced at this investigation shows that the vessel was supplied with an efficient compass and necessary instruments for the purpose of navigation; that the captain, and first and second officers, possess foreign-going certificates as masters, and the evidence has brought out the fact that the compass errors had been occasionally determined by the captain whilst the vessel was on the station, but no record has been entered in the log book of such observations.

"Taken as a departure for the purpose of this investigation, the navigation from the easternmost cape of Cape Breton, the court finds that the navigation of the vessel to the time of the grounding was carried on in a haphazard way, no cross bearings of lights or points of land being taken ot ascertain the position of the ship; that the distances were judged by the eye approximately, and were kept as guides for each succeeding course; that an element of uncertainty existed in the captain's mind as to the amount and nature of the deviation of his compass, and no steps were taken to obtain positive evidence that the vessel's distance from the land was correct, and whether courses steered were proper by either means of observation, cross bearings or soundings. The engagement of a pilot (irresponsible) seems to have led to a wrong impression, which, however, is inexcusable. In this court's point of view it was the duty of the captain to advise his officers that they were solely responsible for the safe navigation of the ship when on deck, and not the pilot. The evidence in connection with the frequent changes of courses after 4 p.m. till the ship grounded is conflicting. All seem to lay the responsibility on the pilot, and no attempt was made on the part of the captain to ascertain the strength and direction of the current and the stage of the tide. The fact that the ship floated off without the help of the engines shortly after touching, indicates clearly that the tide was flood, which was the cause of the vessel being brought in shore and out of her course, a matter which was easy to find by referring to the Almanac or sailing directions. If either a cross bearing or a four-point bearing had been taken off Cranberry light, the mishap would have been evaded. The evidence of Boudreau, the helmsman, goes to show that the lights ashore were visible before the course was altered to the southward, and demonstrates conclusively that the vessel was farther in from the position which the report on the log and the testimony of the captain show. When breakers were seen there was no attempt to stop the engines, but they were kept full speed, the course being altered to starboard, but too late. It appears that the moment the ship struck, the order to man the boats was given and performed effectively, and that the mate was the first to go down in one of them, and the second mate in the other, leaving the captain to direct operations.

"After reviewing carefully the evidence given on the above stated facts, the court can arrive at no other conclusion than that the navigation of the lightship Anticosti was performed in a careless way, utter disregard to the most elementary procedure of coast navigation being evident on the part of the captain and the first officers, and therefore, in view of which, the court, however, wishing to be lenient in view of it being a first mishap, suspends Capt. Alfred Couillard's certificate 2607 for three months, from Feb. 9 to May 9, 1909, and severely censures the chief officer, C. Bernier, for not ascertaining the position of the vessel when he came on watch at 4 o'clock. As to the second officer, owing to the fact that he was required to be at the helm at times, the court simply warns him to be careful in future."

Canal Expenditures and Traffic.

The total amount expended upon the Canadian canal systems for the year ended Mar. 31, 1908, by the Department of Railways and Canals, aggregated $3,221,984.73, of which $1,723,156.07 was on capital account, $508,010.19 on income account, $556,902.83 for staff, and $433,915.64 on repairs. These last two items are charged to revenue. There is also $45,155.99 for miscellaneous expenditures common to both the railway and canal branches of the Department. The revenue produced from the canal works amounted to $144,882.13, the amount received from hydraulic rents being $126,873.70. The total revenue derived from canals from July 1, 1867, to Mar. 31, 1908, was $13,763,468.60.

The total traffic through the several canals for the season of navigation of 1907 was 20,543,639 tons, an increase of 10,020,454 over 1907. The number of passengers carried was 279,199, an increase of 22,699.

On Mar. 3, a deputation from the Dominion Marine Association waited on the Ontario Attorney-General, to ask the assistance of the province in procuring an amendment to the Canada Shipping Act, to bring about the inclusion of Ontario in the list of provinces exempt from the compulsory payment of pilotage dues. It is hoped that Ontario will take up the matter and protest against what is claimed to be an unjust discrimination. This matter has previously been represented to the Federal authorities, but without effect.

The Kilkeel-Scotia Collision.

Commander O. G. V. Spain, R.N., Dominion Wreck Commissioner, has given the following judgment respecting the collision which occurred in the Strait of Canso, off Port Mulgrave, April 28, 1908, between the Dominion Government ferry steamer Scotia and the Inverness Railway and Coal Co.'s s.s. Kilkeel:

"The accident was caused by the Scotia striking the port side of the Kilkeel close to the stem. The Scotia was carrying out her ordinary work, running from Port Tupper to Port Mulgrave, as a ferry boat. The Kilkeel was proceeding from Port Hastings to Port Mulgrave, in order to enable her to fill up with water. At the time of the collision the weather was fairly clear, and lights could be seen at considerable distance if a proper lookout had been kept. As a matter of fact, there was no proper lookout man kept on board the Scotia, as the second mate, J. McDonald, who was supposed to be keeping a lookout, was, at the time of the accident, in the after part of the ship. From the evidence adduced, it appears that the red light of the Kilkeel was first seen about three points on the starboard bow of the Scotia some three minutes before the accident. Under these circumstances it was the duty of the Scotia to keep clear of the Kilkeel, and the Master of the Scotia had to use his own judgment, which was the best way to carry this out.

"The court considers that the accident was caused by the Master of the Scotia using bad judgment in not reversing his engines soon enough. He apparently had time to carry out this manœuvre before he considered it proper to do so. Captain L. R. Maguire, of the Scotia, who holds a Master's certificate of competency in the inland waters, is censured and warned to be more careful in future. The court takes this lenient view of the accident for the reason that the fact of the Scotia being an unwieldy vessel to manœuvre, is thoroughly appreciated, but the two vessels were crossing, which is the position of greatest danger, and under those circumstances there was nothing for it but judgment, good lookout and caution. Captain Elworthy, of the Kilkeel, is exonerated, but his attention is called to the fact of there being no communication with his whistle, the cord being disconnected, and the court considers that it is part of a master's duty to attend to details of this description before getting under way. The court, however, does not consider that, in this case, the above fact contributed to the accident."

Vessels Removed from the Register.

The following vessels were removed from the Canadian register during Jan. and Feb., for the reasons assigned: Steam—Calluna, Richibucto, N.B., 15 tons, wrecked; Carlton, Hamilton, Ont., 6 tons, out of existence; Gertrude, Toronto, 51 tons, out of existence; Mascotte, Toronto, 33 tons, out of existence; Telegram, Collingwood, Ont., 134 tons, wrecked; Thistle, Toronto, 68 tons, out of existence; Wiarton Belle, Owen Sound, 59 tons, broken up. Sailing—Acacia, Kingston, Ont., 188 tons, foundered; Atalaya, Lunenburg, N.S., 79 tons, transferred to Newfoundland; Bee, Chatham, N.B., 11 tons, broken up; Bessie A., Parrsboro, N.S., 96 tons, wrecked; Bonnie Lin, Barrington, N.S., 10 tons, foundered; Carrie L. Smith, St. John, N.B., 600 tons, wrecked; Carrie May, Yarmouth, N.S., 25 tons, broken up; Eliza M., Chatham, N.B., 18 tons, broken up; France and Russie, Charlottetown, P.E.I., 27 tons, broken up; Freddie G., Digby, N.S., 18 tons, broken up; Hornet, Windsor, N.S., 26 tons, wrecked; Idle Wild, Kingston, Ont., 19 tons, broken up; Lark, Barrington, N.S., 13 tons, condemned; Lolita A., Liverpool, N.S., 159 tons, abandoned at sea; Maggie Smith, Port Hawkesbury, N.S., 83 tons, wrecked; Monkland, Chatham, N.B., broken up; Murdock Finlayson, Arichat, N.S., 80 tons, wrecked; Osberga, Maitland, N.S., 1,116 tons, foundered; Prudent, St. John, N.B., 117 tons, wrecked; Regina B., Port Hawkesbury, N.S., 81 tons, sunk in collision; Robert S. Besnard, Parrsboro, N.S., 1,142 tons, sold to foreigners; Savona, Maitland, N.S., 1,584 tons, stranded; Sea Gull, Maitland, N.S., 25 tons, broken up; Strathisla, Maitland, N.S., 1,280 tons, sold to foreigners; Willie M., Barrington, N.S., 24 tons, wrecked; Wood Bros., Parrsboro, N.S., 68 tons, wrecked.

Among the Express Companies.

L. R. Hight has been appointed Agent Canadian Northern Ex. Co., vice H. E. Baker, resigned.

The Board of Railway Commissioners issued order 6366, Feb. 22, on the application of the Dominion and Canadian Ex. companies, postponing from Mar. 1 to May 1 the effective date of order 6167, Feb. 4, ordering express companies subject to the Board's jurisdiction to carry acetylene gas under certain rules and regulations therein quoted.

Five express companies doing business in Ontario paid by way of taxation into the provincial treasury, $6,375 during the financial year ended Dec. 31, 1908. The amount paid by the several companies is shown by the public accounts just presented to the Legislature to have been: American Ex. Co., $925; Canadian Ex. Co., $1,800; Canadian Northern Ex. Co., $925; Dominion Ex. Co., $1,925; United States Ex. Co., $800.

Telegraph and Cable Matters.

The annual meeting of the Association of Railway Telegraph Superintendents will be held at Detroit, Mich., June 23, 24 and 25.

The Old Time Telegraphers' and Historical Association will meet this year at Atlantic City, N.J. The date has not yet been fixed.

W. C. Furness, manager G.N.W. Telegraph Co.'s office, London, Ont., who had been confined to his home by illness, was moved to the hospital there recently.

The Northern Commercial Telegraph Co. is reported to have awarded a contract to M. Connolly, Montreal, for the erection of about 1,000 miles of telegraph line from Point Levis, Que., to Windsor, Ont.

An unconfirmed report stated, recently, that wireless telegraph messages have been exchanged between the Marconi stations at Glace Bay, N.S., and the Eiffel Tower, Paris, France, thus creating a new record.

The Ontario Government collected $1,292.24 from telegraph companies doing business in the province during 1908, the amount paid being: North American Telegraph Co., $100; Dominion Telegraph Co., $475; Montreal and G.N.W. Telegraph Co., $717.24.

The death was recently announced of M. Laberge, at Chateauguay, Que., aged 68. He was one of the party who, under C. Buckley, Chief Engineer, explored the Yukon Territory in 1865, in connection with the Western Union Telegraph Co.'s proposed telegraph line to Europe, by way of British Columbia, Alaska and Siberia.

Lyman Dwight, who died at Detroit, Mich., Mar. 4, aged 72, was a brother of H. P. Dwight, President G.N.W. Telegraph Co., Toronto. He was a telegraph operator in Toronto over 50 years ago, and was transferred to Buffalo, N.Y., where he had charge of the Montreal Telegraph Co.'s office until 1868, being, subsequently, moved to Detroit, Mich., in a similar capacity, where he remained until his retirement from active work a few years ago.

John Murray, one of the veteran telegraphers of Canada, died at Montreal, Mar. 9, aged 72, after a long illness. He came to Canada in 1854, and was responsible for the erection of the first telephone lines in Montreal in 1879, this being the first circuit to be operated in

THE DRAKE & WIERS CO. = CLEVELAND, O.

the Dominion. He was at one time manager of the old City and District Telegraph Co., Montreal. One of his sons, R. Murray, is assistant to J. Kent, manager C.P.R. Telegraphs.

The Minister of Marine and Fisheries stated in the House of Commons recently, that the U.S. Government asked permission to lay a cable through Hecate strait and Dixon channel—Canadian waters—and that the permission had been granted. This cable duplicated a part of the outside cable already established between Seattle and Alaska. No request had been made for permission to lay a cable between Vancouver Island and the mainland.

G. Burnett, who died at Buffalo, N.Y., Mar. 4, aged 71, was employed as a telegraph operator in Toronto in 1857, and was subsequently engaged as an operator in the Western States. He succeeded L. Dwight, whose death on the same day is mentioned elsewhere, in charge of the old Montreal Telegraph Co.'s office at Buffalo, N.Y., in 1868,

and retained that position until his death. At the time of the war he joined the U.S. Military Telegraph Corps, but returned to the north before the war closed.

Owing to the illness of P. W. Snider, C.P.R. Telegraph Superintendent, St. John, N.B., which has since resulted fatally, F. G. Mahon, Inspector of the Eastern Division, Montreal, was recently temporarily appointed in his place; and the following temporary appointments were made as a consequence: F. N. Caisse, head of the Montreal office, to be Inspector there; J. Mitchell, head of the night service, to be head of the Montreal office; A. M. Bennie to be head of the night service, and A. E. Jarvis to be head of the traffic department, assisted by J. Fortier.

The Newfoundland Premier recently announced that his Government had agreed upon a contract with the Commercial Cable Co., for the extension of one of its cables into the colony and thence to New York, to be completed by Aug. 1. The President of the company, when questioned on the subject, said that the company had agreed to cut one of its cables at Flemish Cap, about 300 miles east of Newfoundland, and attach to the European end a new cable extending to St. John's, Nfld., and thence to New York. He claimed that this was the ideal route for a European-U.S. cable, as it divided the distance between Ireland and New York more equally than any other route. This work would have been undertaken before, but that the Anglo-American Telegraph Co. had the sole landing right in Newfoundland. This right, which was for 50 years, has just expired. The new cable to be laid will be about 1,700 miles, the section to be put out of operation between Flemish Cap and Canso, N.S., being about 900 miles, which will be recovered if possible, and utilized elsewhere.

The board of conciliation, consisting of Judge McGibbon, Chairman; J. F. MacKay, for the company, and J. G. O'Donoghue for the men, which has been enquiring into the complaints of the M. C. Rd. telegraph operators against the Great North Western Telegraph Co., concluded its sittings recently. The operators claimed that up to Sept. 12, 1907, they had been in receipt of certain commissions from the G.N.W. Co. for work done, and this had been discontinued without notice. The Industrial Disputes Investigation Act provides that 30 days' notice is required of such alteration, and until that notice the relation of employer and employe shall continue. Notice of discontinuance of the payment by the Telegraph Co. was given Sept. 12, 1907, to date from Sept. 1 of the same year. The company claimed that the notice severed the relations between it and the operators, after which the M.C. Rd. was compelled to furnish operators for the work, and if anyone was liable, the M. C. Rd. was. The board found that as the Telegraph Co. admitted the operators were employed by it to Sept. 12, 1907, it was liable for the difference between the amount of the commissions received on the 10% basis from the M.C. Rd. from Sept., 1907, to Nov., 1908, and for what should have been received on the old basis, and for all commissions from Nov., 1908, to the present time.

Grand Trunk Pacific Ry. Telegraphs.

The G.T.P.R. Telegraph Department during 1908 erected and completed pole lines carrying two wires from Winnipeg, Man., to Battle River, Sask., 675 miles, and from Fort William West, Ont., to Lake Superior Jct., 200 miles. During the current year, the following work will be undertaken: Erection of one no. 8 galvanized wire and one 210 hard-drawn copper wire, from Winnipeg, Man., to Edmonton, Alta., 800 miles; erection of pole carrying two wires from Battle River, Sask., to Edmonton, Alta., 120 miles, and from Edmonton to Wolf Creek, 123 miles; erection of pole lines and wires from Melville to Yorkton, Sask., 40 miles; from Melville to Regina, Sask., 110 miles; from Wainwright to Calgary, Alta., 175 miles, and from the main line to Brandon, Man., 25 miles.

It is expected that construction of the telegraph line on the National Transcontinental Ry., between Winnipeg and Lake Superior Jct., will be completed in July, when direct communication will be established between Winnipeg, Man., and Fort William, Ont., over National Transcontinental-G.T.P. wires.

The construction of telegraph lines on several sections east of Lake Superior Jct. is proceeding rapidly, and also along several sections in New Brunswick and Quebec.
